J. F. FINLAY,
Secretary to the Government of India.

H 2

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FAMINE.)

REPORTS ON AGRICULTURAL PROSPECTS IN INDIA.

The following papers are published for general information :—

1.—Letter from the Chief Commissioner of Burma, to the Government of India No. 110—1S.-2, dated 8th January, 1897.

2.—Letter from the Government of Bombay, to the Government of India, No. 122 (Famine) of 1897, dated 12th January 1897.

1.—Letter from the Chief Commissioner of Burma, to the Government of India, No. 110—1S.-2, dated 8th January 1897.

I am directed to submit herewith the general report regarding the districts to which the Famine Code has been applied as required by section 51 of the Famine Code. The first four paragraphs give an account of the economic condition of the affected tracts. The rest of the report deals with various matters, such as migration, remission of revenue, etc., which appear to call for notice.

2. The Code has been applied to the whole of the Meiktila district, to the Yamèthin subdivision of the Yamèthin district, and to the Taungtha, Pagan, and Myingyan townships of the Myingyan district. I am to give below a brief description of each district, with a brief history of it from an agricultural and statistical point of view for the last eight years.

3. *Myingyan.*—The Myingyan district has a total area of 3,737 square miles with a population, as ascertained at the 1891 census, of 351,411. It is situated on the east bank of the Irrawaddy river between latitude 20° N. and 22° N. The district consists generally of undulating country, the only mountain being Popa. The uncultivated portion of the district consists of stony uplands with poor laterite soil. There are no forests in the district and no perennial streams.

The statement given below shows the rainfall during the period 1888 to 1896 :—

January to May.	June to September.	October to December.	Total.	Year.
3·81	17·08	4·83	25·72	1888
·87	23 76	3·47	28·10	1889
5·68	9·99	4·45	20·12	1890
1·34	13·22	6·59	21·15	1891
3·27	15·15	4·69	23·11	1892
4·30	18 00	9·01	31·31	1893
8·19	13·76	5·17	27·12	1894
6·03	10·38	3·10	19·51	1895
1·55	17·60	3 68*	22·83	1896

*Up to 26th December.

Practically the whole district depends on rainfall for its crops, and in the "Analysis of districts with reference to security against famine" 183 villages

with a gross area of 934 square miles are classed as secure in ordinary years, while 688 villages with a gross area of 2,803 square miles are classed as insecure.

The crops principally grown are, on the lowlands paddy, and on the uplands cotton, sessamum, jowar, maize, and bajra. Along the river-bank there is a considerable area of land which is usually flooded; this produces in favourable years excellent crops of rice, peas, sessamum, and gram. The district is noted for its cotton, and there are a large number of cotton-ginning factories owned by Burmese and Chinese, at which considerable numbers of women are employed. The district is excellently situated for receiving food-supplies as the steamers of the Irrawaddy Flotilla Company call at Myingyan almost daily, and all parts of it are traversed by cart tracks which communicate with the railway at Meiktila.

The statements given below show—

(i) the area under each of the principal crops;

(ii) the collections on account of *thathameda*;

(iii) the collections on account of State land rent during each of the years 1888-89 to 1895-96:—

Year.	Rice.	Jowar.	Bajra.	Maize.	Sessamum.	Cotton.	Others.	Total area.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1888-89 . .	58,803	...	...	...	36,543	52,592	294,869	442,807
1889-90 . .	60,003	...	...	...	37,043	74,085	278,321	449,452
1890-91 . .	48,772	...	...	...	61,954	75,840	153,559	340,134
1891-92 . .	36,776	158,143	57,369	63,897	42,933	28,233	60,943	454,294
1892-33 . .	70,797	121,260	20,344	20,908	14,631	48,531	153,735	450,206
1893-94 . .	70,000	150,000	10,000	15,000	68,000	48,000	39,000	400,000
1894-95 . .	70,000	150,000	10,000	15,000	68,000	43,000	101,500	462,500
1895-96 . .	68,371	130,000	6,330	14,000	53,000	44,000	90,400	406,101
Total .	483,522	709,403	104,043	128,805	382,104	419,293	1,178,327	3,405,494

With regard to these figures it is necessary to observe that they can only be taken as roughly approximate as the district has not yet been cadastrally surveyed and there is no Land Records agency. The only areas which are known with fair accuracy are those of the islands and alluvial lands which are measured annually.

Actual collections on account of the thathameldaand *State land rent.*

Year.	*Thathameda*	State land rent.
	R	*R*
1888-89	2,86,845	20,938
1889-90	3,60,413	43,226
1890-91	4,27,172	13,035
1891-92	2,89,656	17,720
1892-93	4 67,044	33,529
1893-94	5,31,354	41,871
1894-95	5 86,228	42,177
1895-96	5,05,012	35,964

To elucidate the above statements a brief description of the character of the season and the results of the harvest is given below :—

1888-89.—The harvest was above the average, but there was great loss of cattle from disease.

1889-90.—The rainfall in Pagan was below the average; in the rest of the district it was above the average and the crops varied accordingly. In this year too there was heavy loss of cattle from disease and the number left in the district was reported to be insufficient for ploughing purposes in four townships. Agricultural advances to the extent of R2,350 were made.

1890-91.—The rainfall was short and untimely and the harvest as a consequence was poor. The stock of food-grain raised being insufficient for the wants of the population, large amounts were imported from Lower Burma.

1891-92.—An unfavourable season; paddy crops failed; millets produced a poor crop, but sessamum and cotton also failed and relief works had to be opened. The district was fortunately free from cattle disease. Agricultural advances amounting to R18,216 were made.

1892-93.—The harvest was on the whole fairly good, but there was some shortage in Pagan and Kyaukpadaung.

1893-94.—Crops were good, except in the north-east of the district, where the rain was too late for paddy. Agricultural advances to the amount of R4,000 were made.

1894-95.—The paddy crop was above the average, and jowar, peas, and gram were good, while cotton yielded an excellent crop.

1895-96.—The rain was insufficient and untimely and crops were much below the average. The people were enabled to tide over the period of scarcity without relief works by drawing on their savings. Some cattle were exported, but these were probably only surplus stock. Rupees 9,296 were given as agricultural advances.

1896-97.—The season of 1896-97 has been most unfavourable. Briefly it may be said that there has been entire and widespread failure of crops of all kinds, the only crop which will be gathered being a very scanty one of jowar. If the late crops of paddy, jowar, and sessamum had been fairly successful, it might have been possible to close relief works about the end of this year, but the failure of these crops will render the continuance of relief works necessary till the 1897 crops are gathered, *i.e.*, about the end of August 1897 at the earliest. The latest reports show that parts of Kyaukpadaung and a few villages of Natogyi may have to be brought under the Famine Code. The only parts of the district which are able to dispense with relief are the greater part of Natogyi and Salè, the inhabitants of the latter township finding ample employment in the Magwe oil-fields.

Large numbers of plough-cattle have been taken away to Lower Burma for sale, but fodder is reported to be insufficient except in the Myingyan and Natogyi townships.

The only food stocks available in the district are peas, the price of which has risen largely. There is, however, no difficulty in obtaining rice so long as there is money to buy it. The present price of rice (imported) is 9 seers 12 chittacks per rupee.

4. *Meiktila.*—The Meiktila district is situated to the east of the Myingyan district, and is bounded on the north by the Kyauksè district, on the east by the Shan States, and on the south by the Yamèthin district. The area of the district is 3,000 square miles and the population at the 1891 census was 206,650. The Famine Code has been formally applied to the whole of the district, but the area on the east adjoining the Shan States consists of about 400 square miles of mountain land with small and scattered villages dependent on hill cultivation and is not really affected by the scarcity. The forests in the east contain *ingyin*, *pyinma*, *pyinkado*, *thitya*, *pyin*, and teak. There are other hills in the district covered with stunted timber of no value, and there is a considerable area of undulating land with soil unfit for cultivation covered with scrub jungle and stunted cutch. The cutch tree, which was formerly very plentiful, has been exhausted by over-

working. The prevailing soil of the district is a sandy loam on the uplands with black soil in the bottoms. There are no perennial streams, but several streams, of which the principal are the Shanmangè, Thamru, Samru, and Chaunggauk, are used for irrigation purposes, the water being diverted by means of weirs. The Meiktila and Minhla lakes are also used for irrigation, the area irrigated from the former being very considerable. The principal difference between the Meiktila and Myingyan districts as regards agriculture is the existence in the former of considerable irrigation works, otherwise the districts are of very similar character, except that Meiktila has no alluvial or island cultivation.

The district is traversed from north to south by the Rangoon Mandalay railway, and there is a branch from Thazi on that railway to Meiktila, the district head-quarters. Food supplies can be brought to all parts by the railway and by the roads and cart-tracks which communicate with the railway.

The statement given below shows the rainfall during each of the years 1888—1896 :—

Year.	January to May.	June to September.	October to December.	Total.
	Inches.	Inches.	Inches.	Inches.
1888	1·84	28·10	6 61	36·55
1889	1 04	25·95	5 35	32·34
1890	9 89	14·22	5·11	29·22
1891	2 30	14·31	7·10	23·71
1892	11·57	17·81	3 04	32·42
1893	5 83	15·98	14·98	36·79
1894	3·11	19·30	7·27	29·68
1895	9·01	18·04	8·09	35·14
1896	1·49	25·29	*1·48	28·26

* Up to 26th December.

It will be seen from this statement that the rainfall in Meiktila is as a rule more abundant than that in Myingyan.

The crops principally grown are very much the same as in Myingyan, namely, rice, jowar, sessamum, and cotton. In years of good rainfall rice is largely grown, and in years of scanty rainfall its place is taken by jowar and sessamum on the same land. In Meiktila there are practically no spring crops, while in Myingyan there are along the river considerable areas of alluvial land sown with peas and maize and other island crops which take the place of spring crops. The statement given below shows the area under each crop for the years 1888-89 to 1895-96 :—

Year.	Rice.	Jowar.	Bajra.	Maize.	Sessamum.	Cotton.	Others.	Total.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1888-89	34,530	...	...	...	4,220	8,242	9,617	56,609
1889-90	106,988	...	...	...	83,374	25,862	69,077	285,301
1890-91	146,276	...	...	...	2,985	...	36,039	185,300
1891-92	28,495	21,433	136	9,847	28,899	44,290	5,678	138,778
1892-93	34,560	51 840	200	1,728	38,016	24,198	22,258	172,800
1893-94	56,875	53 184	3,281	4,870	45,680	24,250	23,460	211,900
1894-95	91,895	46,603	4,047	1,278	31,992	28,215	23,539	235,569
1895-96	70,968	33,227	3,326	1,247	24,223	35,724	12,318	181,033

The Meiktila district has been cadastrally surveyed, but it has not been settled, and there is only a small Land Records staff for the assessment of water-rate and the rent on State lands which are not very extensive, so that the same remarks apply to the areas given above as were made respecting the corresponding figures for Myingyan.

The statement given below shows the area irrigated during each of the last four years :—

	Acres.
1892-93	30,589
1893-94	58,220
1894-95	51,747
1895-96	38,038

These figures may be considered to be fairly accurate as nearly all the irrigated land pays water-rate which is assessed by a special staff on the basis of the cadastral maps. It will be seen that about 75 per cent. of the crops in the district are entirely dependent on rainfall, which is very capricious. In the Analysis of districts with reference to security against famine 96 villages with a gross area of 200 square miles are classed as secure in ordinary years and 965 villages with an area of 2,800 square miles are classed as insecure.

The statement below shows the collections on account of *thathameda* and State land rent during each of the last eight years :—

	Thathameda.	State land rent.
	₹	₹
1888-89	2,73,336	6,986
1889-90	3,01,633	12,202
1890-91	3,08,657	10,382
1891-92	1,05,731	22,565
1892-93	1,41,345	11,184
1893-94	3,30,571	18,458
1894-95	3,49,451	24,015
1895-96	2,52,150	24,745

Below is given a brief retrospect of the agricultural conditions of the years 1888-89—1896-97 :—

1888-89.—The harvest was good and no food-grain was imported. Agricultural advances to the amount of ₹500 were made and recovered during the year.

1889-90.—The rainfall and harvest were below the average. The cattle of the district were attacked by disease, but as Meiktila is a cattle-breeding district with a large surplus stock in ordinary years there was no scarcity of plough-cattle.

1890-91.—This was a very bad year: the rainfall was badly distributed, a long interval of drought followed the first early burst, large tracts remained uncultivated, and the food-grain raised was quite insufficient for the needs of the district. The district was practically free from cattle-disease.

1891-92.—This was another very unfavourable season: the early crops failed entirely, large immigration to Lower Burma took place, and relief works had to be opened. Large numbers of cattle were sold and some land. Liberal advances amounting to ₹1,10,282 saved the rest of the cattle. There was no cattle-disease. The *thathameda* rate was reduced one-half.

1892-93.—The paddy and jowar crops were very poor, but the early sessamum was a fair crop; food had to be imported. The *thathameda* rate was reduced and ₹31,821 were given out in agricultural advances.

1893-94.—This was a good year: the paddy and cotton crops were good, but the early sessamum was only a 6-anna crop. There was no cattle-disease.

1894-95.—The paddy crop was above the average, sessamum was a moderate crop, jowar varied considerably in outturn, and cotton was damaged by the late rains, but on the whole this was a distinctly good year. The district was free from cattle-disease and Rs. 67,136 were recovered on account of outstanding agricultural advances.

1895-96.—This was a bad year: the paddy crop was only an 8-anna one; sessamum was very poor, cotton was poor, and jowar was poor. Severe scarcity would have prevailed but for the good harvest yielded by irrigated land and the good harvests of the two preceding years. The people were able to support themselves without recourse to Government relief by sales of cattle and by drawing on their accumulated savings.

1896-97.—There has been a general failure of crops during the current year. The affected area is estimated by the Deputy Commissioner to be 1,200 square miles, or ¾ of the plain portion of the district. The condition of affairs

in this area is that the sessamum crop has failed, cotton was very poor, the yield of jowar will be very short indeed, and paddy, where it is best, will not exceed a 4-anna crop. There are no reserve food-stocks and the district has nothing to look forward to till the early crops are gathered about September 1897. There are practically no cold-weather crops grown in the district, and the little hot-weather paddy (*mayin*) which is grown is insignificant in amount and will not materially affect the situation. The price of rice last reported is 7 seers and 2 chittacks per rupee, but as the stock of last year's rice is becoming exhausted and the new rice is coming into the market, it is probable that the price will fall. A fall in the price of rice will lessen the expenditure on relief works, but will have no effect on the number of relief workers, as they have no means of purchasing rice, whatever its price may be.

5. *Yamèthin.*—The portion of the present Yamèthin district with which this report deals is the Yamèthin subdivision, as the Pyinmana subdivision has a good harvest and is free from scarcity. The Yamèthin subdivision was until October 1893 a separate district. The subdivision is bounded on the north by the Meiktila district, on the west by the Magwe district (Pegu Yomas), and on the east by the Shan Hills. The total area of the district is 2,000 square miles, of which 150 square miles on the west and 1,600 square miles on the east are covered with hills and jungle. The population of the subdivision in 1891 was 160,662. Between the two ranges of hills which form the eastern and western boundaries there is a large plain diversified by slight elevations and watered by small streams. On the east there are productive forests containing teak and *pyinkado* and on the west are cutch forests which, however, have been exhausted by overworking and are now closed. The soil of the district varies, being clayey in some places and sandy in others. There are several large tanks or lakes in the subdivision, the principal of which are the Nyaungyan, Kyauksè, Kyein, and Inbaung, all of which are used for irrigation. The subdivision is traversed from north to south by the Mandalay-Rangoon railway, while numerous roads and cart-tracks afford easy means of bringing food-supplies to all parts. This subdivision differs from the Meiktila and Myingyan districts inasmuch as paddy cultivation largely predominates, forming about 80 per cent. of the whole. The statement given below shows the area under each crop in each of the years 1888-89 to 1895-96 :—

	Rice.	Jowar.	Bajra.	Maize.	Sessamum.	Cotton.	Others.	Total.
	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.	Acres.
1888-89 .	70,137	...	...	...	5,089	1,002	20,831	97,059
1889-90 .	87,313	...	...	...	5,215	792	15,257	108,607
1890-91 .	119,196	...	...	...	29,032	27,285	42,714	219,330
1891-92 .	96,588	4,276	1,090	3,700	8,148	549	13,325	127,506
1892-93 .	101,299	9,196	1,518	5,070	9,082	430	16,376	142,887
1893-94 .	113,790	4,300	2,000	3,200	6,132	480	9,941	142,849
1894-95 .	126,726	4,300	2,000	3,000	8,000	450	9,882	152,358
1895-96 .	110,551	3,500	2,000	2,000	6,000	450	9,832	140,333

The areas are approximate as in the case of Meiktila and Myingyan.

The statement given below shows the rainfall during each of the years 1888 to 1896 :—

	January to May.	June to September.	October to December.	Total.
1888	2·24	26·54	3·66	32·44
1889	2·89	28·36	8·93	40·18
1890	11·16	18·87	3·66	33·69
1891	1·21	18·88	11·32	31·41
1892	9·36	20·56	3·56	33·48
1893	10·19	16·65	15·26	42·10
1894	3·86	31·70	6·76	42·32
1895	9·71	17·56	6·73	34·00
1896	1·56	15·66	1·91*	19·13

* Up to 26th December.

The areas irrigated in 1891-92 and 1892-93 were 44,674 acres and 48,294 acres respectively. Figures for succeeding years are not available for Yamethin subdivision separately. The rainfall in this district is heavier than in Meiktila or Myingyan, and a considerable area is irrigated, but it is necessary to remark that, if the rainfall fails, the irrigation works also fail to a large extent as they consist of tanks fed by streams which themselves depend on local rainfall. The district is in reality more insecure than either Meiktila or Myingyan as it depends almost entirely on the paddy crop. Frequently rainfall which is sufficient for one or more of the various crops grown in Meiktila or Myingyan is quite insufficient for the paddy crop in Yamèthin. The cultivators too in this district do not attempt to grow other crops on their paddy-land as is done in Meiktila and, if they are unable to show paddy or if their crop fails, they get nothing. In the "Analysis of districts with reference to security against famine" 45 villages in this subdivision are shown as quite secure and the rest (800) as secure in ordinary years. This is no doubt wrong. The whole subdivision ought, probably, considering the extreme uncertainty of the rainfall, to be classed as insecure.

The statement below shows the annual collections on account of *thathameda* and State land rent for the years 1888-89 to 1895-96. The figures from 1893-94 onwards include the figures relating to Pyinmana subdivision, as separate figures for Yamèthin subdivision are not available.

	Thathameda. ₹	State land rent. ₹
1888-89	2,18,189	15,522
1889-90	2,23,688	9,017
1890-91	2,91,883	14,004
1891-92	1,30,653	7,627
1892-93	1,58,651	5,519
1893-94	3,48,165	30,135
1894-95	3,08,885	33,851
1895-96	2,93,412	28,034

A brief agricultural history of the subdivision from 1888-89 to 1896-97 is given below :—

1888-89.—The harvest was well up to the average and paddy was exported in considerable quantities. There was, however, great loss of cattle from disease Rupees 17,469 were given out in agricultural advances, but the loans were recovered within the year.

1889-90.—The rainfall was unfavourable and the harvest poor.

1890-91.—The crops were bad, but rather better than in Meiktila; the district was free from cattle-disease. Rupees 19,630 were advanced and ₹11,790 re-paid during the year.

1891-92.—A very unfavourable season, the crops failed entirely, and there was considerable distress; *thathameda* assessments were reduced one-half Rupees 88,683 were given out in agricultural advances. Relief works were opened and kept open till July 1892.

1892-93.—The crops in Pyawbwé township failed entirely and there was some distress. *Thathameda* was not levied in 73 villages and reduced rates were generally applied. Rupees 22,726 were given out in agricultural advances.

1893-94.—A bumper harvest. Rupees 1,06,400 were advanced to agriculturists.

1894-95.—The paddy crop was above the average. Sessamum was a moderate crop. Recoveries to the amount of ₹87,226 on account of outstanding agricultural advances were made during the year.

1895-96.—Paddy was extensively sown owing to early rains, but the crops failed generally, except in the irrigated tracts, owing to drought, and the harvest was generally poor. Cultivators who had reserve stocks lived on them and many others were compelled to migrate. A large number of cattle were exported. Rupees 36,871 were recovered on account of agricultural advances.

1896-97.—During the current year there has been a total failure of crops in the subdivision except in a small area in the south-east corner where crops on irrigated lands are good, but this area is but a small fraction of the whole and

the crop in it does not affect the general situation. The price of rice is 8 seers and 5 chittacks per rupee.

6. *Migration.*—The Burmese are naturally a migratory people and large numbers come down annually from Upper Burma in November and December to reap the Lower Burma harvest. During the current year this movement of the population has assumed very large proportions, particularly from the famine-stricken tracts. Early in December it was estimated that 4,000 families had left the Myingyan district, and emigration is reported to have continued steadily since then. In the Yamèthin subdivision many villages are reported to be entirely deserted. From this subdivision large numbers have found employment in the adjoining subdivision of Pyinmana, where the season has been favourable. From Meiktila also large numbers have emigrated. The emigrants come down to the lower province by all means of conveyance—railway, on which half-fares are granted, river steamers, boats, rafts, and road.

7. *Remissions of revenue.*—As appears from the statements given in an earlier part of this report, the great bulk of the revenue of the famine tracts consists of *thathameda*. The districts being almost entirely agricultural, the failure of crops has rendered large remissions of *thathameda* necessary. The rate at which this tax is levied in ordinary seasons is, with few exceptions, R10 a household. During the present year it has been found necessary to remit the tax entirely over considerable portions of the famine area and to a large extent over other portions where crops have not entirely failed. The need for remissions has been rendered greater by the circumstance that the season of 1895-96 was very unfavourable, and that the savings of the people, which if the season had been favourable would have helped to support them in 1896-97, were in great measure exhausted. In the Meiktila district 245 villages have been entirely exempted from *thathameda*, while in the remaining 819 villages rates have, with 13 exceptions, been reduced to from R3 to R6. In the Myingyan district 714 villages have been entirely exempted, in 179 the rate has been reduced to R3, in 202 to from R4 to R6, while in 54 villages only do the rates exceed R6. In the Yamèthin district 491 villages have been entirely exempted from *thathameda*, 165 have been assessed at rates of from R3 to R5, 4 at rates from R6 to R8, and 33 only at the full, or R10, rate.

The following statement, which compares the collections of 1894-95, a normal year, and 1895-96, a bad year, with the estimated collections of 1896-97, indicates as accurately as is at present possible the loss of revenue which the scarcity will cause in the affected districts:—

District.	Collections of *thathameda* in		Estimated Collections of *thathameda* in
	1894-95.	1895-96	1896-97.
	R	R	R
Yamèthin	3,68,685	2,93,412	1,21,579
Myingyan	5,80,228	5,05,012	75,237
Meiktila	3,49,451	2,52,150	60,793
Total .	13,04,564	10,50,574	2,57,609

8. *Agricultural advances.*—In the scarcity of 1891-92 large expenditure was incurred in agricultural advances to enable people to buy cattle and seed. Expenditure of this kind has not been found necessary in 1896 because the character of the famine has been different. In 1891 the rains were deficient in the earlier part of the rainy season, and when rain did fall in later months advances for purchase of seed and cattle were made to enable cultivators to make late sowings. During the present year the failure of rain took place in the later months; there were consequently few opportunities of re-sowing crops on the occurrence of late rain, and the need for granting agricultural advances did not arise. In May and June next, when agricultural operations will be resumed, advances will have to be made on a liberal scale to enable the people, who will

be practically without resources, to purchase seed and cattle. It is too early to make a forecast of this expenditure, as it is impossible to foresee the extent to which cattle will be sold during the next few months. The Chief Commissioner believes, however, that advances to the amount of several lakhs will have to be given when the time comes.

9. *Relief works.*—In October last, when scarcity became acute, a few small relief works were opened as test works in the Yamèthin and Meiktila districts. After these works had been open for a short time, it became evident that the area affected by famine was considerable, that the people would need relief for some months at least, and that large numbers of relief-workers would have to be provided for. At the same time there were serious objections to opening works of the kind carried out in 1891 and 1892. Such works consisted of roads, which are not required, and of irrigation works, for the most part the digging of small tanks, which prove useless during times of drought, when they are most wanted. Moreover, the work of organization is more difficult in the case of numerous small works. In view of these considerations, the Chief Commissioner decided to close the small works and to concentrate labour on one large work. The work selected was the construction of the earthwork of the Meiktila-Myingyan Branch Railway, which would, it was hoped, afford work for all needing relief. The Government of India sanctioned the opening of this work, and a Famine Relief Works division was accordingly constituted under an Executive Engineer, who is subordinated to the Superintending Engineer, Irrigation Circle. The work of marking out the line was begun at both ends under the supervision of Railway Engineers, while the earthwork was in charge of Provincial Engineers. Actual work was begun at Thedaw, near Meiktila, on the 2nd November; near Taungtha, in the Myingyan district, on the 8th; near Myingyan on the 20th; and near Mahlaing in the Meiktila district, on the 26th. No part of the work falls within the Yamèthin district, but relief-workers from the famine area of that district are drafted to the nearest camp at which work is carried on. Relief camps under medical supervision were established at each of these four places; at Mahlaing and Taungtha camp telegraph offices also were opened. The numbers on relief works, which at first were 5,000, rose rapidly, until in the beginning of December they reached 30,000. According to the latest report (for the week ending the 2nd January) the average number employed was 24,727, while the number on gratuitous relief was 5,407.

10. The preceding portion of this report has dealt with the existing situation and with the measures taken hitherto to deal with the famine. It remains to discuss the future course of the scarcity, its probable duration and extent, and the measures which still remain to be taken. As regards the future course of the famine, the facts reported in former portions of this letter show that in the areas to which the Famine Code has been applied the yield of the cold-weather crops of 1896 will be extremely small and no later crops will be reaped till the autumn crops of 1897. In these areas, therefore, it is now practically certain that relief works will have to be maintained until, at the earliest, August and September 1897. During May and June large numbers will return to the fields for ploughing and sowing, and will then again come on the works. If the monsoon of 1897 fails, the scarcity will of course be intensified, but there is little use in basing calculations on this comparatively remote contingency, as, if next monsoon fails, scarcity must prevail over almost the whole of the dry zone. It is not possible at the present time to forecast with any accuracy the numbers which would in that case require relief, or to sketch out a programme of relief operations. In this letter, therefore, it is assumed that the season of 1897 will be normal. As regards districts to which the Famine Code has not been applied, it is yet too early to estimate the extent to which scarcity will prevail during the next few months. Failure of crops has not been confined to the areas to which the Code has been applied. In other parts of the dry zone, however, the failure has not been so complete as in the famine areas, and it has not yet been found necessary to open relief works. The Chief Commissioner fears that the necessity will arise about February or March. He still hopes that if relief is found to be needed in some parts, the numbers needing it will be comparatively few.

11. The future measures to be taken for dealing with the scarcity will consist of the continuation and extension of relief works and the grant of agricultural

advances. The subject of agricultural advances has been dealt with in paragraph 8. As regards relief works, it is estimated that the earthwork of the Meiktila-Myingyan Railway will afford work for 24,000 persons for 33 weeks. In addition to this work, sanction has been asked* to the commencement of collection of stone-ballast, which is found in large quantities near the line of railway. The collection of ballast will afford employment for the more able-bodied among the men, while those of feebler physique, with women and children, will continue to be employed on earthwork. This arrangement will facilitate concentration and will render it unnecessary to move camps at short intervals of time. The actual quarrying of stone and breaking it into ballast will, it is proposed, be carried out as a famine work on famine relief principles. The carriage of the ballast from the quarries to the line cannot, however, be arranged for in this way. For this part of the work carts will be hired at ordinary rates. This arrangement will afford employment to cartmen, who would otherwise be compelled to sell their cattle at a heavy loss. It is estimated that the collection and breaking of ballast will employ 24,000 relief-workers for about six weeks. The earthwork and the collection of ballast together will afford employment to 24,000 for 39 weeks. The length of time for which these works will, as a matter of fact, afford employment depends of course on the number of persons coming on the works Assuming that during November an average of 10,000 a week were employed, and during December an average of 30,000, the works will, from the beginning of January, provide for 30,000 workers a week for 25 weeks, *i.e.*, till the last week in June. It is very difficult to form a forecast of the numbers which will actually come on the works. During November and December emigration to Lower Burma has been going on. With the completion of the rice harvest in the lower province it is probable that many emigrants will return. But it is impossible to calculate with any approach to accuracy how many will return, or how many of those who return will come on relief works. One effect of the abnormal emigration which has lately taken place has been to largely reduce wages of labour in Lower Burma. The cost of producing the Lower Burmā rice-crop has consequently been reduced, and unless prices in the Rangoon market are lower than usual—a contingency which there are no grounds for anticipating—the profits of the Lower Burma cultivator will be unusually high. He will have more money to spend, and Upper Burma emigrants may thus find employment in Lower Burma in considerable numbers during the dry weather. Again, it would be unsafe to asssume that all or even most of the Upper Burmans who return from Lower Burma will come on relief works. Such earnings as they will bring back with them may enable many to dispense with relief, while others may find employment in other parts of the province. In considering this question, the migratory character of the Burman must always be borne in mind. Allowance must also be made for the diminution in the number of relief-workers which may be expected to take place when the monsoon of 1897 breaks. If the season promises favourably money-lenders will no doubt make advances on the security of the future crop, and large numbers will be able to support themselves out of these advances or from wages paid out of these advances. On the whole, the Chief Commissioner doubts whether the numbers coming on relief works will on the average be very much larger during the first eight months of 1897 than they have been during December 1896. An average of 40,000 a week is the highest estimate which he is prepared to make. On this estimate the Meiktila-Myingyan Railway will provide work till the middle of May. The further works which it is proposed to open hereafter, as necessity occurs, are the Mandalay canal scheme, the project for which has been sanctioned by the Government of India, and the Môn river canal scheme, for which sanction is being asked in the Public Works Department. The Sagaing-Alon branch railway is another work which may be undertaken if required. The survey is finished and the plans and estimates will shortly be submitted. All these works are large works, suitable for famine relief and capable of affording employment to large numbers of relief-workers in the affected areas. Another large work which can be undertaken is the Kanna tank on the borders of the Myingyan and Kyauksè districts.

* Letter No. 12563, dated 15th December 1896, to the Secretary to the Government of India, Public Works Department.

12. In conclusion, I am to submit the following remarks on the subject of the expenditure likely to be incurred during the remainder of the famine. The

estimate must necessarily be vague as the main factors on which it depends, namely, the numbers who will come on relief works and the future price of food-grains, cannot be determined with accuracy. The expenditure will be of two kinds, namely, expenditure on relief works and expenditure on other purposes, such as gratuitous relief. As it has been decided to utilize for relief purposes large works under the control of the Public Works Department, the expenditure under the first head will be almost entirely in the Public Works Department. In a recent letter* to the Secretary to the Government of India, in the Public Works Department, the Chief Commissioner estimated that a sum of ten lakhs in all would be required, counting from the beginning of the famine. This estimate was based on the assumption that relief works would be closed when the rains began. A consideration of the latest district reports, however, has led the Chief Commissioner to the conclusion, expressed in an earlier part of this letter, that works will have to be kept open till September. On this assumption the total amount expended in the Public Works Department will, the Chief Commissioner thinks, reach the sum of 12 lakhs before the famine ends. Of this amount R1,90,000, in round numbers, have been expended, leaving R10,10,000 still to be spent. In the Civil Department there may be a small expenditure on local and test works. Rupees 20,000 will, the Chief Commissioner thinks, cover this. In addition to expenditure on relief works money will be spent on the following purposes:—

* No 12405, dated 11th December 1896.

(*a*) Employment of additional Civil Officers.
(*b*) Relief of dependents at works.
(*c*) Gratuitous relief afforded to persons at their homes.

The expenditure anticipated on these purposes is—

	R
(*a*)	20,000
(*b*)	17,000
(*c*)	33,000

The following statement exhibits the total expenditure which will, the Chief Commissioner believes, be incurred from the present date until the famine ends:—

Head of expenditure	Amount.
	R
(1) Public works by Public Works Officers	10,10,000
(2) Public works by Civil Officers	20,000
(3) Employment of additional Civil Officers	20,000
(4) Relief of dependents at works, section 106 of Burma Famine Code	17,000
(5) Gratuitous relief afforded to persons at their homes	33,000
TOTAL	11,00,000

2.—Letter from the Government of Bombay, to the Government of India, No. 122 (Famine) of 1897, dated 12th January 1897.

In accordance with No. 10 of the rules circulated with the Resolution of the Government of India, No. 5—48, dated 2nd March 1892, and section 26 of the Bombay Famine Relief Code, I am directed to submit a report on the scarcity prevailing in parts of this Presidency. In the circumstances stated below it has been found difficult to obtain materials for a complete account of the situation at any time, and there has consequently been delay in the submission of this report, for which I am to express regret. The rain which fell towards the end of November materially altered the outlook and rendered comparatively useless the estimates before received. It was very partial and irregular, as will be shown below, and it was consequently not easy to gauge the general effect of it. There has again been rain in the last week of December in most of the affected districts, but it also has been very irregular and for the most part scanty and it cannot yet be stated with any exactness how far rabi crops will be saved by it. In some other respects the materials for a complete report are still defective, but His Excellency the Governor in Council does not consider it desirable to defer further the submission to the Government of India in a compact form of such information as is available. The summaries which have been prepared every week since relief works were opened have shown in detail all occurrences affecting the condition of the people and the extent to which it has been necessary to provide relief. Copies of these statements are appended for ready reference.

2. The area at present actually affected lies within the Deccan and Southern Maratha Country districts of this Presidency, *viz.*, Sholápur, Ahmednagar, Poona, Sátára, Násik, Khándesh Bijápur, Belgaum, and Dharwár. The probable extent of liability to famine and the normal economic condition of these districts are shown in the following extracts from the Bombay Statistical Atlas:—

"Sholápur.

The whole district is excessively liable to famine. The area protected by canal irrigation is estimated at under 100 square miles. The cause of famine is failure or unseasonableness of the rainfall. The population is nearly purely agricultural. Weaving is the only important industry, but it is altogether dependent on the prosperity of agriculture. Important trade centres are few. The precarious rainfall of the whole district except Bársi places the population in an inferior condition to that of other Deccan districts, and in so far as the season is more untrustworthy the cultivators are in proportion more hindered from enterprise and regular rotation tillage than their Deccan neighbours."

"Ahmednagar.

The whole district except the Dángs is liable to famine. The central belt including Jámkhed enjoys a greater immunity than the tálukás of the Godávari and Bhima valleys. The causes of famine are irregular and uncertain rainfall and deficient water supply. The large town of Ahmednagar with Bhingar contains many artizans and traders. The bulk of the population is agricultural. Weavers are numerous except in Akola, Nevása, and Sangamner. The industry is rather in the hands of classes who are not hereditary weavers, but agriculturists drawn from husbandry by the superior profits of the hand-looms. The husbandmen of Jámkhed, who have unusual facilities for grazing, are considerable dairy farmers. With the exception of these and the market gardeners the cultivating classes are poor and depressed. They are ignorant and improvident and suffer greatly from scanty rainfall and from pressure of money-lenders. The poorer husbandmen go in slack seasons to Bombay to work as labourers and carriers. Others add to their profits from tillage by carting grain, cotton and oil-seeds."

"Poona.

The area liable to chronic distress from failure of rains is the eastern part, which makes up half the district. The western part of the district is practically free from danger of distress caused by drought. The transition tracts lying between the rugged hilly western belt and the open plains of the east have a partial immunity from distress. The eastern tract has a good soil but is badly supplied with water and is dependent on a capricious rainfall derived chiefly from the late or north-east monsoon. This accounts for its liability to distress. The immunity of the western belt lies in its regular rainfall, and the partial immunity of the transition tracts is due to a better water-supply in wells and water-courses from the hills and a fairly regular rainfall as compared with the eastern plains. The population of the eastern plains is almost purely agricultural, and indeed of the whole district except at trade centres like Poona and Talegaon. The bulk of the cultivating classes are Kunbis and Mális, but numerous other castes cultivate. The rayatwari occupants are fairly off, except in the eastern plains where they are poor and indebted."

"Sátára.

The dry eastern part of the district is the least naturally protected area and next to it comes the transition tract lying between it and the hilly west. The eastern part is liable to failure of rainfall. In the transition tract the rainfall is uncertain but the richness of its soil and its unusual facilities for irrigation from wells and running streams enhances its measure of immunity from the effects of prolonged drought. The total area in the district liable to famine may be taken not to exceed 2,000 square miles. The population is largely agricultural, but an unusual number of people are herdsmen and shepherds. The Kunbi, who is the cultivator of the district, is more conservative and less enterprising than elsewhere in the Deccan. Some of the poorer cultivators and many field labourers and others resort yearly in slack times to Bombay for employment in the cotton mills and at the wharves. In the east the rayats are somewhat wanting in energy and industry. Their soil is poor and their seasons precarious. Few in this tract are clear of debt. The rayat of the rich Krishna Valley has better credit and less necessity for recourse to the money-lender. The number engaged in cart-traffic is particularly large."

"Násik.

The Desh, which includes the tálukás of Málegaon, Nándgaon and Yeola, and the eastern portions of Chándor, Niphád and Sinnar is most liable to distress from seasons of drought, but the degree of liability is not so great as in the districts further east. The Desh tálukás receive the tail-end of the south-west and north-east monsoons, and are thus liable to the accident of the failure of both in the same season. The transition tract, which includes most of Sinnar, Niphád and Chándor and parts of Báglán, Kalvan, Dindori and Násik, enjoys the advantage of irrigation facilities to a greater extent than the western Dángs or the eastern plains. The poorest of the population reside in tracts enjoying the most trustworthy rainfall. The poor Varlis, Kolis and Thákurs of Peint have not the contingency of drought to encounter. The Kunbis and Mális of the Desh and the transition tracts are as a rule the most intelligent and prosperous cultivators of the Deccan. The cultivators are poor and indebted in the tracts less liable to distress. In severe distress representatives from all the manufacturing classes (weavers, Koshtis, Rangáris, etc.) will be found in the ranks of relief labourers as they are mostly in a poor condition."

"Khándesh.

As regards East Khándesh, the degree of liability to famine is very much smaller than in the Deccan. The seasonableness of the rains cannot be depended on and thus from time to time much loss is occasioned. Drought is not the only cause of famine or acute distress. The liability to serious loss from

the floods of the Tápti and its tributaries cannot be overlooked. The railway has introduced cotton presses and ginning factories, which give employment to the people over and above that necessarily made available by the Railway Company. The economic condition of the agricultural population of Jalgaon, Erandol, Sávda and Páchora is above the average, even of Khándesh. The cultivators are well off and live easily in ordinary seasons, possessing fair credit. Elsewhere, except in unhealthy and thinly populated tracts, the condition of the people is decidedly good. In East and South Jámner the villages are small and the people poorer. The labouring population finds abundant employment, and field labour is both costly and difficult to obtain.

"As regards West Khándesh, except in the Tápti Valley, the liability to acute distress is very remote. In the four westernmost tálukas a famine could only be caused by a total failure of rain. At the outside 2,000 square miles out of the 4 remaining tálukas may be said to be practically liable to famine. The degree of liability is less than that of East Khándesh by reason of less liability to damage from floods and failure of rainfall. But it is greater on account of more cramped communications, greater distance from the railway and poorer normal condition of the population. Cultivators are as a rule poor. Without forethought or self-restraint they readily run into debt. Those in Sháháda, in East Nandurbár and to a certain extent in the plains of Taloda and along the rivers in Pimpalner are for the most part well off. The rest would in the event of distress very soon need Government assistance. Shirpur and Dhulia have some well-to-do traders. In the latter town the cotton presses and gin-factories give employment to the labouring classes who are thereby in normal years able to save. The population of Amalner is decidedly better off than that of Dhulia. The people are generally well-to-do. Dhulia, Pimpalner and in a less degree Amalner enjoy a special measure of protection by reason of the dams or bandháras which have been built on the tributaries of the Tápti."

"Bijápur.

The whole of the district is liable to famine. Excepting small portions of Hungund and Muddebihál, where the rainfall is more certain than elsewhere, it may be said that the liability to famine is nearly uniform throughout. The cause of famine is failure or unseasonableness of rainfall or both. There are no facilities for protection by large irrigation works. The population is nearly entirely dependent on agriculture. 76 per cent. are agriculturists and 23 per cent. are engaged in crafts and industries. These are almost entirely weavers, of whom four-fifths are females. The weaving industry, which is common throughout the district, is greatly dependent on agricultural prosperity. As a rule the agriculturists are a steady and orderly people, fairly housed and enjoying all the necessaries of a simple life and sufficient agricultural stock for the management of their holdings."

"Belgaum.

About one-third of the district—the south-west portion—is practically secure from great distress induced by drought, for in that portion the rainfall is certain and a bad season rarely occurs. The tálukas in the north-east, which depend on the north-east rains, are liable to chronic drought. The transition tract, which includes Chikodi and Sampgáon, enjoys a fair immunity, as its rain-supply is chiefly from the south-west monsoon, which can be more trusted than that of the north-east monsoon. The cause of distress is insufficiency of rains. The population is nearly purely agricultural. Weavers of coarse cotton and woollen cloths are fairly numerous, but they may be classed as dependent, indirectly though it be, on agriculture. The degree of indebtedness of the rayatwári occupants holds a position intermediate between that of the holders of Dhárwár and the Deccan. On the one hand the cultivators are partly Lingáyets and Jains, while in Dhárwár they chiefly belong to these industrious, self-dependent and provident classes, but on the other hand the improvident Marátha husbandmen, who form the cultivating classes of the Deccan, are nearly as numerous. The land is not so heavily burdened as in the Deccan, but it is a great deal more encumbered than in Dhárwár."

" Dhárwár.

The Mallád or the hilly portion in the west and south of the district, in which failure of the rainfall is unknown, is practically free from danger of famine. The transition tract lying between the Mallád and the Desh—plain open country in the north-east—is less liable, both in degree and in frequency, to severe distress than the Desh, which is most liable to distress from drought. Distress may be caused either by the insufficiency of the rainfall or its unseasonableness or by both. The population is nearly purely agricultural. The land is held by small rayatwári occupants. The arable land is principally free from encumbrances. The money-lenders are not, as in the Deccan, strangers, but pátils and other watandárs of the district. Well-to-do cultivators are always ready to enlarge their possessions by purchase of land and by mortgage with possession. The condition of the rayatwári occupants in the Desh is decidedly good."

3. As regards the current year, the following statement shows the rainfall in these districts in the months of June to November last as compared with the average fall during those months :—

District.	June.		July.		August.		September.		October.		November.	
	Average.	1896.	Average.	1896.	Average	1896.	Average.	1896.	Average.	1896.	Average.	1896.

A skeleton map of the Central Division showing the rainfall at the different stations from 19th to 30th November 1896 is also appended. The peculiarities of the season are that the tracts dependent on kharif crops for the most part received excessive rain till about the middle of August, which proved injurious to crops and necessitated re-sowing in several places; while beyond a few scattered showers there was practically no rain during the months of September and October, when it was most wanted to bring the growing kharif crops to maturity and to enable rabi sowings to be undertaken. There was however some useful rain in the third and fourth weeks of November, which improved the condition of the rabi crops already sown and rendered further sowings possible in all the affected districts except Násik and Khándesh. Again in the last week of December there was some rain in most of the affected districts. This rain would have been most useful for the crops sown in the end of November, and in the eastern tálukas of Poona it is believed to have had very beneficial results, but unfortunately it fell elsewhere for the most part in places where the November rain had not been sufficient for further sowings. The season has been altogether so abnormal, the rainfall so capricious, and the effects so diverse that an accurate idea of them can be given only by a detailed account for each of the districts in which scarcity has resulted.

Sholápur.

Cultivation in this district depends mainly on the amount and seasonableness of the late rains of August, September and October. The rainfall in June and July was timely and useful for kharif sowings, but was deficient throughout the district. In August the rain was far below the average, and standing kharif crops began to wither while rabi sowing was retarded. The situation grew worse in September and October, when the fall measured only a few cents, and by the end of the latter month the kharif crops had almost completely failed and most of the rabi area was left unsown for want of moisture. In November there was rain between the 20th and 23rd and on the 27th, ranging from 58 cents at Pandhar-

pur to 6·76 inches at Sholápur. This rain proved very beneficial to such rabi crops as had been sown, and enabled most of the remaining rabi area to be sown in the tálukas of Sholápur, Bársi, Mádha and Karmála, except in places where seed and cattle were deficient. In the remaining three tálukas of Sángola, Pandharpur and Málsiras rain was smaller in quantity and partial, and further sowings in these places have therefore been more restricted. There was no rain in December except 6 cents at Bársi, and it is feared that without further rain the outturn of the crops sown in the end of November will be small if they do not entirely fail.

Ahmednagar.

The rainfall in June, July and August was generally sufficient and seasonable for kharif crops and enabled rabi lands to be prepared for sowing in some parts of the district. In September and October there was nothing beyond scanty rain in any táluka. The kharif crops consequently withered in many places and rabi sowing was retarded. In November there was good rain in the southern tálukas, *viz.*, Ahmednagar, Párner, Shrígonda, Karjat and Jamkhed, ranging from 1·20 inches at Párner to 4·30 inches at Karjat. The condition of such crops as had been sown was much improved by it and further sowing of wheat, gram, linseed and jowári was rendered possible over nearly the full rabi area in the tálukas above mentioned. In the northern tálukas, on the other hand, the rainfall of November was too scanty for further sowing, and the area there sown averaged only from 1 to 2 annas of the normal area taken at 16 annas. There was rain on the 26th of December in most of the tálukas, the maximum being at Nagar 70 cents; but it was insufficient in the southern tálukas where owing to the large rabi area sown at the end of November it would have been most useful.

Poona.

In June the rainfall was sufficient and seasonable. In July and the first three weeks of August it was exceptionally heavy and proved injurious especially to river-side crops and to those in the western and central tálukas. In the eastern tálukas, *viz.*, Purandhar, Sirur, Indápur and Bhimthadi, the fall in August was below the average. The rainfall in September and October was scanty and crops withered in the eastern tálukás and also showed signs of deterioration elsewhere. Rabi sowing was also retarded. In November good rain fell in the eastern tálukas, measuring from 1·20 inches in Purandhar to 3·08 inches at Indápur. The rest of the district received only light showers. This rain has enabled 8 to 16 annas (whole) of the usual rabi area to be sown in the eastern tálukas. Elsewhere the area sown is about one-fifth of the normal. In the last week of December slight rain (ranging from 8 to 95 cents) fell in these tálukas and has benefited the late-sown crops, but more is needed.

Sátára.

In June the rainfall was generally sufficient and seasonable for sowing and transplantation. In July and the first half of August there was excessive rain in the western and central tracts, which injured the standing crops. In the eastern tálukás, *viz.*, Mán, Khatáv, Khánápur and Tásgaon, the fall was normal, and at the end of August the crops were in good condition. In September and October the rainfall throughout the district was much below the average, with the result that kharif crops began to wither, especially in the eastern tálukas, and rabi sowing was retarded. In November showers of rain fell between the 19th and 22nd throughout the district and improved the condition of crops already sown, but were too light for any appreciable extension of sowing. There was also some rain throughout the district in the last week of December, the maximum being at Tásgaon 1 inch 12 cents and minimum at Pátan 6 cents. The condition of the standing crops is fair, but more rain is required for those last sown.

Násik.

The rainfall in June was sufficient and seasonable. In July and the first half of August it was excessive and injurious to crops, especially bájri; there were floods in Málegaon, which destroyed the crops. In the last week of August there was a break, which proved beneficial for standing crops and for completing kharíf re-sowings and commencing rabi sowings. In September and October the rainfall was very deficient, and standing kharíf crops withered in many places, while rabi sowings were delayed. There were light showers (6 cents to 1 inch) in November, which improved the condition of late crops already sown, but did not make further sowing possible. On the 28th of December there was rain in four tálukas, ranging from 28 to 55 cents. More rain is required for the standing rabi crops.

Khándesh.

The rainfall in June was below the average except in a few tálukas. In July and the first half of August, however, it was abnormally heavy and injurious in some places to standing kharíf crops, especially cotton. Some river-side crops were destroyed by floods. In the second half of August there was a complete break, which benefited the crops and enabled re-sowings to be undertaken. In September the rainfall was much below the average, and in October there was practically no rain and the kharíf crops began to wither everywhere and rabi sowing was retarded. In November there was slight rain (1 cent to 1·27 inches), which was beneficial to wheat and gram already sown, but insufficient for any further sowing. About 1 inch 27 cents of rain fell at Dhulia on the 20th December, where however rabi crops are not grown.

Bijápur.

The rainfall of June, July and August was far below the average and insufficient for complete kharif sowings. Bijápur is however principally a rabi district, and depends mainly upon the later rains of September, October, and November. During September the rainfall was very scanty, and the month of October was almost rainless. By the end of October the kharíf crops had dried up, and a few rabi crops sown were withering except along the banks of the Krishna. In November rain fell in general showers, mostly between the 19th and 23rd. This rain was beneficial to such jowári crops as were before sown, but was not sufficient for further sowings except in a few places. In the last week of December there was slight rain in four tálukás and one petha, varying from 9 to 48 cents, but it was insufficient to revive the few crops sown towards the end of November, which are reported to be withering.

BELGAUM.

In the three tálukas of Athni, Gokak and Parasgad (including Murgod petha), which are included among the affected areas, prospects were good till the end of August. But a long break occurred in September, in the last week of which only a few cents of rain fell in these tálukas. The whole of October also passed almost without any rain. By the end of October the standing kharif crops had already withered or were withering or where they had survived were being destroyed by insects. In November light showers fell throughout the district of Belgaum between the 19th and 23rd and on the 27th. The fall in the affected tálukas was at Parasgad 1 inch 9 cents, at Gokák 45 cents and at Athni 70 cents. The fall was light but useful to standing crops, and enabled some additional sowings to be undertaken. There was general rain on the 25th of December except in Athni and Chikodi, varying from 14 cents at Murgod to 1 inch 57 cents at Belgaum. More rain is needed in all the affected tálukas, but especially in Athni.

Dhárwár.

The situation till the middle of October in the affected tálukas, *viz.*, Naval-gund (including Nargund petha), Ron and Gadag (including Mundargi petha), was somewhat similar to that of the Belgaum tálukas referred to above. The kharif crops were next to worthless and were rooted out in some places, and there were practically no rabi sowings till the end of October. In November good rain fell throughout the district mostly between the 15th and 23rd, the fall in the affected parts being—

	In.	Ct.
Gadag	3	76
Mundargi	0	51
Ron	1	94
Navalgund	2	30
Nargund	2	66

This rain was beneficial to the standing crops, and most of the rabi area was sown. The condition of the affected tálukas except the Mundargi petha was much improved by this rain. There was also some useful rain in the last week of December in these tálukas varying from 15 cents to 1 inch 99 cents. but more is still wanted in the north-east tracts (Ron, Nargund, Mundargi,) where the prospects are still precarious.

4. Estimates in annas of the outturn of kharif crops and of the rabi area sown in each of the affected districts as compared with the normal (16 annas) outturn and sowings have been furnished to the Government of India with my letter No. 10601, dated 23rd December 1896. The following statement gives the information in greater detail for the affected districts as well as for other districts of this Presidency for which it is available:—

District.	Average outturn in annas of kharif crops taking the whole area sown.	Proportion of the ordinary rabi area sown.	Proportion of the rabi area sown in which the seed has germinated.	Proportion of the area in column 4, in which the crop is still alive

‡ Sowing was still going on at the date of report.

These estimates are not based on any detailed inspection, for which there has not yet been time, but they indicate roughly how the probable outturn of food-grains in the current year compares with the normal outturn. For a proper appreciation of the figures however it is necessary to note the proportions of kharif and rabi food crops grown in the areas affected by scarcity. The cereals principally cultivated as kharif crops in these districts are bájri, jowári and rice, while those cultivated as rabi crops are jowári and wheat. The following statement of the average area on which these crops are grown shows how far the several districts are dependent for their food-supply on khariff or rabi crops :—

Districts.	Kharif.	Rabi.
	Acres.	Acres.
Sholápur	257,955	1,356,925
Ahmednagar	811,922	1,226,614
Poona	840,627	796,874
Sátára	944,805	272,891
Násik	982,266	396,355
Kháudesh	1,166,684	267,534
Bijápur	685,626	1,214,279
Belgaum	883,706	305,039
Dhárwár	785,068	435,711

It will be clear from the facts and figures above given that the intensity of the distress in this Presidency depends entirely on the outturn of the rabi crops still standing. Most of these crops were sown at the end of November, long after the time at which such crops are generally sown. Some of them were benefited by rain at the end of last month, but it is feared that most of them will fail to come to maturity without more rain. The Director of Agriculture and all members of the Agricultural Department have been desired to devote their energies to the ascertainment as promptly as is possible of the probable result of these late sowings and to the collection of other information regarding the food-supply.

5. There can however be little doubt that the character of the season does not of itself account adequately for the large demand for relief which has already occurred in this Presidency. In the districts most liable to scarcity the rabi crops are most important, and as already shown it is not yet known what the outturn of them will be. The distress has mainly arisen from the pressure on the poorer classes of the abnormally high prices which have prevailed since October last, and the failure of the kharif crops in these districts would not have caused so great a rise in price if there had been a good harvest in other parts of India. Prices indeed rose in Northern India while yet a plentiful harvest was expected here, for although the heavy rainfall in the end of July and beginning of August caused some damage in various places, the outlook in the Presidency as a whole was very favourable for some time afterwards, and in many places bumper crops were expected. It is believed that in these circumstances holders of stocks of grain were tempted by the higher prices resulting from the unfavourable outlook in Northern India to export to some extent. Afterwards it became evident that the prolonged absence of the later rains would injure or entirely destroy kharif crops and render rabi cultivation exceedingly precarious, and prices rose rapidly. By the middle of November the staple grains were in most of the affected tracts selling at a higher rate than was reached in the last famine till the failure of the early rains of 1877 threatened a prolongation and intensification of the scarcity. The following statement contrasts the normal prices of food-grains with the

average price for each fortnight since the middle of September in each of the affected districts :—

6. It has been stated above that it is believed the holders of stocks of grain were tempted to export to some extent, and it has been alleged that railways now carry away a large part of what would have been stored in pits if the ancient practice had been continued. There is doubtless some truth in the statement, but the Governor in Council is unable to believe that the custom of storing has been abandoned. It is known to have prevailed until a recent date in some of the affected districts, and there is no reason to suppose that the stocks would suddenly be exhausted. The best evidence that a considerable local supply is still available lies in the fact that on the fall of rain in the end of November there was an immediate decline in prices, and it is now reported from districts in which there had been difficulty in obtaining food for people on relief works that grain is plentiful. At the same time, as will be seen from the table above given, prices still continue very high, and throughout the Presidency the harvest has so far been considerably below the average. It has not yet been found possible to obtain any definite information regarding the actual quantity of food-grains available within the Presidency, and it is doubtful whether any information which can be obtained will be trustworthy, for the stocks are generally underground and not easily capable of inspection and the owners have the strongest motives for withholding the truth on the subject. The Director of Agriculture has however been desired to have detailed inquiries made in each village and to frame estimates from such statistics as are available. It may be remarked that a statement often made that the railways have induced the cultivation of exportable products at the expense of food-grains does not appear to be correct. From the following table it will be seen that on the whole food is produced in the affected districts through which railways have been constructed since the last famine as largely as it was before the opening of railways, and that the increase of exportable products has resulted from extension of cultivation :—

7. His Excellency in Council understands that Madras will now be able to spare some surplus produce, and so far as he is at present able to judge is inclined to the belief that even if the outturn of the rabi crops in the affected areas in this Presidency is poor, there will be found in the country sufficient food to keep the people alive until the time comes for reaping crops after next rains. This view is supported by an examination which has recently been made by the Director of Agriculture of the statistics of rail-borne traffic in food-grains in the past 5 years. If it should unhappily prove incorrect, the Governor in Council feels little doubt that merchants would undertake importation from foreign countries. There is room for some apprehension, because such importation has hitherto not been needed for this Presidency and it would take considerable time to carry out after the need for it was ascertained. But the Governor in Council cannot believe that merchants will hold aloof if a profit from importation becomes probable. Communications are excellent throughout the affected area. The greater part of it is traversed by the G. I. P., Dhond-Manmád and Southern Marátha Railways, and local communications with the railway stations are fairly plentiful and good. It will be contrary to all experience if ports and large towns accessible by rail are not supplied by private enterprise more successfully than would be possible by State agency. The Governor in Council has accordingly steadily refused to accede to solicitations to undertake importation from foreign countries, and this policy will not be abandoned, but any aid which can legitimately be given to private trade by the publication of information regarding local stocks and other measures will be freely granted. In other respects there will be as little interference as possible with private enterprise. It was however reported in November last that local dealers had combined not to supply people on certain relief works at reasonable rates. The District Officers have been authorized in such cases to endeavour to make arrangements with merchants in the larger towns for the supply of the labourers and persons gratuitously relieved, or if necessary to bring grain from the larger towns and pay the wages as well as give the gratuitous relief in kind.

8. The following statement shows the areas at present considered to be affected in the several districts and the daily average number of persons likely to require employment on relief works as estimated by the Collectors and Commissioners :—

District.	Total area in acres.	Total population.	Portion likely to be affected.	Estimated daily average number of persons likely to come on relief works.	Remarks.
Sholapur	2,905,194	750,630	Whole district (tálukas of Bársi, Pandharpur and Sholápur less severely than others).	58,000	The estimate is for 9 months from December to August.
Ahmednagar	4,217,206	888,755	Whole district (tálukas of Akola, Sangamner, Shrigonda and Párner less severely than others).	18,000	The estimate is for 9 months from December to August.
Poona	3,424,059	1,067,800	Parts of all tálukas (Bhimthadi and Indápur severely affected).	12,000	The estimate is for 7 months from December to June.
Sátára	3,087,783	1,225,989	Tálukas of Pátan, Jávli, Sátára, Khánápur, part of Karád and Shirála petha severely Other tálukas partially.	11,000	The estimate is for 9 months from November to July.
Násik	3,720,295	843,582	Tálukas of Málegaon, Nándgaon, Yeola, Niphád and Sinnar severely. Other tálukas partially.	10,200	The estimate is for 11 months from November 1896 to September 189 .
Khándesh	5,660,900	1,460,851	All tálukas partially	15,000	The estimate is for 8 months from December to July.
Bijápur	3,627,811	796,339	Whole district	73,750	The estimate is for 8 months from December to July.
Belgaum	2,979,376	1,013,261	Tálukas of Athni, Gokák and Parasgad (including Murgod petha).		
Dhárwár	2,945,832	1,051,314	Tálukas of Navalgund, Gadag and Ron, and Nargund and Mundargi Pethas.		

It will of course however be understood that the statement may require considerable modification according to the outturn of the young rabi crops now in the ground. It seems probable that in the Gokák and Parasgad tálukas of Belgaum and the Navalgund and Gadag tálukas of Dhárwár these crops will come to maturity, and in that event there will not be much distress in these areas. On the other hand it must be remembered that in places where crops are poor but have not entirely failed, and where in ordinary years there would have been no need for relief, the abnormally high prices press severely on persons who have no savings. For this reason it has been necessary to open relief works in the western tracts of Poona and Sátára, which have been considered immune from famine. It is moreover feared that relief may be needed in Ratnágiri and Kolába, partly because the crops are poor and the prices high, but mainly because many inhabitants of these districts who usually gain a large portion of their income from labour in Bombay have left that town owing to the plague, and programmes of works to be commenced if need arises have been prepared. The food grown in the former district is never sufficient for the whole population, which is exceedingly dense, and the imports are ordinarily paid for in some part by the earnings of members of the families outside the district.

9. The estimates of the numbers likely to require employment on relief works given above compare as follows with the average numbers of persons employed in 1876-77 :—

	Present Estimate.	1876-77.
Sholápur	58,000	43,410
Ahmednagar	18,000	22,997
Poona	12,000	31,767
Sátára	11,000	22,542
Násik	10,200	8,625
Khándesh	15 000	3 893
Bijápur, Belgaum and Dhárwár	73,750	95,382
TOTAL	197,950	228,616

The Governor in Council regrets to be forced to the conclusion that unless the rabi crops now in the ground yield a good harvest the estimates are likely to be largely exceeded. The average numbers of persons actually employed in the several districts in the week ending 2nd instant were as follows :—

Sholápur	40,257
Ahmednagar	27,547
Poona	13,074
Sátára	19,042
Násik	14 553
Khándesh	6,827
Bijápur	44,542
Belgaum	1,999
TOTAL	167,831

It will be observed that these numbers are already above the estimates in Ahmednagar, Poona, Sátára and Násik, and that the total number now employed falls short of the maximum number estimated to require employment by some 30,000 only. The Director of Agriculture has been desired to revise the estimates after detailed enquires regarding the probable outturn of the rabi crops and the condition of the people.

10. When there were indications of distress, the Collectors were instructed to open test works, making use for the purpose as far as possible of Local Fund works in progress or in contemplation. It was particularly impressed upon them that the provisions regarding tasks and wages should be strictly applied, and these instructions have been twice repeated. It has been pointed out that without strict enforcement of these conditions the test would be of no value and that it was on that account even of more importance to exact full tasks on test works than on ordinary relief works. Regular relief works have not been opened until there was shown to be a keen demand for labour at famine wages. In

Dhárwár the tests have not hitherto shown such a demand and were discontinued, but in the week ending 2nd instant were resumed. In Belgaum it has so far been necessary to open relief works only in the Athni táluka, but there are test works in progress also in Parasgad and Gokak. In some other places the persons employed on relief works refused to accept famine wages after the rain fell at the end of November, but since that time there has been a continuous increase in the number of people requiring employment as shown below :—

Week ending 5th December.	Week ending 12th December.	Week ending 19th December.	Week ending 26th December.	Week ending 2nd January.
54,913	72,571	114,614	142,848	167,831

The payment of famine wages and exaction of proper tasks have undoubtedly been effectual in affording a proper indication of the intensity of the distress.

11. In all districts the bulk of the people employed are Mhárs and Mángs and members of other low castes who are in the highest degree improvident. There are however other agricultural labourers on the relief works, but not yet so far as can be ascertained a large proportion of holders of land. Amongst the first however to feel the pressure of very high prices were weavers and some other artizans, and in some places at the earliest stage of the distress they were the only people for whom relief was needed. Owing to the enormous numbers of weavers requiring employment throughout the affected areas, the possibility of providing work for them in their own craft presented difficulties which do not appear to have been contemplated when section 151 (*a*) of the Bombay Famine Relief Code was framed, and an amendment of that provision has been proposed. It has been found practicable without an organization which it would take a long time to carry out, and without the risk of dislocating for years the trade in cloth to employ in their own craft only such weavers as cannot gain a livelihood on the ordinary relief works. Earthwork is however provided as far as possible for such of them as are not fitted for the breaking of metal. The situation in respect of the weavers is complicated by the fact that the present is the Sinhast year during which no marriages take place in the Hindu community and consequently the demand for the articles ordinarily manufactured by the weavers is immensely reduced.

12. It is found that in all districts except Sátára there are more women employed than men, and in some districts the disproportion is marked as shown by the following figures :—

Districts.	For week ending 26th December 1896			For week ending 2nd January 1897.		
	Men.	Women.	Proportion of men to women	Men.	Women.	Proportion of men to women.
Sholápur	102,393	118,8 4	46 54	86,582	105,002	45 : 55
Ahmednagar	33,562	47,494	41 : 59	50,597	79,780	41 : 59
Poona	22,685	33,300	43 : 57	28,8 2	36,565	44 : 56
Sátára	31,240	10 775	03 . 37	56,576	34,575	62 . 38
Násik	26,546	33,042	44 : 56	31,807	38,093	45 : 55
Khándesh	7,833	2 ,528	27 . 73	7,,63	23,606	21 . 76
Bijápur	6 ,993	106,219	39 : 61	78, 07	121,850	39 : 61
Belgaum	3,378	4,810	41 : 59	3,560	5,27?	40 : 60

The cause is probably to be found in the fact that some men continue to find employment in agriculture and in agricultural improvements for which takávi advances have been made, but owing to the abnormally high prices are unable to support their wives and families, and others have probably migrated with cattle, leaving their families behind. It is perhaps to some extent on account of this disproportion that the number of children under 7 years of age at the

relief works is found to be very large. The percentage of them to workers in the several districts is shown below :—

Sholápur	47 per cent.
Ahmednagar	39 ,,
Poona	52 ,,
Sátára	13 ,,
Násik	50 ,,
Khándesh	42 ,,
Bijápur	31 ,,
Belgaum	34 ,,

Explanations have been called for on the point, and if there is found to be an abuse it will be stopped. But it has been already reported in some cases that able-bodied women of the lower castes are very prolific and generally have several children under 7 years of age, and that no children of people other than workers had been found on the works. Kitchens for these children have been opened under Chapter IX of the Famine Relief Code in the district of Bijápur and parts of Poona and Sátára.

13. I am to append a copy of the Resolution of this Government in the Public Works Department No. 2-F.—1569, dated 12th November 1896, laying down the principles to be observed in the selection of works for the relief of distress. The annual programmes of relief works have hitherto been found to be generally sufficient. But as the demand for relief is steadily extending and is likely to be very keen in the hot season, new works are being added to the programmes and the feasibility of several tank projects is being considered. It has also been arranged that earthworks on the portions of the Tápti Valley Railway, of which the final alignment has been determined, and on the proposed Bársi-Pandharpur Railway, which is now being surveyed, shall be put in hand as relief works in case of need, and it is hoped that the Hyderabad-Godavari Valley Railway will also be commenced. While no distance test is applied, labour is concentrated as far as possible on large works, the recommendation of the Famine Commission that there should, when practicable, be at least one work in each sub-division being at the same time borne in mind. But if the number of labourers greatly increases, adequate supervision cannot be provided unless they are employed on larger works than are at present in the programmes, and the commencement of earth-work for the railways above specified will be essential. There are however classes of people who for various reasons cannot leave their homes, and instructions have been issued to employ them on small works near their homes if they need relief. The rush on the works on some occasions has been so great that difficulty has been experienced in punctually providing adequate supervision, but this defect has been remedied with little delay. The Sanitary Commissioner and his Deputies are making regular tours of inspection in the affected districts, and the condition of the labourers employed on relief works including weavers, whose health is generally improved by outdoor labour, is reported to be satisfactory. This result is due to the fact that owing to the preparation beforehand of programmes of works relief has been provided as soon as it was required.

14. There is a very keen demand for takávi advances in the affected districts and from the first this Government have urged the great importance of adopting this form of relief as far as is practicable. The money is for the most part expended on improvements which will alleviate distress in future and it is expended in the most economical manner under the supervision of those directly interested in using it to the best advantage. Experience in the Southern Marátha Country in 1891-92 indicates that the great bulk of the advances will be recovered with interest, but even if a proportion of the amount is not recovered, there will be much less loss than in expenditure on inefficient famine labour. In addition to the amount of Rs. 6,27,350 allotted to the affected districts out of the original assignment of Rs. 10,03,450, the whole additional assignment of Rs. 15,00,000 has been applied for in these districts and there is a demand for more, with regard to which the Government of India will be separately addressed. It is estimated that in the districts of Sholápur and Bijápur and the affected tracts of Belgaum and Dhárwár an

aggregate of 140,000 persons will find employment until next rains on works executed with the aid of these advances.

15. Attention is also being given as far as possible to the maintenance and improvement of the water-supply. The aid of the Municipalities and Local Boards for this purpose where they have funds available has been enlisted, while the works are carried out entirely at Government expense where, as in Bijápur, the local bodies cannot give assistance.

16. The provisions of Chapter V of the Famine Code regarding gratuitous relief in villages have been applied wherever necessary in the affected districts, but it is satisfactory to observe that there has not yet been disclosed any extensive need for such relief. According to the latest information the numbers receiving it in the different districts were :—

Sholápur	1,722
Poona	2,811
Bijápur	2,274
Belgaum	103
Sátára	1
Ahmednagar	4
Násik	2

It has however been represented that poor-houses will soon be necessary, especially in the districts of Sholápur, Ahmednagar, Poona and Bijápur, and steps are being taken to construct them in these places. The application of Chapter VIII of the Famine Code to the districts of Sholápur and Ahmednagar and parts of Poona has alrady been authorized I am to quote below the orders issued by this Government for the working of Chapters V and VIII of the Famine Code :—

"The Commissioner will doubtless take steps to see that the provisions with regard to gratuitous relief are strictly applied. The distinction between the classes to be relieved in their villages under Chapter V and those to be received in poor-houses under Chapter VIII should be carefully borne in mind, and great caution is needed that the poor-houses shall be managed in such a way that relief will not involve any offence to religious sentiment. The poor-house at Pandharpur seems intended for its proper purpose, and the municipal commissioners are entitled to credit for their recognition * of their responsibilities in this matter Relief of persons entitled to it in their villages under Chapter V is not likely to offend caste scruples, but it is very liable to abuse, and very constant and close supervision is necessary. There should be a chain of checks applied through Circle Inspectors, Relief Mámlatdárs, Sub-divisional officers and higher authorities to prevent the entry on the dole register of persons who are not eligible and the demoralization which would ensue from any laxity in this respect."

"The Collector refers to the private charity dispensed in the villages. An effort should be made to have it brought under direction and control so that it may not run in the same line with State relief. The appointment of committees who will be guided by the officers engaged on famine duty will help to the attainment of this object. If persons on the dole register or in poor-houses are also assisted by private charity, difficult complications may ensue, but private charity may appropriately be used for the provision of comforts which could not be legitimately supplied at the cost of the State for persons in hospitals attached to poor-houses and for assistance to persons who are not eligible for State relief."

17. The administration of famine relief in each of the affected districts is placed under the control of the Collector, and in order to assist him the Revenue and Police establishments of those districts have been strengthened, and Relief Mámlatdárs, Special Civil officers for relief works and District Medical officers have been appointed wherever necessary. The provisions of the Famine Code besides those mentioned in the preceding paragraph have been applied to the extent considered to be necessary in existing circumstances in all places in which relief has to be given.

18. As the failure of the later rains has also resulted in a very serious scarcity of fodder, the question of the preservation of agricultural cattle in the affected districts has engaged the special attention of Government. Large numbers of cattle have already died or been sold for slaughter, specially in the Bijápur and Sholápur dis-

No. 8939, dated 11th November 1896.
No. 9158, dated 18th November 1896.
No. 10201, dated 12th December 1896.

* The reference here is to a contribution of Rs. 2,500 by the Pandharpur Municipality for the maintenance of a poor-house.

tricts, and the condition of cattle throughout the affected area is reported to be rapidly deteriorating. I am to forward for the information of the Government of India copies of the resolutions of this Government noted on the margin containing the general orders issued on the subject. All subsidiary measures taken in this matter have been summarised in the weekly statements appended to this letter. Every possible facility has been given to the cultivators to take their useful cattle to places where forage is available, takavi advances being authorized for the purpose of taking them either by road or rail, and the arrangements for the importation of fodder are intended only for such of them as must be kept in the affected districts for the carriage of grain and other necessary purposes. I am to state that while this Government recognize that for the supply of fodder in the affected districts private enterprise must be almost entirely depended upon, the situation demanded some immediate action on the part of Government. It was found that there was much grass, especially in the Khándesh forests, which was likely to be burned if not promptly secured. It is also to a large extent in somewhat inaccessible places where contractors would be reluctant to go. It was therefore determined to get as much as possible of this grass cut, pressed and sent down to railway stations. The special officer appointed on this duty has however been instructed to endeavour as far as possible to sell the grass to traders for distribution at the earliest stage of the transit at which they appear to offer a reasonable price for it. As the whole quantity which can be imported will suffice for but a fraction of the cattle required to be kept in the districts, any attempt to distribute it by State agency to cultivators must fail, and there is no alternative to the disposal of it by competition. It has however been directed that advances may be made in kind instead of cash to cultivators who wish to have the grass for the preservation of their agricultural cattle. I am to state that the Agents of the Railway Companies have agreed to carry fodder for cattle by rail to the affected districts at low rates. These rates are not restricted to grass carried at the cost of Government, but will apply to fodder imported into the affected districts by private enterprise. This Government are desirous of leaving the importation as far as possible to private trade and will refrain from any competition which is calculated to render that trade less effective.

19. The financial position of this Government, so far as it can be gauged at present, is explained in my letter to the Finance and Commerce Department, No. 23, dated 4th instant. The following statement shows the estimates of the expenditure likely to be incurred on famine relief as furnished by the Collectors of the Central Division and the Commissioner, Southern Division :—

	Sholápur.	Ahmednagar.	Poona.	Sátára.	Nasik.	Khándesh.	Total C. D.	Total S. D.	Remarks.
	R	R	R	R	R	R	R	R	
Relief works	18,20,0[illegible]	,57,50	3,44,445	3,75,000	4,21,875	4,80,0[illegible]	39,98,800	21,00,000	(1) The items against gratuitous relief for Ahmednagar, Khándesh, Nasik and the Southern Division include R 1,00,000, R 15,000, R 10,000 and R1,[illegible]0,0[illegible]0, respectively, on account of dues or allowances to village servants which are separately shown in the district returns.
Gratuitous relief	3,04,500	(1) 1,82,500	2,33,219	56,250	(1) 73,2[illegible]	(1) 45,000	9,54,750	(1) 4,15,000	
Contingencies	2,18,400	66,000	41,331	45,000	50,625	60,000	4,81,356	2 52,000	
Water-supply	25,000	10,000	..	10,000		...	45,000	30,000	
Establishments under Collectors (including travelling allowances).	24,518	60,709	11,28[illegible]	5,000	28,[illegible]4	7,40[illegible]	1,34,777	87,408	(2) R 2,75,000 have already been granted.
TOTAL	24,52,418	8,76,[illegible]00	6,30,2[illegible]4	4,91,250	[illegible]71,[illegible]45	5,92,400	56,14,[illegible]8	28,84,408	(3) R 5,00,000 are for the Wasah Water scheme, and R 50,000 and R25,000 to the Yeola and Malegaon Municipalities for relief to weavers.
Takávi advances	2,29,350	(4) 4,00,[illegible]0	[illegible],000	1,50,000	40,000	(1) 77,00	9,95,350	(5) 12,[illegible]0,000	(4) R 52 000 have already been granted.
Local resources	...	50,000	...	(6) 30,000	(6) 5,75,[illegible]0		6,55,000	3,75,00[illegible]	(5) These include R5,00,000 required next year.
									(6) Municipal expenditure on water-works.

For reasons already given, these estimates are likely to be below rather than above the mark, unless the rabi crops yield a good harvest. As already explained in my letter referred to above, there will also be other indirect charges due to famine, such as those on account of grain compensation to Government servants, supply of fodder to the affected districts, extra police and medical establishments etc., and Provincial resources are approaching exhaustion. It will be seen that the local resources available to meet expenditure on famine relief are very small. The Dhárwár and Belgaum District Local Boards are already carrying on relief works at their expense, the former with the aid of a loan from Government, and the Municipalities of Yeola and Málegaon in the Násik District have applied to Government for loans of ₹50,000 and ₹25,000, respectively, to enable them to assist weavers in distress. The Municipality of Pandharpur in the Sholápur District has contributed ₹2,500 for the maintenance of a poor-house at that place. The other Local Boards and Municipalities concerned have not so far been able to take any substantial measures towards supplementing the efforts of Government to relieve distress.

20. The probable extent to which suspensions of collections of the land revenue may be necessary within the current financial year is stated in my letter to the Finance Department mentioned in the preceding paragraph. It is impossible, however, to make any accurate forecast until the probable outturn of the standing rabi crops can be ascertained. A recommendation has been made with regard to one district that in the current year the dates of instalments for collections in the rabi areas should be fixed a month later than usual owing to the lateness of the crops, and this measure may be found necessary in all the affected districts. The following are the estimates of suspensions and remissions for the revenue year ending 31st July already furnished by the Collectors. A further report will be made on this subject when the data for a forecast are more definite:—

District.	Suspensions.	Remissions.	Remarks
	₹	₹	
NORTHERN DIVISION—			
Ahmedabad	...	...	
Kaira	30,000	...	In 2 tálukas. Report for the other tálukas not received.

21. In the Native States within or adjoining the affected area of British territory distress is reported to be acute only in Jath, Rámdurg and Akalkot. The following extracts from letters from the Political Agents show the relief measures being taken by the several Chiefs, to whom the Political Agents have been requested to convey the acknowldgment of the Governor in Council that they are recognizing their responsibilities in this matter:—

KOLHA'PUR AND SOUTHERN MARATHA COUNTRY STATES.

(Extracts from a Memorandum, dated 3rd December 1896, from the Political Agent, Kolhápur and Southern Marátha Country.)

I.—KOLHÁPUR.

As yet there is no great distress; labourers are still employed in harvesting operations in parts of the State, and there is no demand yet for large relief works. About 1 inch of rain fell 10 days ago, and this has improved prospects and lowered prices. Present price of jowári is 22 lb per rupee. The scarcity is most severe in the Katkol and Panhála mahals. All arrangements are ready for opening relief works. The Dewán has been appointed Famine Commissioner.

II.—SANGLI.

There is no real distress except in the Mangalvedha and Kuchi tálukas. These two tálukas have an area of 462 square miles and population 62,975, and relief works are about to be commenced there. In the meantime *tagái* is being freely given. In Shirhatti táluka the crops are good. Recent rains have slightly improved prospects everywhere. Fodder supply still fair except in Mangalvedha, where there is great scarcity. Prices vary from 34 lb in Shirhatti to 20 lb in Kuchi.

III.—MIRAJ (SENIOR).

Scarcity is greatest in the Modnimb táluka. Elsewhere the recent rains have so improved prospects that there is no danger for the present. *Tagái* advances are being freely given. The Chief imports grain from Mysore and sells it at cost price in Miraj market without interfering with other traders. The result is to prevent a "corner" in grain. Prices vary from 32 lb at Miraj to 21 at Modnimb. No special relief works opened yet.

IV.—MIRAJ (JUNIOR).

Real distress only in Kuroli petha, where relief works have been opened. In the other two pethas, especially Gudgeri, crops are fair and there is no danger at present. Prices vary from 32 lb in Gudgeri to 19 lbs. in Kuroli.

V.—JAMKHANDI.

In Kundgol táluka the crops are good. In Jamkhandi and Bidri tálukas there is distress. Relief works have been opened and support about 300 persons. Recent rains have slightly improved prospects. Price of jowári 22 lb at Jamkhandi.

VI.—MUDHOL.

Rabi crops much benefited by recent rain of 2½ inches, and cold weather jowári has been sown, which will serve for fodder for cattle if it does not ripen to grain. No actual distress at present. Price of jowári 24 lb at Mudhol.

VII.—KURUNDVA'D STATES.

No real distress except in Tikota Mahál near Bijápur, where relief works have been opened. Price of jowári 24 lbs. Some lands have been sown since recent rains.

VIII.—RA'MDURG.

There is much scarcity in this State, and recent fall of 2½ inches of rain has only effected slight improvement. Relief works have been opened and give employment to 1,200 persons. Jowári 22 lbs. per rupee.

IX.—JATH.

The distress here is greater than elsewhere in the Agency, and prices higher owing to long distance from railway. In Jath Mahál recent rain has done some good, but in Karajgi Mahál the condition is serious. Relief works have been opened and support 600 persons at present and *tagái* advances are being widely given. Jowári 20 lbs. per rupee.

(Extracts from reports of other Political Agents.)

AUNDH (SA'TA'RA AGENCY).

Severe scarcity is expected in the Atpadi Mahál which is mixed up with the eastern tálukas of Sátára. A relief work has been opened there, and 348 persons are employed on it according to the latest information. The numbers are not expected to exceed 1,000 at any time. The situation has been much improved by the rainfall of November.

In the mahál of Gundal on the borders of the Bijápur district, the rabi crops are good, and stocks of grain are reported to be large. Relief works have, however, been kept ready, and tagái advances amounting to Rs 4,000 have been made

Grain compensation is being given to low paid public servants, and suspensions of land revenue have been ordered on a sufficiently liberal scale.

PHALTAN (SA'TA'RA AGENCY).

This State is better off than Aundh. In the western portion the rainfall was not quite seasonable, and some distress is expected there. Relief works sufficient to employ 1,000 persons have been provided. There are no relief works at present.

SA'VANTVA'DI STATE.

There is no famine at present in this State, but prices of food grains range very high, and some distress may be caused among the poorer classes as the hot season approaches. Provision has therefore been made for relief works to be started in case of necessity. Inquiry is being made to ascertain if any remissions or postponements of land revenue collections will be necessary. Measures have been taken to guard against failure of water supply in the hot season.

AKALKOT (SHOLA'PUR AGENGY).

The rainfall of November last improved the condition of crops in the nothern portion of the State, and no relief measures are necessary there. In the southern parts of the State crops are in poor condition, and there is a demand for relief. Works sufficient to meet this demand have been started. A grant of R 4,000 for takávi advances has been sanctioned, and cultivators are freely taking advantage of them. A large area of the State forests has been opened to free grazing of cattle, and arrangements have been made for the sale of grass at a cheap rate to cultivators.

BIHOR STATE (POONA AGENCY).

The population of the State is 155,669. There is no reason to suppose that any excessive proportion will require relief. Relief works have been started, and according to the latest information 446 persons were employed on them, and 56 were receiving gratuitous relief. The Chief has arranged to open grain shops at each táluka to sell grain to poor persons at cost price and is inducing respectable merchants and grain dealers to import grain. Reserved forests have been opened for free pasturage, and the collection of forests fruits and fire-wood has been allowed this year free of charge.

SAVANUR (DHA'RWA'R AGENCY).

There is no immediate prospect of distress in this State. Since the recent rainfall the condition of the rabi crops has greatly improved. There is ample provision for relief works in case necessity for starting them arises.

T. W. HOLDERNESS,

Deputy Secretary to the Government of India.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS FROM 1ST TO 11TH JANUARY 1896, AND FROM 1ST TO 9TH JANUARY 1897.

N.B.—As regards the figures in column "*Total Earnings from 1st January 1897*," audited figures have been used as far as possible.

(*a*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company. The working of this line has been taken in hand by the company from the 1st January 1897.

(*b*) Includes the Bhopal-Itarsi railway.

(*c*) Includes the Godhra-Rutlam-Nagda railway.

(*d*) Includes the Guntakal-Mysore frontier section.

(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.

(*f*) Includes the Jammu and Kashmir and the Hyderabad Shadipal railways.

(*g*) This line has been transferred to a company from the 1st September 1896, but until arrangements are made for the line to be formally taken over, it will be worked by the State on behalf of the company.

(*h*) Includes the Wardha Coal, the Dhond-Manmad, the Khamgaon, and the Amraoti railways.

(*i*) Includes the Mysore-Nanjangud and the Yesvantpur-Mysore frontier sections.

(*j*) This line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.

(*a*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company. The working of the line has been taken in hand by the company from the 1st January 1897.
(*b*) Includes the Bhopal-Itarsi railway.
(*c*) Includes the Godhra-Rutlam-Nagda railway.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.
(*f*) Total earnings from 1st July 1895 to 11th January 1896.
(*g*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.
(*h*) The line has been transferred to a company from the 1st September 1896, but until arrangements are made for the line to be formally taken over, it will be worked by the state on behalf of the Company.
(*i*) Includes the Wardha Coal, the Dhond-Manmad, the Khamgaon, and the Amraoti railways.
(*j*) Total earnings from 1st May 1895 to 11th January 1896.
(*k*) Total earnings from 11th November 1895 to 11th January 1896.
(*l*) Total earnings from 15th July 1896 to 9th January 1897.
(*m*) Includes the Mysore-Nanjangud and the Yesvantpur-Mysore frontier sections.
(*n*) This line is being worked by the Bombay, Baroda and Central India Railway Company as a temporary measure.
(*o*) Total earnings from 1st August 1895 to 11th January 1896.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

CIVIL WORKS.

Telegraph.

ADMINISTRATION REPORT OF THE INDO-EUROPEAN TELEGRAPH DEPARTMENT FOR THE YEAR 1895-96.

No. 26-T., dated Calcutta, the 20th January, 1897.

RESOLUTION—By the Government of India, Public Works Department.

READ—

Despatch from Her Majesty's Secretary of State for India, No. 25 Telegraph, dated the 26th November, 1896, and enclosures, being the Administration Report of the Indo-European Telegraph Department for the year 1895-96, and the India Office note reviewing it.

ORDER.—Ordered that the Report and Note be published in the Supplement to the *Gazette of India*.

N. F. MACKENZIE,
Under Secretary to the Government of India.

ADMINISTRATION REPORT

OF THE

INDO-EUROPEAN TELEGRAPH DEPARTMENT

FOR

1895-96.

CAPITAL AND REVENUE ACCOUNT.

1. *Capital.*—The Capital account of the Department was increased by R46,321, making the capital expenditure to end of the year R1,14,89,206. The increase was chiefly due to outlay on construction of quarters for the signalling staff at Teheran; by providing these the revenue expenditure in succeeding years will be decreased, as the signalling clerks will no longer draw rent allowance :—

The following statement shows how the above increase is made up :—

—	Increase.	Decrease.	TOTAL.
	R	R	R
Works . . .	38,167	...	38,167
Stores . . .	7,286	...	7,286
Suspense . . .	868	...	868
	46,321	...	46,321

A summary of the year's transactions on Capital account is given in Appendix A.

2. *Revenue.*—Appendix B is a summary of the earnings and expenditure.* The earnings amounted to R16,70,081, or an increase of R99,661 as compared with 1894-95, when the sum realised was R15,70,420. The expenditure during the year was R8,17,450 against R8,26,897 in the past year, or a decrease of R9,447. The net result is a profit of R8,52,631 on the year's working against that of R7,43,523 in 1894-95, an improvement of R1,09,108.

3. The following statement shows the chief differences between the earnings and expenditure of the current and previous years. For details, *see* Appendix B :—

Earnings.

Head of Account.	1894-95.	1895-96.	Increase.	Decrease.
	R	R	R	R
†Traffic Earnings .	18,14,916	19,40,495	1,25 579	—

Net Decrease .	—	—	—	9,447

* Excluding the cost of the London Office Establishment (1,380*l.*), which is included as part of the Establishment of the Secretary of State.

† Note.—The head "Traffic Earnings" includes the amount collected in India, as also the loss on account of exchange on sterling transactions. The tariffs on International messages are fixed in a gold standard, and the balances due to or from foreign administrations are settled in that standard. The rupee collections in India vary, therefore, in correspondence with the fluctuations in exchange, and the balance received from the Indian Telegraph Department at Karachi in rupees is sufficient to pay the telegraph companies and foreign administrations in the gold standard and retain the share of this Department in a gold standard also.

EARNINGS.

4. Under message revenue there is a net increase of R72,248 over the previous year wholly due to earnings in India on homeward transit messages, Miscellaneous revenue shows an increase of R27,413 consisting partly of the sale proceeds of cable core in England, and partly of an increase in the earnings of the telegraph steamer *Patrick Stewart*.

EXPENDITURE.

5. The increase and the decrease under the main heads are as follows :—

(1) *General Charges—Gulf Section.*—The increase is caused chiefly by the payment of arrear subsidies due to some of the local chiefs in the Persian Gulf Section.

(2) *General Charges—Persian Section.*—The decrease is partly due to furlough allowances paid in England to officers on leave having been less than similar payments made during the previous year, and partly to short expenditure under travelling allowance superintendence.

(3) *Line Maintenance—Gulf Section* —The decrease is due chiefly to less outlay having been found necessary during the year on repairs to land lines than in the previous year.

(4) *Line Maintenance—Persian Section.*—The increase is due partly to more stores having been required for repairs to lines than in the previous year, and partly to a slight increase in the cost of the inspectors' staff consequent on arrangements made during leave.

(5) *Signalling—Gulf and Persian Sections.*—The decrease under Gulf Section is trifling and does not call for any remark. The increase under Persian Section is wholly due to a portion of the new buildings at Teheran having been charged to revenue, 1895-96; the Government of India having ordered that so much of the cost of the new buildings as represents the recovery made from the sale of the old buildings, which was credited to revenue in 1890, is now to be debited to the revenue account, the difference only being charged to capital. Considering the signalling staff of the Department are on an incremental scale of pay, the decrease under this head shows that strict economy is being observed.

(6) *Cable Maintenance—Gulf Section* —The decrease is due chiefly to less repairs having been found necessary to the cable steamer *Patrick Stewart* during 1895-96 than in the preceding year.

NET REVENUE.

6. On a total Capital expenditure of R1,14,89,206 a net profit of R8,52,631 was earned, which gives a dividend of 7·42 per cent. as compared with a dividend of 6·50 per cent. in 1894-95. The dividends earned during the past six years are as follows :—

Year.	Interest on Capital.
	R
1890 91	*Nil.*
1891-92	1·4
1892-93	3·8
1893-94	4·28
1894-95	6·50
1895-96	7·42

CIS-INDIAN JOINT PURSE.

7. Appendix C deals with the transactions in connection with this Agreement, which was entered into in 1878. The number of words carried between Europe and India or Trans-India and *vice versâ* during the year by the three Administrations (*viz.*, the Eastern Telegraph Company, the Indo-European Telegraph Company, and this Department) rose from 5,110,230¾ to 5,954,751½, showing an increase of 844,520½, while the net value also shows an increase of 123,449*l.* 1*s.* 5*d.* The Department's share of the Purse shows an increase of 10,672*l.* 15*s.* 8*d.*, chiefly caused by the increase to the Department's percentage on Indian traffic, while the amount paid into the Purse was more than in the previous year by 11,112*l.* 2*s.* 7*d.*

8. The following table shows the sums paid in and drawn out by the Department annually since the agreement was concluded:—

Year.	Paid in.	Drawn out.	Excess.	
			Paid in.	Drawn out.
	£	£	£	£
1878-79 . .	42,265	62,256	...	19,991
1879-80 . .	52,488	68,905	...	16,417
1880-81 . .	57,235	76,295	...	19,060
1881-82 . .	67,108	74,798	...	7,690
1882-83 . .	110,728	84,914	25,814	...

1892-93 . .	94,209	83 894	10,315	...
1893-94 . .	97,469	89,327	8,142	...
1894-95 . .	99,267	91 012	8,255	...
1895-96 . .	110,380	101,685	8,695	...
TOTALS . .	1,533,409	1,432,721	166,059	65,371
TOTAL EXCESS PAID IN . .	...	...	100,688	...

9. *Divisions of Traffic.*—The following are the proportions according to which the Joint Purse receipts are divided Under the Supplemental Agreement referred to in the previous Report (para. 9), which came into force from 1st January 1894, this Department's share of Indian traffic was increased from 17·27 to 18·06 per cent. on the ground that the Perso-Indian receipts dealt with by the Department alone were local receipts:—

Administration.	Indian Receipts.				Trans-Indian Receipts.	
	To 1894.		From 1894.			
Eastern Telegraph Company . .	60·39		59·82		80·53	
Indo-European Telegraph Company .	22·34	39·61	22·12	40·18	12·03	19·47
Indo-European Telegraph Department .	17·27		18·06		7·41	

10. The percentages of traffic which have been actually carried since 1878-79 are:—

Year.	On Indian Traffic.		On Trans-Indian Traffic.	
	Vid Suez.	*Vid* Indo-European Route.	*Vid* Suez.	*Vid* Indo-European Route.
	Per cent.	Per cent.	Per cent.	Per cent.
1878-79	71·31	28 69	95·26	4·74
1879-80	67 91	32 09	94·10	5·90
1880-81	69·01	30·99	92·50	7·50
1881-82	64·63	35·37	81·26	18·74
1882 83	48 34	51·66	59 26	40·74
1883-84	55·96	44·04	83·52	16·48
1884-85	53·02	46·98	84·44	15·56
1885-86	52 14	47·86	75·91	24·09
1886-87	55·46	44·54	85·32	14·68
1887-88	60·93	39·07	86 48	13·52
1888-89	51·69	48·31	77·04	22·96
1889-90	49 92	50·08	82·89	17·11
1890-91	46·67	53·33	83·21	16·79
1891-92	43·52	56·48	80 75	19·25
1892 93	48·09	51·91	82·49	17·51
1893-94	51·75	48·25	85·20	14·80
1894 95	48 91	51·09	84·31	15·69
1895 96	49·03	50·97	84·09	15·91

11. *Interruptions affecting Joint Purse Agreement.*—Interruptions which affected traffic between Teheran and Karachi occurred only on the Persian Section, and amounted to 5 hours, 16 minutes. Beyond Teheran to London the Indo-European Company's lines were totally interrupted for 399 hours, 22 minutes.

Two of these interruptions affected the divisions of the Joint Purse and occurred on the Indo-European Company's lines, lasting for 9 days.

12 On the Turkish route interruptions occurred between Fao and Constantinople, lasting 111 days, 17 hours, 35 minutes. The working of this route continues to be very unsatisfactory.

During the last six years the Turkish route beyond Fao has been interrupted as follows :—

Year.	1890-91.	1891-92.	1892-93.	1893-94.	1894-95.	1895-96.
Days, hours, minutes	62-5 17	77-8-12	108-9-54	101-5-41	150-0-52	111-17-35

The Department was only liable to the Joint Purse for 75 days' interruptions at Fcs o per diem.

Australasian Message Fund.

13. Full particulars regarding the nature of this Fund are given in the Administration Report of 1893-94 (page 6, paras. 14 to 17). In April 1896, however, a Supplemental Agreement was entered into under which, from 1st May 1895, the amount guaranteed was reduced to 227, 000*l.*, but the sum payable in any one year by the colonies is limited to 10,000*l.* The agreement was also made binding for at least five years.

The Departmental receipts for this year show an increase of 2,924*l.* over the receipts in 1885, on which the original Australasian Message Fund was based. *See* Appendix C (1).

TRAFFIC.

14. The service regulations of the Paris Convention of 1890 were in force throughout the year.

15. Appendix E, with its Supplementary Statements E I and E II, shows the traffic carried by the two sections of the Department. The number of words was 1,924,734 against 1,699,729 in the previous year, showing an increase of 225,005; the value as stated in francs shows an increase from 2,497,951 to 2,786,951 francs.

In Indian currency the earnings of the Department are more by R1,25,579, being R19,40,495 against R18,14,916.

16. During the past year the comparative value of the franc and rupee has varied steadily in favour of the rupee, rising in April 1895 from 1 franc = ·74 rupee to 1 franc = ·66 rupee in April 1896. As compared with the previous year, the exchange value of the rupee has risen considerably. This accounts for the disproportionate decrease in the revenue expressed in rupee as compared with the increase in the number of words.

The variations were as follows:—

From 1st April to 30th April 1895	·76 of a rupee.
From 1st May to 31st October 1895 . . .	·74 of a rupee.
From 1st November to 21st February 1896 . .	·71 of a rupee.
From 22nd February to 29th February 1895 . .	·68 of a rupee.
From 1st March to 31st March 1896 . . .	·66 of a rupee.

17. The following table gives the amounts paid into the Joint Purse by the Department as compared with its independent traffic revenue:—*

	For Joint Purse, etc.		Independent Revenue.	Total.
	Indian.	Trans-Indian.		
	Frcs.	Frcs.	Frcs.	Frcs.
Persian Gulf Section .	1,763,683	652,902	16,909	2,433,494
Persian Section .	250,125	92,778	10,548	353,451
TOTAL FRANCS .	2,013,808	745,680	27,457	2,786,945

18. Appendix F gives the number of messages and words carried under the four following classes during the past five years:—

State.	Press.
Commercial and Private.	"Times" (special rate).

19. The average length of "private and commercial" messages was 13·04 words in 1895-96 as compared with 12·67 words in the previous year. The average length, calculated from the averages of the past seven years, is 13·16 words.

20. In addition to the messages classified in Appendix I,799 messages, containing 75,274 words, were forwarded to the British Resident at Bushire free of charge. These are called "Government and press" telegrams, and would, if charged for, yield R20,564-4-3 at press rates.

* NOTE.—The independent traffic revenue is that obtained from traffic dealt with by this Department and not touching India, such as for telegrams between the stations of Jask and Bushire.

21. The percentages of traffic carried on the Teheran and Turkish routes were 93·55 and 6·45 respectively. The following table give the respective percentages for the past seven years :—

YEARS.	*Vid* Teheran.	*Vid* Turkey.	REMARKS.
1889-90 . . .	93·00	7·00	
1890-91 . . .	93·92	6·08	
1891-92 . . .	92·37	7·63	
1892-93 . . .	92·96	7·04	
1893-94 . . .	93·60	6·40	
1894-95 . . .	94 36	5·64	
1895-96 . .	93·55	6·45	

22. The meam rate of transmission of telegrams between the United Kingdom and Bushire, and between Karachi and Teheran, the latter being the Section worked by the Department, during each of the past six years is as follows :—

Year.	Between the United Kingdom and Karachi, *vid* Teheran.		Between the United Kingdom and Karachi, *vid* Turkey.		BETWEEN KARACHI AND TEHERAN.			
					Karachi to Teheran.		Teheran to Karachi.	
	Hours.	Min.	Hours.	Min.	Min.	Sec.	Min.	Sec.
1890-91 . . .	0	59	10	25	18	26	10	26
1891-92 . . .	0	59	16	12	8	42	6	25
1892-93 . . .	0	45	27	47	5	51	4	26
1893-94 . . .	0	43	36	49	5	40	4	28
1894-95 . . .	0	43½	40	46	7	7	5	00
1895-96 . . .	0	46	34	00	5	27	4	41

23. Appendix G gives the details, month by month, of the speed of working between Karachi and Teheran, and in Appendix H similar details are supplied with regard to the speed between the United Kingdom and Karachi, *vid* Teheran and *vid* Turkey. These statements show that a very high rate of speed has been maintained on the Teheran route.

24. ***Check of Errors.***—The accuracy of transmission over the lines of the Department for the past two years is shown below. It will be seen that in this respect the year under review compares favourably with the preceding one.

1894-95 . . .	0·284 per cent
1895-96 . . .	0·171 „

25. During the past year no changes have been introduced into the methods of testing our cables and land lines An alteration has, however, been made in the working. Formerly Karachi transmitted messages on two circuits to Bushire, and Bushire retransmitted them to Teheran on two circuits. But since June 1895 automatic translation working has been introduced at Bushire, whereby Karachi is enabled to work direct to Teheran on one circuit, a distance of 1,076½ miles (600 submarine cable and 1,376½ land line), whilst messages are only retransmitted by Bushire on the second circuit. This alteration has worked so successfully that it is proposed, when the necessary instruments are ready (they have been indented for), to give translation at Bushire on both circuits. The result, it is hoped, will be increased speed and accuracy in transmission, and will lead eventually to a material decrease in the signalling staff employed at Bushire.

26. *Complaints.*—The number of complaints received for investigation amounted to 148, being 26 more than the total for the year 1894-95. Of this number, 98 were from Europe and 50 from India; 78 related to messages *vid* Turkey, and 5 to local traffic.

The following table gives all details :—

Nature of Complaint.	Received from Europe.	Received from India.	TOTAL.
Non-deliveries . .	20	17	37
Non-deliveries due to insufficient address .	1	3	4
Delays . . .	32	9	41
Mis-deliveries . .	1	1	2
Errors	21	9	30
Refund of reply deposits not used . . .	9	5	14
Miscellaneous references .	14	6	20
TOTAL .	98	50	148

Of the above, 45 were not admitted by the Administrations concerned, or are still being investigated by them. Of the remaining 103 this Department is responsible for 14.

ESTABLISHMENT.

27. The following casualties occurred during the year :—

Resignations :—
- 1 Assistant Superintendent (retired).
- 1 Officer of the "Patrick Stewart" (cable steamer).
- 1 general service clerk.
- 1 desk clerk.

Died :—
- 1 local service clerk.
- 1 office clerk.

Dismissed :—
- 2 general service clerks.

CABLES.

PERSIAN GULF SECTION.

28. The lengths of the various cable sections on the 31st March 1895 and 1896 were as follows :—

Cables.	1895-96. Knots.	1894-95. Knots.
Fao-Bushire Gutta-percha Cable	153·822	153·850
Bushire-Jask India-rubber Cable of 1869 . .	501·872	501·827
Bushire-Jask Gutta-percha Cable of 1885 . .	520·642	520·578
Jask-Manora Gutta-percha Cable	528·000	528·000
Manora-Karachi (3 harbour cables) . . .	14·850	13·140
TOTAL KNOTS .	1,719·214	1,717·395

Showing an increase of 1·819 knots since last year, of which 0·174 are due to repairs, and 1·645 knots being the lengths of the three cores of the Fowler-Waring Cable laid to the Cable House at Manora.

29. In addition to the above, this Department keeps the following cables and land lines in good working order :—

(i) The Harbour Defence Revised System, composed as follows :—

	Miles.
From Customs Cable House through Junction Box to Marsah Fort (Harbour Cables)	6·703
From Junction Box to Manora and Beach Forts (Fowler-Waring Cables)	1·328
From Central Office to Customs Cable House (land line copper wire)	1·600
Total	9·631*
or 8·376 knots.	

(ii) A telephone line for the Port Trust connecting the Port Trust Office at Karachi with the Port Trust and Port Officer's Offices at Manora.

	Miles.
Land line—Manora to Box IX	0·367
Harbour Cable to Customs Cable House	5·008
Land line to Port Trust Office	0·460
Total	5·835
or 5·061 knots.	

Electrical Condition of the Cables.

30. *Fao-Bushire Cable.*—This cable still contains a small fault, which resists attempts to break it down, and this reduces the insulation to about 3 megohms per knot. The cable continues to work well.

Bushire-Jask Cable of 1869.—The insulation of this cable is 94 megohms per knot. This is as high as can be expected.

Bushire-Jask Cable of 1885.—This is satisfactory. The average insulation for the year remains at 627 megohms per knot. Only one fault occurred, detailed below.

Jask-Manora Cable.—The insulation of this section is lower than last year, *viz.*, about 81 megohms per knot. It is working satisfactorily, but requires careful watching.

Interruptions.

31. There was no total break of the cables during the year. The interruptions on account of repairs to partial faults amounted altogether to 15 hours, 55 minutes, and caused no interruption to the traffic.

Repairs and Renewals.

32. During the past year no renewals have been made and only two repairs undertaken. The repairs necessitated the expenditure of but a very small amount of cable from stock, *viz.*, the India-rubber Cable repair, alluded to above required only 1·54 knots of second-class cable, whilst only 1·063 knots of shore-end cable were expended over the repair of the Gutta-percha Cable of 1885. Of the cable recovered during these two repairs, 1·263 knots from the

* The remainder of the Harbour Defence line, consisting of land line from Central Office to Royal Artillery Office, 1·090 miles, is maintained by the Indian Telegraph Department.

India-rubber Cable has already been brought on charge, and the greater portion of the shore-end piece will also be brought on charge after being retaped.

Expenditure of Cable and Cable in Stock.

	Knots.
Cable in stock on 1st April 1895	57·240

TOTAL .	78·503
Cable expended in repairs	2·790
Leaving on 31st March 1896 a balance of .	75·713

Summary of the History of the Cables and their Mechanical Condition during the year 1895-96.

33. *Fao-Bushire Gutta-percha Cable.*—This cable remains faulty as reported last year. An attempt was made in January last to break down the fault, but without success. The fault (or faults) in this section do not interfere in the least with the working. As the cable has not been lifted since June 1894, it is impossible to speak with certainty as to its mechanical condition, but it may be taken as satisfactory.

34. *Bushire-Jask India-rubber Cable of 1869.*—In this section only one fault occurred during the past year. The cable was reported faulty on 23rd December 1895, and was repaired during the down trip of the *Patrick Stewart* on 15th January 1896. This fault occurred in a piece of cable laid just a year previously, when a fault was cut out at almost the same spot, *viz.*, 449·638 knots from Bushire.

The mechanical condition of this cable may be taken as good.

35. *Bushire-Jask Gutta-percha Cable of 1885.*—During the past year only one fault occurred in this cable. It was reported faulty on 8th March 1896, and was repaired on 22nd March. The fault was in the shore end off Jask, and was evidently caused by a borer. Within a few feet of the fault the core showed other marks of the borer at work.

The mechanical condition of this section may be considered satisfactory.

36. *Jask-Manora Gutta percha Cable.*—No faults have occurred in this section throughout the past year, and its mechanical condition may be considered fairly satisfactory.

37. *Harbour Cables.*—Three faults have occurred during the past year in these cables.

The first was reported in the spare cable (No. 1) on 2nd October 1895. The cable was cut on 17th and was repaired on 18th idem. The fault was caused by a borer. The same cable was bagain reported faulty on the 24th October 1895. It was cut on 31st and repaired on 2nd November 1895. In this case the fault was caused where a new road is being constructed.

On the 4th November 1895 the No. 4 or Military Cable used for the Harbour Defence System was reported faulty. It was cut on 5th and repaired on 6th idem in the vicinity of the last-mentioned fault, the damage being due to the same cause.

38. The aërial wires are still being used between the Central Office and the Customs Cable House. The laying of the seven-core Fowler-Waring Cable has been postponed until the arrival of the Fowler-Waring Cable ordered from England by the Indian Telegraph Department for the use of the Harbour Defence System. The two cables are to be laid in the same trench, and it is proposed to serve the lead sheathing with yarn and compound before laying.

Cable Steamer "Patrick Stewart."

39. After completing the laying of a new cable, etc., between India and Ceylon, the *Patrick Stewart* reached Bombay on 1st April, and went into

dock. She returned to Karachi on 9th. On October 20th she left for Bombay, arriving there on 24th, and was in dock until November 8th, undergoing repairs, fitting new propeller, etc. During the year she made two trips to the Gulf for cable repairs, etc., and one trip to Gwadur with the Perso-Baluchistan Boundary Commission.

Cable-houses and Cable Land Lines.

40. The whole of the cable-houses have been inspected and cable ends renewed when necessary. Ths cable land lines at the various stations are satisfactory.

Manora Cable Factory.

41. The following is a summary of the work done in the Cable Factory during the year:—

	Knots.
Cable manufactured	20·000
„ recovered and brought on charge	1·263
„ stripped for core	0·4012
Core stripped for copper	0·9212
„ sent to London { gutta-percha 2·000 knots, India-rubber 4·000 „ }	6·000

At present we have the following core coiled in the tanks:—

Gutta-percha core, 1st class (received from England)	31·000
„ „ stripped, to be made into cable as required	15·533
„ „ 2nd class, stripped	0·683
India rubber core	0·000
We have also on hand short pieces of cable which are kept for sale and fencing purpose	7·538

42. The vertical boiler has been inspected by the Government boiler inspector, and reported to be in very good condition. A certificate has been granted for a further period of 12 months, *viz.*, till 2nd December 1896.

The locomotive boiler, now 27 years old, has been condemned and a new type boiler has been indented for. That it should have lasted so many years, brackish water having been used, is a convincing proof of the careful attention to his duties of Mr. Hughes, the Chief Engineer.

43. The cable machinery remains the same as last year and is in good order. Some small alterations will have to be made to enable us to serve the seven-core Fowler-Waring Cable with tape and compound.

Working and Testing.

44. The average difference between the assumed and actual position of cable faults during the year was 0·26 knots.

MEKRAN COAST LAND LINE.

45. The lengths of the various sections of this line on the 31st March 1896 were the same as last year *viz.*:—

	Miles of Line.	Miles of Wire.
Karachi to Sonmiani branch	41·10	82·20
Sonmiani branch	1·56	1·56
„ „ to Ormara	173·35	346·70
Ormara to Pasni Branch	89·65	179·30
Pasni Branch	3·20	3·20
„ „ to Gwadur	76·50	153·00
Gwadur to Charbar	117·18	234·36
Charbar to Jask	199·47	398·94
Total	702·01	1399·26

Maintenance and Repairs to Land Lines.

46. About 40 miles of badly corroded wire and 24 corroded iron standards were removed. The line was closely inspected by the Assistant Superintendents, who had all the fluid insulators cleaned and refilled with insulating fluid.

Interruptions.

47. The otal interruptions on the land line during the past year amounted to 21 hours, 55 minutes, of which 11 hours were due to wilful damage between Gwadur and Charbar, for which the Chief concerned has been fined. This interruption continued till 1-30 P.M. on 1st April, another 13½ hours.

48. The partial interruptions, *i.e.*, those not affecting communication, amounted to 10 days, 13 hours, 29 minutes, of which wilful damage between Karachi and Ormara is responsible for 16 hours, 12 minutes, leaving 9 days, 21 hours, 17 minutes, partial interruptions due to accidental causes, chiefly corrosion of wires.

Inspections.

49. All the offices of this section were inspected by the Director during the past year, and were found to be in a satisfactory state. The buildings generally were in good repair.

PERSIAN SECTION.

50. *Line Maintenance.*— In addition to the ordinary line repairs, one short diversion was carried out which will render the line more secure.

51. *Offices.*— Funds were not provided by the Persian Government for the completion of Abadeh Office to make it secure from floods. The Treasury officers reported no funds were avilable for the purpose.*

52. *Interruptions.*—During 1895-96 there was only one total interruption, which lasted 5 hours, 16 minutes, on the 11th of April 1895. This was wilfully caused by a party of raiders. The Inspector on arrival at the break at midnight found a standard had been broken, the insulators pulverized, and lengths from all three wire carried away. The culprits were never traced, despite the urgency of the claim made that they should be brought to justice.

The interruptions on this section from all causes during the past three years have been :—

Year.	1 Wire.	2 Wires.	3 Wires.
	Hours.	Hours.	Hours.
1893-94	376·03	95·26	11·05
1894-95	591·38	94·27	65·57
1895-96	325·45	13·32	5·16

53. There were 309 acts of wilful damage committed during 1895-96, being 101 more than in 1894-95, and 22 less than in 1893-94.

54. The total amount claimed and recovered from the Persian Government for the year was Krans 6,341·50,† or 1,983·50 more than last year, and Krans 784 more than 1893-94. Of the above sum Krans 350 were recovered from local Governors, and the balance of Krans 5,991·50 through Her Britannic Majesty's Legation. The accounts for wilful damage are made up from the 1st February to 31st January of each year to suit the convenience of the Persian Government.

* Funds have since been supplied and the work completed.

† NOTE.—300 krans=100 rupees at the present rate of exchange.

Wilful damage caused interruptions as follows :—

Year.	1 Wire.	2 Wires.	3 Wires.
	Hours.	Hours.	Hours.
1893-94 . . .	73·01½	*Nil.*	*Nil.*
1894-95 . . .	150 38	42·16	*Nil.*
1895-96 . . .	158·8	*Nil.*	5·15

55. Our relations with the Persian authorities and people were as cordial as heretofore during the year under consideration. There was a large amount of highway robbery perpetrated during the year. The muleteer accompanying two signalling clerks, who were going on transfer from Shiraz to the North, was robbed of his money during May 1895, and the whole party had to return to Shiraz. At the Director's urgent request the Governor at once refunded to the muleteer the sum he had lost, and so enabled our party to proceed on their journey. They were ordered to take guards with them by His Royal Highness the Zil es Sultan as soon as they entered his province ; and other members of the staff were likewise obliged to obtain protection when travelling.

56. On 20th August a muleteer going to Dehbeed from Ispahan was robbed near Surmeh of stores, the property of the Department and of the clerk at Dehbeed, to the total value of Krans 164·35. Compensation was received for this from the Persian Government.

Another signalling clerk was pursued by robbers in the neighbourhood of Koom-i-Shah on 11th March 1896.

57. The country was much disturbed throughout its extent, as evinced by fighting at Borasjoon in July 1895, serious rioting at Tabreez in August 1895, and disturbances at Ispahan and Bushire in January 1895, but no material harm resulted to the Telegraph Department. Doubtless much of this rioting was due to the discontent and want caused by the introduction of large quantities of copper money, and its consequent great depreciation in value as compared with silver.

58. A very serious disturbance of a political nature took place at Abadeh on 18th February 1896. The office was besieged by a noisy mob of the inhabitants of that place, to the number of 2,500 persons, headed by the High Priest who threatened to incite the people to riot unless the Governor of Abadeh was deposed. The Director reported the state of affairs to the British and Persian authorities in Teheran. The clerk at Abadeh, with the Director's sanction, visited the unpopular Governor and induced him to flee, which he did at 2 A. M. on the 19th, thus preventing a riot. The Governor was deposed on that day, and things quieted down.

59. The state of affairs as regards supplies of forage and baggage animals has improved since last year's report. The cost of carriage from Bushire to Shiraz remained abnormally high till July 1895, but has since fallen to an average of Krans 85 per 650 lbs. for 15 days' transit.

Buildings.

60. The site for the new quarters for the staff at Teheran, *viz.*, 14 123 Persian square yards,* was purchased in July 1895, and by the end of the financial year one block of married quarters and one of single quarters were roofed in, but not plastered or glazed. The verandahs also were not built. The boundary wall and gates were finished, and the walling and roof of one block of servants' quarters for single quarters were finished ; also a stable for the inspector's quarters was built.

61. The title deeds for the ground were registered in Her Britannic Majesty's Legation, and are deposited in the safe belonging to this Department, which is in charge of the Superintendent, Teheran. His Excellency the Mukhbared Dowlah granted a supply of drinking water from his private conduit for the use

* One Persian yard equals 40·875 English inches.

of these quarters. A brickwork channel from the site and a brickwork reservoir for storage of 2,000 gallons of drinking water were completed.

62. A site for a residence for the Director in Teheran was purchased, *viz.*, 4,608 Persian square yards,* in February 1896. The title deeds have been registered in the Legation and deposited in the Departmental safe.

63. A store-room was rebuilt at Bushire at a cost of Krans 6,500, on the site of the one previously existing, which had become unserviceable, and was completed by contract in February 1896.

Medical.

64. Dr. Aganoor was appointed as an Extra Medical Assistant Superintendent on 10th May 1895 for six months, *vice* Dr. Scully, absent on furlough with medical certificate. The staff at Shiraz suffered severely from fever during the summer and autumn of 1895.

Meteorology and Survey.

65. The thanks of the meteorological reporter in India were given for the daily weather telegrams sent from Teheran and Ispahan to India during the period January till the middle of March. He states these telegrams were most useful and valuable, occasionally giving three days' warning of the probable occurrence of rainy weather in Upper India, and stormy snowy weather in the hills. They were discontinued in March being no longer required. Captain Lenox Conyngham, R.E., of the Great Trigonometrical Survey of India, commenced at Teheran a series of observations for longitude, etc., with Berlin on 31st October, which lasted till 15th December 1895. A series with Bushire then commenced on the 1st and ended 15th March 1896. Lines were erected to connect his observatory with the International Office. Captain Conyngham stated the series with Bushire was most satisfactory. The retardation of the electric current over the section proved to be 0·05 seconds.

MESHED LINE.

66. *Maintenance and Repairs.*—148 new juniper poles and 637 Indian field pattern insulators were placed in position; also 101 old poles were re-erected after rotten bases had been sawn off.

67. The third annual payment of the sum of Krans 24,695 from the Persian Government, although due on the 1st April 1895, was not received until October. Details of expenditure are given in Appendix K.

68. *Offices.*—The Sabzwar, Semnan, and Aivanikieg Offices were refitted throughout. The instruments at all the out-stations were taken to pieces by the Assistant Superintendent and thoroughly cleaned; new batteries were also made. The amount of battery power now used is half what was required in 1892, and it may be possible still further to reduce it.

69. The insulation and conductivity are now so good that translation at Shahrud is not an advantage and has been discontinued.

70. *Interruptions.*—The line was interrupted for 397 hours, 18 minutes, during the year. The interruptions from all causes during the past three years were :—

	Hours.
1893-94	542·50
1894-95	581·20
1895-96	397·18

——	1895-96.	1894 95.	1893-94.

Unknown causes	72·20	82·24	133·00
Floods and storms	55·11	...	...
Working party	13·30	...	...

71. *Traffic.*—The table below shows the amount of paid coversational traffic, etc., carried by the line during 1894-95 and 1895-96.

Year.	Total Paid Coversation and State Messages.	State Messages only.
1894-95	3,657 krans	972 krans.
1895-96	3,423 „	814 „

BORASJOON-AHWAZ LINE.

72. At the request of His Imperial Majesty the late Shah, the maintenance, at the Persian Government expense, of the Borasjoon-Ahwaz line (300 miles) was taken over by this Department in December 1895 and Mr. White, local service signaller, was placed in charge as an acting inspector. He arrived at Borasjoon on th January 189 , and since that date the line has been open with only slight and temporary interruptions but funds for its proper repair had not been supplied up to the end of the financial year.

STORES.

73. During the past year the principal items of expenditure under this head have been as follows :—

Purchase of stores in India	3,958
London stores, including freight, landing charges and exchange	90,171
Stores from other Departments	19,930

and the following were the principal issues of stores :—

Repairs to cable	59,476
Repairs and renewals of land line	4,781
Issues to signal offices	24,976
Repairs and issues to cable steamer	14,595

Personnel.

74. The Director-in-Chief visited Teheran during September and October 1895. Lieutenant-Colonel Wells, R.E., and Mr. Possmann respectively held charge of the Persian and Persian Gulf Sections throughout the year, administering them with marked success. My best thanks are due to them.

Both Directors desire to express their acknowledgments to their staff for the continued good service rendered by them, and for the willingness and zeal displayed on all occasions. I have much pleasure in cordially endorsing their sentiments.

B. T. FFINCH,
Director-in-Chief.

INDIA OFFICE,
The 1st October 1896.

Equivalent of francs 2,786,051·8$\frac{3}{4}$ at 25 francs = 1*l*. . . . . £ 111,478
Difference between the value of the rupee at the drawing rates and 10R to the £ . . . Rx. 79,504
Exchange on English transactions . . . . . Rx. 3,068

Rx. 1,94,050 the exact sum being R19,40,495-3-4 (*vide* Appendix B).

NOTE.—Traffic earnings are primarily worked in francs in accordance with the existing convention, but in converting the francs into rupees a uniform rate is not adopted. For the receipts from the Indian Department for traffic interchanged with it, a rate of francs 25·21 to the pound sterling is taken; and from sterling to rupees the conversion is made at the latest rate obtained by the Secretary of State for demand bills which is communicated to the Check Office. On the other hand, for the receipts from or payments to the Indo-European Company and Turkey, which are settled in London in sterling, a uniform rate of francs 25 to the pound (in accordance with the convention) is adopted, and the conversion to rupees made at the average rate of the Secretary of State's drawings for the year, which in the present case is 13·638*d*. to the rupee.

* *See* Appendix F. Most of these words are also shown under Persian Gulf Section, and are therefore excluded from the total column.

APPENDIX I.

STATEMENT of work done by the TELEGRAPH STEAMER "PATRICK STEWART" during the year 1895-96.

DATE. From	DATE. To	PARTICULARS.
1895. April 1	1895. April 1	Arrived Bombay from Cable operations between India and Ceylon.
„ 2	„ 5	In dock undergoing repairs.
„ 6	„ 9	Hauled out of dock and left for Karachi, arriving 9th.
„ 10	Oct. 19	At moorings in Karachi Harbour.
Oct. 20	„ 24	Left for Bombay, arriving 24th.
„ 25	Nov. 8	In dock undergoing repairs and fitting new propeller, etc.
Nov. 9	„ 12	Hauled out of dock and left for Karachi, arriving 12th.
„ 13	Dec. 26	At moorings in Karachi Harbour.
Dec. 27	1896. Jan. 20	Left Karachi with Director, on annual inspection of the Persian Gulf stations, and with reliefs and stores. Repaired Bushire shore end and fault in Bushire-Jask Cable and returned to Karachi, arriving 20th.
1896. Jan. 21	„ 25	At moorings in Karachi Harbour.
„ 26	„ 30	Left Karachi with Perso-Beluch Boundary Commission for Gwadur, and returned to Karachi, arriving 30th.
„ 31	Mar. 16	At moorings in Karachi Harbour.
Mar. 17	„ 26	Left for Persian Gulf, repaired G. P. (1885) Cable between Jask and Bushire, and returned to Karachi, arriving 26th.
„ 27	„ 31	At moorings in Karachi Harbour.

ABSTRACT.	Days.
At moorings in Karachi Harbour	293
In Bombay Harbour and dock	20
At sea	53
Total days	366

APPENDIX K.

STATEMENT showing EXPENDITURE against PERSIAN GOVERNMENT GRANT for UPKEEP of TEHERAN-MESHED LINE during the year 1895-96.

RECEIPTS.	Krans.
Balance in hand, 1894-95	1,139
Persian Government grant, 1895-96	24,695
Sale of old poles, etc.	310
Total Krans	26,144

EXPENDITURE.	Krans.
Juniper and poplar poles purchased	4,700
Field Insulator cups purchased	2,679
Insulator stalks purchased	2,834
Other stores and instruments	2,627
Carriage of stores	11,862
Labour, contingencies, etc.	1,019
Total	25,721
Balance in hand	423
Total Krans	26,144

Note dated the 12th November 1896 by the Secretary, Public Works Department, India Office, reviewing the Administration Report of the Indo-European Telegraph Department for the year 1895-96.

The following statement shows the financial results of working the Department during the past five years:—

Year.	Total Capital Outlay.	Gross Receipts.	Expenditure.	Net Receipts.	Percentage of	
					Net Receipts to Capital.	Expenditure to Gross Receipts.
	R	R	R	R	R	R
1891-92	1,15,15,094	11,60,482	9,98,448	1,62,034	1·40	86·0
1892-93	1,14,59,696	13,02,516	8,64,848	4,37,668	3·80	66·3
1893-94	1,14,46,190	13,50,856	8,60,608	4,90,248	4·28	63·7
1894-95	1,14,42,885	15,70,420	8,26,897	7,43,523	6·50	52·6
1895-96	1,14,89,206	16,70,081	8,17,450	8,52,631	7·42	48·9

The capital account was increased by R46,321. This increase was due to the provision of quarters for the signalling staff at Teheran, but the Revenue expenditure will be reduced in succeeding years as the signalling clerks will no longer be paid rent allowance.

The traffic earnings of the Department show an increase of R72,248 over the previous year, due wholly to earnings in India on Homeward traffic. Miscellaneous Revenue also shows an increase of R27,413 due to the sale of old cable core in England and to increased earnings by the cable steamer for work done for other departments. The percentage of Indian traffic carried by the Department was 50·97 or 10·79 per cent. more than that drawn out of the Joint Purse under the Agreement, but the Department only carried 15·91 per cent. of trans-Indian traffic whereas 19·47 was drawn out of the purse.

Expenditure shows a decrease of R9,447 as compared with the previous year. The decrease is mainly due to fewer repairs to lines and cable steamer having been necessary. The decrease would have been larger but that so much of the cost of the new buildings at Teheran as represents the recovery made from the sale of the old buildings (R18,400) was, by order of the Government of India, debited to Revenue, the balance only being charged to capital.

The net Revenue shows an increase of R1,09,108 as compared with last year, and gives a dividend of 7·42 per cent., against 6 50, on the capital. This is the highest dividend ever earned by the Department.

The general working of the Department has been very satisfactory. No total interruption of traffic occurred on the cables, and the land lines in Persia were only totally interrupted for 5 hours 16 minutes. A very high rate of speed was maintained and the percentage of errors fell from 0·284 in 1894-95 to 0·171 in 1895-96. The mechanical and electrical condition of the cables and land lines is also satisfactory.

The Indo-European Telegraph Company's lines between London and Teheran were totally interrupted for 399 hours 22 minutes, but only nine days of this affected the Joint Purse divisions.

The Turkish lines between Constantinople and Fao are still in a very unsatisfactory condition and are practically useless for Indo-European correspondence.

The average length of "private and commercial" messages was 13·04 words against 12·67 in 1894-95 and the average for the past seven years is 13·16.

Mr. Ffinch reports that the system of automatic translation has been introduced on one circuit between Teheran and Karachi and has been found very successful. It is hoped that when the necessary instruments are ready the

system may be extended to both circuits and that a considerable reduction in the staff employed at Bushire may result therefrom (possibly eight employés).

Our relations with the Persian Authorities were very satisfactory, and although several riots and disturbances occurred in different parts of the country none of our staff were molested.

The report is a distinctly satisfactory one, almost too satisfactory in its financial aspect, for if the line can earn nearly 7½ per cent. on its large capital, the policy of reducing the existing rate for messages between Europe and India becomes apparent. The action of the Government of India's representatives at the last International Telegraph Conference at Buda Pesth this year was strongly in favour of some such reduction being made, but our endeavours, backed as we were by the British Delegates, were defeated owing to the opposition of the two telegraph companies, the Eastern aud Indo-European, but mainly of the former. It is the intention of this Depatment to raise this question again at the first suitable opportunity.

The administration of the Department reflects credit on the Director-in-Chief and on the admirable staff in Persia and the Persian Gulf, for the good financial results referred to before have been obtained side by side with increased efficiency in the actual working operations and decreased expenditure on the establishment.

A copy of the Report should be published in the *Gazette of India*.

HOME DEPARTMENT.

NOTIFICATIONS.

MEDICAL.

Calcutta, the 25th January, 1897.

No. 39.—Surgeon-Colonel G. C Ross, Inspector General of Civil Hospitals, Bengal, is granted furlough on medical certificate under Article 704, Army Regulations, India, Volume I, Part I, for eight months, with effect from the date on which he may avail himself of the leave.

SANITARY.

The 26th January, 1897.

No. 171.—The following rules for quarantine against plague which have been made by the Madras Government in exercise of the power conferred by section 1, Act I of 1870, with the previous sanction of the Governor General in Council, are published for general information.

The rules have effect from the 13th January, 1897, as a temporary measure, in the Port of Tuticorin:—

I.—The Commander of every vessel arriving from Bombay or Karachi shall, before entering the port, indicate his arrival by signal.

II.—Such Commander shall not, except as hereinafter provided, allow any communication, either with the pilot boat, except orally, or with the shore, or with any other vessel or boat in the port.

III.—Immediately on any such arrival being signalled, the Health (or other medical) Officer of the port shall go

alongside the vessel and ascertain by inquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague. If there is no case of plague on board, pratique may be granted at the discretion of the Health Officer whether the vessel carries a qualified medical officer or not. Pratique granted at Colombo will be recognised.

IV.—If the Health Officer shall have reason to believe at the time when the vessel arrives in the port that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage, and there to remain for a period of fifteen days from the day of arrival in the port; and shall further direct that, during such fifteen days, intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited.

V.—If, during the period a vessel is at the quarantine anchorage aforesaid, any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring and be subject to all the prohibitions provided for in Rule IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected as places of quarantine, there to remain for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Port Officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores or other articles as may be required by those on board Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

IX.—All vessels arriving at the port which may have communicated with infected vessels coming from Bombay or Karachi shall be subjected to the same quarantine as vessels arriving from Bombay or Karachi with plague on board.

The 28th January, 1897.

No. 248.—The following rules for quarantine against plague which have been made by the Chief Commissioner of Burma in exercise of the power conferred by section 1, Act 1 of 1870, with the previous sanction of the Governor General in Council, are published for general information.

The rules have effect from the 20th January 1897, as a temporary measure, in the Port of Akyab :—

I.—The Commander of every vessel, including junks or other native craft, arriving from Bombay or Karachi, shall, on arrival at the pilot brig, hoist a yellow flag and indicate by signal the port from which she has come.

II.—Such Commander shall not, except as hereinafter provided, allow any communication either with the shore or with any other vessel or boat except with the boat supplying a pilot from the pilot brig, and in that case communication shall be limited to receiving on board the pilot, his servant if any, and baggage.

III. The pilot shall not take such vessel higher than the stone pier, but shall anchor it there until the Health Officer of the port has visited it and ascertained by enquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague. If the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, the Heath Officer *may*, by writing under his hand to be delivered to the Commander, permit such vessel to haul down the yellow flag and proceed upwards in the port and hold free communication with the shore and with vessels and boats in port. Provided that, if the vessel has undergone since leaving Bombay or Karachi a quarantine, which is properly proved, for not less than eight days at Colombo, or some other British port, the Health Officer *shall* grant such permission as aforesaid.

If the vessel has not undergone eight days' quarantine at Colombo or some other British port since leaving Bombay or Karachi, the Health Officer *may* direct the Commander to take the vessel to the quarantine anchorage and there to remain for a period of eight days from the date of arrival in the harbour. In such case the Health Officer shall also direct the Commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is herein-

after provided for between such vessel and the shore, or other vessels and boats in the harbour.

IV.—If the Health Officer shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague he shall direct the Commander to take the vessel to the quarantine, anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further direct that, during such fifteen days, intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule III.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rules III and IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Chief Commissioner as places of quarantine, there to remain for a period of eight days, or, if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Conservator of the Port to facilitate the conveyance to all vessels in quarantine or such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.

IX.—All vessels arriving at Akyab, which may have communicated with any vessel coming from Bombay or Karachi, shall be subjected to the same quarantine as vessels arriving at Akyab from Bombay or Karachi unless the communication was held after the vessel from Bombay or Karachi was released from quarantine.

JUDICIAL.

LAND REVENUE.

Calcutta, the 23rd January, 1897.

No. 158.—The following agreement executed under section 41 of the Land Acquisition Act (I of 1894) is published for information in accordance with section 42 of that Act:—

AN AGREEMENT made the 21st day of December One thousand eight hundred and ninety-six BETWEEN THE SECRETARY OF STATE FOR INDIA IN COUNCIL (hereinafter called the Secretary of State) of the one part and THE INDIA GENERAL STEAM NAVIGATION COMPANY LIMITED a joint Stock Company with limited liability incorporated under the Indian Company's Act 1882 and having their Registered Office at No. 4 Fairlie Place in the Town of Calcutta (hereinafter called "the Company") of the other part WHEREAS the Company carry on a Steamer Service for carriage of mails passengers and goods between Kushtea and Pubna and in various other places in Bengal and Assam AND WHEREAS the Company require in connection with the said Steamer Service between Kushtea and Pubna the piece of land situate on the Northern Bank of the River Pudma in Thannah Pubna and Sub-District Surdah District Pubna and delineated in the map or plan annexed hereto and thereon marked with the letters A and B and the Company have applied to the Secretary of State through the Government of Bengal to acquire on its behalf the said land under the provisions of the Land Acquisition Act 1894 which has been agreed to upon the terms and conditions hereinafter contained NOW it is hereby agreed as follows:—

1. The Company shall forthwith deposit with the Government of Bengal the sum of Rupees One hundred and thirty as the estimated cost of and on account of the acquisition of the said land with all rights therein and the Company hereby undertake and agree on demand to pay to the Government such further sum (if any) as may be expended by the Government in and about the acquisition of the said land.

2. Upon payment by the Company of all the costs and expenses of the acquisition of the said land the Government shall convey and transfer at the cost of the Company the said land free from incumbrances to the Company.

3. In case the costs and expenses of acquiring the said land be less than the said sum of Rupees One hundred and thirty the Government shall forthwith refund to the Company the difference between the sum of Rupees One hundred and thirty and the actual costs and expenses of acquiring the said land.

4. The Company shall forthwith on the acquisition of the said land and on being placed in undisturbed possession thereof keep and maintain on the said land proper offices and waiting room for passengers and such landing stages as may be necessary in connection with their said business and such erections shall be available at all times of the year and at all state of tides for the use of passengers landing at or embarking from Pubna by the said Company's steamers and the Company shall thereafter from time to time repair or rebuild and maintain in proper state of repair the said offices room for passengers landing stages and other erections on the said land as long as the Company continue in possession thereof.

5. The Company shall allow free access to the said land offices waiting room and landing stages to all bonâ fide passengers by the steamers worked by the Company in connection with the said steamer service landing at or embarking from Pubna and to all cargo shipped in or landed from the said steamers or from flats worked therewith at Pubna.

6. The Company shall not sell or transfer the said land without the written permission of the Government of Bengal in that behalf first obtained.

7. In the event of the Company ceasing at any time to work or going into liquidation or ceasing to use the said land the Secretary of State shall be at liberty at once to take over the said land either on his own behalf or on account of the local Municipality upon payment to the Company of the price paid by the Company to the Secretary of State.

IN WITNESS whereof Secretary to the Government of Bengal on behalf of the Secretary of State for India in Council by order of the Lieutenant Governor of Bengal has hereunto set his hand and the Common Seal of the India General Steam Navigation Company Limited was hereto affixed the day and year first above written.

LAND SURVEY.

No. 215—14-2.—Mr. J Eccles, Deputy Superintendent, 1st grade, Survey of India Department, is granted furlough for eight months under Article 340 (*b*) of the Civil Service Regulations, with effect from the 20th March, 1897, or any subsequent date on which he may avail himself of it.

DENZIL IBBETSON,
Secretary to the Government of India.

FOREIGN DEPARTMENT.

NOTIFICATIONS.

Fort William, the 27th January, 1897.

No. 139-G.—The undermentioned officer is granted leave to proceed out of India, on private affairs, under the leave rules for the Staff Corps; the specified period to count from the date of being struck off duty :—

Major F. H. R. Drummond, 2nd Regiment, Central India Horse, for one year.

Pension Service, 22nd year, commenced 11th February, 1896.

No. 142-G.—Lieutenant-Colonel A. M. Muir, Indian Staff Corps, officiating Political Agent of the 1st class, is granted privilege leave for three months, with effect from the 16th February, 1897, or the subsequent date on which he may avail himself of the leave.

No 144-G.—Mr. J. C. Gaskin, Extra Assistant to the Political Resident in the Persian Gulf, is granted privilege leave for three months, with effect from the 2nd February, 1897, or the subsequent date on which he may avail himself of the leave.

The 28th January, 1897.

No. 149-G.—Mr. J. P. Sequeira, Uncovenanted Assistant and Treasury Officer to the Political Resident in the Persian Gulf, is appointed to officiate, in addition to his own duties, as Extra Assistant to the Political Resident in the Persian Gulf, with effect from the date of assuming charge and during the absence on privilege leave of Mr. J. C. Gaskin, or until further orders.

No. 353-I.B.—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879) and of all other powers enabling him in this behalf, the Governor-General in Council is pleased, in continuation of the Notification of the Government of India in the Foreign Department, No. 507-I., dated the 6th February, 1896, regarding the exercise of jurisdiction over certain lines of railway in the Mysore State, and with effect from the date of that Notification, to declare:—

(1) that Part III of the said Notification shall not apply to proceedings pending at the date thereof, which shall be carried on as if that Notification had not been issued; and

(2) that in the case of all decrees or orders passed on or before, or where the proceedings were then pending, subsequent to, the 6th February, 1896, by the Courts of the Mysore State, in exercise of the civil jurisdiction possessed by them over the lands described in the aforesaid Notification, an appeal, when the same is allowed by law, shall lie as follows, namely—

(*a*) in the case of an original decree or order of a Munsiff or a Subordinate Judge to the Court of the District Judge of the Civil and Military Station of Bangalore.

(*b*) in the case of an original decree or order of a District Judge, or of an appellate decree of a subordinate Judge or a District Judge, to the Resident in Mysore.

The 29th January, 1897.

No. 366-I.B.—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879) and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to direct that the Officer for the time being Commanding the Regiment of Central India Horse at Agar shall exercise within the territory included in a radius of five miles from the Cantonment of Agar (in all cases in which such powers may lawfully be exercised by the Governor-General in Council within that area) the powers of a Magistrate of the second class, as described in the Code of Criminal Procedure, 1882.

No. 367-I.-B.—In exercise of the powers conferred by sections 4 and 5 of the Foreign Jurisdiction and Extradition Act (XXI of 1879) and of all other powers enabling him in this behalf, the Governor-General in Council is pleased to direct that the Officer for the time being Commanding the Regiment of Central India Horse at Guna shall exercise within the territory included in a radius of five miles from the Cantonment of Guna in all cases in which such powers may lawfully be exercised by the Governor-General in Council within that area) the powers of a Magistrate of the second class as defined in the Code of Criminal Procedure, 1882: Provided that nothing herein contained shall be deemed to apply to lands which are, or may hereafter be, occupied by railways.

2. The Notification of the Government of India in the Foreign Department, No. 1770-I., dated the 27th June, 1883, is hereby cancelled.

No. 368-I.-A.—In exercise of the powers conferred by section 27 of the Cantonments Act (XIII of 1889), as applied to the Cantonment of Deesa by the Notification of the Government of India in the Foreign Department, No. 1377-I, dated the 25th April, 1890, the Governor-General in Council is pleased to declare that the provisions of section 434, sub-section (1), and section 47 of the City of Bombay Municipal Act (III Bo. C. of 1888), as extended to the Cantonment of Kirkee by the Notification of the Government of India in the Military Department, No. 87, dated the 22nd January, 1897, shall be in force in the Cantonment of Deesa, in the modified form set forth below, namely:—

"(1) In the event of the Cantonment of Deesa being at any time visited or threatened by an outbreak of any dangerous disease among the inhabitants thereof, the General Officer of the Command, if he thinks that the provisions of the law at the time in force are insufficient for the purpose, may, with the previous sanction of the Governor of Bombay in Council,—

(*a*) take such special measures, and

(*b*) by public notice prescribe such temporary regulations to be observed by the public or by any person or class of persons,

as he may think necessary to prevent the outbreak of such disease or the spread thereof.

"(2) Whoever commits a breach of any such temporary regulation prescribed as aforesaid shall be deemed to have committed an offence punishable under section 188 of the Indian Penal Code as applied to the Cantonment of Deesa by the Notification of the Government of India in the Foreign Department, No. 403-I., dated the 4th February 1885.

No. 156-G.—The services of Lieutenant-Colonel J. H Sadler, Indian Staff Corps, officiating Additional Political Agent of the 1st class, are placed temporarily at the disposal of the Government of Bombay, with effect from the date on which he was relieved of his duties as Political Agent in Kotah.

No. 157-G.—Mr. G. R. Irwin, of the Indian Civil Service, Additional Political Agent of the 1st class and Political Agent in Jhalawar, is appointed, on return from furlough, to officiate temporarily as Political Agent in Kotah, with effect from the date of assuming charge, *vice* Lieutenant-Colonel J. H. Sadler.

No. 159-G.—Mr. W E. Jardine, of the Indian Civil Service, is appointed, on return from privilege leave, to officiate as a Political Assistant of the 1st class, and is posted as Second Assistant and Assistant Secretary for Berar to be Resident at Hyderabad, with effect from the 23rd December, 1896.

No. 161-G.—The following changes are made in the graded list of the Political Department:—

Consequent on the return from special leave of Major T. C. Pears, Indian Staff Corps, Political Agent of the 2nd Class, and his appointment (hereby made) to officiate as a Political Agent of the 1st Class, and with effect from the 24th October 1896—

Mr. A. L. P. Tucker, of the Indian Civil Service, officiating Political Agent of the 1st Class, reverts to officiating Political Agent of the 2nd Class.

CANTONMENTS.

REGULATIONS.

No. 118.—In exercise of the powers conferred by section 25 of the Cantonment Act (XIII of 1889), the Governor General in Council is pleased to extend to the Cantonment of Ahmedabad the provisions of section 434, sub-section (1) and section 473 of the City of Bombay Municipal Act (III Bo. C. of 1888) in the modified form set forth below, namely :—

(1) In the event of the Cantonment of Ahmedabad being at any time visited or threatened by an outbreak of any dangerous disease among the inhabitants thereof, the General Officer of the Command, if he thinks that the provisions of the law at the time in force are insufficient for the purpose, may, with the previous sanction of the Local Government,

(*a*) take such special measures ; and

(*b*) by public notice, prescribe such temporary regulations to be observed by the public or by any person or class of persons,

As he may think necessary to prevent the outbreak of such disease or the spread thereof.

"(2) Whoever commits a breach of any such temporary regulation prescribed as aforesaid shall be deemed to have committed an offence punishable under section 188 of the Indian Penal Code." XLV of 1860.

No. 119.—It is proposed, in exercise of the powers conferred by sections 25, 26 and 27 of the Cantonments Act (XIII of 1889) and of all other powers in this behalf, to make for, and apply to, the cantonment of Purandhar, the rules and enactments published with the Notification of the Government of India in the Military Department, No. 1070, dated the 25th

September, 1896, and notice is hereby given that the draft will be taken into consideration by the Governor General in Council after the first day of April, 1897.

2. Any objection or suggestion which may be received from any person with respect to the draft before the date above mentioned will be considered by the Governor General in Council.

No. 120.—The following letter to Local Governments and Administrations, relating to the draft Cantonment Rules, which were published in the *Gazette of India* with Military Department Notification No. 1070, dated the 25th September, 1896, is published for general information :—

No. 190-C., dated the 23rd January, 1897.

From—MAJOR-GENERAL P. J. MAITLAND, C.B., Secretary to the Government of India, Military Department,

To—All Local Governments and Administrations.

In continuation of Military Department letter No 2311-C., dated the 10th December, 1896, relative to the Draft Cantonment Rules which were published in the *Gazette of India* with Military Department Notification No. 1070, dated the 25th September, 1896, I am directed to state that, although the period fixed under the Act by the Notification referred to has expired, any objection or suggestion which may be received from any person with respect to the draft before the 1st April, 1897, will be considered by the Governor General in Council.

2 I am to request that this letter may be published for general information in the local official Gazette.

FURLOUGH AND LEAVE.

No. 121—The practice of issuing parchment certificates on retirement, as required by paragraph 19 of G. G. O. No. 134 of 1895, having been discontinued, the last sentence of that paragraph is expunged.

No. 122—The following addition is made to paragraph 12 of G G O. No. 134 of 1895 after the full stop in line 11 :—

"Similar statements of service should also be sent to the India Office in the case of officers (including officers of Royal Engineers) proceeding out of India on furlough or leave granted under Civil Leave Rules."

No. 38.—The following is published for general information:—

No. 74 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT.—RAILWAY TRAFFIC.

Calcutta, the 21st January 1897.

General Rules of 1895 for working railways open for traffic.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 267, dated the 11th June 1890, appointing the Director General of Railways as the officer who, under section 47 of the Indian Railways Act, 1890, is to make General Rules for railways administered by the Government.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India Circular No. 6 Railway, dated the 14th March 1895, and the General Rules, therewith promulgated, for all open lines of railway in British India administered by the Government.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India Circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Government of India, Public Works Department, notification No. 301, dated the 9th July 1896, publishing—in the *Gazette of India* of the 11th July 1896—the Government of India Resolution No. 515 R. T., dated the 6th July 1896.

Government of India, Public Works Department, notification No. 310, dated the 15th July 1896, publishing—in the *Gazette of India* of the 18th July 1896—the Government of India Resolution No. 528 R. T., dated the 10th July 1896.

Government of India, Public Works Department, notification No. 325, dated the 22nd July 1896, publishing—in the *Gazette of India* of the 25th July 1896—the Government of India Resolution No. 535 R. T., dated the 14th July 1896.

Government of India, Public Works Department, notification No. 453, dated the 27th October 1896, publishing—in the *Gazette of India* of the 31st October 1896—the Government of India Resolution No. 835 R. T., dated the 23rd October 1896.

Letter from the Director General of Railways, No. 7 T., dated the 5th January 1897.

OBSERVATIONS.—The Director General of Railways has applied that the General Rules for working open lines of railway in British India administered by the Government, which have been published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circular No. 3 Railway, dated 22nd May 1896, and published under Public Works Department notification No. 257, dated the 28th May 1896 (*vide* the *Gazette of India* of the 30th May 1896), with such other modifications as may, for the time being, be in force on the Oudh and Rohilkhand railway, may be made applicable to the Rae Bareli-Benares section of the Lucknow-Rae Bareli-Benares railway from the date on which it may be opened for the public carriage of passengers, animals or goods.

RESOLUTION.—The Governor General in Council is pleased to sanction the application to the Rae Bareli-Benares section of the Lucknow-Rae Bareli-Benares railway, from such date as the branch is opened for the public carriage of passengers, animals or goods, of the General Rules which may, for the time being, be in force on the Oudh and Rohilkhand railway.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3), of the Indian Railways Act, 1890; also that the General Rules cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution be communicated to the Director General of Railways for information and guidance.

No. 40.—The following is published for general information :—

No. 91 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT.—RAILWAY TRAFFIC.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India circular No. 6 Railway, dated the 12th March 1895, and the General Rules, therewith promulgated, for all open lines of railway in British India administered by the Government.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Letter from the Government of Bengal, No. 73 T. R., dated the 17th September 1895, forwarding letter from the General Manager and Chief Engineer of the Darjeeling Himalayan railway, No. G. 2957, dated the 28th August 1895.

Letter from the Government of Bengal, No. 1277 R., dated the 25th November 1896, forwarding letter from the General Manager and Chief Engineer of the Darjeeling Himalayan railway, No. G. 3942, dated the 19th November 1896, and its enclosures.

Letter from the Government of Bengal, No 1465 R., dated the 31st December 1896, forwarding extracts from letter from the General Manager and Chief Engineer of the Darjeeling Himalayan railway, No. G. 4332, dated the 19th December 1896.

OBSERVATIONS.—The General Manager and Chief Engineer of the Darjeeling Himalayan railway has applied that the accompanying General Rules, Part I, together with Part II of the General Rules of 1895 for working open lines of railway in British India administered by the Government—which latter was published, in the *Gazette of India* of the 23rd March 1895, under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895—as modified by the Government of India circular No. 3 Railway, dated 22nd May 1896, which was published in the *Gazette of India* of the 30th May 1896, under Public Works Department notification No. 257, dated the 28th May 1896, may be made applicable to the Darjeeling Himalayan railway.

RESOLUTION.—The Governor General in Council is pleased to sanction, with effect from the 1st February 1897 and in supersession of the rules now in force, the application to the Darjeeling Himalayan railway of the accompanying General Rules, Part I ; also Part II of the General Rules for working open lines of railway in British India, which are cited in the foregoing observations, together with the further modifications of the latter appended hereto.

ORDER.—Ordered that this resolution and its enclosure, with the accompanying General Rules, Part I, be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3), of the Indian Railways Act, 1890; also that the same General Rules, together with Part II of the Rules of 1895 cited in the foregoing observations,—which have already been published in the *Gazette of India*—and the several modifications thereof, be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution and its enclosures be communicated to the Government of Bengal, and to the Consulting Engineer to the Government of India for Railways, Calcutta, for information and guidance.

[Enclosure No. 1 to the Government of India No. 91 R. T., dated the 23rd January 1897.]

PART I.

Rules for the guidance of Darjeeling-Himalayan railway officials.

CONTENTS.

CHAPTER I.

PRELIMINARY.

RULES.

1. Definitions.

CHAPTER II.

2. Systems of working trains.

CHAPTER III.

RULES APPLICABLE GENERALLY TO ALL SYSTEMS OF WORKING TRAINS.

3. Time.
4. Following trains, working on certain systems.
5. Double and single line working.
6. Running of trains or trollies.
7. Pushing engine.

CHAPTER IV.

WORKING OF TRAINS ON THE "LINE-CLEAR AND CAUTION MESSAGE" SYSTEM.

8. Procedure before allowing train to leave station.
9. Who to despatch telegrams and issue certificates and written permissions.
10. Time for despatching telegram.
11. Delivery of certificate or written permission to Driver.
12. Examination of facing-points of approaching train.
13. Cancellation of telegram.
14. Forms for telegrams, certificates and written permissions and books of forms.
15. Special numbering of telegrams.
16. Contents of telegrams.
17. Writing-up and signing of telegrams, certificates and permissions.
18. Telegrams, certificates and permissions not to be written or signed before required.
19. Telegrams to be wholly written out before being despatched or acted upon.
20. Time for keeping telegrams, certificates and permissions.
21. Signals.
22. Working of trains in case of accident.

(*Contents.*)

CHAPTER V.

WORKING OF TRAINS ON THE COMBINED "LINE-CLEAR AND PILOT GUARD" SYSTEM.

RULES.

23. Application of system.
24. Following trains.
25. Pilot Guard's dress or badge.
26. Trains to be accompanied, or personally started, by Pilot Guard.
27. Pilot Guard's ticket.

CHAPTER VI.

ADDITIONAL RULES AS TO WORKING OF BALLAST TRAINS.

28. Rules applicable to ballast trains.
29. Permission required to running of ballast train on line.
30. Permission before leaving siding.
31. Time of running on line.
32. Working of ballast train at night, or in thick or foggy or tempestuous weather.
33. Guard to accompany ballast train; his qualifications.
34. Coolies.
35. Pushing engine.
36. Ballast train stopping between stations.
37. Ballast train running through.
38. Securing of wagons left outside station limits.
39. Ballast train to be kept clear of other trains.
40. Persons employed on permanent-way or works to assist in working signals.
41. Ballast trains and other impediments on main line when to be removed.

CHAPTER VII.

SIGNALS AND TRAIN-LIGHTS.

Classes of signals.

42. Classes of signals.
43. Hand signals.
44. Temporary signals.

Signals for shunting.

45. Signals for shunting and locking of scotch blocks.
46. Signals of Platelayers and other workmen employed on the permanent-way.

Signals generally.

47. Signalmen to have flags and lamps.
48. Signals to be kept ready for use.
49. Night signals when to be used by day.
49*a*. Signal lamps.
49*b*. Disc signal to be kept at danger.
50. "Danger" signal to be shown in case of shunting or other obstruction.
51. Duties of Signalman in case of obstruction.
52. Duties of Signalman observing any thing wrong with train.

(*Contents.*)

RULES.

Directions to Drivers and others as to observance of signals.

53. Driver and Fireman to obey signals.
54. Engine entering or crossing main line.
55. Driver not to trust entirely to signals.
56. Signal when to be regarded as at "danger."
57. Signal at "danger" or "proceed."
57*a*. Disc signal at "danger."
57*b*. Defective signals.
57*c*. Repair of signals.
57*d*. Procedure in case of signals being defective.

Train-lights.

58. Wells lights when to be used and use of scotch blocks.

CHAPTER VIII.

POINTS.

59. Points to be kept clear.
60. Report when points damaged.
61. Closing of points.
62. Engine entering or crossing main line.
63. Pointsman to have flags and lamps.
64. Duties of Pointsman in case of obstruction.
65. Duties of Pointsman observing any thing wrong with train.
66. Pointsman not to leave points.
66*a*. Reverses.
66*b*. Working of Reverses.

CHAPTER IX.

ADDITIONAL RULES AS TO THE MOVEMENT OF ROLLING STOCK AND THE DUTIES OF RAILWAY SERVANTS IN CONNECTION THEREWITH.

67. Engine running tender foremost.
68. Manning of engine in motion.
69. No unauthorised person to ride on engine or tender.
70. Driver to assist in forming train.
71. Engine when to be placed in front of train.
72. Driver, before starting, to satisfy himself as to condition of engine and line.
73. Whistle to be sounded before moving engine.
74. Whistle when to be sounded on approaching or passing through a station.
75. Whistle to be sounded when approaching curves.
76. Duties of Driver as regards engine lamps.
77. Management of train by Driver.
78. Limits of speed generally.
79. Limit of speed through facing-points.
80. Regulation of speed.
81. Making up time.
82. Driver to leave hose or water-crane clear of line and properly secured.
83. Fireman to obey, and be responsible jointly with, Driver.
84. Guards and brake-vans.
85. Guard to ride in his own brake-van.
86. Railway servants not to ride in brake-van or luggage van.
87. Passengers and others where to ride.
88. Railway servants to have ticket or pass.
89. Communication cord.
90. General duties of Guard and Driver in charge of a train.

RULES.

91. Train, passengers and property in charge of Guard.
92. Driver's and Guard's time-pieces.
93. Drivers and Guards from whom to receive orders.
94. Subordinate Guards to obey Head Guard.
95. Guards and Drivers to carry rules, time tables, equipment and stores.
96. Drivers to obey orders of Guard and Station Master.
97. Guard's or Jemadar Brakesman's signal before starting train.
98. Exchange of signals between Guard and Driver.
99. Assistance from Guards' brakes.
99*a*. Brakes on steep incline.
100. Driver and Fireman to look back.
101. Guard, Driver and Fireman to keep a look-out.
102. Load of trains.
103. Wagons and trucks not to be over-loaded.
104. Loading of large articles.
105. Travelling cranes.
106. Duties of Guard as to loading of wagons and trucks.
107. Loading and other operations obstructing line.
108. Attaching and detaching vehicles and fire in train.
109. Examination of trains.
110. Removal of vehicle pronounced to be unfit.
111. Report as to, and oiling or removal of, defective vehicle.
112. Vehicles which have been off the line.
113. Time of starting passenger train or mixed train.
114. Passenger train not to stop where not advertised to call.
115. Passenger train or mixed train arriving at station.
116. Moving passenger train or mixed train after it has been stopped at station.
117. Two trains not to enter station at same time on a single line.
118. Train obscured by steam or smoke.
119. Duties of Driver and Guard observing obstruction, etc., on the line.
120. Report to stations in case of obstruction to train
121. Driver observing train following too closely.
122. Train parting.
123. Train stopped on single line.
124. Engine stopped on line
125. Portion of train left on line.
126. Protection of trains approaching train stopped, or portion of train left, on line.
127. Danger to be avoided in shunting or crossing.
128. Shunting on incline.
129. Vehicle escaping from a station.
130. Fly shunting.
131. Securing vehicles in sidings.
132. Searching of vehicles shunted off at station.
133. Closing of windows of empty compartments on siding.
134. Private vehicles entering main line.
135. Driver not to leave engine when on duty.
136. Guard not to leave train till handed over.
137. Duties imposed on Guard to be undertaken by Driver of train not provided with Guard.

(*Contents.*)

RULES.

CHAPTER X.

PERMANENT-WAY AND WORKS.

138. Responsibility of, and reports by, Inspector of Permanent-way.
139. Reports by railway servants of failure of works.
140. Inspection of permanent-way and works.
141. Ganger in each gang.
142. Supply of gauge, tools and implements to Gangers and signals and lamps to gangs.
143. Inspection of such gauge, tools, implements, signals and lamps.
144. Responsibility of Ganger as to signals.
145. Inspector of Permanent-way to keep register of Gangers.
146. Ganger to collect his men.
147. Inspector of Permanent-way to see to observance of rules.
148. Telegraph posts and wires, and signal wires.
149. Cleaning of signals and points.
150. Keeping of permanent-way materials and tools and implements.
151. Replacing of defective materials.
152. Line to be kept clear and safe and fencing in repair.
153. Flood.
154. Fire.
155. Permission required before putting in points or crossings.
156. Work involving danger to trains or traffic.
157. Ordinary work necessitating showing of a "danger" signal.
158. Use of signals in other cases, when line is unsafe.
159. Ordinary work outside station limits, necessitating showing of a "proceed" signal.
160. Time for performing work.
161. Work to be stopped when train is approaching.
162. Lifting permanent-way.
163. Ballast.
164. Blasting.
165. Placing of lorries and trollies on the line, and responsibility for them.
166. Lorry or trolly when to be run; when lights to be used.
167. Protection of lorry or trolly on line and rules for working trollies.
168. Removal of lorries and trollies when not in use.
169. Lorries or other impediments on main line when to be removed.
170. Work when to be completed.

RULES.

CHAPTER XI.

ADDITIONAL RULES AS TO THE DUTIES OF RAILWAY SERVANTS IN CONNECTION WITH THE WORKING OF THE RAILWAY GENERALLY.

171. Safety of public.
172. Railway servants to assist in case of accident or obstruction.
173. Railway servants to report occurrences affecting safe or proper working of railway.
174. Special trains without notice.
175. Hours of attendance for duty.
176. Station Masters to be under Traffic Branch.
177. Subordination of railway servants to Station Master; his general responsibility.
178. Station Master's responsibility as to station machinery and points, etc.
179. Daily inspection of station.
180. Articles found on railway or in vehicle to be delivered to nearest Station Master.
181. Unprotected lights.
182. Supply of copy or translation of rules.
183. Railway servants to acquaint themselves with rules.
184. Station Masters, Inspectors of Permanent-way and Gangers responsible that their subordinates have made themselves acquainted with rules.
185. All railway servants to assist in carrying out rules, and to report breaches.

CHAPTER XII.

CONDUCT OF RAILWAY SERVANTS.

186. Railway servants to produce rules, and apply, when necessary, for a new copy.
187. Prompt obedience to orders.
188. Absence from duty.
189. Notice before leaving service.
190. Surrender of railway property on leaving service
191. Certain railway servants not to obtain spirituous or fermented liquor at station.
192. Conduct generally.
193. Station Master to report misconduct and forward particulars of complaint.

CHAPTER XIII.

PENALTIES FOR BREACHES OF RULES BY RAILWAY SERVANTS.

194. Penalties for breaches of rules by railway servants.

(Part I, Chapter I.—Preliminary.—Rule 1. Chapter II.—Systems of working trains.—Rule 2. Chapter III.—Rules applicable generally to all systems of working trains.—Rules 3 & 4.)

PART I.

CHAPTER I.

Preliminary.

DEFINITIONS. 1. In these rules, unless there be something repugnant in the subject or context,—

(1) "main line" means the line ordinarily used for running trains through and between stations on any part of a railway;

(2) "train" means an engine with or without vehicles attached;

(3) "passenger train" means a train intended solely or mainly for the carriage of passengers and other coaching traffic;

(4) "goods train" means a train intended solely or mainly for the carriage of general merchandise, minerals, materials or live-stock;

(5) "mixed train" means a train intended for the carriage of both passengers and goods or of passengers, animals and goods;

(6) "ballast train" means a train intended for the carriage of ballast, and includes a train intended for the carriage of stone, material or fuel when picked up or put down either between stations or in station yards;

(7) "ordinary train" means a train, whether passenger, goods or mixed, which is entered in the working time tables;

(8) "special train" means any train which is not an ordinary train;

(9) "Guard" includes a Brakesman and any other railway servant who may for the time being be performing the duties of a Guard;

(10) "Driver" means the person in charge for the time being of a working locomotive engine;

(11) "system of working" means the system adopted for the time being for the working of trains on any portion of a railway in pursuance of rule 2;

(12) "station" means any place—

(*a*) at which traffic is booked and authority is given under the system of working for trains to proceed, or

(*b*) at which authority is given under the system of working for trains to proceed;

(13) "station limits" include—

(*c*) all traffic lines and premises within 250 feet, above and below the upper and lower points of any station. At stations, at which there are no lower points, the lowest limits will be 250 feet from the centre of the station building;

(14) "Station Master" means the person on duty who is for the time being responsible for the working of traffic within station limits, and includes—

(*d*) an Assistant Station Master,

(*e*) a Clerk in charge, and

(*f*) any other person appointed to the charge of a station;

(15) "Inspector of Permanent-way" means the railway servant performing the duties of an Inspector of Permanent-way by whatever designation he may be known on any particular railway;

(16) "Ganger" means the railway servant in charge of a gang of Platelayers or other workmen employed on the permanent-way, by whatever designation he may be known on any particular railway;

(17) "authorised officer" means the person who is duly empowered by general or special order of the railway administration, either by name or by office, to issue instructions or to do any other thing of the nature referred to in each case.

NOTE.—Such order shall not empower an authorised officer to depute the power conferred upon him thereby to any other person.

(18) "special instructions" mean instructions issued from time to time by the authorized officer in respect to particular cases or special circumstances;

(19) "banner flags" mean red or green flags stretched across the line of rails or held by upright supports fixed in the ground;

(20) "write" with its grammatical variations and cognate expressions, includes "print" and "lithograph" with their grammatical variations and cognate expressions;

(21) words defined in the Indian Railways Act, IX of 1890, have the meanings assigned to them in that Act;

(22) Words importing the masculine gender include females; and

(23) words in the singular include the plural and *vice versâ*.

CHAPTER II.

Systems of working trains.

Systems of working trains. 2. All trains working between stations must be worked on one of the following systems, namely:—

"Line-clear and caution message" or "Combined Line-clear and Pilot Guard system;"

in accordance with the rules laid down in Chapters IV and V, respectively.

CHAPTER III.

Rules applicable generally to all systems of working trains.

Time. 3. The working of trains between stations shall be regulated by Madras time, which must be sent to all the principal stations on the railway.

Following trains, working on certain systems. 4. No train shall be allowed to leave a station to follow another train on the same line,—

(*a*) in the case of a passenger train to follow a goods train, or a goods train to follow a slow passenger train, unless—

(*i*) the Driver has been properly warned of the time of departure of the

(Part I, Chapter III.—Rules applicable generally to all systems of working trains.—Rules 5-7. Chapter IV.—Working of trains on the "Line-clear and caution message" system.—Rules 8-11.)

preceding train and of the place at which it will next stop, and

(*ii*) an interval of seven minutes (or, if the distance to the next station in advance exceeds ten miles, such longer interval as shall be prescribed by special instructions) has elapsed since the departure of the preceding train, or

(*b*) in any other case, unless either—

(*iii*) it has been ascertained that the preceding train has arrived at the next station in advance, or

(*iv*) an interval of seven minutes has elapsed since the departure of the preceding train.

5. (1) Where there is a double line, every train must be run on the left hand line:

Provided that if one of the lines should be blocked so as to necessitate the passing of all Up and Down trains on a single line, such special instructions as may be necessary shall immediately be issued for establishing single-line working.

(2) Where trains are being run on a single line, no train shall be allowed to leave one station for another until it has been ascertained that the line between such stations is clear of trains coming from the opposite direction and, except as contemplated in rule 4, of all other known impediments.

(*a*) When telegraphic communication is interrupted between any two stations, and the usual "Line-clear" message cannot, in consequence, be obtained direct, every effort must be made to obtain it by communicating through the station next beyond or next back, but should the interruption be of such a nature as to render this impossible, the Station Master may allow a train to proceed under a caution order (green form), provided that no train is due in the opposite direction, and that the Station Master has reason to believe that the line in the direction in which the train is proceeding is clear. This caution order to proceed must state fully the reason why "line clear" has not been obtained, and must restrict the speed to 7 miles an hour.

6. No train or trolly shall be allowed to leave a station unless previous notice has been given, when practicable, to all other stations concerned.

7. (1) No engine shall be allowed to push any vehicle except—

(*a*) within station limits, or

(*b*) as provided in rule 35, or

(*c*) in accordance with special instructions.

(2) Trains may be pushed on the Reverses on receiving a caution signal from the pointsman in charge. The speed to be limited to six miles an hour. All brakesmen must be on the alert.

CHAPTER IV.

Working of trains on the "Line-clear and caution message" system.

Procedure before allowing train to leave station.

8. (1) Where trains are worked on the "Line-clear and caution message" system, no train shall be allowed to leave one station for another unless it has been ascertained by telegram that the line on which the train is to travel between the two stations either—

(*a*) is absolutely clear of trains and all other known impediments, or

(*b*) is occupied only by trains running in advance in the same direction at time intervals.

(2) In case (*a*) a line-clear certificate or a written permission to proceed, and in case (*b*) a caution certificate or a written permission to proceed with caution, must be issued, and the Driver shall not move the train from the station unless he has such certificate or permission in his possession.

(3) In case (*b*) the following conditions must also be observed, in addition to those prescribed in rule 4, namely:—

(*c*) permission must first be obtained, in each case, from the station to which the train is proceeding,

(*d*) the time at which the preceding train left the station must be entered in the caution certificate or written permission, and

(*e*) if a flag station, or a station without telegraphic connection, intervenes between the two stations, such special instructions as may be given must be followed.

Who to despatch telegrams and issue certificates and written permissions.

9. No telegram shall be despatched, and no certificate or written permission shall be issued, under rule 8, clause (1) or clause (2), except by the Station Master or by some railway servant appointed in this behalf by the authorised officer.

Time for despatching telegram.

10. Except from train terminal stations, no telegram enquiring whether any train may run shall be despatched from any station under rule 8, clause (1), until advice has been received at that station that such train has left the station in rear:

Provided that where, in consequence of the short distance between the two said stations, the train might be delayed by the observance of this rule, such telegram may be despatched at any time prescribed by special instructions.

Delivery of certificate or written permission to Driver.

11. (1) Every certificate or written permission issued at a station under rule 8, clause (2), shall be delivered, by the Station Master or by some railway servant appointed in this behalf by the authorised officer,—

(*a*) if the train runs through the station without stopping, to the Driver, and

(*b*) if the train stops at the station, in the case of passenger trains, to the Guard in charge of the train, and in the case of goods trains, to the Driver.

(Part I, Chapter IV.—Working of trains on the "Line-clear and caution message" system.—Rules 12-16.)

(2) When any such certificate or written permission is delivered to the Driver under clause (*a*) of this rule, a duplicate shall be given in case of passenger trains to the Guard in charge of train.

(3) When any such certificate or written permission is delivered to the Guard in charge of the train under clause (*b*) of this rule, it must be either—

(*c*) handed to the Driver by the Guard, or

(*d*) countersigned by the Guard and then handed to the Driver either by the Station Master or by some railway servant appointed in this behalf by the authorised officer.

(4) When any such certificate or written permission is delivered to the Driver under clause (*a*) of this rule, the Station Master shall be responsible—

(*e*) that it is properly filled up,

(*f*) that the date and time of the receipt of the line-clear or caution telegram upon which it is based are noted thereon,

(*g*) that it applies to the particular train to which such telegram referred, and

(*h*) that it is signed in full and in ink.

(5) When any such certificate or written permission is delivered to the Guard in charge of the train under clause (*b*) of this rule, the Guard must, before it is handed to the Driver, satisfy himself on the several points mentioned in clause (4) of this rule.

(6) If the train stops at the station, the Driver must, before starting, satisfy himself, so far as he may be able to do so, on the several points mentioned in clause (4) of this rule.

(7) If the train stops at the station,—

(*i*) a certificate or written permission issued under rule 8, clause (2), shall not, except in accordance with special instructions, be handed to the Driver until the train is ready to start, and

(*j*) if the train is waiting to pass another train, such certificate or written permission shall not be handed to the Driver until the whole of the latter train has come in and is clear of the points.

Examination of facing-points of approaching train.

12. When a train is to run through any station without stopping, the Station Master of that station, or some railway servant appointed in this behalf by the authorised officer, must proceed to the facing-points and satisfy himself that they are properly set and either secured or manned.

Cancellation of telegram.

13. (1) Any telegram despatched under rule 8, clause (1), may, if necessary, be cancelled.

(2) When a line-clear or caution telegram has been despatched from any station, conveying permission for a train to proceed to that station, and such telegram is subsequently cancelled, no train shall be allowed to leave that station in the opposite direction on a single line until a telegram has been received at that station, acknowledging such cancellation and stating that the train for which permission to proceed had been given will be detained.

Forms for telegrams, certificates and written permission and books forms.

14. (1) All telegrams despatched, and certificates and written permissions issued, under rule 8, clause (1) or clause (2), shall be written on forms specially provided for the purpose by the railway administration.

(2) Such forms shall be bound up in books, and kept at each station by the Station Master or by some railway servant appointed in this behalf by the authorised officer.

(3) Each of such books in use at a station shall contain a certificate, signed by the person by whom the book is kept, showing the number of pages contained therein.

(4) The pages of each such book shall be progressively numbered in print; and when any telegram, certificate or permission written on any page is cancelled, the whole page, together with the counterfoil, must be marked as cancelled, and the page must be carefully preserved by doubling it on the counterfoil.

Special number in telegram.

15. (1) In addition to the progressive printed number, every telegram despatched under rule 8, clause (1), from each station to stations on each side must be specially numbered from midnight to midnight, commencing with number one to each station; and such special number must be treated as a portion of the telegram, and entered on the counterfoil. This number must also be entered in the Log Book.

(2) When a telegram is in reply to another, each station's number must be quoted at the beginning of the reply telegram.

(3) When a telegram bears reference to a prior telegram to the same station, the number of such prior telegram must be quoted at the beginning of the latter telegram.

Content of telegr

16. (1) Every telegram despatched under rule 8, clause (1), must distinctly describe the train to which it relates, as, for instance, "No. 10 Down Mail," or "No. 1 Up Goods, and so on.

(2) For every train a separate enquiry and reply must be sent; and an enquiry telegram and a reply telegram shall never be written on one form.

(3) Every telegram despatched from a station under rule 8, clause (1), enquiring whether the line is clear, must specify the time at which the last train in the opposite direction arrived at that station.

(4) There are four kinds of train messages:—

A.—Line-clear enquiries.
B.—Line-clear messages.
C.—In reports.
D.—Out reports.

These must be written on the forms specially provided for the purpose.

A—is the enquiry message from the station at which an engine or train is waiting or is expected, asking the station next beyond, if the line is clear for the train to proceed and must be worded thus—

From—S.M.	To—S.M.
G.M.	D.J.

No. 3.—Is line clear for No. 5 Up Mail left S.A.D. at 14-20 hours. No. 10 Down Mail arrived at 10-33 hours

This message must be written by the Station Master in the Log Book printed in red for Up

(Part I, Chapter IV.—Working of trains on the "Line-clear and caution message" system.—Rule 16.)

stations, and in black for Down stations, and in all cases he must state on the message the last train that has arrived from the opposite direction. The Log Book must be sent to the signaller who will signal the message, noting on it the time received by him and the time despatched; he will then initial the entries and return the book to the Station Master.

When a line-clear reply has been received, it must be written for Up stations in the red Log Book (Form T 1A) and for Down stations in the black Log Book (Form T 1B). The Station Master, when he receives a "Line-clear" from the signaller, must sign across the original message in the Log Book and satisfy himself that it is correct, before handing it to the Guard or Driver.

Line-clear Log Books for Up stations are printed in red and for Down stations in black.

B—is the "Line-clear" or reply from the station to which the enquiry message has been sent; it must be worded thus—

From—S.M.	To—S.M.
D.J.	G.M.

No. 3—Your No. 5—Line is clear for No 5 Up Mail.

Line-clear messages must, after being copied into the Log Book, be written for Up trains on the red form and for Down trains on the white form. The line-clear message must be written in the Log Book at the station where it is given by the Station Master who gives it.

C—The "In report" is an entry made by the Station Master in the "Arrival" column of the Train's arrival and departure notice book (Form T 6)—showing the time and train arrived at his station. The book containing this entry must be sent by the Station Master, immediately a train arrives, to the signaller, who must, at once, telegraph the information to the station from which the train has just come, initial the entry, showing against it time despatched, and return the book to the Station Master.

A signaller on receipt of an "In report" must enter it in the "Time arrival" column of his "In report book" (Form T 7) which he must at once send to the Station Master, who will, after copying the entry into "Arrival at next station" column of the Train's arrival and departure notice book, initial the entry in the "In report book" and return it to the signaller.

NOTE.—The above must be strictly acted up to, in addition to the rule already laid down.

In the case of slips, etc., blocking the line, "Out report" should, as usual, be sent to the station beyond the slip.

D—The "Out report" is an entry made by the Station Master in the "departure" column of the Train's arrival and departure notice book, showing the time the train left his station. The book containing this entry must be sent by the Station Master directly the train has started to the signaller, who must immediately despatch the information to the station to which the train is proceeding and then initial the entry, showing the time the message was signalled, and return the book to the Station Master.

A signaller on receipt of an "Out report" must enter it in the "Time left" column of his "Out report book" (Form T 8) which he must at once send to the Station Master, who will initial the entry and return the book to the signaller after copying the information into the "departure from next station" column in his Train's arrival and departure notice book.

When a "Line-clear" message has been given for a train by one station to another and it is afterwards found necessary to cancel it, in order to allow a train running in an opposite direction to take precedence, an enquiry message, worded thus, must be sent :—

From—S.M.	To—S.M.
G.B.E.	T.D.H.

No 4.—Cancel my No. 3.—Detain No. 3 Up Goods at yours and give "line clear" for No. 4 Down Goods left M.H.N. at 11-16. No. 1 Up arrived at 9-4.

If No. 3 Up Goods for which G.B.E., in the first instance, gave "line clear" had not started from T.D.H. before the receipt of this message, Station Master, T.D H., would write "cancelled" across the face of the "line clear" granted for No. 3 Up Goods, return the message to signaller and reply to G.B.E. as under :—

From—S.M.	To—S.M.
T.D.H.	G.B.E.

No. 4.— Your No. 4.—No. 3 Up Goods is and will be detained here. Your No. 3 cancelled. Line is clear for No. 4 Down Goods.

Station Master, T.D H., would then again ask "line clear" for No. 3 Up Goods, which message he would word thus :—

From—S.M.	To—S.M.
T.D.H.	G.B.E.

No. 5.—Your No 4 and my No 4.—On arrival of No. 4 Down Goods here, will line be clear for No. 3 Up Goods waiting here?

to which enquiry, Station Master, G.B.E., would reply as follows :—

From—S.M.	To—S.M.
G.B.E.	T.D H.

No. 5.—Your No. 5.—On arrival of No. 4 Down Goods at yours, line will be clear for No. 3 Up Goods.

This message however would be a "conditional line clear" and could not be made use of by Station Master, T.D.H., until he had certified across the face of the message that No. 4 Down Goods had arrived at his station.

When one train has to follow another cautiously, the messages should be worded as follows :—

From—S.M.	To—S.M.
G.B.E.	T.D.H.

No. 6.—Your No. 5.—May No 2 Down Goods follow No. 4 Down?

From—S.M.	To—S.M.
T.D.H.	G.B.E.

No. 7.—Your No. 6.—No. 2 Down Goods may follow No. 4 Down cautiously.

The message received from the preceding station must be written in the Log Book and sent to the Station Master, who will write the order on Form T4 endorsing on it the time of departure of the preceding train. The Driver's signature as also the Guard's, if there is one, must be obtained on the counterfoil. The interval of time as laid down in Chapter III of the Book of General Rules must be observed.

(Part I, Chapter IV.—Working of trains on the "Line-clear and caution message" system.—Rules 7-22. Chapter V.—Working of trains on the combined "Line-clear and Pilot guard" system.—Rules 23-27. Chapter VI.—Additional rules as to working of Ballast trains.—Rule 28.)

Writing-up and signing of telegrams, certificates and permissions.

17. All telegrams despatched, and certificates and written permissions issued under rule 8, shall be written up in ink or with some other indelible substance, and shall be signed in full by the person authorised to despatch or issue the same.

Telegrams, certificates and permissions not to be written or signed before required.

18. No telegram despatched, or certificate or written permission issued, under rule 8, clause (1) or clause (2), shall be written out, either in full or in part, or signed, before it is required for use.

Telegrams to be wholly written out before being despatched or acted upon.

19. No part of a telegram framed under rule 8, clause (1), shall be despatched or acted upon until the whole telegram has been written out, except in view to the prevention of an accident or in some other case of emergency.

Time for keeping telegrams, certificates and permissions.

20. No telegram despatched, or certificate or written permission issued, under rule 8, clause (1) or clause (2), shall be destroyed in less than a fortnight after such despatch or issue.

Signals.

21. In working trains on the "Line-clear and caution message" system, Hand or other signals must be used, whenever and wherever occasion may require.

Working of trains in case of accident.

22. In case of accident to the line or to any train, or of failure or interruption of telegraphic communication, trains must be worked between stations in accordance with special instructions.

CHAPTER V.

Working of trains on the combined "Line-clear and Pilot guard" system.

Application of system

23. This system will only be used when trains are booked to cross at intermediate stations where there is no telegraph office.

Following trains.

24. Trains may follow one another in the same direction between stations subject to the conditions prescribed in this Chapter, in addition to those prescribed in rule 4.

Pilot Guard's dress or badge.

25. The Pilot Guard must be distinguished by a red badge.

(*a*) No train shall be started from a station unless the Driver has, in his possession, a line-clear certificate or caution certificate, and unless the Driver sees that the train is accompanied by, or that the signal for starting is given personally by the Pilot Guard wearing the badge prescribed by rule 25.

Trains to be accompanied, or personally started, by Pilot Guard.

26. Except as herein provided, the Pilot Guard must accompany every train and must, in all cases, ride on the engine:

Provided that when it is necessary to start two trains from a station following one another under rule 4, the Pilot Guard shall accompany the last train and shall personally give the signal for starting the prior train.

Pilot Guard's ticket.

27. (1) When the Pilot Guard does not accompany any train, he shall, before giving the signal for starting, deliver to the Guard in charge (or, if there be no Guard in charge, to the Driver) a Pilot Guard's ticket (on a printed form) properly filled up and signed.

(2) Every such ticket shall apply only to the single journey to the station named on it.

(3) If the train is in charge of a Guard, he shall, before the train is started, deliver the ticket to the Driver.

(4) All the "Line-clear and caution messages" given under these rules will have printed upon them the word "Pilot" in large red letters on the white form, and black letters on the red form.

(5) All Pilot Guard's tickets will be sent in by the Drivers attached to his Journal.

EXAMPLES—

(*a*) If Mahanudy asks Kurseong "line clear" for the Up Mail and Kurseong, to avoid detention to a Down train, gives "line clear" to Giddapahar Siding only, the Pilot Guard at Mahanudy, under the instructions of the Station Master, must start and accompany the Up Mail, having in his possession a written order on "line clear" (Form T5) for the train coming from the opposite direction, which should be worded thus:—

"On arrival of No. 5 Up Mail at Gidda-"pahar Siding, line will be clear for "No. 4 Down Goods" and so on.

(*b*) If Teendaria wishes to send forward a train with extra wagons to Choonbatty to be followed by the Down Mail which attaches these wagons at that station, and Rungtong at the same time wishes to despatch an Up train as far as Loop No. 2, the procedure will be as follows:—

Teendaria would ask Rungtong for return line clear to Choonbatty, and on arrival of Down Mail at Choonbatty the engine would return to Teendaria. The Pilot with caution line clear for Up train proceeds to Loop No. 2 by Down Mail and returns to Teendaria by that train from No. 2 Loop.

For two Up trains and one Down train—

(*c*) The Pilot Guard leaving Teendaria proceeds by the 24 Down train with two line-clear messages, and on arrival at Choonbatty he hands the one for No. 1 Up to the Driver and then goes on to Loop No. 2 and hands the line clear to Driver of No. 3 Up and returns to Teendaria with that train.

(*d*) Rungtong gives No. 1 Up line clear to Choonbatty only, and No. 3 Up to Loop No. 2 only, one Pilot Guard accompanies the first train with line clear for No. 24 Down from Choonbatty to Loop No. 2; the latter train with the second Pilot with line clear from Loop No. 2 to Rungtong.

In the "line clear" given by Teendaria to No. 3 Up from Loop No. 2, the Driver is informed to follow No 1 Up cautiously.

The same procedure is adopted for two Down trains and one Up train.

CHAPTER VI.

Additional Rules as to working of Ballast trains.

Rules applicable to ballast trains.

28. Ballast trains must be worked in accordance with the rules contained in this Chapter,

(Part I, Chapter VI.—Additional rules as to working of Ballast trains.—Rules 29-41. Chapter VII.—Signals and Train-lights.—Rules 42 and 43.)

in addition to the rules hereinbefore prescribed as to the system of working:

Provided that such trains may be exempted by special instructions from any of the said rules as to the system of working.

mission ired to ning of last train line.

29. No ballast train shall be run on any line without the permission of the authorised officer.

mission ore leaving ing.

30. No Driver of a ballast train shall take the train from a siding without the permission of the authorised officer.

ne of ming on a.

31. The Guard or other person in charge of a ballast train must obey the orders of Station Masters as to the time at which the train may be run on the line.

orking of llast train night, or in k or foggy tempes- ous weather.

32. (1) No ballast train shall be allowed to pass along the main line at night or in thick or foggy or tempestuous weather, except under special circumstances, and with the permission of the authorised officer.

(2) When such permission has been given, the speed of the train shall not exceed seven miles an hour down-hill or nine miles an hour up-hill.

uard to company llast train, l signal lica- s.

33. (1) A Guard or Jemadar Brakesman must accompany each ballast train running on the line.

(2) No person shall be appointed to be a Guard or Jemadar Brakesman of a ballast train unless he has had the necessary experience as a Train Guard.

oolies.

34. The Guard or other person in charge of a ballast train must, before giving the starting signal, require the coolies working with the train and riding in the open trucks to sit down.

Pushing ngine.

35. A ballast train may, in accordance with special instructions, be pushed by an engine either when running on the line or when being taken back into the station from which it was started:

Provided that the speed shall not exceed nine miles an hour, or such lower rate as may be prescribed by special instructions.

Ballast train stopping between stations.

36. (1) No ballast train shall be stopped between stations to take up or put down material unless—

(*a*) The permission of the Station Master of the station next before the place of stopping has been obtained before the departure of the train from that station, and

(*b*) the Guard or other person in charge of the train has, if practicable, arranged with the Station Master of each station as to place and time at which the next train is to be passed.

(2) When granting any permission under clause (*a*) of this rule, the Station Master must give such instructions to the Guard or other person in charge of the train as he may consider necessary, and must, if necessary, communicate with the Station Master of the other station concerned.

Ballast train running through.

37. When a ballast train is intended to run through from one station to another, without stopping, it must be treated as a special train.

Securing of wagons left outside station limits.

38. When ballast wagons are left on a siding outside station limits, the Guard or other person in charge of the train must secure a wheel of the wagon nearest to the points of the siding, and must see that the wagons are otherwise properly secured in accordance with such directions as may be issued by the authorised officer, and that scotch blocks, where provided, are fastened.

Ballast train to be kept clear of other trains.

39. The Guard or other person in charge of a ballast train must see that the train is kept clear of all other trains.

Persons employed on permanent-way or works to assist in working signals.

40. Every person employed on the permanent-way or any works shall be bound, on the requisition of the Guard or other person in charge of a ballast train, to assist him in working signals.

Ballast trains and other impediments on main line when to be removed.

41. The guard or person in charge of a ballast train on any part of the main line outside station limits shall be responsible that the line is cleared and the Station Master advised not less than ten minutes before a train is due.

CHAPTER VII.

Signals and Train-lights.

Classes of signals.

42. The following classes of signals shall be used on the Darjeeling-Himalayan Railway, namely:—

Hand signals,
Temporary signals, and
Disc signals.

(*a*) No disc signal shall be used unless it is constructed to show danger.

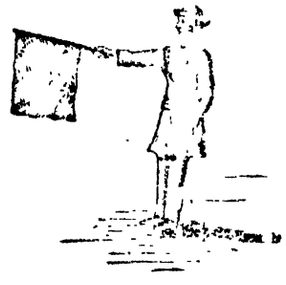
(*b*) The "danger" signal must be shown when it is intended that a train should stop, and shall be given, by night, by showing a red light; the "proceed" signal being a green light.

When a red light is shown, the signal is said to be "on."

When a green light is shown, the signal is said to be "off."

Hand signals.

Hand signals.



43. (1) A Hand signal shall be made, subject to the provisions of clause (4) of this rule,—

by day, except in a tunnel, by showing or waving a flag,

and by night, or in a tunnel, by showing or waving a light.

(2) The "danger" signal must be shown when it is intended that a train should stop, and, subject to the provisions of clauses (4) and (5) of this rule, shall be given,—

by day, except in a tunnel, by conspicuously showing a red flag, thus—

or by waving a red flag to and fro; and by night or in a tunnel, by showing a red light.

(3) The "proceed" signal must be used when it is intended that a train should proceed with caution, and, subject to the provisions of clauses (4) and (6) of this rule, shall be given,—

by day, except in a tunnel, by showing a green flag, thus—

and by night, or in a tunnel, by showing a green light.

(4) In the absence of flags—

(*a*) the "danger" signal shall be given by raising both arms with the hands above the head, thus—

(*b*) and the "proceed" signal shall be given by raising one arm with the hand above the head, thus—

(5) In the absence of a red light, the "danger" signal shall be given by violently waving any light.

(6) In the absence of a green light, the "proceed" signal shall be given by slowly waving a white light.

Temporary signals.

44. (1) "Temporary signals" are signals used for the protection of a portion of the line while under repair or during any other temporary circumstances.

(2) They may be of a semi-permanent character, and may be made by temporary semaphores, by fixed flags, by banner flags or by any other convenient means.

(3) The "danger" signal must be shown when it is intended that a train should stop, and shall be given,—

by day, by raising the semaphore arm (if any) to the horizontal position or by showing a red flag, and

by night, by showing a red light.

(4) The "proceed" signal must be shown when it is intended that a train should proceed with caution, and shall be given,—

by day, by lowering the semaphore arm (if any) at least half-way from the horizontal position, or by showing a green flag,

and by night, by showing a green light.

Signals for shunting.

Sign shun and scot

45. (1) Shunting operations shall be controlled by Hand signals or by verbal directions, as occasion may require.

(2) No railway servant shall shunt or move any engine or vehicle, so as to obstruct the main line, until the proper signals have been exhibited in one or both directions as occasion may require.

(3) Whenever any hand shunting has to be done or any vehicles have to be detached at stations, or intermediate sidings, the scotch block at the lower end of the station or siding must be locked across the rail.

Drivers will, in each case, be responsible that this rule is carried out.

Signals of Platelayers or other workmen employed on the permanent-way.

Signals of Platelayers and other workmen employed on the permanent way.

46. (1) Platelayers and other workmen employed on the permanent way must use special signals.

(2) Such special signals shall be red and green hand flags, banner flags, red and green hand lights, and must be used as hereinbefore prescribed.

Signals generally.

Signalman to have flags an lamps.

47. Every Signalman must, while on duty, have with him flags and lamps for Hand signals.

Signals to be kept ready to use.

48. All signals must be kept ready for immediate use

Night signals when to be used by day.

49. The signals hereinbefore prescribed for use by night shall be used by day in thick or foggy or tempestuous weather, and during twilight in the mornings and evenings.

Signal lamps.

49*a*. (1) Whenever any train is timed to run or is expected to run on any portion of the line between sunset and sunrise, all the signal lamps on that portion of the line must be lighted at sunset or at such earlier time as shall be prescribed by the authorised officer

(2) The signal lamps shall not be put out until broad daylight, except in accordance with special instructions.

(3) Notwithstanding anything contained in clause (1) or clause (2) of this rule, the signal lamps shall always be lighted and kept burning during thick or foggy or tempestuous weather.

(4) At stations the Station Master, and elsewhere the railway servant in charge of signals, must see that all due care is exercised in

(Part I, Chapter VII.—Signals and Train-lights.—Rules 49b-57d.)

the cleaning, trimming and lighting of signal lamps.

(5) The Station Master must see that the back lights, if any, of all signal lamps at the station are clearly visible.

(6) Whenever night signals have to be used in accordance with these rules, the Station Master or other railway servant shall not grant such authority as may, under the system of working, be required for a train to proceed to his station, unless the lamps of the signals at that station which apply to the train are burning brightly.

ignals kept at r.

49*b*. (1) Disc signals must always be kept at danger or "on" whenever a train is expected to run at night, on the section to which the signal applies.

(2) Unless this duty is imposed on some other railway servant by the authorised officer, the Station Master shall be held responsible that the disc signals are not taken "off" before he is ready to receive the train into his station.

nger" to be in case nting or obstruc-

50. Whenever the line is occupied by shunting or otherwise obstructed, the signals applicable to it shall be placed and kept at "danger."

s of lman in of ob- ion.

51. Should there be any obstruction on the line within the sight or knowledge of any Signalman, he must show a "danger" signal, and

must continue to show such signal to any train approaching in the direction of the obstruction until the obstruction has been removed and the line made clear and safe, and

must, as soon as practicable, take steps to report the obstruction to one of his superior officers.

s of lman ving any rong ain.

52. If any Signalman should observe any thing wrong or unusual in a passing train, he must report the circumstance to his superior officer; and, if the occurrence is of such a nature as to involve danger to the train or to the public, he must show a "danger" signal to the Guard and Driver.

Directions to Drivers and others as to observance of signals.

r and an to ignals.

53. (1) The Driver and the Fireman of every engine must pay immediate attention to, and obey, all signals shown, whether the cause of a signal being shown is known to him or not:

Provided that, when two or more engines are attached to a train, the Driver and the Fireman of the leading engine shall alone be responsible for observing such signals, and the Driver or Drivers of the other engine or engines must watch for, and take signals from, the Driver of the leading engine.

(2) If, in consequence of a fog or storm, or for any other reason, the usual signals are not visible, the Driver of the engine or the leading engine, as the case may be, must take every possible precaution, specially when approaching a station or a junction, to admit of the train being stopped short of any obstruction in the event of a "danger" signal being shown.

e enter- or cross- ain line.

54. (1) No Driver shall take an engine upon or across the main line without the permission of the Station Master.

(2) Before taking an engine upon or across the main line, the Driver must satisfy himself that the proper signal has been shown.

Driver not to trust entirely to signals.

55. Drivers must not trust, entirely to signals, but must always be vigilant and cautious.

Signal when to be regarded as at "danger."

56. The absence of a signal from a place where a signal is ordinarily shown, or the imperfect showing of a signal, must be regarded as a "danger" signal.

Signal at "danger" or "proceed."

57. (1) When the "danger" signal is shown to a train in any of the methods prescribed by rule 43 or rule 44, and in every case mentioned in rule 56, the Driver must stop the train as quickly as possible.

(2) When the "proceed" signal is shown to a train in any of the methods prescribed by rule 43 or rule 44, the Driver must proceed with caution, and

if such signal is shown by Platelayers or other workmen employed on the permanent-way, the speed of the train over the portion of the line protected by such signal shall not exceed five miles an hour, or such lower rate as may be prescribed by special instructions.

Disc signal at "danger."

57*a*. When a disc signal is at "danger," the Driver must stop his train dead, short of the signal.

Defective signals.

57*b*. (1) Every Driver, Guard and other railway servant employed on a running train who may observe any defective signal or any obstruction or neglect in the working of any signal, shall report the fact to the Station Master at the next station at which the train arrives.

(2) Every railway servant not employed on a running train who may observe any defective signal, or any obstruction or neglect in the working of any signal, shall report the fact to the Station Master or other railway servant in charge of the signal.

(3) If any signal becomes defective or ceases to work properly, the Station Master or other railway servant in charge of the same must forthwith report the fact to his immediate superior and to the nearest Inspector of Permanent-way.

Repair of signals.

57*c*. No person shall interfere with any signal or its fittings or connections for the purpose of effecting repairs or for any other purpose except with the previous sanction of the Station Master or other railway servant in charge of the signal.

Procedure in case of signals being defective.

57*d*. The Station Master or other railway servant in charge of any signal shall,—

(1) as soon as he becomes aware that such signal has become defective or ceases to work properly, and

(2) before he gives sanction to any person to interfere with such signal,

depute one or more competent men, with such hand signals as may be required, to give signals until such Station Master or other railway servant has satisfied himself that such signal as aforesaid has been put into proper working order; and if he should be unable himself to provide competent men for the purpose, he must apply to the nearest Inspector of Permanent-way for them.

(Part I, Chapter VII.—Signals and Train-lights.—Rule 58. Chapter VIII.—Points.—Rules 59-63. Chapter IX.—Additional rules as to the movement of rolling stock and the duties of railway servants in connection therewith.—Rules 67-73.)

Train-lights.

Wells lights when to be used, and use of scotch blocks.

58. (1) No train is to run excepting during the hours of day-light, unless the engine is provided with the Wells light and the scotch block at the upper end of the section, on which the train is running, is locked across the line: in such cases, only one train at a time is to be permitted between telegraph stations and speed is not to exceed seven miles an hour down-hill or nine miles an hour up-hill.

(2) Between sunset and sunrise, and in thick or foggy or tempestuous weather,—no train shall be worked outside station limits unless it has the head-lights prescribed by the authorised officer.

(3) No engine shall be moved at night within station limits or in a siding, unless it has the head-lights and tail-lights prescribed by the authorised officer, and unless the Wells light is burning.

CHAPTER VIII.

Points.

Points to be kept clear.

59. Unless these duties are, by special instructions, imposed on some other railway servants,

every Pointsman must keep the points under his charge clean and clear, and

whenever a train has passed, must remove anything that may have got within the points so as to prevent them from closing.

Report when points damaged.

60. Whenever points, crossings or guard rails are damaged, the Pointsman must immediately report the circumstance to his immediate superior, and if possible to the nearest Inspector of Permanent way.

Closing of points.

61. (1) Unless this duty is imposed on some other railway servant by the authorised officer, the Station Master will be responsible that all facing-points, over which a train will pass, are correctly set and secured and trailing points correctly set.

(2) Facing-points must, for the passage of trains or vehicles, be securely fastened or held.

(3) Points must be fastened in the manner directed by the authorised officer.

Engine entering or crossing main line.

62. No Driver shall take an engine upon or across the main line without the permission of the person in charge of the points.

Pointsman to have flags and lamps

63. Every Pointsman must, while on duty, have with him flags and lamps for Hand signals.

Duties of pointsman in case of obstruction.

64. Should there be any obstruction on the line within the sight or knowledge of any Pointsman, he must show a "danger" signal, and

must continue to shew such signal to any trains approaching in the direction of the obstruction, until the obstruction has been removed and the line made clear and safe, and

must, as soon as practicable, take steps to report the obstruction to one of his superior officers.

Duties of Pointsman observing any thing wrong with train.

65. If any Pointsman should observe any thing wrong or unusual in a passing train, he must report the circumstance to his superior officer; and, if the occurrence is of such a nature as to involve danger to the train or to the public, he must show a "danger" signal to the Guard and Driver.

Pointsman not to leave points.

66. No Pointsman shall, while on duty, leave the points under his charge.

Reverses.

66a. At the Reverses, at least two selected pointsmen will be placed in charge of the points. These men will be employed under the direct orders of the mistree of the length to assist in keeping their points and crossings and the permanent-way within 250 feet of their points in order, but unless engaged on such work, they must always be at their points.

Working of Reverses.

66b. The Engineering Branch will be responsible for the efficient maintenance and working of the Reverses, and it will be the special duty of the Permanent-way Inspector in charge of the length, under the orders of the Engineer, to train the mistrees and pointsmen to their special duties and see that they carry them out efficiently. No mistree or pointsman is to be appointed until he has been examined and passed by the Permanent-way Inspector and approved by the Engineer; these men must not be changed without the approval of the Engineer.

CHAPTER IX.

Additional rules as to the movement of rolling stock and the duties of railway servants in connection therewith.

Engine running tender foremost.

67. All trains proceeding up-hill must be drawn by an engine running funnel foremost: all trains proceeding down-hill must be drawn by an engine running cab foremost. This rule may only be disregarded

(*a*) At the Reverses, see rule 7 (2).

(*b*) Under a written order issued by the authorised officer.

Manning engine in motion.

68. No engine shall be put in motion outside station limits unless both the Driver and the Fireman are upon it.

No unauthorised person to ride on engine or tender.

69. Except with the permission of the authorised officer, no person other than the Driver and the Fireman, shall ride on the engine or the tender.

Driver to inform train.

70. The Driver must afford such assistance with his engine as may be required for the formation, arrangement and despatch of the train.

Engine when to be placed in front of train.

71. The Driver must place his engine in front of the train not less than five minutes before the time of starting.

Driver, before starting, to satisfy himself as to condition of engine and line.

72. The Driver must, before starting his train, satisfy himself that his engine is in proper order, that the proper signals are shown, and that the line before him is clear.

Whistle to be sounded before moving engine.

73. The Driver must always sound the engine-whistle before putting an engine in motion.

(Part I, Chapter IX.—Additional rules as to the movement of rolling stock and the duties of railway servants in connection therewith.—Rules 74-90.)

Whistle when to be sounded approaching or passing through a station.

74. Whenever another train is approaching, stopping at or leaving a station on the opposite line, and whenever shunting operations are being carried on at any station, every Driver must, while his train is approaching and passing through such station, sound the engine-whistle.

Whistle to be sounded when approaching curves.

75. Every Driver of a train must sound the engine-whistle when approaching curves, where riders or carts are likely to be met, also in proceeding through bazaars.

Duties of Driver as regards engine and lamps.

76. The Driver must satisfy himself, before the train is started from any station, and during the journey,—

(*a*) that the engine carries the proper lamps,

(*b*) that such lamps are in good order, and

(*c*) that such lamps are properly trimmed and are lighted and brightly burning between sunset and sunrise and in thick or foggy or tempestuous weather.

Management of train by Driver.

77. (1) The Driver must start, run and stop his train steadily and without a jerk.

(2) He must exercise care in approaching stations at which the train is to stop, and in passing stations at which the train is not to stop.

(3) In stopping the train, he must, in order to determine when to shut off steam, pay particular attention to the state of the weather, the condition of the rails and the length of the train.

Limits of speed generally.

78. (1) Every Driver must run his train on each section of the line within the limits of speed prescribed for that section by special instructions.

(2) In no case above the 8th mile-post is the maximum speed to exceed 12 miles an hour up-hill or 9 miles an hour down-hill. Below the 8th mile it is not to exceed 15 miles an hour. Through bazaars and facing-points the speed is to be limited to 4 miles an hour and 6 miles an hour on reversing stations.

(3) The maximum speed for night-running is seven miles an hour down-hill and nine miles an hour up-hill.

Limit of speed through facing-points.

79. No Driver shall run his train through facing-points at a speed exceeding five miles an hour, or such lower rate as may be prescribed by special instructions:

Provided that, if the points are interlocked with a Fixed or Permanent semaphore signal and automatically fastened in a manner approved by an Inspector appointed under the Indian Railways Act, IX of 1890, trains may be run over them at such speed as may be approved by such Inspector.

Regulation of speed.

80. Every Driver must regulate the running of his train as accurately as practicable according to the working time tables, so as to avoid either extreme speed or loss of time.

Making up time.

81. No Driver of a train shall make up between any two stations more time than is allowed by special instructions.

Driver to lea hose or wate crane clear line and pro perly secure

82. After taking water for an engine from a tank or a water column, the Driver of the engine must leave the hose or water-crane clear of the line and properly secured.

Fireman to obey and be responsible jointly with Driver.

83. The Fireman must obey the orders of the Driver in all particulars, and shall be responsible jointly with the Driver for the proper observance of these rules.

Guards and Brake vans.

84. (1) No engine with vehicles attached shall be despatched from any station without the proper complement of Brakesmen and Jemadar Brakesmen.

(2) Unless it be otherwise directed by special instructions, one brake-van must be attached to the rear of all passenger trains.

(3) One Jemadar Brakesman and three Brakesmen are appointed to each train drawn by an "A" class engine; one Jemadar Brakesman and four Brakesmen to each train drawn by a "B" class engine. Jemadar Brakesmen are to be distinguished from ordinary Brakesmen by wearing a badge with "Jemadar" engraved on it.

Guard to ride in his own brake-van.

85. (1) Every Guard must, except under special circumstances, ride in his own brake-van.

(2) In all cases, the Jemadar Brakesman must be on the last vehicle running on the train including trollies.

Railway servants not to ride in brake-van or luggage-van.

86. Except with the permission of the authorised officer, no railway servant shall, otherwise than in the execution of his duty, ride in a brake-van or in any vehicle in which luggage or parcels is or are being carried.

Passengers and others where to ride.

87. Every Guard must see—

(*a*) that no person rides outside a carriage, and

(*b*) that, except in accordance with special instructions, no person travels in any compartment or vehicle not intended for the carriage of passengers.

Railway servants to have ticket or pass.

88. No railway servant shall travel in a train unless he is provided with a proper ticket or free pass.

Communication cord.

89. No passenger train or mixed train shall be despatched from any station unless provided with a communication cord by which the Guard can communicate with the Driver.

General duties of Guard and Driver in charge of a train

90. All Guards and Drivers in charge of a train must satisfy themselves before the train is despatched from any station and during the journey,—

(*a*) that the train is properly loaded, marshalled and coupled,

(*b*) that the lashings and chains are secure,

(*c*) that the vehicles are in good order and properly coupled up, and if sheeted, that the sheets are properly secured,

(*d*) that the brakes are in good working order and that all vehicles are provided with brakes worked by a lever, which can, if necessary, be pinned down,

(*e*) that the cord or other appliance, if any, for communication between the

(Part I, Chapter IX.—Additional rules as to the movement of rolling stock and the duties of railway servants in connection therewith—Rules 91-101.)

Guard and the Driver is in order and properly arranged throughout,

(*f*) that the windows of all empty compartments are closed and purdahs fastened down,

(*g*) that the doors of the carriages are properly closed,

(*h*) that the train carries all necessary lamps in the vehicles and in the brake-van,

(*i*) that such lamps are properly trimmed and are lighted and brightly burning between sunset and sunrise and in thick or foggy or tempestuous weather, and

(*j*) generally, that, as far as they can ascertain, the train is in a state of efficiency for travelling, and

(*k*) that if the train be an exceptionally heavy one, they will be responsible for arranging that as many additional brakesmen as required are provided.

In the case of the first train of the day run up or down over any length of the line, the Driver will proceed with special caution and be prepared to pull up sharp at any moment in case of an obstruction.

91. Every train consisting of an engine with vehicles attached, and the passengers and the property thereon shall, when the train is working, be under the charge of the Guard, or, if there be no Guard, in charge of the Driver

92. Every Driver and Guard must regulate his time-piece in accordance with special instructions.

93. Drivers and Guards shall receive their orders from the Station Master, or from some other railway servant appointed in this behalf by the authorised officer, and must apply to such Station Master or other railway servant for the time tables, equipment and stores referred to in rule 95.

94 When there are two or more Guards with a train, the subordinate Guard or Guards must obey the orders of the Head Guard.

95. Every Guard and Driver must carry with him while on duty with his train—

(*a*) a copy of the rules for the time being in force under section 47 of the Indian Railways Act, IX of 1890,

(*b*) a copy of the working time tables in force on the line over which the train is to run, and

(*c*) the equipment and stores prescribed in this behalf by the authorised officer

Every Jemadar Brakesman must have the prescribed Hand signals.

96. When an engine has been placed in front of a train, and until the end of the journey, the Driver—

(*a*) must obey the orders of the Guard in charge of the train in all matters affecting the starting, stopping or movement of the train, and

(*b*) must promptly obey all other orders given and all signals shown to him, whether by the Guard in charge of the train or by the Station Master, so far as the safe and proper working of the engine will admit

Guard's or Jemadar Brakesman's signal before starting train.

97. (1) No engine with vehicles attached shall be started from a station until the Guard or Jemadar Brakesman in charge of the train has given the prescribed signal for starting to the Driver.

(2) Such signal shall not be given until the Guard has received instructions from the Station Master that all is right for the train to proceed.

Exchange of signals between Guard and Driver.

98. (1) The Guard in charge of the train or, where there is no Guard, the Jemadar Brakesman, and the Driver of the train must exchange signals with each other, in such manner as may be prescribed by special instructions,—

(*a*) as soon as the train has passed out of station limits,

(*b*) whenever the train runs through any station without stopping, and

(*c*) when starting the train after it has been stopped outside station limits.

(2) If signals are not exchanged as required by clause (1) of this rule, the Driver must stop the train

Assistance from Guards' brakes.

99. When the Driver requires the assistance of the Guards' brakes, he must, unless otherwise directed by special instructions,

(1) give two or more short, sharp whistles or, if a brake whistle is provided, sound such whistle, and

(2) apply the communication, if any;

and the Guard and Brakesman shall thereupon immediately apply the brakes.

Brakes on steep incline.

99*a*. When a train is travelling down a steep incline the Guard and Brakesman must, if necessary, in order to steady the train, assist the Driver with their brakes.

(1) Before any train starts down hill, the Driver will see that the Jemadar Brakesman releases the levers of all brakes, and, if necessary, pins them down so as to put on the pressure required to hold the vehicles forming the train to a speed of 9 miles an hour, and

(2) the Jemadars and Brakesmen must on no account ride on the top of coaching vehicles, but must stand within reach of the brake levers ready to apply them immediately when ordered.

Driver and Fireman to look back.

100. The Driver and Fireman must frequently, during the journey, look back and see that the whole of the train is following in a safe and proper manner

Guard, Driver and Fireman to keep a look-out.

101. (1) Every Guard and Driver must keep a good look-out while his train is in motion

(2) Every Fireman must, when he is not necessarily otherwise engaged, keep a good look-out while his engine is in motion.

(3) If any Guard or Brakesman should see reason to apprehend danger, he must use his best endeavours to attract the attention of the Driver.

(Part I, Chapter IX.—Additional rules as to the movement of rolling stock and the duties of railway servants in connection therewith.—Rules 102-119.)

trains.

102. The Station Master must leave it to the discretion of the Driver to determine what load the engine can take; but every instance of refusal by a Driver to take the load prescribed must be reported by the Station Master to his immediate superior.

s and ot to oaded.

103. No wagon or truck shall be loaded as to exceed the maximum gross load on the axles prescribed by the Governor General in Council under the Indian Railways Act, 1890, section 19, sub-section (1), clause (*c*), or other less load prescribed by the authorised officer.

g of ticles.

104. Carriages, machinery, timber and other large articles in open trucks must be loaded within the authorised loading dimensions.

ing

105. No travelling cranes are to be allowed to run on the line.

of as to of and

106. The Guard in charge of a train must, unless this duty is, by special instructions, imposed on some other railway servant, carefully examine the loading of any wagon or truck which may be attached to the train at a station or siding; and should any wagon or truck become unsafe from the shifting or derangement of the load, he must, on the arrival of the train at the next station, at once have the load re-adjusted or the wagon or truck removed from the train.

ig and opera- bstruct- e.

107. No railway servant shall commence any loading or other operation by which any line of rails in use for traffic purposes may be fouled or obstructed without obtaining the previous sanction of the Station Master, who must see that all necessary steps are taken for the protection of traffic while such operation is being carried on.

hing and hing es and train.

108. (1) Whenever a train has been brought to a stand, and it is necessary for the engine to be detached from the train for the purpose of attaching or detaching vehicles, the Driver must before the engine is uncoupled, satisfy himself that the brakes of all vehicles uncoupled from his engine are secured, and that wooden wedges are placed under the wheels of heavy vehicles. The Jemadar Brakesman must be left in charge of such vehicles until they are again coupled on to the engine.

(2) The coupling and uncoupling of vehicles must be done by the Jemadar Brakesman only, under the orders of the Driver. No vehicle in a train is to be uncoupled without such orders.

(3) In case of fire, the first precaution to be taken is to secure the wheels of the last vehicle by a sprag or wedge independent of the brakes and then detach the wagon or wagons on fire, spragging them also, every effort being made to keep fire within the smallest limit. The train must also in all cases be protected by signals in both directions.

mination rains.

109. At every station at which a Carriage and Wagon Examiner is employed, the Station Master must, before starting any train, satisfy himself that the examination of the train has been completed by such Examiner and that the train is all right and fit to proceed.

moval of ucle pro- ceed to be nt.

110. The Station Master must, before starting any train, see that any vehicle attached thereto, which is pronounced by a Carriage and Wagon Examiner to be unfit, is removed.

Report as to, and oiling or removal of, defective vehicle

111. (1) If any complaint be made of the running of any vehicle, the Guard in charge of the train must report the complaint to the Station Master and enter the particulars in his journal, giving the number and class of the vehicle.

(2) If there is no Carriage or Wagon Examiner at the station, the Station Master must see that steps are taken to remedy any defect in such vehicle, for instance, by supplying oil or grease to the axle boxes, if required.

(3) If the Guard or the Station Master has reason to apprehend danger from any such vehicle before it can be inspected by a Carriage and Wagon Examiner, the Guard shall consult the Driver, and if, after such consultation, he considers it necessary to do so, he shall have the vehicle detached from the train.

Vehicles which have been off the line.

112. No vehicle which has been off the line shall be allowed to run between stations until such vehicle has been examined and passed by a competent Carriage and Wagon Examiner:

Provided that, when a vehicle attached to a train has been derailed outside station limits, the Driver may, if he considers it safe to do so, take the vehicle slowly to the next station.

Time of starting passenger train or mixed train.

113. No passenger train or mixed train shall be despatched from a station before the advertised time.

Passenger train not to stop where not advertised to call.

114. Except in accordance with special instructions, no passenger train shall be stopped for the purpose of taking up or setting down passengers at a station at which it is not advertised to call.

Passenger train or mixed train arriving at station.

115. Upon the arrival of a passenger train or a mixed train at a station, the Station Master must see that the name of the station is called out along the train in a distinct and audible manner, and that the station servants pay immediate attention to any indication shown by passengers of their desire to alight.

Moving passenger train or mixed train after it has been stopped at station.

116. When a passenger train or a mixed train has been brought to a stand at a station, whether alongside, beyond or short of the platform, the Driver shall not move it for any purpose whatever, except upon instructions from the Guard in charge of the train, under orders of the Station Master, and the Guard in charge of the train shall not give the signal for moving the train until he has satisfied himself that no passenger is getting into or out of the train.

Two trains not to enter station at same time on a single line.

117. Where there is a single line, two trains shall not be allowed to enter a station at the same time, but the train having precedence must be admitted first, and the signals applying to the other train must be kept at "danger" until the first train has been brought to a stand at the station.

Train obscured by steam or smoke.

118. Whenever the Driver of a train observes a train obscured by steam or smoke on any line or siding, he must sound the engine whistle, and must approach the obscured train cautiously, to enable him to stop his own train if necessary.

Duties of Driver and Guard observing obstruction, etc., on the line.

119. (1) Whenever the Driver or any Guard of a train observes—

(*a*) any obstruction on the line on which the train is running, or

(Part I, Chapter IX.—Additional rules as to the movement of rolling stock and the duties of railway servants in connection therewith.—Rules 120-128.)

(*b*) any defect in, or irregularity in the working of, any signal, or

(*c*) any defect in the permanent-way, works, or telegraph, or

(*d*) any other unusual circumstance,

he must make a report of the facts to the Station Master at the first station where the train stops and at the end of the journey.

The Station Master will communicate such report at once to the Heads of Branches concerned and will also see that all necessary precautions are taken for the protection of traffic.

(2) If any of the circumstances mentioned or referred to in clause (1) of this rule and observed by the Driver or any Guard involve danger to the traffic, then—

(*e*) if it is necessary for the safety of the traffic to do so, the Driver must stop the train as soon as practicable.

Report to stations in case of obstruction to train.

120. (1) Whenever a train is obstructed, the Guard in charge of the train must take steps to secure a report of the circumstances being made, in the quickest possible manner,—

(*a*) to the Station Master of the nearest station, or

(*b*) if the telegraph be injured, or if there be no telegraph, to the Station Masters of the stations on each side of the place at which the obstruction occurred.

(2) Any Station Master receiving any such report must, as soon as possible, arrange for all necessary assistance being sent to the train, and, in order that approaching trains may be stopped, must report the circumstances, by telegraph, or if the telegraph be injured, or if there be no telegraph, then by the most expeditious means available, to the next station on the other side of the place at which the obstruction occurred, unless he has received information that such a report has already been made under clause (*b*) of this rule.

Driver observing train following too closely.

121. Whenever the Driver of a train observes a train following his own train too closely, he must sound the engine-whistle and show a "danger" signal to warn the Driver of such following train.

Train parting.

122. If any portion of a train should become detached when in motion, the Driver shall not stop the front portion until the rear portion has been stopped, and the Guard in the rear brake-van and the Brakesmen on the rear portion of the train must promptly apply their brakes.

Train stopped on single line.

123. (1) When a train is from any cause stopped outside station limits, the Guard in charge of the train must protect the train by showing a "danger" Hand signal both in rear and in front of the train at a distance of 300 feet from the train. The fireman or other competent person must, if necessary, be sent out for this purpose.

(2) The persons going out to protect the train must constantly show the "danger" Hand signal and must remain at the distance prescribed, showing the "Danger" Hand signal until recalled by engine-whistle or otherwise.

(3) The rear portion of the train must be protected first.

(4) This rule shall not apply to incidental stoppages, made under instructions from Station Master of preceding station.

Engine stopped on line.

124. If any engine without vehicles attached should, while on the line outside station limits, be unable to proceed, the Driver must see that the precautions prescribed by rule 123 are taken for the protection of the engine, employing the Fireman or some other competent person to assist him.

Portion of train left on line.

125. (1) When a portion of a train is left on the line outside station limits, in consequence of an accident or of the inability of the engine to take the whole train forward, the Guard in charge of the train must put down the brakes, and, if necessary, otherwise carefully secure the said portion of the train to ensure its remaining stationary.

(2) The Guard must then take the precautions prescribed by rule 123, for the protection of the said portion of the train.

(3) When the front portion of the train is taken forward, the Fireman, or if there are two Guards with the train, the second Guard must, if it is practicable and safe to do so, ride upon the last vehicle of the said front portion of the train until it is placed in a siding. For the purposes of this rule, Brakesmen are to be looked upon as Guards.

(4) The Driver shall not take the engine back on the same line to pick up the portion of the train left on the line, except upon instructions from the Guard in charge of the train.

(5) When the engine is so taken back, the Guard must, until the arrival of the engine, continue to take the precautions referred to in clause (2) of this rule, for the protection in the rear of the portion of the train left on the line, and shall not permit a following train to move any of the vehicles under his charge.

Protection of trains approaching stopped, or portion of train left, on line.

126. (1) If more than one train should approach a train or a portion of a train stopped or left on the line outside station limits, the Guard in charge of the train which last arrives, or if there be no Guard, the Driver of such train, must see that the precautions prescribed by rule 123 are taken for the protection of such train in the rear.

(2) When such precautions have been taken, all persons who went out to protect in the rear any train except such last train as aforesaid may return to their own trains.

Danger to be avoided in shunting or crossing.

127. The Station Master must see that the shunting of trains, or the crossing of trains from one line to another, is performed only at such times and in such manner as will not involve danger.

Shunting on incline.

128. When any vehicle is being shunted on a steep gradient, the railway servant in charge of the operation must see that a sufficient number of brakes are put on, that sprags or hand scotches are used when necessary, and that any other necessary precautions are taken to prevent the vehicle from running down the incline. The instructions given in rule 45

(Part I, Chapter IX.—Additional rules as to the movement of rolling stock and the duties of railway servants in connection therewith.—Rules 129-137. Chapter X.—Permanent-way and Works.—Rules 138-148.)

must also be observed where scotch blocks are provided.

icle escap- from a on.

129. If any vehicle escapes from a station, the Station Master must take immediate steps to warn the other stations concerned and to prevent, as far as practicable, the occurrence of an accident.

shunting.

130. Fly shunting of any vehicle against a loaded passenger train or of any vehicle containing passengers or live-stock, is prohibited.

uring cles in gs.

131. (1) The Station Master must see that vehicles standing at the station in sidings are properly secured in accordance with special instructions, and that scotch blocks, where provided, are fastened,—

(*a*) All vehicles detached from running trains and left in siding are to be secured so as to prevent them from being blown out in a storm or escaping in any other way, by passing a chain under the rail and round one or more of the wheels of the vehicle nearest to the points of the siding in which the vehicles are standing, and then after fastening the chain by a padlock coupling up the other vehicles to the vehicle so secured.

(2) No railway servant shall leave any vehicle in a siding outside station limits unless the wheels thereof are properly secured and the vehicle is clear of all running lines.

ching of icles shunt- off at sta-

132. The Station Master shall be responsible that all vehicles shunted off at the station as empties are carefully searched.

sing of dows of ty com- ments on ag.

133. The Station Master shall be responsible that the doors and windows of all empty compartments are closed when the carriages are standing on a siding and that all purdahs are fastened down.

ate icles enter- main line.

134. No engine or other vehicle, the property of a private owner, shall be allowed to enter upon the main line except under special arrangements.

iver not to ve engine en on duty.

135. No Driver shall leave his engine when on duty, whether at a station or on the line, except in case of absolute necessity and after a competent man has been placed in charge of it.

d not to e train till ded over.

136. No Guard in charge of a train shall leave it until it has been properly handed over in accordance with special instructions.

ies osed on rd to be ertaken by ver of train provided Guard.

137. Such of these rules as impose duties on the Guard in charge of a train for ensuring the protection and safe working of the train shall, so far as they are applicable, apply to the Driver of all trains not provided with Guards.

CHAPTER X.

Permanent-way and Works.

sponsibility and reports Inspector Permanent- y.

138. Each Inspector of Permanent-way shall be responsible for the condition of the permanent-way and works in his section and must promptly report to the Engineer in charge of the line all accidents thereto, and defects therein which such Inspector may consider likely to interfere with the safe running of trains.

Reports by railway servants of failure of works.

139. Every railway servant observing any failure of any part of the works must, if he considers that the same is likely to interfere with the safe running of trains, report the circumstances as soon as possible to the nearest Inspector of Permanent-way and to the Station Masters of the stations on each side of the point at which such failure has occurred.

Inspection of permanent-way and works.

140. (1) Every portion of the permanent-way must be inspected daily on foot by some railway servant appointed in this behalf by the authorised officer.

(2) All bridges and other works must be regularly inspected in accordance with special instructions.

Ganger in each gang.

141. In each gang of Platelayers or other workmen employed on the permanent-way there shall be a Ganger.

Supply of gauge, tools and implements to Gangers and signals and lamps to gangs.

142. Each Inspector of Permanent-way shall be responsible—

(*a*) that every Ganger employed in his section is supplied with a permanent-way gauge and all necessary tools and implements, and

(*b*) that every gang of Platelayers, or other workmen employed on the permanent-way in his section is supplied with two sets of flag signals and two Hand signal lamps.

Inspection of such gauge, tools, implements, signals and lamps.

143. Each Inspector of Permanent-way must, at least once a month, inspect the gauge, tools, implements, signals and lamps supplied under rule 142 to Gangers and gangs, and ascertain whether the gauge is correct, whether the tools, implements, signals and lamps are in good order, and whether any of the said articles have been lost.

Responsibility of Ganger as to signals.

144. Each Ganger shall be responsible that the signals supplied to himself and to the gang under his charge are kept constantly in proper order and ready for use.

Inspector of Permanent-way to keep register of Gangers.

145. Each Inspector of Permanent-way must keep a Register of the names and places of residence of all Gangers employed on his section to enable him to call upon them to summon their gangs whenever their services may be required.

Ganger to collect his men.

146. Each Ganger must immediately collect the men of his gang whenever their services may be required.

Inspector of Permanent-way to see to observance of rules.

147 Each Inspector of Permanent-way must see to the due observance of such of these rules as affect the Platelayers or other workmen employed on the permanent-way in his section.

Telegraph posts and wires, and signal wires.

148. (1) Each Ganger must report to the Inspector of Permanent-way whenever any telegraph post on his length of line appears to be in an unsafe state, or whenever any of the telegraph or signal wires on his length of line are broken, slack or entangled, or touch each other or any building.

(2) Where the maintenance of the telegraph is under the control of the Government Telegraph Department, the said Inspector shall forward to that Department every such report relating to the telegraph posts or wires.

(3) Each Ganger must see that all grass, creepers, boughs of trees and rubbish are removed from the signal wires, and (where the maintenance of the telegraph is not under the control of the Government Telegraph Department) from the telegraph wires, on his length of line.

Cleaning of signals and points.

149. Each Ganger must see that the working parts of points on his length of the line are kept clean, unless that duty is imposed on some other railway servant by the authorised officer.

Keeping of permanent-way materials and tools and implements.

150. (1) Each Inspector of Permanent-way shall be responsible for the security of all rails, chairs, sleepers and other permanent-way materials in his section, and for seeing that such of them as are not actually in use are kept clear of the line and properly stacked.

(2) Each Ganger must see that all rails, chairs, sleepers, pieces of iron or wood and other permanent-way materials and all tools and implements under his charge, are carefully placed so as to be quite clear of the line and at least five feet away from the rails.

Replacing of defective materials.

151. Each Inspector of Permanent-way or authorised officer must see that all broken or defective rails, chairs, sleepers, or other permanent-way materials on the length of line under his charge are removed from the road with the least possible delay, and that sound materials are substituted for them.

Line to be kept clear and safe, and fencing in repair.

152. Each Ganger must—

(*a*) keep his length of line clear and safe, and

(*b*) keep the fences thereof in repair.

Flood.

153. If, owing to heavy rain, a flood occurs on the railway, each Ganger must carefully examine the action of the water through the culverts and bridges on his length of line; and

should he see any cause to apprehend danger to the works, must immediately show the proper signals for trains to proceed with caution or to stop, as necessity may require, and inform the Inspector of Permanent-way of the circumstances; and

until the said Inspector arrives, must take precautionary measures for securing the safety and stability of the line.

Fire.

154. If a fire occurs on or near any portion of the railway where Platelayers or other workmen are employed on the permanent-way, the men must take immediate measures for putting it out.

Permission required before putting in points or crossings.

155. No person shall put in any points or crossings without the written permission of the authorised officer, previously obtained.

Work involving danger to trains or traffic.

156. (1) No person shall commence or carry on any work which will involve danger to trains or to traffic without the previous sanction of the Inspector of Permanent-way or of some competent person appointed in this behalf by the authorised officer, and except in cases of emergencies or of trifling repairs which can be executed between trains, 24 hours' notice in writing must be given to the Traffic Branch before the work is commenced.

(2) The Inspector of Permanent-way or other person who sanctions any work under clause (1) of this rule must himself be present to superintend such work and shall be responsible that the provisions of rule 157 are observed:

Provided that in cases of emergency, when it may be necessary for safety to commence any such work before such Inspector or other person can arrive, the Ganger may commence the work at once and must himself see that the provisions of rule 157 are observed.

Ordinary work necessitating showing of a "danger" signal.

157. (1) No Inspector of Permanent-way or authorised officer shall change or turn a rail or commence any operation which would obstruct the line and necessitate the showing of a "danger" signal,—

(*a*) if within station limits,—

until he has obtained the permission of the Station Master and has seen that special signals as per rule 46 are clearly exhibited and necessary signals have been placed at danger, or,

(*b*) if outside station limits,—

until he has seen that "danger" signals have been plainly shown in both directions at a distance of 300 feet.

(2) In case (*a*) the signals must be kept at "danger" until the Station Master has been informed by the Inspector of Permanent-way or authorised officer that the line is again clear and safe for traffic.

(3) In either case the Inspector of Permanent-way or authorised officer must himself be present at the spot until the line is clear.

Use of sign in other cases when line is unsafe.

158. If any Ganger becomes aware that the line outside station limits is unsafe from any cause not referred to in rule 156 or rule 157, he must proceed to the spot and see that "danger" signals are plainly shown at a distance of 300 feet.

Ordinary work outside station limits, necessitating showing of a "proceed" signal.

159. When repairing or lifting the line outside station limits or performing any other operations outside station limits which will make it necessary for a train to proceed cautiously, the Ganger must—

(*a*) himself be present at the spot, and

(*b*) send a man in each direction at least 300 feet and as much further as the circumstances of the case may render necessary to show a signal to proceed with caution, so as to be plainly visible to the Driver of an approaching train, and

(*c*) show another such signal at the site of the operation:

Provided that if the Ganger has any doubt as to the line being in a fit state to pass a train at slow speed he must see that a "danger" signal is shown instead of showing signals to proceed with caution.

Time for forming work.

160. (1) No rail shall be displaced, and no other work which is likely to cause obstruction to the passage of trains shall be performed in thick or foggy or tempestuous weather, except in cases of absolute necessity.

(2) The times for effecting repairs or performing any other work which will involve the stopping of trains must be so selected as to interfere as little as possible with the passage of the traffic.

rk to be ped when n is ap- ching.

161. When a train is approaching, all Platelayers and other workmen employed on the permanent-way must stop work and stand clear of all the lines.

ing perma- t-way.

162. In lifting the permanent-way,—

(*a*) no lift shall be made of more than 1½ inches at once,

(*b*) every lift must be made so as not to occasion any sudden change of gradient,

(*c*) both rails must be raised equally and at the same time.

llast.

163. (1) Ballast shall not be thrown up between the rails higher than rail level and must be thrown as much as possible on the outside of each line or between the two roads.

(2) The rails must be kept clear of ballast, gravel and other material.

sting.

164. No railway servant shall carry on any blasting operations on or near the railway without the permission of the authorised officer.

acing of rries and llies on the e, and sponsibility r them.

165. (1) No lorry used for the conveyance of materials, or trolly used for the conveyance of men, may be placed on the line, except by a railway servant appointed in this behalf by the authorised officer.

(2) Such railway servant shall be responsible for the proper protection of the lorry or trolly, and for its being used in accordance with special instructions.

orry or trolly hen to e run; when ghts to be ed.

166. (1) No lorry or trolly shall be run, if it can be avoided, except during daylight and when the weather is sufficiently clear for a signal to be distinctly seen at a distance of 200 yards.

(2) Whenever it is necessary to run a lorry at night or in thick or foggy or tempestuous weather, it must be protected by lamps showing "danger" signal in both directions and the speed shall not be allowed to exceed six miles an hour.

Protection of orry or trolly on line and rules for orking rollies.

167. (1) A lorry, whether loaded or empty, which is used for conveying materials, or a light trolly so loaded that it cannot readily be removed from the line,—

(*a*) must be followed and preceded at a distance of not less than one hundred yards by a man with "danger" Hand signals; this rule does not however apply to trollies working under rule 167 (4).

(2) There are two classes of trollies, large and small; the attaching of the latter to passenger trains or goods trains must be avoided as much as possible.

(3) Small trollies must only be attached to passenger trains in cases of great emergency, when an officer or Platelayer records in writing to the Station Master at the station at which it is desired that the trolly shall be attached that it is necessary for his work and important that his trolly should be returned by the first train to a certain point.

(4) Large trollies, when used by officials of the railway, shall be worked in accordance with the rules laid down for trains as regards "Line clear and Pilot guard."

(5) Officials and others must, as a rule, return their small trollies to their destination by goods trains if load allows.

(6) When a small trolly is being hauled uphill, the Trollyman in charge must precede it 100 yards with a red flag. The same precaution must be observed by the conductor of a large trolly, should it be necessary to haul it uphill.

(7) Every effort must be made to avoid attaching small trollies to passenger or other trains over the length of line upon which there are reversing stations, *viz*, between the 16th mile and the 24th mile, so that cutting off and running back the trollies up the Reverses immediately in front of the passenger train may be avoided.

(8) The attaching of any trolly or other vehicle to a special passenger train is strictly prohibited, without the special authority of the Superintendent of Working, and no such authority should be given when the train is working late. This will not prevent an officer or Platelayer travelling by the special train.

(9) No one, excepting an employé of the Company, shall be allowed to travel by trolly without special authority. It is the duty of Station Masters to report any infringement of this rule.

(10) When there is any prospect of meeting an engine or train from the opposite direction, a trolly must invariably be preceded at a distance of 100 yards by a man with a red flag and the speed must be limited to 6 miles an hour.

(11) The employé in charge of a trolly will be responsible for always having in charge of the flag, a smart, well-trained Trollyman who shall thoroughly understand the duties required of him.

(12) No Engineer, Permanent-way Inspector, or any other person authorised to use a trolly, is to leave a station with his trolly until he has ascertained the movements of trains coming from the direction in which he intends running and until the Station Master at the next station has been advised that the trolly is leaving in order that he may warn all Drivers that the trolly is on the line between the two stations. The Station Master is responsible for sending this advice to the next station. This rule holds good under all circumstances whether the line is blocked by slips or other obstructions.

Removal of lorries and trollies when not in use.

168. All lorries and small trollies, when not in use, must be taken off the rails and placed well clear of the line, the wheels being secured with chain and padlock.

Lorries or other impediments on main line when to be removed.

169. No lorry or other impediment shall be allowed to remain on any part of the main line within an interval of ten minutes of a train being due or expected.

Work when to be completed.

170. Except in cases of accident or of absolute necessity, all repairs or other work must be completed, and the line made clear and safe for the passage of trains before the commencement of the interval mentioned in rule 169.

(Part I, Chapter XI.—Additional rules as to the duties of railway servants in connection with the working of the railway generally.—Rules 171-185. Chapter XII.—Conduct of railway servants.—Rules 186-190.)

CHAPTER XI.

Additional rules as to the duties of railway servants in connection with the working of the railway generally.

Safety of public.

171. Every railway servant shall be bound to see that every exertion is made for ensuring the safety of the public.

Railway servants to assist in case of accident or obstruction.

172. Every railway servant must on demand render all possible assistance in case of an accident or an obstruction.

Railway servants to report occurrences affecting safe or proper working of railway.

173. Every railway servant must immediately report to his immediate superior any occurrence affecting the safe or proper working of the railway which may come to his notice.

Special trains without notice.

174. The staff along the line must always be prepared without previous notice for special trains.

Hours of attendance for duty.

175. Every railway servant must be in attendance for duty at such times and for such periods as may be fixed in this behalf by the authorised officer, and must also attend at any other time at which his services may be required by any of his superior officers.

Station Masters to be under Traffic Branch.

176. Station Masters shall receive their orders from, and report to, such Traffic Officers as may be placed over them by the authorised officer.

Subordination of railway servants to Station Master; his general responsibility.

177. (1) All railway servants employed, whether temporarily or permanently at a station or within station limits, shall, in carrying on their duties connected with the working of the line or station, be subject to the authority of the Station Master.

(2) The Station Master shall be responsible for the efficient discharge of the said duties and for the general working of the station being carried out in strict accordance with the rules for the time being in force under section 47 of the Indian Railways Act, IX of 1890.

Station Master's responsibility as to station machinery and points, etc.

178. The Station Master shall be responsible that all points and station machinery at his station are in proper working order, and must report to his immediate superior, and in case of points, to the nearest Inspector of Permanent-way, any defect which he may observe in the same.

Daily inspection of station.

179. The Station Master, or some other railway servant appointed in this behalf by the authorised officer, must daily inspect the station, see that all rooms, offices, platforms, latrines and other appurtenances are kept neat and clean and the whole working machinery of the station are in proper working order.

Articles found on railway or in vehicle to be delivered to nearest Station Master.

180. Any railway servant who finds on the railway or in a vehicle any article (whether belonging to a railway administration or to a private owner) which has fallen from a train or has been lost must immediately deliver or send such article to the nearest Station Master, to be dealt with in accordance with special instructions; and

if the article appears to have fallen from a train, must either make a report himself or see that a report is sent, to such Station Master, giving the best information that he has been able to obtain as to the train from which it fell.

Unprotected lights.

181. No railway servant shall place any unprotected light in any vehicle.

Supply of copy or translation of rules.

182. The authorised officer shall supply to each railway servant who is in any way connected with the outdoor working of the railway or with the working of the trains,—

(*a*) if the railway servant understands English, a copy of the rules for the time being in force under section 47 of the Indian Railways Act, IX of 1890, and

(*b*) if he does not understand English, a translation, in a language which he understands, of the said rules, or such of them as relate to his duties.

Railway servants to acquaint themselves with rules.

183. (1) Every railway servant must make himself acquainted with so much of the copy or translation of rules supplied to him under rule 182 as relates to his duties.

(2) No person shall be employed as Guard, Brakesman or station Pointsman unless he has been passed by the officer in charge of the Traffic Branch as conversant with his duties and the rules laid down for his guidance.

Station Masters, Inspectors of Permanent-way and Gangers responsible that their subordinates have made themselves acquainted with rules.

184. Station Masters, Inspectors of Permanent-way and Gangers shall be responsible that each of the subordinates respectively working under them has made himself acquainted with so much of the copy or translation of rules supplied to him under rule 182 as relates to his duties.

All railway servants to assist in carrying out rules, and to report breaches.

185. Every railway servant must assist, whenever necessary, in carrying out the rules for the time being in force under section 47 of the Indian Railways Act, IX of 1890, and must report forthwith to his immediate superior any breach thereof which may come to his notice.

CHAPTER XII.

Conduct of railway servants.

Railway servants to produce rules and apply, when necessary, for a new copy.

186. (1) Every railway servant must, on the demand of any of his superior officers, produce the copy or translation of rules supplied to him under rule 182.

(2) If any such copy or translation supplied to any railway servant should be lost or torn, he must apply to his immediate superior for a new one.

Prompt obedience to orders.

187. Every railway servant must promptly obey all lawful orders given by any person placed in authority over him.

Absence from duty.

188. No railway servant shall absent himself from his duty without the permission of the authorised officer:

Provided that, if a Station Master should be obliged, through illness, to absent himself before he can obtain such permission, he must first see that some competent person is entrusted with his duties and must report the circumstances to his immediate superior.

Notice before leaving service.

189. Every railway servant shall, before leaving the service, give the railway administration the notice specified in his agreement (if any), or, if no notice is so specified, then one month's notice in writing.

Surrender of railway property on leaving service.

190. When a railway servant leaves the service, he must deliver up to the railway administration, or to a person appointed by the

railway administration in this behalf, any property belonging to the railway administration and in the possession or custody of such railway servant.

Certain railway servants not to obtain spirituous or fermented liquor at station.

191. Drivers, Guards and other railway servants directly connected with the working of the trains, shall not, when on duty, obtain spirituous or fermented liquor at any refreshment room at a station, except in accordance with directions issued by the authorised officer.

Conduct generally.

192. (1) The conduct of all railway servants must be prompt, civil and obliging. They must at all times afford every proper facility for the business to be performed and be careful to give correct information.

(2) The Station Master must see that all railway servants at his station behave respectfully and civilly to the public and to passengers of every class.

(3) Swearing, the use of immoral language, violent altercations and threats are prohibited.

Station Master to report misconduct and forward particulars of complaint.

193. The Station Master must report, without delay to his immediate superior, any neglect of duty or other misconduct on the part of any of the railway servants, employed within station limits, and must forward to such superior, particulars of any complaint made by the public.

CHAPTER XIII.

Penalties for breaches of rules by railway servants.

Penalties for breaches of rules by railway servants.

194. (1) If any railway servant commits a breach of any of the rules hereinafter mentioned, he shall be liable to punishment as follows, namely :—

RULES.	PENALTY.
4 to 10 (both inclusive), 11 (1), 11 (2), 11 (3), 11 (5), 11 (6), 11 (7), 12, 13 (2), 14 to 19 (both inclusive), 25(*a*), 26, 27, 29 to 32 (both inclusive), 34, 35 (proviso), 36 (1), 38, 39, 41, 42 (*b*), 43, 44 (3), 44 (4), 45 (2), 45 (3), 46 to 54 (both inclusive), 57 to 58, 62 to 66*b* (both inclusive), 67, 68, 72 to 82 (both inclusive), 84, 85, 87, 90, 96 to 99*a* (both inclusive), 106 to 108 (both inclusive), 110 to 112 (both inclusive), 116, 117, 119 to 124 (both inclusive), 125 to 131 (both inclusive), 135 to 137 (both inclusive), 139, 143, 150, 155 to 160 (both inclusive), 162 to 165 (1) (both inclusive), 166 to 170 (both inclusive), 175, 179, 183 (1), 185.	Fine which may extend to fifty rupees.
69 to 71 (both inclusive), 83, 86, 95, 103 to 105 (both inclusive), 109, 113 to 115 (both inclusive), 140, 172, 180 and 181 (both inclusive).	Fine which may extend to twenty-five rupees.
40, 59 and 60 (both inclusive), 88, 94, 146, 148 and 149 (both inclusive), 151 to 153 (both inclusive).	Fine which may extend to ten rupees.
187 to 189 (both inclusive), 192 (3)	Fine which may extend to fifty rupees and forfeiture of a sum not exceeding one month's pay, which last sum may be deducted by the railway administration from the pay of the railway servant.
186, 190, 191, 192 (1), 193	Forfeiture of a sum not exceeding one month's pay, which sum may be deducted by the railway administration from the pay of the railway servant.

(2) Any railway servant who has committed a breach of any of the rules mentioned in clause (1) of this rule shall be liable to the punishment authorised by that clause in addition to, and not in substitution for, any punishment to which he may be liable upon prosecution under the Indian Railways Act, IX of 1890:

Provided that no railway servant shall be thereby rendered liable to be punished twice for the same offence.

[Enclosure No. 2 to the Government of India No. 91 R. T., dated the 23rd January 1897.]

Corrigenda and Addenda to Part II of the General Rules promulgated with the Government of India circular No. 6 Railway, dated the 12th March 1895, as modified by the Government of India circular No. 3 Railway, dated the 22nd May 1896.

CORRIGENDA—

Part II, chapter I, rule 1 (5).—For the words "authorised officer means the person who is duly empowered to issue instructions or do any other thing of the nature referred to in each case," *read,* "authorised officer means the person who is duly empowered, by general or special order of the railway administration, either by name or by office, to issue instructions or to do any other thing of the nature referred to in each case," *and add the following* :—

"NOTE.—Such order shall not empower an authorised officer to depute the power conferred upon him thereby to any other person."

Part II, chapter IV, rule 33 (1).—Against the words "Fine which may extend to ten rupees," *insert, under the heading* "*Rule*," *the figure* "21."

Appendix A, rule IV, (8) (b).—Substitute the following :—"Turpentine may be carried either in sound iron or steel drums or tins properly soldered, or in corked and capsuled bottles, the bottles or tins being securely packed in wooden cases."

ADDENDA—

Part II, chapter II, rule 7.—Before the word "Cholera," *add* "Bubonic fever."

Appendix A, rule I (1).—After the word "drums" in the last line, *add the words* "or in tins without wooden cases, provided that in the latter case a layer of durma-matting or other suitable dunnage is placed on the floor of the wagon and between each tier of tins."

The 28th January, 1897.

No. 47.—The following is published for general information :—

No. 95 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT.—RAILWAY TRAFFIC.

Calcutta, the 26th January 1897.

General Rules for railways under construction.

READ—

Sections 3 (4), 16 (2), 47 and 148 (1) of the Indian Railways Act (IX) of 1890.

Government of India, Public Works Department, notification No. 480½, dated the 30th October 1890, publishing—in the *Gazette of India* of the 8th November 1890—the Government of India resolution No. 736 R. T., dated the 17th October 1890, and the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods.

Letter from the Consulting Engineer to the Government of India for Railways, Calcutta, No. $\frac{84 T.}{20}$, dated the 12th January 1897, forwarding letter No. 316, dated the 11th January 1897, from the Agent and Chief Engineer, Bengal Nagpur Railway Company.

OBSERVATIONS.—The Agent and Chief Engineer of the Bengal Nagpur railway has applied for leave to adopt, on the Howrah-Cuttack and Midnapur-Sini extensions, the General Rules for working railways under construction and not used for the public carriage of passengers, animals or goods, which rules were published in the *Gazette of India* of 8th November 1890, under Public Works Department notification No. 480½, dated the 30th October 1890.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules referred to in the foregoing observations to the Howrah-Cuttack and Midnapur-Sini extensions of the Bengal Nagpur railway, which have been sanctioned for construction.

ORDER.—Ordered that the General Rules, which have already been published in the *Gazette of India* of the 8th November 1890, be further notified to the railway servants and to the public by a copy thereof being kept open to inspection, free of any charge, in the office of the engineer in charge of the construction of the railway.

Ordered, also, that this resolution be communicated to the Consulting Engineer to the Government of India for Railways, Calcutta, for information and guidance, and that it be published under a notification in Part I of the *Gazette of India*.

TELEGRAPH.

The 28th January, 1897.

No. 43.—The Governor General in Council is pleased to order the following reversion in the Superior Establishment of the Indian Telegraph Department, with effect from the date specified :—

Name.	From	To	Date.
Mr. H. C. A. Goodall .	Superintendent, class V, 2nd grade, officiating.	Assistant Superintendent, class VI, 2nd grade.	31st December, 1896.

W. S. S. BISSET, *Colonel, R.E.*,
Secretary to the Government of India.

The Gazette of India.

Matter intended for publication in the Supplement should reach the Press not later than Thursday.

WM. ROSS,

Publisher, Gazette of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 28th January 1897.

NOTIFICATIONS.

No. 317 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 23rd January 1897:—

No. 21 of 1897.—Robert Henry Livesay, secretary and general manager of the Donegal railway company, of Stranolar, in the county of Donegal, Ireland, for means for facilitating the transfer of goods between railways of different gauges.

No. 22 of 1897.—George Vickers Evans, assistant to Mr. F. W. Shallis, engineer, of 9, Marine street, Fort Bombay, for a latrine for the use of natives.

No. 23 of 1897.—Gustaf Dillberg, electrician, and William Walker, consulting engineer, both of 77, Elizabeth street, Sydney, New South Wales, for an improved machine for saving gold by the aid of mercury.

No. 24 of 1897.—Frederick George Morris Brittin, surgeon, and Benjamin Walter Glass, engineer, both of 71, Cathedral square, Christchurch, Canterbury district, New Zealand, for an improved method of, and apparatus for, freezing meat.

No. 318 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the department of land records and agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying:—

No. 80 of 1896.—William Silver, engineer, of Tamworth, New South Wales, for improvements in railway axle lubricators. (Specification filed 8th January 1897.)

No. 118 of 1896.—Temulji Dhanjibhai, mill manager, of No. 125, Hurrogunge road, Salkia, Howrah, for drying and warming oil seeds by steam power. (Specification filed 31st October 1896.)

No. 166 of 1896.—James Coleman Connel, landlord of the Dovedell estate, Simla,

for a weir or breakwater which requires no brick or mortar. (Specification filed 13th January 1897.)

No. 169 of 1896.—Henry Sabow, (the late) some time engineer, of Kurseong, Darjeeling, for packing tea—the invention being called "Sabow's patent vibrating tea packer." (Specification filed 16th January 1897.)

No. 178 of 1896.—Arthur Weinberg, doctor of philosophy, of 19, Liebigstrasse, Frankfort-on-Main, Germany, for the production of polyazo-dyestuffs from gamma-amidonaphtolsulpho acid. (Specification filed 19th January 1897.)

No. 187 of 1896.—James Burgess Readman, analytical and consulting chemist, of 4, Lindsay place, Edinburgh, for improvements in apparatus for obtaining cyanides. (Specification filed 5th January 1897.)

No. 380 of 1896.—David White, engineer, and Thomas Moore Simpson, metallurgist, both of Stawell, in the colony of Victoria, for an improved method and apparatus for extracting precious metals from slimes or other finely divided material containing the same (Specification filed 15th January 1897.)

No. 319 P.—WHEREAS the inventor of the undermentioned invention has failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fee hereinafter mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling and using the said invention in British India and of authorizing others so to do has ceased :—

No. 124 of 1892.—Frederick William Gwyther's invention for an improved close-coupling to suit ordinary metre gauge buffers. (Specification filed 17th October 1892.)

Fee in respect of the continuance of an exclusive privilege—

(*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The fee of ₹50 for the said invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

BOARD OF REVENUE, MADRAS.

NOTIFICATION UNDER SECTION 30 OF ACT XII OF 1882.

The 20th January, 1897.

No. 550-*C.*—In exercise of the powers conferred by section 7 of the Cantonment Act, 1889, the Agent to the Governor General is pleased to appoint Captain H. P. E. Parker, 29th Bombay Infantry, to be Cantonment Magistrate at Loralai.

No. 551-*C.*—Under the provisions of section 12 of the Code of Criminal Procedure, 1882, the Cantonment Magistrate at Loralai is invested *ex-officio* with the powers of a Magistrate of the second class, within the local area of the Loralai Cantonment.

The 21st January, 1897.

No. 569-C.—The following rules, made by the Quetta Municipal Committee under section 19 of the Vaccination Act, XI I of 1880, for the regulation of vaccine operations within the limits of the Quetta Municipality, have been confirmed by the Agent to the Governor General in Baluchistan, and hereby published for general information :—

Division of the Municipality into circles for the performance of vaccination.

I. The area of the Quetta Municipality shall be considered one circle for the purpose of these rules.

Appointment of a place in the circle as a Public Vaccine Station.

II. The Municipal Committee will provide a vaccination office in a convenient situation, and a board will be set up at this office, and maintained there, bearing the words "Vaccination station," followed by a notice setting forth for public information the name of the Public Vaccinator, and the hours of his daily attendance at the station on vaccination duty, and also a notice notifying that the Public Vaccinator will, on due request made, attend for the vaccination of children at their homes in the circle, and a notice that no charge will be made for vaccination, whether performed at the station or at a child's home.

III. The Civil Surgeon of Quetta shall, *ex-officio*, be Superintendent of Vaccination within the limits of the Quetta Municipality.

The authority with which the appointment, suspension and dismissal of the Public Vaccinator shall rest.

IV. The Public Vaccinator shall be appointed by the Municipal Committee, on the nomination of the Superintendent, and may, for recorded misconduct, be suspended or dismissed from office by the Municipal Committee on the recommendation of the Superintendent.

The time of attendance of the Public Vaccinator at the vaccine station, the vaccination season and the Public Vaccinator's place of residence.

V. The hours of daily attendance of the Public Vaccinator at the vaccine station shall be fixed by the Superintendent.

VI. The Public Vaccinator shall be a permanent resident of the circle, and shall be absent therefrom only for such periods of leave as may be granted by the Superintendent.

VII. The vaccination season shall continue throughout the entire year.

The distinguishing mark or badge to be worn.

VIII. The Public Vaccinator shall at all times, when engaged in the duties of his office, wear a badge in the form of a brass plate, with the words "Public Vaccinator, Quetta Municipality," engraved on it.

The facilities to be afforded to people for procuring the vaccination of children at their own houses.

IX. The Public Vaccinator shall vaccinate children of the circle at their homes at the request of a parent or guardian, or at any other place within the circle by direction of the Superintendent.

The Public Vaccinator may also visit and vaccinate children residing beyond the circle, at the request of a parent or guardian, and with the permission of the Superintendent.

The grant and form of certificates of successful vaccination, of unfitness for vaccination, or of insusceptibility to vaccination.

X. Certificates of vaccination shall be in the Form (A) hereto annexed.

XI. Certificates of unfitness for vaccination shall be in the Form (B) hereto annexed.

XII. The Public Vaccinator shall issue to the parent or guardian a certificate of vaccination in Form (A) on account of every child vaccinated on the day of vaccination, and shall complete the certificate on the day of examination, and he shall also issue to the parent or guardian a certificate in Form (B) of unfitness for vaccination, on account of every child found unfit on the day of examination. All cases of reported unfitness for vaccination shall be referred by the Vaccinator to the Superintendent, who shall countersign every certificate issued in Form (B).

Before final delivery to the parent or guardian of any certificate the Public Vaccinator shall complete and sign the entries on its fly-leaf, which shall remain bound in the book of such certificates. The Public Vaccinator shall be provided with books of the above Forms (A) and (B).

The nature of the lymph to be used, and the supply of a sufficient quantity of such lymph.

XIII. The lymph ordinarily used by the Public Vaccinator shall be human lymph, supplied to the Public Vaccinator by the Superintendent ; but arm-to-arm vaccination shall be sedulously practised. Lymph shall not be taken for any purpose from an unhealthy or weakly child, and more especially not from a child with appearance of skin disease.

In the event of a considerable demand for vaccination with animal lymph arising in the circle, the Superintendent shall either cultivate such lymph or procure a supply from elsewere.

The necessary appliances shall be supplied to the Public Vaccinator free of charge by the Superintendent.

Fee to be levied for Vaccination with human or animal lymph.

XIV. No fee shall be charged for vaccination with human or animal lymph within municipal limits.

For the successful vaccination with human or animal lymph of a child residing beyond the circle limits, when operation and inspection are performed at the child's home, the Public Vaccinator shall be entitled to a fee of four annas.

The preparation and keeping of certain Registers.

XV. The Municipal Committee shall take measures to prepare and keep the following registers in the forms appended to these rules :—

(1) Register of infants born within the circle on or after the 1st March, 1897, with a record of vaccination or reason for non-vaccination, in every Mohalla of the Municipality.

(2) Register of the names of children who either are now resident within municipal limits, or are brought into them after the 1st March, 1897, and who have not been vaccinated, or have not had small-pox, such children having resided within municipal limits for a month, and being, if boys under the age of 14 years and if girls under the age of 8 years.

XVI. The general register of vaccinations performed in the circle, and forms of monthly returns shall be supplied by the Superintendent.

XVII. On the 1st March and 1st September in each year, the Secretary to the Municipal Committee, shall cause notices to be affixed for public information in every important portion or quarter of the circle in the accompanying Form C, in English, Persian, Pushtoo and Urdu.

The Secretary, Municipal Committee, may at any time direct the public crier to call attention to these notices.

The preparation of Vaccination Reports and Returns.

XVIII. A monthly figured statement of results shall be submitted by the Public Vaccinator to the Superintendent in the approved departmental form. At the same time a copy shall be sent to the Municipal Committee.

The Public Vaccinator shall submit to the Superintendent and to the Municipal Committee a figured statement of results for the year after its termination, together with a concise report upon the working of the Act during the year.

Miscellaneous.

XIX. All the fees received by the Public Vaccinator shall be credited to the municipal fund.

XX. If at any time the Superintendent has reason to believe that a parent or guardian has failed to procure the vaccination of a child liable to vaccination under the Act, he shall cause to be delivered to such parent or guardian, or to be attached to his house, a notice in the accompanying Form D.

If such notice in not complied with, the Superintendent shall report the matter to the Secretary to the Municipal Committee, who shall proceed as directed in section 18 of the Act.

By order,

S. G. KNOX, *Lieutenant*,
Second Assistant.

Certificate of vaccination shall be in the following form :—

NOTIFICATION.

ESTABLISHMENT.

Calcutta, the 27th January, 1897.

No. 3.—Mr. E. D. Chanter, Assistant Examiner of Accounts, is transferred from the Office of the Examiner of Accounts, Military Works Department, to that of the Examiner of Public Works Accounts, Assam.

A. R. BECHER,
Offg. Accountant General.

REVENUE DEPARTMENT.

Land Revenue Branch.

NOTIFICATION.

Calcutta, the 19th January, 1897.

No. 243-L.-R.—The following is published for general information, with reference to section 42 of Act I of 1894:—

M. FINUCANE,
Secy. to the Govt. of Bengal.

An agreement made the 29th day of July one thousand eight hundred and ninety-five between the Central Jute Mills Company Limited of Ghusry of the one part and the Secretary of State for India in Council for the other part. Whereas the said Central Jute Mills Company Limited for the purpose of extending their mills building cooly lines for their workmen construction of a road and ghát for the public resorting to the river Hooghly and for the sanitary improvement of the locality have applied under the provisions of section 40 of the Land Acquisition Act (Act I of 1894) for the consent of the Local Government to the acquisition of a plot of land measuring about 8 (eight) bighas and situate on the north side of their mill premises: And whereas the Local Government being satisfied after making necessary enquiry through the Land Acquisition Collector of Howrah that the proposed acquisition is needed for the construction of some works and that such works are likely to prove useful to the public has expressed its willingness to give the necessary consent on the said Central Jute Mills Company Limited filing a plan of the works they intend carrying out and executing an agreement as provided in section 41 of the said Land Acquisition Act, now the said Central Jute Mills Company Limited in pursuance to the order aforesaid agree with the Secretary of State for India in Council (1) that they will pay to the Government the necessary cost of the acquisition, (2) that on such payment and on the transfer of the land to the said Central Jute Mills Company Limited by the Land Acquisition Collector the said Central Jute Mills Company Limited within twelve months commencing from the date of such transfer of possession (*a*) will fill up the low lands and irregular excavations with cinders and other inoffensive materials so as to raise them to at least a height of two feet above the level of the highest spring tides and otherwise reclaim them, (*b*) will build the cooly bungalows with proper roads and drains for their workmen and will build or erect a pucca privy on the spot marked X in the plan referred to in the schedule hereunder given, and (*c*) construct a road commencing from Joya Bibi's Lane and leading to the west bank of the river Hughly and build a pucca masonry ghát on the said bank and other works delineated in the plan hereunto annexed and referred to in the schedule hereinunder given and they do covenant to keep the said road ghát and other works in proper repair and to execute all orders from time to time of the Local Municipal Commissioners in that behalf. That the said Central

Jute Mills Company Limited further agree to grant to the public the right of easement over the road so constructed leading to the river bank and the ghát for the purpose of bathing and carrying water reserving to themselves the proprietary rights in the said road and ghát. In witness whereof the said Central Jute Mills Company Limited have hereunto set their hands and seal the day and year first above written.

Schedule above referred to :—A plan of the land showing the proposed construction of cooly bungalows, roads, privy, and ghát.

ANDREW YULE & Co.,
Managing Agents

Signed and sealed and delivered by the within-named Central Jute Mills Company Limited in the presence of—

A C FALCONER,
7, Clive Row, Calcutta.

W. WINGATE,
7, Clive Row, Calcutta.

THOMASON COLLEGE, ROORKEE.

NOTIFICATION.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows :—

1-pound tin, R18, or, post free, R18-12.
½ „ R 9, „ R9-8.
¼ „ R4-8, „ R5.

Analysis shows this Quinine to be of the purest manufacture ; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পোণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৲০
½ আধ „ „ ৯৲ „ ৯৲০
¼ সিকি „ „ ৪৲৮ „ ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিন্‌কোনিডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের বোটানিকেল বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.
Drawing Instruments (electrum) are available at the College Book Depot at R62 per box. Drawing Instruments, drawing materials, etc., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required :—

VOLUME I.*

Section	I.	Building Materials (1895),	₹2-0.
,,	II.	Masonry (1891),	₹1-4.
,,	III.	Carpentry (1889),	₹1-4.
,,	IV.	Earthwork (1892),	₹1-4.
,,	V.	Tools and Plant (never published).	

VOLUME II.*

Section	VI.	Buildings (1891),	₹1-4.
,,	VII.	Bridges (in the Press),	
,,	VIII.	Roads (in the Press).	
,,	IX.	Railways (1891),	₹1-4.
,,	X.	Irrigation Works (1873),	₹1-8.

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). ₹3.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. ₹8

,, II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table (in the Press).

XIII. Drawing (by Lieut. R. Pulford, R.E.).† ₹8.

XIIIa. Drawing, First Principles of Geometrical (by do.) (4th edition). ₹1-4.

XIV. Simple Applied Mechanics (2nd edition), Parts I and II in one. ₹3.

Simple Applied Mechanics, Part II (1st edition). 8*a*.

XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition) (in the Press).

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 4*a*.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 6*a*.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4*a*.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 10 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. ₹1.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunnya Lal. ₹2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet. 8*a*.; mounted on cloth and bound (in the Press). ₹1-12.

Tables for Computing Earthwork in Distributaries and small open Channels, in use in Irrigation Department, N.-W. Provinces. ₹1-4.

Tyndall's Hand-Book of Specifications. ₹5.

The Indian Engineer's Pocket Book. 4*a*.

Wooden Bridges and Designs. By Rai Kunhya Lal (in the Press).

Blasting under Water (2nd edition). 12*a*.

Waugh's Instructions for Topographical Surveying ₹1-4.

Analysis of Lime and Cement Stones. By Murray Thomson, Esq., M.D., F.R.S.E. 6*a*.

Tables for Degree Curve and Intersection Angles, from 90° to 180°, and for Fixed Tangents from 100 feet to 7,500 feet. By F. G. Brook Fox, Esq., M.I.C.E. ₹2-4.

Graphic Hydraulic Diagram for Channels in earth, etc. By R. G. Kennedy, Esq., Executive Engineer. ₹7-8

Chart, giving by a graphic method the discharges of earthen channels up to 40 feet bed width. ₹1-8.

MATHEMATICAL.

Boileau's Tables of Wages and Rent, and of the value of goods. Tables for converting Seers and Chittacks into decimals of a Maund, and Annas and Pies into decimals of a Rupee. With a few others of general utility (4th edition). ₹1-8.

Boileau's Tables of Log sin² ½ P (for computing time). 4*a*.

Cape's Logarithms, with Tables of Squares, Cubes, etc. (in the Press).

Cape's Geometry. ₹1-4.

,, **Mechanics.** ₹1.

Military Topography. 8*a*.

HINDUSTANI.

Elements of Hindustani Grammar (in the Press).

Technical Dialogues—English and Urdu. ₹1.

A Vocabulary of Common and Technical Words in English-Urdu. ₹1.

History of India (*Itihas Timirnásak*), Hindi, Parts I and II, each part 4*a*.

Short Account of Ganges Canal (English and Urdu). 8*a*.

NOTE AND FIELD-BOOKS, etc.

Note-Books (Section paper), large and small. Each ₹1-4.
Surveying Field-Books (ruled). ₹1.
Levelling Field-Books (English Pattern). ₹1-8.
,, ,, (Canal ,,). ₹1-8.
,, ,, (College ,,). ₹2-0.
P. W. D. Note-Book. ₹1-4.
,, **Measurement Book** ₹1-4.
Circular Card-board Protractors, 12 inches (exclusive of packing). ₹1-8.

MISCELLANEOUS.

Distributary Velocity and Discharge Table. By Capt. Allan Cunningham. 8*a*.

Description of Venomous Snakes. (The drawings of all the venomous snakes of Upper India, with description and all important information, extracted from the "Thanatophidia of India.") ₹1-8.

Ditto ditto in Urdu. ₹1-4.

Perspective (fully explained). By Col. A. M. Brandreth, R.E. ₹1-12.

Map of Roorkee. ₹1.

Thomason College Calendar for 1891, 1892, 1894,* and 1895,* each ₹2.

Ditto ditto for 1896* ₹4-12.

Forms of Accounts, P. W. D., for Sub-Divisional Officers, in English (very old). 8*a*.

Memo. of Instructions for Road Project. ₹1.

Thomason College Library Catalogue. ₹2-2.
Ditto, Supplement, 1895. 2*a*.
Ditto, ditto, 1890. 2*a*.

Irrigation by Rajbahas, 12*a*.
Irrigation Tract, No. I. 8*a*.
,, ,, ,, II. 8*a*.
,, ,, ,, III. 8*a*.
Land Measuring Chain Statement, Area of kucha and pucka Bighas, sheet. 4*a*.

* Date of Edition on sale.
† Originally published at ₹15, reduced to ₹8.

* These include Question Papers for entrance to Engineer and Upper Subordinate Classes and Superior Accounts Branch, Public Works Department.

Report of the Ganges Canal Committee (Major Crofton's Project for remodelling the Ganges Canal according to the views of Major-General Sir Arthur Cotton, R.E., K.C.S.I.), 1860. 8*a*.

Report of the Ganges Canal. By Captain J. Crofton, R.E., with Estimates and Plan—

Vol. I, Report, 1865. ₹1.

Vol. II, Estimates. ₹1.

Shakesperian Readings, *viz.*:—

1. **Taming of the Shrew,**
2. **Othello,**
3. **Macbeth,**
4. **Comedy of Errors,**
5. **Merchant of Venice,**

each 4*a*.

Graphic Hydraulic Diagrams for channels in earth, giving Discharges and mean Velocities for varying bed widths, depths, and slopes. By R. G. Kennedy, Executive Engineer. ₹7-8.

PLANS OF STATIONS.

Lithographed Plans of the Cantonments and Regimental Lines in the different Military Stations of India. Drawn to a uniform scale, and prepared between 1804 and 1808 for the Government of India, P. W. Department. (Useful for Executive Engineers' and Superintending Engineers' Offices.)

Bengal, 51 Plans,
Madras, 99 Plans,
Bombay, 91 Plans,
N.-W. Provinces, 104 Plans,
Oudh, 21 Plans,
Rajputana, 4 Plans,
British Burma, 19 Plans,
Central Provinces,

each 8*a*.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES.)

Vol. I. (Quarterly Nos. 1 to 5), bound ₹2, original price ₹18.

Quarterly Nos. 1, 2, 3, 4, and 5, at ₹1 each, original price ₹4 each.

Vol. II, Quarterly Nos. 6 and 7, at ₹1 each.

„ III, „ No. 13, ₹1.

„ V, „ Nos. 18, 19, 20, and 21, ₹1 each.

„ VI, „ Nos. 22, 23, 24, and 25, ₹1 each.

„ VII, „ Nos. 26, 27, 28, and 29, ₹1 each.

Extra No., April 1870, ₹1.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI of the Series at ₹1 each

Quarterly Number 41A of Vol. X, at ₹1 each

Cloth covers for Volumes 1st and 2nd Series, at As. 8 each

(THIRD SERIES.)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15, at ₹1 each.

Index to Professional Papers and loose Papers, 1st and 2nd Series, at 2*a*. each

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . ₹22-8

	Without postage. ₹ a. p.	With postage. ₹ a. p.
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town. ₹ a. p.	For mofussil. ₹ a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series; per copy . . .	0 5 3	0 5 9
„ the Calcutta Series. For the year .	7 2 0	8 6 3
„ each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

The Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page. ₹	*Half page.* ₹	*Quarter page.* ₹
For one issue . . .	20	14	9
„ three issues . . .	„ 55	„ 36	„ 24
„ six „ . . .	„ 100	„ 68	„ 45
„ nine „ . . .	„ 145	„ 96	„ 64
„ twelve „ . . .	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage. ₹ a. p.	With postage. ₹ a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies, ₹2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, ₹22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 28th January, 1897 and is hereby promulgated for general information :—

ACT No. II OF 1897.

An Act to amend the Criminal Tribes' Act, 1871.

XVII of 1871.

WHEREAS it is expedient to amend the Criminal Tribes' Act, 1871; It is hereby enacted as follows :—

Title and commencement.

1. (*1*) This Act may be called the Criminal Tribes' Act Amendment Act, 1897; and

(*2*) It shall come into force at once.

XXVII of 1871.

Addition of proviso to section 1, Act XXVII, 1871.

2. To section 1 of the Criminal Tribes' Act, 1871, the following proviso shall be added, namely :—

"Provided that any Local Government, with the previous sanction of the Governor General in Council, may, by notification in the local official Gazette, declare all or any of the provisions of this Act, as amended by subsequent legislation, to be in force in the whole or any part of the territories under its government."

XXVII of 1871.

Addition of new section after section 1, Act XXVII, 1871.

3. After section 1 of the Criminal Tribes' Act, 1871, the following section shall be inserted, namely :—

Definition of tribe, gang and class.

"1A. In this Act the words 'tribe,' 'gang' and 'class' shall be deemed to include any portion or members of a tribe, gang or class."

Addition of new section after section 17, Act XXVII, 1871.

4. After section 17 of the said Act the following section shall be added, namely :—

Power to place children in reformatory settlements established for children and to apprentice them.

"17A. (*1*) The Local Government may establish and maintain reformatory settlements for children and may separate and remove from their parents and place in such a reformatory settlement the children of the registered members of any tribe, gang or class which has been declared to be criminal.

(*2*) For every reformatory settlement for children established under sub-section (*1*) a Superintendent shall be appointed by the Local Government.

(*3*) The Superintendent of a reformatory settlement for children shall be deemed to be the guardian, within the meaning of Act No. XIX of 1850 (*concerning the binding of apprentices*), of every child detained in such settlement; and such Superintendent may, if he shall think fit, and subject to any rules which the Local Government may make in this behalf, apprentice such child under the provisions of the aforesaid Act.

"*Explanation.*—The term 'children' in this section includes all persons under the age of eighteen and above the age of four years."

Substitution of new section for section 19, Act XXVII, 1871.

5. For section 19 of the said Act the following section shall be substituted, namely :—

Penalties for breach of rules.

"19. (*1*) Any person registered under this Act violating a rule made under clause (*4*), clause (*5*) or clause (*6*) of section 18 shall be punishable with rigorous imprisonment for a term which may extend, on a first conviction, to one year, on a second conviction, to two years, and, on any subsequent conviction,

to three years, and shall also, whether on the first or any subsequent conviction, be liable to whipping.

(2) Any person being a member of a proclaimed tribe violating a rule made under any other clause of section 18 shall be punishable with rigorous imprisonment for a term which may extend to six months, or with fine, or with whipping, or with all or any two of those punishments; and, on any subsequent conviction for a breach of any such rule, with rigorous imprisonment for a term which may extend to one year, or with fine, or with whipping, or with all or any two of those punishments."

Addition of two new sections after section 19, Act XXVII, 1871.

6. After section 19 of the said Act the following sections shall be added, namely:—

Enhanced punishment for certain offences by members of criminal tribe after previous conviction.

"19A. Whoever, being a member of any tribe, gang or class which has been declared criminal, and having been convicted of any of the offences under the Indian Penal Code specified in the schedule to this Act, shall thereafter be convicted of the same or any other offence specified in the said schedule, then he shall, in the absence of special reasons to the contrary to be mentioned in the judgment of the Court, be punished, on such second conviction, with rigorous imprisonment for a term of not less than seven years, and on a third conviction with transportation for life.

XLV of 1860.

Nothing in this section shall affect the liability of such person to any further or other punishment to which he may be liable under the Indian Penal Code or any other law.

Punishment for members of criminal tribe found under suspicious circumstances.

"19B. Whoever, being a registered member of any tribe, gang or class which has been declared criminal, is found in any place under such circumstances as to satisfy the Court that he was about to commit, or aid in the commission of, theft or robbery, or that he was waiting for an opportunity to commit theft or robbery, shall be punishable with rigorous imprisonment for a term which may extend to three years, and shall also be liable to fine."

Addition of schedule to Act XXVII of 1871.

7. To the said Act the schedule in the schedule to this Act shall be added.

THE SCHEDULE.

(*See section 7.*)

THE SCHEDULE.

(*See section 19A.*)

CERTAIN OFFENCES PUNISHABLE UNDER CHAPTERS XVI AND XVII OF THE INDIAN PENAL CODE.

CHAPTER XVI.

SECTIONS.

299. Culpable homicide.
307. Attempt to murder.
308. Attempt to commit culpable homicide.
310. Thug.
322. Voluntarily causing grievous hurt.
324. Voluntarily causing hurt by dangerous weapons or means.
326. Voluntarily causing grievous hurt by dangerous weapons or means.
327. Voluntarily causing hurt to extort property or to constrain to an illegal act.
328. Causing hurt by means of poison, etc., with intent to commit an offence.
329. Voluntarily causing grievous hurt to extort property or to constrain to an illegal act.
332. Voluntarily causing hurt to deter public servant from his duty.
333. Voluntarily causing grievous hurt to deter public servant from his duty.

CHAPTER XVII.

382. Theft after preparation made for causing death, hurt or restraint, in order to the committing of the theft.
383. Extortion.
385. Putting person in fear of injury in order to commit extortion.
386. Extortion by putting a person in fear of death or grievous hurt.
387. Putting person in fear of death or of grievous hurt in order to commit extortion.
390. Robbery.
391. Dacoity.
393. Attempt to commit robbery.
394. Voluntarily causing hurt in committing robbery.
397. Robbery or dacoity, with attempt to cause death or grievous hurt.
398. Attempt to commit robbery or dacoity when armed with deadly weapon.
399. Making preparation to commit dacoity.
402. Assembling for purpose of committing dacoity.
458. Lurking house-trespass or house-breaking by night after preparation for hurt, assault or wrongful restraint.
459. Grievous hurt caused whilst committing lurking house-trespass or house-breaking.
460. All persons jointly concerned in lurking house-trespass or house breaking by night punishable where death or grievous hurt caused by one of them.

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to provide for certain matters relating to Fisheries in British India was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 28th January, 1897 :—

WE, the undersigned, Members of the Select Committee to which the Bill to provide for certain matters relating to fisheries in British India was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

From Agent to Governor General, Baluchistan, No. 5897, dated 31st October, 1893 [Paper No. 1].
From Mr P. R. Desai, Pleader, District Court, Ratnagiri, dated 3rd October, 1893 [Paper No. 2].
From Chief Commissioner, Coorg, No. 1860—170-93, dated 15th November, 1893 [Paper No. 3]
From Chief Commissioner, Ajmere-Merwara, No. 212C, dated 21st December, 1893 [Paper No. 4].
From High Court, Calcutta, No 60, dated 8th January, 1894 [Paper No. 5].
From Secretary for Berar to Resident, Hyderabad, No. 14, dated 10th January, 1894 [Paper No 6],
From Chief Commissioner, Assam, No $\frac{31}{343}$], dated 11th January, 1894 [Paper No 7].
Telegram from Chief Commissioner, Burma, No. 72, dated 18th January, 1894 [Paper No. 8].
From Chief Commissioner, Burma, No. 497—2-F.-4, dated 22nd January, 1894, and enclosures [Papers No. 9].
From Government, Punjab, No. 90, dated 25th January, 1894, and enclosures [Papers No. 10]
From Government, North-Western Provinces and Oudh, No. 355, dated 9th January, 1894, and enclosures [Papers No. 11]
From Chief Commissioner, Central Provinces, No. 1035, dated 10th February, 1894, and enclosure [Papers No. 12].
From Government, Bombay, No. 1647, dated 2nd March, 1894, and enclosures [Papers No 13].
From Government, Madras, No. 315, dated 16th May 1894, and enclosures [Papers No 14].
From Government, Bengal, No 940, dated 19th February, 1895, and enclosures [Papers No. 15].
Note by the Hon'ble Pandit Bishamber Nath, dated 17th December, 1896 [Paper No. 16]
From Honorary Secretary, Fishing Memorial Committee, Rawalpindi, dated 11th January, 1897, and enclosure [Papers No. 17].

2. *Clauses 1 and 2.*—We have expressly excluded Burma from the scope of the proposed Act, as that province is already sufficiently provided for by the Burma Fisheries Act (VII of 1875), the Upper Burma Revenue Regulation and the rules thereunder.

3. *Clause 3 (3).*—We have revised the definition of "private water" so as to make it clear that it covers water over which an exclusive right of fishery has been acquired by lease or otherwise, and we have added an *Explanation* to the definition to prevent water being held not to be private, because other persons may have by custom a right of fishery therein.

4. *Clause 5.*—We have omitted sub-clause (*2*) and the schedule appended thereto, as we think it more convenient to allow the provisions of the Forest laws and rules in question to stand for the present. We consider that there is no reason why a different law should not prevail in the forests from elsewhere. By the addition of a new sub-clause, we have conferred power on the Local Government to suspend the operation of this clause, which prohibits the destruction of fish by poisoning of waters, in any specified area so as to enable it to relax the prohibition in such cases as it thinks desirable in order to save existing customs.

5. *Clauses 6, 7 and 8.*—These clauses, which may be styled the poaching clauses, have been omitted by us from the Bill for the reasons given by the Hon'ble Sir John Woodburn in his speech in Council on the 15th day of October, 1896, in which we concur.

6. *Clause 9 (new clause 6).*—We have made various changes in this clause. We have revised sub-clauses (*1*) and (*2*) so as to restrict the former to waters "not being private waters" and the latter to "private waters," and we have limited the consent required under the latter sub-clause to owners and "all persons having for the time being any exclusive right of fishery therein", instead of owners "and all other persons interested therein" as at present. We have shortened and simplified the description of the details as to which rules may be made, omitting clauses (*d*) and (*e*) of sub-clause (*3*) and clause (*b*) (*iii*) of sub-clause (*5*) entirely, because we are not satisfied as to the practical necessity for them. We have omitted the words requiring the previous sanction of the Governor General in Council to the making of rules by the Local Government, as we consider the matter is one which, now that the scope of the rules has been carefully limited and defined, may be safely left to the discretion of the Local Government.

7. *Clause 10 (new clause 7).*—We have amended this clause so as to indicate that offences against the proposed Act and rules will be strictly non-cognizable. In revising the clause we have followed the lines of section 83 of the Punjab Municipal Act, 1891, the wording and arrangement of which appear to us to be an improvement upon section 57 of the Code of Criminal Procedure.

No. II.

A Bill to Provide for certain matters relating to Fisheries in British India.

WHEREAS it is expedient to provide for certain matters relating to fisheries in British India; It is hereby enacted as follows :—

1. (*1*) This Act may be called the Indian Fisheries Act, 1897.

Title, extent and commencement.

(*2*) It extends to the whole of British India, *except Burma*; and

(*3*) It shall come into force at once.

2. Subject to the provisions of sections 8 and 10 of the General Clauses Act, 1887, this Act shall be read as supplemental to any other enactment for the time being in force relating to fisheries in any part of British India *except Burma*.

Act to be read as supplemental to other Fisheries Laws.

3. In this Act, unless there is *anything* repugnant in the subject or context,—

Definitions.

(*1*) "fish" includes shell-fish :

(*2*) "fixed engine" means any net, cage, trap or other contrivance for taking fish, fixed in the soil or made stationary in any other way : and

(*3*) "private water" means water which is the exclusive property of any person, or in which any person has *for the time being* an exclusive right of fishery *whether as owner, lessee or in any other capacity*.

EXPLANATION.—Water shall not cease to be "private water" within the meaning of this definition by reason only that other persons may have by custom a right of fishery therein.

4. (*1*) If any person uses any dynamite or other explosive substance in any water with intent thereby to catch or destroy any of the fish that may be therein, he shall be punish*able* with imprisonment for a term which may extend to two months, or with fine which may extend to two hundred rupees.

Destruction of fish by explosives in inland waters and on coasts.

(*2*) In sub-section (*1*) the word "water" includes the sea within a distance of one marine league of the sea-coast : and an offence committed under that sub-section in such sea *may be tried, punished and in all respects dealt with as if it had* been committed on the land abutting on such coast.

5. (*1*) If any person puts any poison, lime or noxious material into any water with intent thereby to catch or destroy any fish, he shall be punish*able* with imprisonment for a term which may extend to two months, or with fine which may extend to two hundred rupees.

Destruction of fish by poisoning of waters.

(*2*) *The Local Government may, by notification in the official Gazette, suspend the operation of this section in any specified area, and may in like manner modify or cancel any such notification.*

6. (*1*) The Local Government may make rules for the purposes hereinafter in this section mentioned, and may by a notification in the official Gazette apply all or any of such rules to such waters, ***not being private waters***, as *the Local* Government may specify in the said notification.

Protection of fish in selected waters by rules of Local Government

(*2*) The Local Government may also, by a like notification, apply such rules or any of them to *any private* water with the consent *in writing* of the owner thereof *and of all persons having for the time being any exclusive right of fishery therein.*

(*3*) Such rules may prohibit or regulate all or any of the following matters, that is to say :—

(*a*) the erection and use of fixed engines;

(*b*) the construction of weirs, and

(*c*) *the dimension and kind of the nets to be used and the modes of using them.*

(*4*) Such rules may also prohibit all fishing in any specified water for a period not exceeding two years.

(*5*) In making any rule under this section the Local Government may—

(*a*) direct that a breach of it shall be punishable with fine which may extend to one hundred rupees, and, when the breach is a continuing breach, with a further fine which may extend to ten rupees for every day after the *date of the* first *conviction* during which the breach *is proved to have been persisted in*; and

(*b*) provide for—

(i) the seizure, forfeiture and removal of fixed engines erected, or used, or nets used, in contravention of *the* rule, *and*

(ii) the forfeiture of any fish taken by means of any such fixed engine or net.

(*6*) The power to make rules under this section is subject to the condition that they shall be made after previous publication.

7. (*1*) Any *police-officer*, or *other* person specially empowered by the Local Government in this behalf, *either* by name or *as holding any* office, *for the time being*, may, without an order from a Magistrate and without warrant, arrest any person *committing in his view* any offence punishable under section 4 *or* 5 or under any rule under section 6—

Arrest without warrant for offences under this Act.

(*a*) *if the name and address of the person are unknown to him, and*

(*b*) *if the person declines to give his name and address, or if there is reason to doubt the accuracy of the name and address if given.*

(*2*) *A person arrested under this section may be detained until his name and address have been correctly ascertained :*

Provided that no person so arrested shall be detained longer than may be necessary for bringing him before a Magistrate, except under the order of a Magistrate for his detention.

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to provide for the recognition in British India of Probates and Letters of Administration granted by Courts in the United Kingdom was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 28th January 1897 :—

WE, the undersigned, Members of the Select Committee to which the Bill to provide for the recognition in British India of probates and letters of administration granted by Courts in the United Kingdom was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report.

From L. P. D. Broughton, Esq., Administrator General, Bengal, dated 24th March, 1896 [Paper No 1].

From Agent to Governor General in Baluchistan, No. 3599, dated 7th May, 1896 [Paper No 2].

From Chief Commissioner, Coorg, No 6,0, dated 2nd June, 1896 [Paper No. 3].

From Government, Bengal, No. 124 J. D., dated 17th June, 1896, and enclosures [Papers No. 4].

From Chief Commissioner, Central Provinces, No. 4155, dated 22nd June, 1896 [Paper No. 5].

From Secretary for Berar to Resident, Hyderabad, No. 185, dated 11th July, 1896, and enclosures [Papers No 6]

From High Court, Calcutta, No. 1742, dated 11th July, 1896 [Paper No. 7].

From Chief Commissioner, Ajmére Merwara, No 535—690, dated 13th July, 1896 [Paper No 8]

From Chief Commissioner, Assam, No. 137 L & L—287 J., dated 13th July, 1896, and enclosures [Papers No. 9].

From Chief Commissioner, Burma, No. 462 L-15, dated 17th July, 1896, and enclosures [Papers No. 10].

From Government, Punjab, No. 884, dated 28th July, 1896, and enclosures [Papers No 11].

From Government, Bombay, No. 5221, dated 31st July, 1896, and enclosures [Papers No 12].

From Government, North-Western Provinces and Oudh, No 928, dated 7th August, 1896, and enclosures [Papers No. 13].

From Government, Bombay, No. 5570, dated 12th August, 1896, and enclosure [Papers No. 14].

From Government, Madras, No. 1239 (Judicial), dated 1st August, 1896, and enclosures [Papers No. 15].

2. The publication ordered by the Council has been made as follows :—

In English.

Gazette.	*Date.*
Gazette of India	14th March, 1896.
Fort Saint George Gazette	24th March, 1896.
Bombay Government Gazette	19th March, 1896.
Calcutta Gazette	1st April, 1896.
North-Western Provinces and Oudh Government Gazette	28th March, 1896.
Punjab Government Gazette	10th April, 1896.
Central Provinces Gazette	11th April, 1896

Coorg District Gazette	1st June, 1896
Sind Official Gazette	23rd April, 1896.

3. We have come to the conclusion that there is no sufficient reason for proceeding with the Bill. Its object is to provide for reciprocity between the Indian and English Courts of Probate and to pave the way for the application of the Colonial Probates Act, 1892 (55 Vict., c. 6), to India. Such legislation is probably required in other colonies and possessions, but in the case of India no difficulty has yet been experienced, and we do not think that any is to be apprehended.

The procedure under the Indian Succession Act, 1865, works smoothly and provides for the administration of all Indian assets whether there be an English will or not. If the will has been proved in England, section 180 of the Succession Act and section 5 of the Probate and Administration Act, 1881, provide for grant of administration (with copy of the will annexed) to the nominee of the English executor. It is more convenient that the administration of assets in India should be conducted by a person in India, who is appointed by, and directly responsible to, the Indian Court, than that it should be conducted by a person who is merely the agent of the executor in England.

4. Where probate or letters of administration have been granted in India, no practical difficulty appears to arise as regards assets situated in England, because it is the practice of the Courts there to recognise and give effect to properly authenticated copies of the Indian grants—see *Williams on Executors*, Ed. 9, page 305.

5. In some respects there are differences between the Indian and English rules of administration, and if, as the Bill proposes, the English grants were simply re-sealed in India, the English rules might supersede the well understood rules of the Indian Acts as regards Indian assets, and complications which it is difficult to provide for beforehand might arise. For these reasons we think it is better to leave the existing practice undisturbed.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 28th January 1897:—

NO. 1 OF 1897.

A Bill to provide for the better prevention of the spread of Dangerous Epidemic Disease.

WHEREAS it is expedient to provide for the better prevention of the spread of dangerous epidemic disease; It is hereby enacted as follows:—

Short title, extent and commencement.

1. (1) This Act may be called the Epidemic Diseases Act, 1897.

(2) It extends to the whole of British India (inclusive of Upper Burma, British Baluchistan, the Santal Parganas and the Pargana of Spiti); and

(3) It shall come into force at once.

Power to take special measures and prescribe regulations as to dangerous epidemic disease.

2. (1) In the event of India or any part thereof being at any time visited by, or threatened with, an outbreak of any dangerous epidemic disease, the Governor General in Council, if he thinks that the ordinary provisions of the law for the time being in force are insufficient for the purpose, may take such measures and, by public notice, prescribe such temporary regulations to be observed by the public or by any person or class of persons as he shall deem necessary to prevent the outbreak of such disease or the spread thereof, and may determine in what manner any expenses incurred shall be defrayed.

(2) In particular and without prejudice to the generality of the foregoing provisions, the Governor General in Council may take measures and prescribe regulations for—

(a) the inspection of any ship or vessel leaving, or arriving at, any port in British India and such detention thereof, or of any person intending to sail therein, as may be necessary; and

(b) the inspection of persons travelling by railway or otherwise and the segregation, in hospital or otherwise, of persons suspected of being infected with any such disease.

(3) The Governor General in Council may, by general or special order direct that all or any of the powers conferred by this Act may also be exercised by any Local Government with respect to the territories administered by it.

Penalty.

3. Any person disobeying any regulation, or order made under this Act shall be deemed to have committed an offence punishable under section 188 of the Indian Penal Code. XLV of 1860.

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is sufficiently explained by the title thereof, and the spread of the bubonic plague from Bombay unfortunately renders it unnecessary to dwell on the reasons for its introduction in Council. It may, however, be stated that its main provisions are based upon those contained in sections 434 and 473 of the City of Bombay Municipal Act, 1888.

PART VI.

Abstract of the Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

ABSTRACT OF THE PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House on Thursday, the 28th January, 1897.

PRESENT:

His Excellency the Earl of Elgin, Viceroy and Governor General of India, P.C., G.M.S.I., G.M.I.E., LL.D., *presiding*.
His Excellency Sir G. S. White, G.C.I.E., K.C.B., V.C., Commander-in-Chief in India.
The Hon'ble Sir J. Westland, K.C.S.I.
The Hon'ble Sir J. Woodburn, K.C.S.I.
The Hon'ble M. D. Chalmers.
The Hon'ble Major-General Sir E. H. H. Collen, K.C.I.E.
The Hon'ble A. C. Trevor, C.S.I.
The Hon'ble H. E. M. James.
The Hon'ble Sir A. S. Lethbridge, K.C.S.I., M.D.
The Hon'ble M. R. Ry. P. Ananda Charlu, Rai Bahadur.
The Hon'ble Alan Cadell, C.S.I.
The Hon'ble J. D. Rees, C.I.E.
The Hon'ble G. P. Glendinning.
The Hon'ble Sir Lakshmishwar Singh, K.C.I.E., Maharaja Bahadur of Durbhanga.
The Hon'ble Rao Sahib Balwant Rao Bhuskute.
The Hon'ble P. Playfair, C.I.E.
The Hon'ble Rahimtula Muhammad Sayani, M.A., LL.B.
The Hon'ble Pandit Bishambar Nath.
The Hon'ble Joy Gobind Law.
The Hon'ble C. C. Stevens, C.S.I.
The Hon'ble Sir H. T. Prinsep, KT.

NEW MEMBER.

The Hon'ble SIR HENRY PRINSEP took his seat as an Additional Member of Council.

FISHERIES BILL.

The Hon'ble SIR JOHN WOODBURN presented the Report of the Select Committee on the Bill to provide for certain matters relating to Fisheries in British India.

CRIMINAL TRIBES' ACT, 1871, AMENDMENT BILL.

The Hon'ble MR. CADELL moved that the Report of the Select Committee on the Bill to amend the Criminal Tribes' Act, 1871, be taken into consideration. He said:—"My Lord, I have now the honour to move that the Criminal Tribes' Act Amendment Bill, as modified by the Select Committee, be taken into consideration.

"Legislation against criminal tribes in Northern India began very long ago, indeed long before the worst of the tribes with which we have now to deal came much into contact with our administration. For, under Regulation XXII of 1793, Magistrates were invested with summary powers, and could put members of certain specified tribes, vagrants and suspected persons to work on the roads, and could imprison them for six months if they absconded.

"When the Indian Penal Code and the Code of Criminal Procedure were enacted, these summary powers came to an end, but as the new law provided very inefficient substitutes for them, further legislation was found to be necessary, and after a long interval the Criminal Tribes' Act, XXVII of 1871, was passed; and in the North-Western Provinces—

The Bowriahs of Bidowli in Muzaffarnagar,
The Sunauriahs in Lalitpur,
The Haburahs and Ahcriahs of certain villages in the Etah district, and
The Barwárs of Gorakhpur,

and also a number of criminal tribes in the Punjab were brought under the Act.

"But curiously enough, the worst tribe of all, that of the Sansiahs, was left unmolested, until the dakaitis committed by them in the Punjab attracted special attention, and Mr. Warburton of the Punjab Police was deputed to inquire into their misdeeds. In consequence of these inquiries, 32 Sansiahs were arrested in Aligarh, and of these 25 were convicted of dakaiti or of belonging to a gang of dakaits.

"Mr. Warburton ascertained from his approvers that during 5 or 6 years, over 200 dakaitis had been committed by members of the Sansiah tribe in the North-Western Provinces and about 80 in the Punjab. The character of the tribe is well indicated by the fact that of 186 male Sansiahs in Aligarh 129 had been convicted for 284 offences, and that only 13 male Sansiahs over 15 years of age had escaped conviction.

"After much delay, the Sansiahs were at last brought under the Act, and the difficulty in dealing with this specially dangerous and mischievous tribe has been a chief cause of the more serious measures of restriction now proposed. The piece of legislation now before the Council is an immediate consequence of the recommendations of the Police Committee appointed by the Government of the North-Western Provinces to inquire into certain questions connected with the Police Administration. These recommendations with respect to criminal tribes, and the experience which the Government of Sir Auckland Colvin had acquired in dealing with the Sansiahs, led to three distinct recommendations being made to the Government of India in the beginning of 1891.

I.—That the preliminary steps for bringing a criminal tribe under the provisions of Act XXVII of 1871 may be simplified, and that any part of a criminal tribe may be proclaimed.

II.—That provision may be made for the more severe punishment, after a first conviction, of an adult member of a criminal tribe,

III.—That greater power be given to Local Governments in disposing of children of criminal tribes brought under the Law, with a view to their reformation.

"There was practically a fourth recommendation—that for the amendment of section 401 of the Indian Penal Code suggested in his evidence before the Police Committee by Mr. Justice Straight.

"All these recommendations find a place in the Bill which has been submitted to Council, and as now amended, although some of the provisions at first proposed have undergone material change.

"Section 2 of the Bill provides for the first recommendation of the North-Western Provinces Government, and has been but slightly altered in Committee.

"Section 3, if passed, will add 17 A to the Act, and will provide for the removal of children to a reformatory. The principal changes made by the Committee in the clause as originally drafted have been, first, to restrict the provisions of the clause to the children of registered members of a criminal tribe. This implies that such members have had an opportunity of complaining against the entry of their names in the register, and that after enquiry their names have been retained. We have also defined the word child, and power has been given to remove the children at an early age, in order to save them from contamination, but the rules on this subject may be varied by the Local Governments, as experience may direct, and they need not be the same for all tribes.

"The necessity for removing the children from the control of the parents has in the North-Western Provinces, where these tribes are most widely known, been accepted by every officer who has expressed an opinion upon this point, but in the Punjab there is great diversity of opinion, and the opinions alternate in the most striking manner. But the Select Committee has retained in the Bill the power to remove children of both sexes from their parents, notwithstanding the concurrence of the Punjab Government in the view of some of its officers 'that girls should not be removed from their mothers.' But one of these officers lessens the force of his argument by admitting that he had heard that 'in some criminal tribes the women are worse than the men,' and although this would be difficult, the fact that they are as bad, or nearly as bad, renders them entirely unfit for the charge of either girls or boys who are to lead a respectable life. Among the Sansiahs, for example, owing possibly to the frequent absence of the men in jail or in hiding, the headship of the tribe or section of a tribe vests in a woman, who must be as active in the organization of crime, as any of the male members of it are in the commission of crime. Many of the women are most expert thieves, and they are ordinarily people of morality and of low most degraded habits. To leave children to the guidance of such parents would be to deprive them of their only chance of reformation.

"Section 4 of the Bill as originally framed, very greatly increased the severity of the punishments, which could be awarded for the violation of the rules most essential to the control of the proclaimed tribes. We have somewhat moderated the severity at first proposed, but we have increased the possible periods of imprisonment to double and treble what they are under the present law. This greater stringency will, it is believed, materially strengthen the administration in dealing with all criminal tribes, and will not be too severe in the case of the less violent tribes, which may be brought under the Act.

"The clause which if passed will become section 19A of the Criminal Tribes' Act was at first drafted on the lines of section 75, Act XLV of 1860, and this accounts for the retention in the clause (as originally printed) of the reference to Chapter XII of the Indian Penal Code. The minimum penalties proposed have now, as suggested by the Government of the North-Western Provinces, been restricted to cases in which a crime of violence has been committed for the second time by a member of a criminal tribe. Minimum punishments are exceptional, but when a man belongs to a tribe which is addicted to the systematic commission of crime, and when he has already been found guilty of violent crime, it is most desirable that, for the second offence, he should on conviction be certain of a substantial sentence, and that the public should be protected for a prolonged period from his violence. Many members of the Sansiah tribe are so careless of human life, that when they attack wayfarers the chances are about equal whether they kill or stun, and even, if we do nothing more than change these criminals from murderous robbers into thieves, we shall have done something towards the prevention of suffering. And it is to be noted that a vigorous Judge can already,

under section 75 of the Indian Penal Code, inflict the punishments, enjoined by this section.

"Clause 19B was at first proposed by the Government of the North-Western Provinces as an amendment of ection 401 of the Indian Penal Code, and when it was decided at the suggestion of the Punjab Government to deal with the clause as an addition to the Criminal Tribes' Act, the full punishment provided by section 401 was at first retained. But inasmuch as section 401 is always available, when it can be proved that the accused person belongs to a gang of thieves, and section 402 when it can be proved that five or more persons are assembled for the purpose of dakaiti, it was held that a smaller punishment would be sufficient in the case of a registered member of a criminal tribe about to commit theft or robbery. This reduction in the punishment is in the direction suggested by the Punjab Government. The Government of the North-Western Provinces does not now press for this clause, but it seemed to the Select Committee, that, if passed into law, it would strengthen the hands of the Executive, and that the difficulty hitherto experienced in securing convictions under section 401, Indian Penal Code, will not be felt to the same extent under the law as proposed, for the great difficulty hitherto has been to satisfy the Courts that the accused belongs to a gang of persons associated for the purpose of habitually committing theft or robbery. And there will be much less difficulty in proving, where this is possible at all, that the accused is a member of a criminal tribe. As has been pointed out in the report of the Select Committee, the operative portion of the clause has been taken word for word from the English Prevention of Crimes Act, and it was held that a similar provision is as necessary in this country as in England.

"When it is considered at what classes of people this legislation is aimed, and that the original provisions of the Bill have been largely moderated by the Select Committee, there is not, I think, any ground left for the objection that the provisions of the Bill as it now stands are too severe. That they are severe is unquestionable, but, if severity is ever justifiable, it is justifiable towards those who generation after generation have been living upon the plunder of their neighbours, and who in many cases have no compunction in sacrificing life, in order to secure the most petty gain to themselves. And when looked at from another standpoint there can be no piece of legislation more beneficial to the law-abiding portion of the community, than one such as this, which has for its object to strengthen the hands of the administration in coercing and reclaiming people who have so long been a scourge not only to the localities in which they live, but also to the distant places to which their depredations extend."

The motion was put and agreed to.

The Hon'ble MR. JAMES moved that the following clause be inserted as clause 2 of the Bill, as amended by the Select Committee, and that the numbering of the following clauses be altered accordingly:—

"2. To section 1 of the Criminal Tribes' Act, 1871, the following proviso shall be added, namely:—

"'Provided that any Local Government, with the previous sanction of the Governor General in Council, may, by notification in the local official Gazette, declare all or any of the provisions of this Act, as amended by subsequent legislation, to be in force in the whole or any part of the territories under its government.'"

He said:—"My Lord, I should have been glad to give a silent vote for the Bill and to leave to Bengal, the North-Western Provinces and Oudh, and the Punjab the reputation of being the only parts of India which foster criminal tribes. But unfortunately these undesirable elements are not wanting in other provinces also, and I submit therefore to the Council, that, when passing this Bill, the opportunity should not to lost of giving to all other Local Governments, with the prior sanction of the Government of India, the power of regulating such tribes, wherever they are found and when the need for such regulation is proved. In illustration of this view I may mention to the Council that of late in Sind I have had serious reason for regretting that the powers given by the Act could not, as the law stands at present, be extended to part of that province. There exists in Sind a pretty numerous sect or class called Hurs. Their bond of union is devotion to a Pir or spiritual guide, whom they revere, not as a prophet, but as God

Almighty Himself. Of course the Pir, like the King of England, can, in the eyes of his followers, do no wrong, but his lieutenants can, and fanatical to a degree and jealous of one another these lieutenants themselves are frequently either the instigators or the victims of murder. Indeed the last Pir but one, who died only a few years ago, on one occasion narrowly escaped the gallows himself for the murder of a rival Pir Murder as the ordinary means of attaining spiritual ends, tends, as the Council will readily admit, to demoralise the general character of a society; in consequence, minor crimes of violence, grievous hurt, dakaiti and robbery are looked upon by the Hurs as venial faults, and indeed those who commit them are deserving of sympathy, and must be protected by all their fellow-Hurs. For nearly three years a band of fourteen Hurs, headed by a man who had murdered a rival lieutenant, openly defied the authorities, with the countenance, in fact with the active aid of the local Hur zamindars, and peace and security were not restored to the country till all but one had been executed or shot down fighting. Had this Act been in force against the Hurs and had rules existed under section 18, I think I am justified in saying that the outlawry might have been stamped out at an earlier stage, various horrible atrocities would have been prevented, the lives of loyal Police-officers and unoffending citizens would have been saved and the robbery of a great deal of property would not have occurred. Where you have a class of men whose bigotry and freemasonry prevent its members (some of them outwardly well-to-do and respectable persons) from aiding in the prevention of violent crime, but rather stimulate them to protect it, the public safety demands that they be put under special regulations. There is another criminal tribe of my acquaintance, named the Jagaranis, in North Sind. Settled in the dense forests they are habitually addicted to cattle stealing, a crime which in an agricultural country is specially cruel, as it takes away the cultivator's means of livelihood. We have placed special punitive Police posts upon them; we have sent them to jail, when we could get proof, and we have even offered them, without success, employment in our Police. But though I admit that I have not heard very much of them lately, I believe they still prefer a thieving life in the jungles. Under this Act I could move them bodily from their lair in the forests and by giving them waste lands in the great canals which are now under construction, gradually turn them into useful citizens, just as General Jacob did with the lawless Hill-Baluchis 50 years ago, by the construction of the Begari Canal. Outside Sind again in the Bombay Presidency proper, I know of at least one criminal tribe, the Bhamteas, who, when asked their profession in Court, answer complacently 'Theft,' and whose operations are now much facilitated by railways. They are a miserable little tribe I am bound to say, and very likely special measures in regard to them may be thought unnecessary. But the Act would undoubtedly strengthen the hands of the Inspector General of Police in dealing with them or any other tribe or class of the kind. The Council will notice that the Act gives every security against honest members of tribes becoming subjected to the disabilities of the Act, merely on account of a few evil-behaved individuals. A thoroughly good case must be made out against the community first, and then the Governor General in Council will weigh carefully and decide whether the case is strong enough to justify the Act being introduced. No Local Government can put the Act in force *suo motu*. The amendment, I repeat, is merely permissive, enabling other Local Governments than those of the three northern provinces to apply for such extension when the need arises. I would only add a word more: As Mr. Cadell has said, gentlemen who live at home at ease and in security are apt to forget that the poor labouring cultivator and the struggling trader living in far off villages are also entitled to the protection of the law for their lives and property. And when crime becomes endemic in a certain tribe, whether they be called Thugs or Sansiahs or Hurs, it is not for the mere pleasure of the executive but for the sake of the law-abiding subject that special measures are necessary. I trust therefore that the amendment of which I have given notice and which I beg to move will meet with the approval of this Council."

The Hon'ble MR. REES said:—"The provisions of this Bill though more lenient than those of the original draft are nevertheless of an extremely stringent

character. I believe, however, that there is abundant evidence that they do not go beyond the necessities of the case, having in view the protection of society and the reformation of the particular tribes to which the Bill is primarily intended to apply. These are described in the Statement of Objects and Reasons as tribes composed of criminals of the worst type whose only occupation is crime. Such a description at once distinguishes the Sansiahs and kindred tribes from others conventionally known as criminal. For instance, the opinion that this Bill is unduly severe might naturally be formed by one whose experience of criminal tribes was confined to the Maravars, Kallars and others in Southern India. Yet these are conventionally known as criminal. The word Kallan means a thief, and the word Maravan might be translated marauder. Kallars and Maravars were dominant and military tribes in the last century and their turbulent disposition too often finds an outlet at the present day in cattle-lifting and in robbery with violence. Their very sports are mimic representations of these offences. It might at first sight be thought that these tribes are not dissimilar from the criminal tribes to which the Bill specially relates, but in fact they offer in the most important considerations aspects of contrast rather than of similitude. They are exceedingly numerous and amount probably to a million in all; they have fixed and settled residences, and, above all, the masses are more or less peaceful cultivators, though large numbers are hardened habitual offenders, to deal with whom the provisions of the existing law are found in some respects to be defective. Yet the application to them of the Criminal Tribes' Act would be unjustifiable. Certain provisions thereof which were considered appropriate to their case it was proposed by Sir Philip Hutchins' Habitual Offenders Bill to incorporate in the Code of Criminal Procedure, and the matter is now, it is understood, under consideration. It is probable that Sir Philip Hutchins was moved to introduce his Bill in consequence of the depredations of the South India criminal tribes of which he had ample experience.

"The Bill as reported upon to-day could not be applied to these tribes, but under the amendment, it would be competent to a Local Government to bring them, or others of a kindred character, under the operation of the Act, after obtaining the sanction of the Governor General in Council. Inasmuch as the provisions of the proposed amendment are purely permissive no objection need be offered to them. It is not likely that any Local Government would ever propose to bring under the Act any tribe other than one which in the language of the Statement of Objects and Reasons is composed of criminals of the worst type, whose only occupation is crime. To such, it will be universally admitted, its application should be jealously restricted."

The Hon'ble RAI ANANDA CHARLU BAHADUR said:—"Like my hon'ble friend Mr. Rees, coming from the same presidency he comes from, I have not the necessary personal knowledge to fully appreciate the severity of this measure, and I should have liked it as it left the hands of the Select Committee. That there should yet be classes under the British rule at this time of day, calling for such drastic provisions is a matter for both surprise and regret. As the Hon'ble Mr. Rees has pointed out, even the class whose name is a synonym for 'thieves' have, in the main, given up their old ways and settled down into peaceable citizens, following one or other of the peaceful walks of life in the Southern Presidency. I hope and trust that the giant's power, taken under this Act, would be used most sparingly and by the soberest men. Too much zeal, actuated by impulsive natures, and a too free resort to the powers conferred by this Act, would only give a longer base to the existing conditions and defeat the very object, had in view. I also hope that the widest publicity would be given to these extended powers, bringing them home to the classes, they are meant to be used against, by other means than mere publication in gazettes and newspaper notifications. It seems to me that measures, such as this, would do far more by acting as a deterrent, in a preventive sense, than being put into practice as a punitive provision. I have trespassed on Your Lordship's attention thus far, as we are, by this Act, interfering with the most sacred of rights—the right of a parent to the custody and bringing up of his child—the right which all enlightened Governments have respected, even

to the extent of handing over irredeemably a non-Christian child to a Christianised father—the right, which we now interfere with, somewhat on the questionable principle of 'the end justifies the means.' I venture to express the hope that the year would soon come round, when this Act would no longer require to be retained on the Indian Statute-book."

The Hon'ble SIR JOHN WOODBURN said :—"I have nothing to add to the facts brought before the Council by the Mover of the present motion. But perhaps in regard to the discussion that has taken place it is expedient that I should give a stronger support to my hon'ble friend Mr. Cadell than would be indicated by a mere silent vote. I can endorse all that he has said about the criminal habits and pursuits of these tribes, and I can speak from my personal knowledge of the suffering entailed upon the community by the depredations of these people. Attempts have been made for a long time to reform them—attempts which for the most part have resulted in failure,—but I entertain the hope with my friend Mr. Ananda Charlu that perseverance in this matter, as in other matters, will meet with success. It is not to be expected that habits and pursuits which are ingrained in a race by generations of practice can be eradicated in a few years, and, therefore, it is the duty of the Government to go patiently on with their endeavours to reform and repress the tendencies and practices of these tribes. Our best hopes lie in the children of the tribes. If they can be moulded, there is some chance of influencing favourably the next generation. But experience has shown, to the satisfaction of the Government of the North-Western Provinces, that the arrangements which we made under the Criminal Tribes' Act for instituting and carrying on reforms require to be stringent if those reformatory measures are to succeed. It is with regret that we find that those measures have not been so successful as we had hoped, but the aim and object, which Mr. Ananda Charlu and the rest of us all have, is essentially to strengthen the Local Government in those measures which it has taken for the object we have commonly in view. The proposals now before the Council are specially directed to the accentuation of those Regulations which govern the conduct of Reformatories and which secure the retention of the people in those settlements which are designed with the object of teaching them more wholesome habits of life than those which they now pursue.

"The other object is the repression of the habits which are common to these tribes. It has been the experience of the Government of the North-Western Provinces—and that is an experience which we must respect—that some increase of these repressive measures is absolutely essential in the interests of the people. There is an occasional humanity, which I venture to think is not a sound humanity, which exhausts all its pity on the criminal and forgets the sufferings of the people upon whom that criminal preys. As I said before I can endorse from my own experience everything that my hon'ble friend Mr. Cadell has said, and that has been said by other speakers, of the serious loss and injury to which innocent people are subjected by the practices of these tribes. I am satisfied from what I saw in the Select Committee and the papers that were put before us that the increased severity which is now proposed in the Bill before the Council is necessary for the protection of that community—a protection to which every community is entitled from a civilized Government; and it is also essential for the restraint of these tribesmen from practices and habits which have been the growth of generations.

"In regard to the amendment I have only to say that as far as I am concerned on the part of the Government I am prepared to accept that amendment, which will permit the extension of the Act to other parts of India."

The motion was put and agreed to.

The Hon'ble MR. CADELL said :—"I have now the honour to move that the Bill as amended be passed, and in doing so I would merely remark that the different points of view from which the Hon'ble Member on my left (the Hon'ble Mr. Ananda Charlu) and I view this measure are probably due to the difference in our experience. If the Hon'ble Member had, as I have done, picked up the dying and wounded victims of members of

these tribes, if he had as Magistrate and Judge listened to the revolting narratives of how readily life had been sacrificed to secure a few rupees or even a few annas, he would think less of those at whom this legislation is aimed, and more exclusively of their victims. The Bill now before the Council will, I am assured if passed into law, be the means of preventing much misery and suffering to the innocent, and I confess that with this object in view I have not much sympathy to spare for the guilty. If the hopes in which the Hon'ble Member indulges are fulfilled, I shall be extremely glad, but in the meantime there is good ground for the belief that the greater severity towards the criminal tribes, which this Bill contemplates, is likely to conduce to the safety and security of the law-abiding portion of the community."

The motion was put and agreed to.

UNITED KINGDOM PROBATES BILL.

The Hon'ble MR. CHALMERS presented the Report of the Select Committee on the Bill to provide for the recognition in British India of Probates and Letters of Administration granted by Courts in the United Kingdom. He said :—"When Hon'ble Members have our Report in their hands, they will see that we have come to the conclusion that it is unnecessary to proceed with this Bill. The reasons are stated in the Report. Of course, if, when the Report has been in the hands of Hon'ble Members, they desire any further explanation, I shall be most happy to give that explanation on behalf of the Committee. But I think all Hon'ble Members will agree with me that at any rate we have plenty of legislation, and that, before we proceed with any fresh legislation, a strong case ought to be made out for it. In this particular case we have satisfied ourselves that the existing procedure works smoothly, and that any possible hypothetical advantages to be gained by introducing a new procedure would be more than counterbalanced by disturbing and confusing the old mode of procedure. No difficulty has arisen in England in the case of probates granted in India where it has been sought to administer the estate in England, and under the existing Succession Act in the case of the probate of a will granted in England, we have ample means to administer an estate which is situated in India. I beg to lay the Report on the table."

EPIDEMIC DISEASES BILL.

The Hon'ble SIR JOHN WOODBURN said :—"I would ask Your Excellency's permission to suspend the Rules of Business in order to enable me to obtain leave of the Council to introduce a Bill to meet the spread of dangerous epidemic diseases. I think I may at this stage explain that it is not the intention or desire of the Government of India in any way to express, or give occasion for, alarm of any kind whatever, in regard to the matter, but the fact stands that the plague which has taken root in Bombay has been gradually extending to other parts of the country, and it seems to the Government expedient that some measures should be promptly taken before the disease has attained large proportions elsewhere to hold it in check.

THE PRESIDENT declared the Rules to be suspended.

The Hon'ble SIR JOHN WOODBURN said :—"My Lord, I have the honour to ask for leave to introduce a Bill for the better prevention of the spread of dangerous epidemic diseases. Hon'ble Members are aware that parts of the Bombay Presidency are suffering from a visitation of bubonic plague, and will doubtless recognise that it is well for the Government to be armed with special powers dealing with this calamity and enabling it to prevent, so far as is humanly possible, the extension of the disease to other districts and provinces. Municipal bodies already have extraodinary powers of dealing with disease within their own limits, but these powers are by no means uniform, and only extend to very limited areas. The Madras Government have moved very reasonably and naturally that they should be armed with larger powers than they now possess, and in a series of municipalities and cantonments in other

parts of India authority has been asked for the enforcement of the sanitary precautions that the circumstances require, and for powers of control, enabling them to deal promptly with any emergency which may arise. Since I arrived in the Council room a letter has been put into my hands from the Bombay Government asking for the very extension of their powers, which it is proposed in the Bill to give. The general powers conferred by clause 2 of the Bill are an adaptation of the powers already conferred within the City of Bombay by section 434 of the Bombay Act, III of 1888, for imposing such temporary regulations as may be found necessary to prevent the outbreak or spead of disease. In another direction the Government of India are advised that existing powers are legally inadequate. Foreign countries are already much alarmed at the possibility of infection from India, and telegraphic news has arrived that Russia has declared the whole Continent of India to be infected. For the safeguarding of our commerce the Government must be prepared to take steps to allay the fears of other nations, and we therefore propose to take power to order the medical inspection, and, if necessary, the detention, of any suspected ship whose departure from India with sickness on board might give grounds for severe measures to be taken against Indian shipping abroad. The special powers which the Bill confers are intended to meet a special emergency, and will only be enforced where the Governor General in Council is satisfied that the provisions of the ordinary law are insufficient."

The motion was put and agreed to.

The Hon'ble SIR JOHN WOODBURN introduced the Bill.

The Hon'ble SIR JOHN WOODBURN moved that the Bill be referred to a Select Committee consisting of the Hon'ble Sir James Westland, the Hon'ble Mr. Chalmers, the Hon'ble Mr. Playfair, the Hon'ble Mr. Sayani, the Hon'ble Joy Gobind Law and the Mover, with instructions to report upon it at the next meeting of the Council.

The motion was put and agreed to.

The Council adjourned to Thursday, the 4th February, 1897.

J. M. MACPHERSON,
Secretary to the Government of India.

No. 5.] CALCUTTA, SATURDAY, JANUARY 30, 1897.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *and* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta or Rupees nine if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, January 16th, 1897.

THE weather during the week under review was determined by the passage of two cold weather storms across Northern India.

The first of these which was a feeble depression appeared in Upper Sind at the beginning of the week, and drifting slowly eastwards along the Himalayas during the next three days passed out of the Indian area on the 14th. Notwithstanding its feebleness it gave numerous showers of rain to the greater part of the Punjab and moderate to heavy rain and snow to Baluchistan, Kashmir and the Punjab Himalayas between the 10th and 12th. The second storm passed into India from the plateau of Persia and Baluchistan on the 13th, and, while advancing eastwards during the day, gave rise to a secondary storm of exceptional severity in the Punjab. The barometer at Khushab (the station nearest to the centre of the Punjab depression) at 8 A.M. of the 14th marked only 29·582 inches, or about half an inch below the normal of the day, and the weather was stormy over the Punjab and the adjacent Himalayas with moderate to heavy rain in the plains and heavy snow in the hills. The secondary storm broke up even more rapidly than it formed during the day, and the barometer rose with unusual rapidity in the Punjab, thus re-establishing high pressure conditions in that area on the 15th. The primary depression which was advancing through Bundelkhand on the 14th continued its march eastwards, passing through Bengal on the 15th and Assam on the 16th. Its influence on the weather was but slight.

The double disturbance was in several respects one of the more remarkable of recent years. The original depression, though moderately deep when crossing the North-West frontier, was very shallow and ill-defined during its existence in India and marched unusually rapidly at an average rate of about 650 miles per diem. The secondary depression was unusually deep, and the upward movement of the barometer accompanying its dispersion was one of the largest and most rapid on record in the Punjab. It may be noted that an almost equally large and rapid movement of the barometer was recorded at Peshawar on the 25th February 1889.

Daily Summary.—*Sunday, 10th January.*—The barometric changes of the previous 24 hours were generally small in amount except in Upper India and Baluchistan where pressure had decreased briskly to rapidly. Pressure was normal in the Peninsula and more or less in defect over the remainder of the country. The deficiency was greatest in Baluchistan, Upper Sind and the West Punjab where it averaged nearly two-tenths of an inch. The storm which was approaching Baluchistan at the end of the previous week lay over Upper Sind. The distribution of pressure was very abnormal, pressure being highest in Upper Assam and lowest in the area of depression in Upper Sind. Winds exhibited a fairly regular cyclonic circulation in Upper India, but were light except at the level of the hill stations where they were strong. Westerly winds prevailed in the Gangetic Plain, northerly winds on the coasts of the Bay, and easterly winds in the west of the Peninsula. Elsewhere the directions were very variable. Skies were overcast in the hills and heavily clouded on the plains in the north-west, and heavy rain had fallen in Baluchistan, and a few light showers in the submontane districts of the Punjab and the adjacent hills. Chaman had registered 1·15 inches. Moderate snow was falling in Kashmir. Temperature differed but little from the normal in Burma, Bengal and Southern India, but exceeded the normal in all other districts. The excess was greatest in Upper India (3° to 9°) and was due to a warm wave advancing across that area.

Monday, 11th January.—Pressure had increased briskly to rapidly in Baluchistan, Upper Sind and the West Punjab, and had fallen briskly in the South Punjab, East Rajputana, the western districts of the North-Western Provinces, Bundelkhand and Baghelkhand. In other parts of the country the barometer had changed but slightly. The depression had advanced east-north-eastwards and lay over the eastern half of the Punjab. It was, however, beginning to fill up. The distribution of pressure remained abnormal. Winds were feebly cyclonic around the depression. They had fallen off considerably in strength at the hill stations and were now generally light to moderate in force. Rain and snow had fallen more generally than on the 10th in the Punjab, Kashmir and Baluchistan, and had extended to the north-western and hill districts of the North-Western Provinces. The largest recorded fall was 1·45 inches at Murree. Temperature had decreased rapidly in Baluchistan and was now 3° below the normal at Quetta. The warm wave had extended eastwards across the western districts of the North-Western Provinces and Bundelkhand.

Tuesday, 12th January.—Pressure had increased slightly in Rajputana and the South and Central Punjab, and had fallen rapidly in the central submontane districts of the North Western Provinces to which the depression was now transferred. The depression had, however, filled up largely and was but faintly indicated in the chart. Pressure was falling rapidly in Baluchistan and a fresh storm was approaching from Persia. The distribution of pressure was, as on the previous two days, very abnormal in character, pressure being in large defect over the greater part of Northern India, in moderate to considerable defect in Burma and the central parts of India, and normal in the Peninsula. Light irregular airs and calms prevailed generally. The wind was rising at Murree. Light showers had occurred in the hill and submontane districts of North-Western India. Temperature had decreased rapidly in Sind and Rajputana. The warm wave had advanced to Chota Nagpur and West Bengal.

Wednesday, 13th January.—Pressure had increased slightly in Burma, North-Eastern India, the North-Western Provinces and the eastern districts of

the Punjab, and had fallen over the remainder of India and in Baluchistan. The fall was greatest in Upper Sind where it slightly exceeded a tenth of an inch. The storm which was approaching Baluchistan on the preceding day from the Persian side had crossed the frontier and was at 8 A.M. central near Jacobabad where pressure was about a quarter of an inch in defect. The very feeble residual depression passing through the submontane districts of the North-Western Provinces had reached North Bihar. Pressure was below the average over the whole of the country. The deficiency was moderate to considerable generally and was largest in the Punjab, Sind and Baluchistan where it ranged from an eighth to a quarter of an inch in amount. Winds in Upper India were under the influence of the Sind depression, but elsewhere very variable winds and calms continued. The air movement was generally feeble though increasing rapidly in Upper India and more especially at the hill stations. Skies were overcast in Baluchistan, and snow was falling at Chaman. They were slightly clouded in Upper India and parts of the Peninsula, but were practically clear elsewhere. Beyond a few drops at Kurrachee no rain whatever had fallen in India. The high temperature conditions had extended to East Bengal. The mean temperature of the previous 24 hours was above the average in all districts. The excess was as much as 6½° in the North-Western Provinces, 5° in the Central Provinces and 4° in Bengal and Assam. The increased temperature in these areas was due chiefly to higher day temperature than usual.

Thursday, 14th January.—The barometric changes of the previous 24 hours were unusually large and important. Pressure had fallen with great rapidity in the Punjab and Kashmir, and briskly to rapidly in Rajputana and the neighbouring districts of the North-Western Provinces and Central India. It had, on the other hand, increased slightly to briskly in Baluchistan, Lower Sind, North-Eastern India and Burma. The Sind depression had marched very rapidly eastwards and lay over Bundelkhand at 8 A.M. It was, however, obscured by the formation of an unusually deep secondary storm over the Punjab. Pressure was in very large defect over the whole of North-Western and Central India, the deficiency being largest in the central area of the secondary depression in the Punjab where it averaged about half an inch in amount. Strong cyclonic winds were blowing on the plains of Upper India and severe gales at the hill stations. The hourly velocity at Murree during the previous 24 hours averaged 33 miles. Elsewhere winds were unchanged. Skies were overcast at the majority of stations in North-Western India and in Baluchistan, and the cloud was extending rapidly eastwards to the North-Western Provinces. The double disturbance had occasioned moderate to heavy rain over the greater part of the Punjab, heavy snow in the West Punjab Hills and light rain in Rajputana and Gujarat. Light rain and snow had fallen also in Kashmir and Baluchistan. The snowfall at Murree and Cherat measured about 1 foot deep, while the largest amount of rain in the plains were registered at Peshawar (1·06 inches), Rawal Pindi (0·95 inch) and Lahore (0·90 inch). The residual depression in North Bihar on the 13th had advanced to Assam. It, however, died out during the day. An unusually large reduction of temperature had occurred in Baluchistan and the mean temperature of the previous 24 hours averaged 14° below the normal at Quetta.

Friday, 15th January.—Pressure had increased even more rapidly than it had fallen on the previous day in North-Western India and Baluchistan, and the secondary depression in the Punjab had filled up completely. The rise exceeded five-tenths of an inch at Dera Ismail Khan, Peshawar, Khushab and Rawal Pindi, and pressure was now normal at these stations. The primary depression had advanced from Bundelkhand to South Bihar, and occasioned a brisk fall of the barometer over Bihar, Chota Nagpur and Bengal. High pressure conditions were re-established in the Punjab, and the distribution of pressure was fairly normal, the only abnormal feature being the low pressure area over Bengal. Westerly winds obtained over the Gangetic Plain and the central parts of the country, irregularly cyclonic winds over Bengal, northerly winds over Burma, and more or less variable winds and calms elsewhere. Moderate to heavy rain and snow had fallen in the North-West Himalayas, and light to moderate rain almost

stations in the Punjab and in the north-western districts of the North-Western Provinces. The largest amount recorded in the hill districts was 3·02 inches at Simla, and in the plains 1·07 inches at Peshawar. Temperature had diminished very rapidly in Baluchistan and Upper India, the decrease at several stations amounting to over 15°. The mean temperature of the previous 24 hours was 26° below the average in Baluchistan (Quetta), 13° below in Gujarat, 8° in Sind and Rajputana, and 6° below in the Punjab. The temperature conditions at Quetta during the previous 24 hours were very remarkable, the day temperature being only 19° and the night temperature only 9°·3.

Saturday, 16th January.—Pressure had fallen briskly in Assam to which area the depression had now advanced. Pressure had increased briskly to rapidly over the greater part of Upper India, the Central Provinces, Central India, the North-Western Provinces, Bihar and Chota Nagpur. Elsewhere the changes were slight, though generally downward. Pressure was in slight to considerable excess in Upper and Central India, about equally in defect in North-Eastern India and Burma, and practically normal in other districts. Winds were anti-cyclonic in direction over the greater part of Northern and Central India, and variable elsewhere. Skies were free from cloud throughout the Indian area, and no rain had been received beyond a few local showers of little importance in Assam and the North-West Himalayas. A well-defined cool wave was affecting the whole of North-West and Central India and reducing temperature largely in these areas. Temperature was in very large excess in Bengal and in moderate excess in Madras and normal in Burma.

Temperature.—The temperature conditions over Northern and Central India were determined by the disturbances of the week. The second storm of the week was preceded by a well-marked warm wave and followed by a cool wave of unusual intensity. Temperature was throughout the week practically normal in Madras and Burma, and slightly to largely above the average over the remainder of India during the first five days. The precipitation accompanying the second disturbance caused an unusually large reduction of temperature in Baluchistan on the 14th, and a cool wave crossed the frontier during the next 24 hours, and extended rapidly to the whole of North-Western and Central India on the 16th. The mean temperature in that area was hence in very large defect on the 15th and 16th. Remarkably low temperatures were recorded in Baluchistan on the 15th. Thus the highest temperature of the 24 hours preceding 8 A.M. of the 15th at Quetta was only 19° and the lowest only 9°·3. It may be noted that the reading of 9°·3 at Quetta is about 5° lower than the lowest reading previously on record.

The following table gives mean temperature variation data for the week :—

Province.	January 1897.							Mean variation of week.
	10th.	11th.	12th.	13th.	14th.	15th	10th.

Mean for whole of India	+3·6	+4·1	+3·7	+3·0	+3·4	+0·2	—3·0	+2·1

Rainfall.—There were two periods of disturbance and rainfall during the week :—

1st.—From the 10th to the 12th.—Moderate rain fell during this period in the Central, Submontane and North Punjab, light showers in the South Punjab and the hill and north-western districts of the North-Western Provinces, and moderate to heavy rain and snow in Baluchistan, Kashmir and the Punjab Himalayas. The precipitation of the period was due to the passage eastwards of a feeble cold-weather storm across North-Western India.

2nd.—From the 14th to the 16th.—Light to heavy general rain occurred over the Punjab on the 14th and 15th, light to moderate rain in the north-western and hill districts of the North-Western Provinces on the 15th and 16th, and light rain in West Rajputana on the 14th. Very heavy rain and snow fell in the Punjab (and probably also Kashmir) Himalayas on the 14th and 15th, Simla recording 3·02 inches (melted snow), and Dharamsala 2·35 inches on the 15th. Daily falls exceeding 1 inch in amount were registered at several stations in the Punjab, the heaviest being 1·50 inches at Abbottabad on the 15th. The precipitation during this period occurred in connection with a cold-weather storm which travelled across Northern India between the 13th and 16th, and gave rise to an unusually deep secondary depression in the Punjab on the 14th.

Practically or actually no rain fell during the week in Burma, the whole of Bengal, Assam, the greater part of the North-Western Provinces, Central India, East Rajputana, the Central Provinces, Berar, North Bombay and the Peninsula, and the rainfall of the week was in more or less defect in these areas. The deficiency was, however, small in amount and ranged from two hundredths of an inch in Lower Burma to about two tenths of an inch in the eastern districts of the North-Western Provinces.

The rainfall of the week was, on the other hand, abundant or excessive in the Punjab (excepting the southern and south-eastern divisions, where it was scanty), the hill districts of the North-Western Provinces and Baluchistan. The excess was both absolutely and relatively to the normal largest in the North Punjab which obtained an average fall of 3·40 inches or 2·98 inches above the normal of the week.

A reference to the accompanying table shows that the rainfall of the period exceeds the normal very largely in the Central, Hill, North and West Divisions of the Punjab and the eastern districts of the Central Provinces, and slightly to considerably in the hill districts of the North-Western Provinces, the submontane districts of the Punjab, Baluchistan, the central coast districts of Madras and West Rajputana. It is more or less below the normal in other divisions, the deficiency being greatest in amount in Assam and South Madras.

The following are the principal totals recorded during the week :—

Murree 7·75 inches, Abbottabad 4·66 inches, Nowshera (Peshawar) 4·60 inches, Hangu (Kohat) 3·50 inches, Chakrata 3·53 inches, Joshimath (Garhwal) 2·90 inches, Jallalabad (Ferozepore) 2·55 inches, Jhelum 2·45 inches and Kharian (Gujrat) and Chunian (Lahore) each 2·11 inches.

Province.	Division.	Rainfall data for week ending January 16th, 1897. Average actual rainfall of Division.	Average normal rainfall of Division.	Excess or defect in inches.	Rainfall data from January 3rd, to January 16th, 1897. Average actual rainfall of season to date.	Average normal rainfall, Jan. 3rd to Jan 16th.	Excess or defect of (seasonal) rainfall expressed as a per-centage.

HEM RAJ,
Offg. Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 21st January 1897.*

DENZIL IBBETSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.
DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 23rd January.*—No rain fell during the week except a few scattered showers in the southern districts. The water-supply continues sufficient in the southern half of the presidency; but is inadequate except under largest works elsewhere; and is scanty in parts of the Deccan and the Circars. Sowing and planting is in progress in parts under wells and large irrigation works. The standing crops in the Deccan and in parts of the Circars are in a bad condition; elsewhere they are fair to good. The harvest in the southern half of the presidency and on the west coast is yielding a fair outturn, elsewhere the outturn is poor or bad generally. Pasture and fodder is very scarce in the Deccan and in parts of the Circars; elsewhere it is adequate. Cattle are in a bad condition in parts of the Deccan; elsewhere they are generally fair. Prices are dearer in the Deccan and in Ganjam, but elsewhere changes are small and rates generally slightly easier. The numbers relieved were:—relief workers 24,782; kitchen inmates, chiefly dependants, 2,070; weavers 6,974; all in the Deccan districts. Total numbers in receipt of relief are 33,826. The increase is chiefly in Bellary owing to the deepening of distress. Prices on which the famine wage is regulated are:—Kurnool 15, Bellary 14⅔ and Anantapur 13⅛ seers per rupee, Cuddapah is not reported, but there *Cholam* (*Sorghum vulgare*) is 14½ seers per rupee. Test works have again been opened in Ganjam; one has failed to attract workers, but the authorities anticipate necessity for gratuitous relief owing to emigration of able-bodied and also to weavers.

Bombay.—*For week ending 23rd January.*—Slight rain has fallen in Khandesh and Poona; more is urgently wanted for crops lately sown in affected districts. The standing crops have been damaged by frost slightly in one taluka of Karachi, in seven of Shikarpur, and in six of Hyderabad; by drought in two of Karachi, and by locusts in one of Karachi; they are thriving in Sind and Gujrat; but are indifferent elsewhere. The crops recently sown are withering for want of rain in Nasik, Ahmednagar, Ratnagiri, Poona, Sholapur, and Dharwar. The autumn harvesting is completed except in Khandesh and Dharwar. The reaping of the spring crop has commenced in Ahmedabad, Broach, Khandesh, Ahmednagar, Sholapur, Satara, and Bijapur. Fodder is sufficient except in the Deccan, Karnatak, Shikarpur, and in parts of Karachi. The grain-supply is generally sufficient in affected districts. Cotton picking continues in Broach, Surat, Kathiawar, Wadhwan, and Baroda. The condition of agricultural stock is deteriorating in Poona, Ahmednagar, Sholapur, Bijapur, Belgaum, and Dharwar; healthy elsewhere except in parts of Shikarpur, Upper Sind Frontier, Thar and Parkar, Kaira, Khandesh, Nasik, Thana, Ratnagiri, and Kanara. Prices are rising in parts of Surat, Ratnagiri, Poona, and Bijapur, falling in Shikarpur, Upper Sind Frontier, and parts of Broach, Surat, Ratnagiri, and Bijapur, and stationary in Hyderabad, Thar and Parkar, Ahmedabad, Panch Mahals, Khandesh, Kolaba, Sholapur, Kathiawar, and in parts of Broach, Surat, Poona, Bijapur. Prices of the food-grains on which famine wages are based are:—Dharwar 13¾, Belgaum 12, Bijapur 11, Sholapur and Ahmednagar 10½, Poona 10, Nasik and Khandesh 9¾, Satara 9½, Kolaba 8¾ seers per rupee. The numbers on relief works including non-working children were:—Bijapur 72,652, Sholapur 67,316, Ahmednagar 46,604, Poona 23,938, Nasik 27,766, Satara 21,051, Khandesh 18,134, Belgaum 3,058, Dharwar 644, total 2,81,163, of which 1,97,546 are relief workers and 83,617, non-working children. On gratuitous relief:—Bijapur 4,820, Sholapur 3,560, Ahmednagar 33, Poona 2,383, Belgaum 266. Total numbers in receipt of relief are 2,92,225.

Bengal.—*For week ending 25th January.*—There was some rain in Champaran (Sadar ·10, Bettiah ·40, Bigaha ·56) and parts of Saran (Gopalganj ·22, Siwan ·07), but practically none in any of the other districts during the week. The rain in Champaran has done much good to the spring and poppy crops. These crops are generally promising throughout Bihar. The spring crops in North Bengal are fair, but in almost all other parts they are poor. The harvesting of winter rice is not yet over. Oilseeds and pulses are being gathered, and the pressing of sugar-cane is in progress. Transplantation of spring rice is going on. Ploughing for autumn rice has begun in North Bengal. Prices have not generally risen during the week. Slight fluctuations in the price of common rice are reported from some districts. In Patna the price of common rice fell from 10½ to 11 seers, in Gaya from 9 to 9½ seers, and at Bettiah (Champaran) from 8½ to 9¼ seers per rupee. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 9¼ seers, Patna (common rice) 11 seers, Shahabad (common rice) 10 seers, Saran (Indian-corn) 10 seers 1 chittack, Champaran (Indian-corn) 10¼ seers, Muzaffarpur (Indian-corn) 10 seers, Durbhanga (common rice) 9 seers. The numbers on relief works and in receipt of gratuitous relief on Saturday, the 23rd January, were—Relief Works: Nadia 4,810 (men 2,264, women 539, children 2,007), Khulna 37 (men 20, women *nil*, children 17), Rajshahi, 891 (men 852, women *nil*, children 39), Patna 490 (men 255, women 156, children 79), Shahabad 2,040 (men 702, women 896, children 442), Saran 12,579 (men 3,348, women 5,136, children 4,095), Champaran 115,770 (men 50,638, women 40,031, children 25,101), Muzaffarpur 7,129 (men 3,655, women 1,615, children 1,859), Darbhanga 103,581 (men 48,928, women 40,392, children 14,261. Total 247,327 against 233,846 in the previous week.—Gratuitous relief: Nadia 912 (men 170, women 600, children 142), Khulna 138 (men 33, women 60, children 45), Patna 5 men (in Bihar), Saran 7,313 (men 1,167, women 4,839, children 1,307), Champaran 5,838 (men 1,383, women 2,475, children 1,980), Muzaffarpur 4,603 (men 1,611, women 1,686, children 1,306), Darbhanga 51,534 (men 12,203, women 25,843, children 13,488). Total 70,343 against 44,423 in the previous week. The total numbers in receipt of relief are 317,670.—Private relief: Relief works—Hutwa Raj 2,548. Darbhanga Raj—Figures not complete.—Gratuitous relief—Hutwa Raj 1,142. Rest of Saran district, 1,508.

North-Western Provinces and Oudh.—*For week ending 27th January.*—Good and general rain fell during the week; few districts recorded less than one quarter of an inch. The rain has benefited the standing crops which are reported to be doing well. Cane-pressing continues in most districts The Arhar (*Cajanus indicus*) crop has been slightly damaged by frost in portions of a few districts. The numbers in receipt of relief on Saturday, the 23rd January 1897, in 17 districts which have been officially recognized as distressed were as follows:—Agra 12,805, Etawah 13,432, Banda 139,013, Cawnpore 57,123, Hamirpur 47,726, Allahabad 174,160, Jhansi 38,138, Jalaun 58,765, Jaunpur 27,425, Mirzapur 10,306, Gorakhpur 19,671, Lucknow 52,491, Unao 29,312, Rae Bareli 56,161, Sitapur 36,964, Hardoi 159,929, Bara Banki 18,828, total 952,249. The total is distributed as follows among the various methods of relief prescribed by the Famine Code which are in operation:—Employed on relief works 618,355; relieved as dependants 125,973; relieved in poor-houses 41,735; relieved under other provisions of the Code 166,186. The numbers relieved in 20 districts which are under observation but not yet officially recognised as distressed were, on the same date, as follows:—relieved on test works 45,892, relieved in poor-houses 15,855, relieved under other provisions of the Code 10,358, total 72,105. The grand total in receipt of relief on the last day of the week was therefore 1,024,354. Supplies are generally sufficient. Fodder is somewhat scarce in places. Prices remain high, but show a tendency to fall slightly in a few districts. The prices of staple food-grains on which the famine wages are based are as follows in the districts officially recognised as distressed:—Etawah, Agra, Hamirpur and Mirzapur 9; Hardoi and Allahabad 9¼; Jalaun 9⅛; Rae Bareli and Jhansi 9¼; Jaunpur, Gorakhpur, Lucknow, Unao, Banda, Sitapur and Bara Banki 10 and Cawnpore 10½ seers per rupee.

Punjab.—*For week ending 26th January.*—Rain averaging about one-fourth of an inch has fallen in parts of Jullundur, Ludhiana, Sialkot and Gujranwala, as well as in Amritsar. Slight drizzling has also taken place in Karnal, Umballa and Lahore. Coming after the general rainfall in the middle of the month, this rain has been very beneficial. More rain is wanted in the Delhi Division, Mooltan, and in the Derajat. Sugarcane-pressing is still going on. In some districts sowings of the spring crops have been nearly completed. Owing to the recent rains sowings are still being made in a few districts, but not on a large scale. Ploughings for extra spring crops have also commenced in places. The standing crops have greatly benefited by recent rain in nearly all districts. Their condition and prospects are reported to be good in most districts, but average only in Mooltan and Dera Ismail Khan. The crops on dry land are still suffering from want of more rain in the Delhi Division. Stocks of food-grains are reported insufficient in Hissar, parts of Jullundur and Shahpur, and with the cultivators of Lahore, Amritsar and Gujranwala. The sugarcane has been slightly damaged by frost in Jullundur, and rape by insects in parts of Ferozepore. Cattle are generally in poor condition owing to scarcity of fodder. Their condition is good to fair in Gurgaon, Delhi, Amritsar and Gujranwala; they are dying of starvation in Hissar. Fodder is insufficient or scarce in all districts except Umballa, but since the recent rains clover has sprung up on the stubble of irrigated lands, and this will soon be available for fodder. Grass too is already beginning to spring up. The average number of persons employed on famine relief works is:—Hissar 23,180, Rohtak 3,895, Gurgaon 484, Delhi 2,392, Karnal 2,428, Ferozepore 3,038, and Gujrat 43,388 including 4,646, 1,750, 31, 597, 105, 320, and 1,327, persons respectively gratuitously relieved. The numbers on test works are:—Umballa 1,214, Ludhiana 113, Mooltan 233, Sialkot 291, Gujranwala 235, and Rawalpindi 178. In Lahore 845 persons are employed on famine and 1,032 on test works. Total numbers in receipt of relief are 82,946. There are, besides, 1,026 on ordinary works in Gurgaon. The Jhelum test works have been closed, as no persons attended. In other districts the number employed on famine and test works has risen from 70,000 to 84,000, the chief increases being in Rohtak and Gujrat. The numbers will continue to increase as this is the slack season for agricultural operations. Prices are still high throughout the province, but have fallen slightly except in Rawalpindi, where they continue to rise, and in Ludhiana where they are stationary. Wheat is selling from 8 to 10½ seers, great millet 9¾ to 11, bulrush millet 9¾ to 11¼, gram 9 to 12½, and maize 10 to 12½ seers per rupee. Prices of staple food-grains on which famine wage is reckoned are:—Rohtak gram 10½ seers, Delhi bulrush millet 10, Karnal gram 10 and maize 10½, Ferozepore great millet 12, and maize 11, Lahore wheat 10 to 11, Gujrat wheat flour 7½, Umballa maize 10, Ludhiana 11, Mooltan wheat 9½, Sialkot maize 9½, and Gujranwala gram 9 seers per rupee.

Central Provinces.—*For week ending 26th January.*—Weather cloudy and stormy with rain in almost all districts Jubbulpur and Narsinghpur got nearly two inches, Saugor one and a quarter and seven districts about half an inch. Hail is reported to have caused some local damage in the Chhindwara, Seoni, Saugor, Damoh and Nerbada Valley districts. The prospects of the spring crops continue generally favourable, but some injury has been caused by the cloudy weather in places to the ripening crops and those which are being harvested. Fodder is sufficient except in Seoni, Hoshangabad, and in parts of Nagpur and Sambalpur. The numbers on relief works are as follows:—Saugor 24,345, Damoh 17,894, Jubbulpore 64,763, Mandla (up to January 3rd) 12,621, Seoni 5,872, Narsinghpur 14,451, Hoshangabad (up to January 23rd) 27,140, Nimar 452, Betul 6,810, Chhindwara 3,436, Nagpur 1,662, Chanda 1,868, Bhandara 7,760, Balaghat 4,093, Raipur 6,319, and Bilaspur 4,453. Total 202,939. The numbers on gratuitous relief are as follows:—Saugor 7,327, Damoh 2,466, Jubbulpore 13,264, Mandla 257, Seoni 496, Narsinghpur 1,796, Hoshangabad 5,755, Nimar 273, Betul 751, Chhindwara 1,337, Nagpur 877, Chanda 212, Bhandara 1,162, Balaghat 1,330, Raipur 1,034, and Bilaspur 1,326. Total 39,663. Grand total 242,602. There were also

29,867 on railway and other works in Saugor, Damoh, and Jubbulpore. The prices of the staple food-grains on which the famine wage is based are as follows:—Saugor 9¼, Damoh 8¾, Jubbulpore and Seoni 9½, Narsinghpur, Hoshangabad, Bhandara and Raipur 10, Nimar 10¼, Betul 10½, Chhindwara 13, Nagpur 13¾, Chanda 13½, Balaghat 8⅓ and Bilaspur 9½ seers per rupee.

Burma.—*For week ending 23rd January.*—In Lower Burma reaping is nearly completed, and threshing and winnowing are progressing. In Upper Burma the cultivation of dry weather crops is in progress. Prospects as yet are generally good in the Amarapura township. In Mandalay the tobacco crop is being destroyed by caterpillars. The price of paddy has increased slightly in Bassein and Amherst, and decreased slightly in Thongwa; elsewhere it is stationary. The numbers on relief works are as follows:—Meiktila 17,183, Myingyan 8,972. On gratuitous relief:—Meiktila 2,961, Myingyan 2,587, Yamethin 320. Total numbers in receipt of relief are 32,023. The prices of staple food-grains are:—Meiktila 8 seers 15 chittacks and Myingyan 9 seers 8 chittacks per rupee.

Assam.—*For week ending 26th January.*—The weather is seasonable. There has been a slight rainfall in Sibsagar, Lakhimpur and the Naga Hills districts, but rain is badly wanted for all standing crops in Sylhet, and for pulses in Goalpara. Mustard is being gathered and pressing of sugarcane and pruning of tea continue. Prices are as follows:—Common rice—Silchar 9, Sylhet 9¾ to 10, Gauhati and Tezpur 10, Sibsagar 12 and Dibrugarh 8¾ seers per rupee. Fodder is insufficient in Cachar and the Khasi Hills. The water-supply is sufficient except in Cachar and parts of Nowgong.

Mysore and Coorg.—*For week ending 26th January.*—MYSORE: The standing crops are in good condition. Prices have fallen in Tumkur and Mysore and risen in all other districts, except Chitaldrug. Harvesting operations still continue in Bangalore, Kolar and Mysore.

COORG: Harvesting of rice and picking of coffee are nearly completed. Prices of food-grains are normal. Water and fodder for cattle sufficient.

Hyderabad and Berar.—*For week ending 27th January.*—BERAR: Weather clear and cool. Cotton-picking nearing completion and threshing of jowar (*Sorghum vulgare*) in progress. Of the winter crops wheat is reported to be in an unsatisfactory condition in most places, owing to insufficient moisture. Insufficiency of fodder and water prevails, and high prices for food-grains continue. Relief works appear likely to be necessary owing to the anticipated failure of the winter crops.

HYDERABAD: No rain fell during the week ended 23rd January. The spring crop is in fairly good condition except in nine taluks of southern division, where this crop suffers for want of rain. Sowing of winter rice crop continues in the central division. There is a scarcity of fodder and pasture. Prices are as follows:—wheat 7½, coarse rice 7⅓, white jowari 11¼, yellow jowari 13⅔, gram 10¼, and tur 11¼ seers per current sicca rupee.

Central India.—*For week ending 26th January.*—Rain fell in Gwalior, Bhopal, Bundelkhand and Baghelkhand during the week. The fall was insufficient in Gwalior. Agricultural operations have been completed in Bundelkhand and Baghelkhand, but are in progress in Gwalior and Bhopal. The spring crops are good in one district of Gwalior and some districts of Bundelkhand, fair in three districts of Gwalior and four of Bundelkhand and in the Bhopal Agency, but are indifferent elsewhere. Pasturage is indifferent in Bundelkhand and Baghelkhand and in some districts of Gwalior, fair in Bhopal and other parts of Gwalior. Prices are steady in Gwalior and Bhopal, and are above normal in Bundelkhand and Baghelkhand. Opium crops are fair in parts of Gwalior and in Bhopal. The number of persons employed on famine relief works were:—Gwalior 7,996, Bundelkhand 2,587, and Baghelkhand 25,983; the numbers on gratuitous relief were:—Bundelkhand 1,891 and Baghelkhand 2,302. The total numbers in receipt of relief were 40,759. None in Gwalior. The prices of staple grains on which famine wages are based are:—Gwalior 10 to 10½, Baghelkhand 10 seers per rupee.

Rajputana —*For week ending 27th January.*—There has been slight rainfall in Jhallawar, Kotah, Dholepore, Bickaneer and in parts of Marwar. Agricultural operations are satisfactory in three States and in Ajmere-Merwara, fair in Kherwara, and poor in Dholepore. The spring crop is good in Jaisulmere and Sirohee, thriving in Kerowlee and fair in Bickaneer. The prospects of standing crops are good in ten States, very fair in Ajmere-Merwara, fair in Meywar, poor in Dholepore. The harvest prospects are below average in Harowti, average in Ajmere-Merwara and good in Jhallawar and Jeypore. The crops have been severely damaged at Baseri, and partly elsewhere in Dholepore by hail. Cattle are generally in a good condition, fair in Meywar, Dholepore, Jaisulmere, and Bhurtpore. Pasturage or fodder is generally sufficient, but scarce in some tehsils of Jeypore, and failing in Dholepore and Bhurtpore. Prices are rising in Bhurtpore and Jaisulmere and falling in Pertabgurh, Meywar, and Bickaneer, fluctuating in Kotah, high in Harowti, and steady elsewhere. The numbers of persons on relief works were :—Marwar 5,806, Kotah 1,028, Dholepur 596, Bhurtpore 565, Bickaneer 9,916, and Jaisulmere 822, and on gratuitous relief :—Marwar not reported ; Bhurtpore 522 ; Bickaneer 1,275 ; Jaisulmere 13. Total number in receipt of relief 20,543. The prices of the staple food-grains on which famine wages are based are :—Marwar 8 seers 8 chittacks ; Kotah 14½ seers ; Dholepore 9 seers ; Bhurtpore 9 seers 6 chittacks ; Bickaneer 9½ to 8 seers 15 chittacks ; Jaisulmere 8⅜ seers per rupee.

Kashmir.—KASHMIR VALLEY : *For week ending 26th January.*—Snow has fallen. Prices continue slow. Normal price 24 seers per rupee.

Jammu.—*For week ending 27th January.*—Good showers of rain have fallen. Prices are stationary. Fodder is scanty. Relief works are in progress. Price 10½ seers per rupee.

Nepal.—*For week ending 23rd January.*—Sixty-six cents of rain fell in two days and the weather is clear again. Prospects are good. Price of common rice 7 seers ; better sort 6½ seers per rupee.

The total numbers in receipt of relief in all Provinces during the past and present weeks are as follows :—

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

REGULATIONS FOR THE FOREST SERVICE BRANCH OF COOPER'S HILL COLLEGE FOR 1897.

Circular No. $\frac{1}{306-2}$ F.

Extract from the Proceedings of the Government of India, in the Department of Revenue and Agriculture (Forests): dated Calcutta, the 27th January 1897.

READ the following extract from a Despatch from Her Majesty's Secretary of State, forwarding copies of the Regulations for 1897 of the Forest Service Branch in Cooper's Hill College:—

Extract (paragraph 2) from Despatch No. 150 (Revenue), dated 19th November 1896, from Lord George Hamilton, Secretary of State for India, to the Government of India.

* * * *

2. I take this opportunity of forwarding ten (10) copies of the Regulations for admission to the Forest Branch of the College for the year 1897.

REGULATIONS

FOR THE

FOREST SERVICE BRANCH

OF THE

ROYAL INDIAN ENGINEERING COLLEGE, COOPER'S HILL,

FOR 1897.

[*Post Town, Staines. Railway Station, Egham. Telegraph Station, Englefield Green.*]

STAFF OF THE COLLEGE.*

President, Colonel JOHN PENNYCUICK, R.E., C.S.I.
Secretary, Lieutenant-Colonel W. J. BOYES.
Bursar, J. P. PASCO, Esq., R.N., Retired.
Chaplain, Rev. C. CROSLEGH, D.D.

Engineering Branch.

Assistant Professor of Engineering, A. H. HEATH, Esq., Assoc. Mem. Inst. C.E.
Professor of Surveying, Major-General E. H. COURTNEY, R.E.
Instructor in Geometrical Drawing, ARTHUR HICKS, Esq.
Lecturer in Accounts, J. C. HURST, Esq.
Instructor in Freehand Drawing, RUSSELL DOWSON, Esq.

Mathematical Branch.

Professor of Applied Mathematics, G. M. MINCHIN, Esq., M.A., F.R.S.
Professor of Pure Mathematics, A. LODGE, Esq., M.A., Fereday Fellow of St. John's College, Oxon.

Natural Science Branch.

Professor of Chemistry, HERBERT MCLEOD, Esq., F.R.S.
Professor of Physics, W. N. STOCKER, Esq., M.A., Fellow of Brasenose College, Oxon.
Lecturer in Geology and Mineralogy, Professor H. G. SEELEY, F.R.S.

Forestry Branch.

Principal Professor of Forestry, W. SCHLICH, C.I.E., Ph.D., late Inspector-General of Forests to the Government of India
Assistant Professor of Forestry, W. R. FISHER, Esq., B.A., late Conservator of Forests, Northern India.

* The staff of the College is only given in so far as it concerns the Forest Branch.

Lecturer on Botany, C. A. BARBER, Esq., M.A.
Lecturer on Entomology, W. F. H. BLANDFORD, Esq., M.A., Fellow of Christ's College, Cambridge.
Lecturer on Chemistry of Soils and Vegetation, A. H CHURCH, Esq., M.A., F.R.S.
Instructor in German, T. H. DITTEL, Esq.

[*The arrangements hereinafter described are subject to revision under the orders of the Secretary of State for India.*]

1. The Royal Indian Engineering College is primarily maintained, under the orders of the Secretary of State for India in Council, for the education of candidates for the service of Government in the India Public Works, Telegraph, and Forest Departments; but it is open, to the extent o. the accommodation available, to all persons desirous of following the course of study pursued in it.

India Forest Department Appointments.

2. The Examination, which is conducted by the Civil Service Commissioners, usually takes place towards the end of June; and candidates may undergo the written part of their examination in London, Edinburgh, or Dublin, or at any of the provincial centres at which the simultaneous examination of candidates for admission to the Royal Military College, Sandhurst, is to be held. A list of the probable centres may be obtained from the Civil Service Commissioners at any time after March 1897. The oral and practical parts of the examination will be held in London only.

A fee of 2*l.* is required from candidates examined in London, but when the written examination is conducted elsewhere than in London the fee is 3*l.* Candidates examined at a college or school will probably be required to pay a local fee in addition to the fee of 3*l.* (in order to defray the expenses of superintendence), as to which they should obtain early information from the college or school authorities. The fee payable to the Civil Service Commissioners must be paid by means of stamps of the specified amount. Instructions on this point will be issued to candidates about 10 days before the examination.

3. The number of candidates to be selected annually varies according to the requirements of the Forest Service in India; the figures as regards each particular year will be advertised from time to time. *In* 1897 *there will be six appointments offered for competition.*

4. Candidates for the Indian Forest Department are selected under the following arrangements:—

(*a*) An applicant must be a natural-born British subject, and must be above 17 and under 20 years of age on the 1st June of the year in which he competes for an appointment. He must be unmarried, and if he marries before reaching India he will forfeit his appointment.

(*b*) An applicant must send* to the Revenue Department of the India Office, on or before the 1st day of May of the year in which he proposes to compete:—

(1) His name and parentage, a certificate or other satisfactory evidence of the date of his birth, and the written consent of parent or guardian that his name should be recorded as a candidate.

(2) A statement of the places of education at which he may have been, accompanied by testimonials of good conduct, during the last four years.

(*c*) Applicants will have to appear before a Medical Board† at the India Office, particular stress being laid upon good vision and hearing.
A physical test will also be imposed, so as to ensure the selection of persons of active habits and powers of endurance.

(*d*) The applicants who have successfully passed the medical examination and the physical test will be required to undergo an examination before the Civil

---

* There is no form of application; the documents specified in para. 4 (*b*), clauses (1) and (2), should be enclosed in a covering letter addressed to the Secretary, Revenue Department, India Office, London.

† With a view to prevent parents and guardians from incurring the inconvenience and expense of preparing candidates who may be physically unfit for the Forest Service, it is suggested that, before any such preparation is begun, candidates be submitted to examination by the medical adviser of the family, or any other qualified medical practitioner, with regard to the following points:—

1. A weak constitution.
2. Defective vision.
3. Impaired hearing.
4. The existence of any congenital defect.

It is to be understood that this private examination is merely suggested to lessen the chances of disappointment, and that it is by no means intended to take the place of, or to influence in any way, the official examination.

On the subject of the standard of eyesight required for the Indian services, a pamphlet has been published, under the authority of the Secretary of State in Council, by Messrs. Churchill and Sons, 11, New Burlington Street.

Service Commissioners in the following subjects* (Classes I to III), marks being assigned as follows:—

CLASS I.—OBLIGATORY SUBJECTS.†

	Marks.	
1. Mathematics (lower), *viz.*, Algebra up to and including the Binomial Theorem; the theory and the use of logarithms; Euclid, Books I to IV and VI; Plane Trigonometry up to and including the solution of Triangles and Mensuration	2,500	In each of these subjects a candidate must obtain not less than one-third of full marks in order to qualify.
2. English composition	1,000	
3. German (400 for colloquial)	2,000	

CLASS II.—OPTIONAL SUBJECTS.

4. Mathematics (higher), including Analytical Geometry, Conic Sections, Statics, and Dynamics	2,000	A candidate may take any two, but not more than two, of the optional subjects. Under "Optional Subjects" Nos. 9, 10, 11, and 12, the examination will be partly practical.
5. French (400 for colloquial)	2,000	
6. Latin	2,000	
7. Greek	2,000	
‡8. English History. There will be set: one general paper; one paper limited to a fixed period, which will be from the year 1660 to the year 1727 for the examination of 1897	2,000	
9. Botany, *viz.*, the elementary parts of vegetable morphology, histology, and physiology, and the principles of a natural system of classification as illustrated by the more important British natural orders. Candidates will be required to describe plants in technical language. Questions will not be set on vegetable palæontology or on the geographical distribution of plants	2,000	
10. Chemistry, *viz.*, the elements of Inorganic Chemistry	2,000	
11. Physics. Elementary properties of Electricity, Magnetism, Heat, Light, and Sound	2,000	
12. Physical Geography and Geology, chiefly economic; including the recognition of the more familiar minerals and rocks, and their properties and uses	2,000	

CLASS III.—ADDITIONAL SUBJECTS.

13. Freehand Drawing	500	Either or both of these subjects may be taken in addition to the obligatory and the two optional subjects
14. Geometrical Drawing	300	

(*e*) The Secretary of State will nominate as probationers such competitors as attain the highest aggregate of marks (provided they obtain the minimum in the obligatory subjects and satisfy the requisite conditions in other respects). These probationers will then enter the College, where they will be further trained for the Forest Service of India.

(*f*) If the full number of competent probationers required in any year cannot be obtained from the persons so examined, the Secretary of State reserves a discretion to fill up the deficiency by selecting any other person or persons who may satisfy the authorities of the College that he or they are properly qualified to become probationers for the Forest Service.

5. The course of study for candidates for the India Forest Service extends over about three years, at present divided into seven terms, and a period of study in foreign forests. For about seven terms the candidates will prosecute their studies mainly at the College, and during the period of foreign study, which will occupy the remainder of the course, they will visit, under suitable supervision, such Continental forests as may be selected for the purpose. Excursions may also be made for purposes of instruction, both during term time and during part of the vacations.

6. Each annual session begins in September, and is divided into three terms, with vacations of about four weeks at Christmas, two weeks at Easter, and eight weeks in the summer except at the end of the visit to the Continent, when the vacation will be shorter.

7. A charge of 61*l.* is made for each of the seven terms spent at the College; for the period of foreign study the charge is 150*l.*; the amounts must be paid terminally in advance to the Bank of England for the first seven terms, and the amount due for the period of foreign study must be paid before the period begins. Receivable orders, with full directions as to the mode of payment, will be forwarded from the India Office to the parents or guardians, shortly before the fees fall due. A student will not be allowed to come into residence or to start for his foreign study of forests until his fee has been paid.

8. A deposit of 5*l.* is required to be paid by each student on admission to the College, as caution money, to cover charges incurred by him for damage to books,

* Reprints of the papers set at previous examinations, together with tables of the marks assigned to the candidates, are published by the Civil Service Commissioners, and can be obtained through any bookseller. The price of each reprint is one shilling.

† Attention is invited to the appended Syllabus, giving further details regarding the extent and character of the examination.

‡ No special text-books are prescribed.

instruments, etc., or any College bills outstanding on leaving the College. Any balance over and above such charges will be repaid. This deposit is to be paid with the fee for the first term, making the total payment on that occasion 66*l.*

9. The foregoing payments cover all charges for tuition, board according to the College tariff, lodging, with washing, up to a cost of 2*s.* a week, and ordinary medical attendance while in residence at the College. When students are on tour and during the course of practical instruction, whether in Great Britain or on the Continent, the Secretary of State will defray the expenses of (1) board, lodging, and washing (the aggregate maximum expenditure under these heads being 10*s.* per diem), (2) travelling expenses, and (3) fees to local Forest officers, etc.

Students are required to provide their own class books and drawing instruments. Drawing paper, drawing boards, and surveying instruments are provided by the College.

10. The prescribed course of study comprises the following subjects :—

I.—*Auxiliary Subjects.*

1. Geometrical Drawing.
2. Freehand Drawing.
3. Surveying.
4. Forest Engineering.
5. Accounts.
6. German.
7. Mechanics.
8. Physics.
9. Chemistry
10. Geology and Mineralogy.
11. Entomology.
12. Botany.
13. Drill and Gymnastics.

II.—*Forestry*, theoretical and practical, in all its branches.

11. Every student is required to conform to the College rules, to exhibit due diligence in his studies throughout the course, and to give evidence of satisfactory progress in such manner as may be required, failing which, or in the event of serious misconduct, he will be liable to be removed from the College, or to be sent back from the foreign study, which may entail the loss of his appointment.

12. During the course of study, the proficiency of the students will be tested by periodical examinations and on the termination of their studies there will be a final examination. Each student may also, at the discretion of the Secretary of State for India, be required to appear before the Medical Board at the expiration of the first year of residence at the College, and should the result be unsatisfactory he cannot claim to be allowed to complete the course.

13. The subjects enumerated in paragraph 10 are grouped in certain main branches of study,* and a fixed minimum of qualification is required in each branch and in the subjects taught during the forest tours, as well as a certain minimum for all branches taken together. Students who obtain these minima will receive the College diploma in forestry.

14. Candidates who have obtained this diploma and are found to be of sound constitution and free from physical defects which would render them unsuitable for employment in the Forest Department (the final decision on which points will rest with the Secretary of State for India), will be appointed Assistant Conservators in the Forest Department of India in the order of their standing at the end of the final examination. They will be allowed before leaving the College to state their preference in respect to the Provinces to which they desire to be allotted ; but the distribution will be made to the several Provinces according to the needs of the public service, at the discretion of the Secretary of State for India after consulting the President of the College and the Principal Professor of Forestry. Officers are, however, at all times liable to be transferred from one province to another at the pleasure of the Government of India.

15. Within a month of his nomination as Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State, and will be provided with a free passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

16. The pay of an Assistant Conservator of Forests will begin from the date of reporting arrival in India. Probationers who acquit themselves creditably during their course at Cooper's Hill College will begin on a salary of ₹350 a month. It will, however, rest with the President of the College, in consultation with the Principal Professor of Forestry, to decide whether any of the probationers, though they have obtained the College diploma in Forestry, have failed to deserve that rate of initial salary. Such probationers, if any, will begin on a salary of ₹250 a month; and this difference of salary will continue until the first departmental examination is passed in India. Officers entering the Forest Service will be required to contribute a subscription ranging from a compulsory minimum of 5 per cent. up to a voluntary maximum of 10 per cent. of their salary to the Forest Officers' Provident Fund. Such contributions, with compound interest, will accumulate till the date of retirement, when the total sum will be paid to the contributor, or in the event of death before retirement to his legal representative.

* For details *see* Royal Indian Engineering College Calendar.

17. Promotion, leave, and pension will be governed by the regulations laid down by the Government of India and made applicable to Forest officers, such regulations being subject to any modifications or alterations which may be made in them from time to time by the Government of India, and their interpretation in case of any doubt arising being left to that Government. The more favourable pension rules applicable to Public Works and Telegraph officers appointed from Cooper's Hill College have been extended to Forest officers appointed from England; and the Inspector General of Forests and Conservators of the 1st grade are now eligible for the extra pension of Rs. 1,000 per annum admissible to an officer after at least three years of approved service as a head of a department in any province, if considered deserving of the special concession. A copy of the Regulations relative to these matters can be seen on application either at the Library or the Record Department of the India Office; the principal rules are contained in the Abstract of the Civil Service Regulations, as given in the "India List and India Office List" published by Messrs. Harrison and Sons, 59, Pall Mall, London, which can be procured through any book-seller.

18. Every candidate, before proceeding to India, will be required to furnish to the President of the College satisfactory evidence of his competency in riding.

General Rules.

19. Chemical, physical, and botanical laboratories, a forestry museum, a forest nursery, a library, and gymnasium are attached to the College. Means are also provided for the practice of photography. Students making use of the laboratories are supplied with the needful apparatus.

20. The responsibility for the discipline and management of the College and for the superintendence of the studies is vested in the President, under the control of the Secretary of State for India.

21. The students are distributed in divisions, under personal charge of one of the Professors or Instructors selected by the President; such tutor being responsible for exercising the proper degree of personal supervision over each student in his division, and for conducting necessary correspondence with the student's parents or guardians.

22. Each student residing in the College is provided with a separate room, and with fuel and light, also with the necessary attendance. Furniture and bedding are supplied by the College, but students are required to provide their own towels and bed linen. Meals are taken in hall. Wine and beer are not included in the ordinary fare, but can be obtained from the College cellar at fixed prices.

23. A chapel is attached to the College, which the students residing in the College are expected to attend, unless specially exempted.

24. Every student will be required to go through a course of gymnastics and also of military exercises, including the use of the rifle.

25. Students are required to wear academical dress, under such regulations as may be prescribed from time to time.

Students not nominated for the Indian Forest Service, but desirous of obtaining a Diploma in Forestry from Cooper's Hill College.

26. Students not nominated for the Indian Forest Service may be received into the College, as far as the available accommodation permits. Such students may pass through the course of instruction prescribed for the nominees of the Indian Forest Service, as detailed above, or they may be permitted to participate in the instruction given in certain subjects only. On attaining the prescribed minima of marks in the several branches of study and in totals as laid down above, they will receive, as the case may require, either the College Diploma in Forestry or special certificates showing in what subjects they have followed the instruction, and with what result.

27. Candidates who desire to be admitted under paragraph 26 may submit the necessary application at any time, but not later than the 15th day of June of the year named for admission, except with the special permission of the President. The application must be made on the prescribed forms, which can be obtained from the Secretary of the College.

28. Candidates whose applications are found satisfactory as to character and in other respects will be required to undergo an examination, to be held at the College about the last week in June of the year, for admission. The object of the examination will be to ascertain whether the candidate is qualified to follow the course of instruction with advantage (or certain parts of it, as the case may be). Candidates who do not come up to the required standard will not be admitted to the College.

The President may dispense with the whole or any portion of this examination in the case of a candidate who produces an University diploma, or other similar certificate granted by a recognized examining body.

29. Candidates admitted to the College under paragraph 26, who propose to pass through the full prescribed course of study, will be required to pay the same fees in every

respect as those paid by the nominees for the India Forest Service. Candidates who do not become resident, and are admitted only to certain subjects of study, will be required to pay the fees which may be fixed in each special case in consideration of the extent of their studies. The candidates of both classes will be required to abide by the general rules of the College.

FOREST EXAMINATION.

SYLLABUS.

Class I.

Mathematics.—The extent of the Examination will be as fol

(*a*) Algebra, up to and including the binomial theorem, use of logarithms;

(*b*) Euclid, Books I to IV and VI;

(*c*) Plane Trigonometry, up to and including solution of triangles and mensuration.

English Composition.—The standard of positive merit will be looked for in logical arrangement of thought, and in accuracy and propriety of expression, but large deductions of marks will be made for faults of writing and spelling.

Candidates are also warned that, for similar faults in the use of the English language, similar deductions will be made from the marks obtained in the German papers in Class I.

German.—There will be translations of unseen passages from German into English, and from English into German; the passages for translation will be taken, mainly, from standard authors, and a few simple questions may be asked, on the passages set, as to the structure and character of the language, and allusions of obvious and general interest. The *viva voce* Examination will include Dictation.

Class II.

Any two Subjects may be taken up.

Higher Mathematics.—

*** In all the following subjects great importance will be attached to accuracy in numerical results.

Further questions and problems on the subjects of the Examination in Mathematics, Class I.

And in addition:—

Statics: The equilibrium of forces acting in one plane and of parallel forces, the centre of gravity, the mechanical powers, and friction. (The graphical or geometrical method of treating such problems should be studied as well as the analytical. No application of the differential calculus to Statics will be required.)

Dynamics: Uniform, uniformly accelerated, and uniform circular motion, falling bodies and projectiles *in vacuo*, collisions and work. (Analytical methods of solution, but not the use of the differential calculus, will be involved.)

Analytical Geometry: Problems on straight line and circle.

Conic Sections: Elementary properties, with easy problems both on the analytical and geometrical methods.

French.—The passages for translation will be taken mainly from standard authors, and in other respects the Examination will proceed on the same lines as in German.

Latin.—Passages selected from the authors usually read in schools will be set for translation into English. Passages from English authors will be given for translation into Latin prose and verse; but candidates will be allowed, in the place of verse composition, to answer questions of a simple character, which will test whether they possess a fundamental knowledge of the grammar of the language and such an elementary acquaintance with Roman History as is required for the intelligent study of the books they have read.

Greek.—Passages will be set for translation into English from the authors usually read in schools, and in other respects the Examination will proceed on the same lines as in Latin.

English History.—The General Paper in this subject will test whether the candidates are accurately acquainted with the facts of English History, and also possess an intelligent knowledge of the meaning of the facts. The paper on the fixed period will, of course, require from the candidates more minute knowledge than the General Paper.

Botany, Chemistry, Physics, Physical Geography and Geology.—The standard of Examination in these subjects will be such as may be reasonably expected from the education given at schools possessing appliances for practical instruction, such as a

laboratory, etc. A considerable portion of the marks will be allotted for the proficiency shown in the practical part of the Examination.

Chemistry will be limited to elements of inorganic chemistry.

Physics will include elementary properties of electricity, magnetism, heat, light and sound.

Geology, chiefly economic, including the recognition of the more familiar minerals and rocks, and their properties and uses.

Class III.

Both subjects may be taken up.

Drawing, Freehand.
Drawing, Geometrical.

GENERAL.

Handwriting.—In estimating the papers of candidates, a limited number of marks, namely, 100 out of the maximum allotted to each subject, is assigned for handwriting.

ORDER.—Ordered that a copy be forwarded, for information, to the Governments of Madras and Bombay, the Local Governments and Administrations noted in the margin, the Inspector General of Forests, and the Comptroller and Auditor General.

Bengal.	Assam.
North-Western Provinces and Oudh	Coorg.
Punjab.	Ajmere.
Central Provinces.	Andamans.
Burma.	Baluchistan.
	Hyderabad.

Ordered, also, that these papers be published in the Supplement to the *Gazette of India*.

(True Extract.)

F. G. SLY,

Under-Secretary to the Government of India.

Printed and published for the GOVERNMENT OF INDIA *at the Office of the* SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA, *No. 8, Hastings Street, Calcutta.*

The Gazette of India.

PUBLISHED BY AUTHORITY.

No. 6.] CALCUTTA, SATURDAY, FEBRUARY 6, 1897.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

CONTENTS.

PART I.—Government of India Notifications, Appointments, Promotions, Leave of Absence, General Orders, Rules and Regulations.

PART II.—Notifications by High Court, Comptroller General, Administrator General, Paper Currency Department, Presidency Pay Master, Money Order Department, Mint Master, Secretary and Treasurer, Bank of Bengal, Superintendent of Government Printing, and Other Government Officers; Postal, Telegraph, and Commissariat Notices.

PART III.—Advertisements and Notices by private individuals and Corporations.

PART IV.—Acts of the Governor General's Council assented to by the Governor General:—

An Act to provide for the better prevention of the spread of Dangerous Epidemic Disease.

An Act to provide for certain matters relating to Fisheries in British India.

PART V.—Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council and Bills published under Rule 22:—

Report of the Select Committee on the Bill to provide for the better prevention of the spread of Dangerous Epidemic Disease, with Bill as amended.

Bill to consolidate and extend the General Clauses Acts, 1868 and 1887.

PART VI.—Abstract of the Proceedings of the Council of the Governor General of India assembled for the purpose of making Laws and Regulations on the 4th February 1897:—

Fisheries Bill.

Reformatory Schools Bill.

Rules of Business.

Epidemic Diseases Bill.

General Clauses Bill.

SUPPLEMENT No. 6.

PART I.

Government of India Notifications, Appointments, Promotions, etc.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Calcutta, the 5th February, 1897.

No. 3.—The following Rules for the Conduct of the Legislative Business of the Council of the Governor General of India which were made by the Council of the Governor General assembled for the purpose of making Laws and Regulations at the meeting held on the fourth day of February, 1897, and received the assent of His Excellency the Governor General on the same day, are hereby promulgated for general information:—

Rules for the Conduct of the Legislative Business of the Council of the Governor General.

I.—Preliminary.

1. These Rules supersede the Rules for the Conduct of Business at the meetings of the Council made on the 11th day of February, 1873, and the 16th day of February, 1883.

2. In these Rules—

"Council" means the Council of the Governor General of India assembled for the purpose of making Laws and Regulations:

"President" means the Governor General or (during the time of his visit to any part of India unaccompanied by his Council) the President nominated by the Governor General in Council, under the Indian Councils Act, 1861, section 6; or, in the absence of both the Governor General and the President so nominated, the senior Ordinary Member of Council present and presiding:

"Member" means a Member of the Council, whether ordinary, extraordinary or additional:

"Secretary" means the Secretary to the Government of India in the Legislative Department, and includes the Deputy Secretary and every person for the time being exercising the functions of the Secretary: and

"Local Government" includes a Chief Commissioner.

II.—Meetings of the Council.

3. The Council shall ordinarily meet at 11 A.M., and shall not prolong its sitting after 4 P.M., unless the President otherwise directs.

4. The quorum shall be seven, including the President.

5. The Governor or Lieutenant-Governor and the Law Member shall sit where the President may direct.

Subject to any such direction, the Members shall sit in the following order, beginning from the right of the President:—

(1) The Commander-in-Chief.

(2) The Ordinary Members according to seniority.

(3) The Additional Members according to seniority.

6. The President may adjourn, without any discussion or vote, any meeting or business, whether there be a quorum present or not, to any future day, or to any hour of the same day.

7. The President shall preserve order, and all points of order shall be decided by him, no discussion thereupon being allowed.

8. A Member desiring to make any observations on any subject before the Council shall address the President without rising from his chair.

9. On all matters brought before the Council, after the Member who makes a motion has spoken, each Member consecutively, beginning with the Member on the left of the President, may make such observations as he thinks proper. The Law Member, however, may speak according to the position of the seat he would occupy if he sat in order of seniority and not according to the seat he may occupy at the Council table under rule 5.

After all the Members in turn have had an opportunity of speaking, the Mover may speak once by way of reply, and any other Member may, with the permission of the President, speak once by way of explanation:

Provided that, if the matter be an amendment of a Bill, the Member in charge of the Bill shall be entitled to speak next after the Mover of the amendment.

10. When, for the purpose of explanation during discussion, or for any other sufficient reason, any Member has occasion to ask a question of another Member on any measure then under the consideration of the Council, he shall ask the question through the President.

11. Any Member may speak at the request and on behalf of another Member who is unable to express himself in English.

12. On every motion before the Council, the question shall be put by the President, and shall be decided by a majority of votes.

In case of a division, the votes shall be taken by the Secretary in consecutive order, beginning with the Member on the left of the President.

After the question is put, no further discussion upon it shall be allowed.

13. Any Member may ask for any papers or returns connected with any Bill before the Council. The President shall determine, either at the time or at the Meeting of the Council next following, whether the papers or returns asked for can be given.

14. Communications on matters connected with any Bill before the Council may be addressed, either in the form of a petition to the Governor General in Council, or in a letter to the Secretary, and must in either case be sent to the Secretary. Ordinarily, such communications will not be answered.

Except in the case of the High Court at Fort William, such communications shall ordinarily be sent through the Local Government.

15. The Secretary shall either cause such communications to be printed and send a copy to each Member, or circulate them for the perusal of each Member.

III.—Introduction and publication of Bills.

16. Any Member desiring to move for leave to introduce a Bill in accordance with the provisions of section 19 of the Indian Councils Act, 1861, shall give the Secretary at least three days' previous notice of the title and object of the Bill.

If such motion be carried, the Bill with a full Statement of Objects and Reasons shall, if not already prepared, be prepared by the Member or (if he so desire) by the Secretary in consultation with the Member.

17. The Secretary shall then cause the Bill, together with the Statement of Objects and Reasons, to be printed, and shall send a copy to each Member.

If any of the Members are unacquainted with English, he shall also, if requested, cause the Bill and the Statement of Objects and Reasons to be translated into Hindustani for their use.

18. The Council may, at any time after leave to introduce a Bill has been granted, direct that the Bill be published in such manner as the Council thinks fit.

19. When a Bill is introduced, or on some subsequent occasion, the Member in charge of it shall make one or more of the following motions:—

(*a*) that it be referred to a Select Committee, or

(*b*) that it be taken into consideration by the Council, either at once or at some future day to be then mentioned, or

(*c*) that it be circulated for the purpose of eliciting opinion thereon.

20. No such motion shall be made until after a copy of the Bill and a copy of the Statement of Objects and Reasons have been furnished to each Member. Any Member may object to the motion unless such copies have been furnished to him at least seven days previously: and such objection shall prevail unless the President, in exercise of his power to suspend any of these Rules, allows the motion to be made.

21. On the day on which such motion is made, or on any subsequent day to which the discussion is postponed, the principle of the Bill and its general provisions may be discussed.

22. When any motion mentioned in rule 19 is carried, the Bill shall, together with a Statement of its Objects and Reasons, if not already published on a motion under rule 18, be published in English in the Gazette of India.

The Bill and Statement shall also, if publication has not already been directed, be published in such official Gazettes and in such vernacular languages (if any) as the Council in each case decides to be necessary for the purpose of giving notice to the communities affected by the Bill.

For this purpose, the Council shall make an order at the Meeting at which such motion is carried, and may from time to time, on the motion of any Member, vary or cancel such order.

23. The Governor General, if he see fit, may order the publication of a Bill, together with the Statement of Objects and Reasons which accompanies it, in such Gazettes and languages as he thinks necessary, although no motion has been made for leave to introduce the Bill.

In that case it shall not be necessary to move for leave to introduce the Bill; and, if the Bill be afterwards introduced, it shall not be necessary to publish it again.

IV.—Select Committees.

24. The Law Member shall be a Member of every Select Committee.

The other Members of every Committee shall be named by the Council when the Bill is referred, or at any subsequent Meeting.

The Law Member and, in his absence, the Member in charge of the Bill, shall be chairman of the Committee, and, in the case of an equality of votes, the chairman shall have a second or casting vote.

25. After publication of a Bill in the Gazette of India, the Select Committee to which the Bill may have been referred shall make a report thereon.

Such report shall be made not sooner than three months from the date of the first publication in the Gazette of India, unless the Council orders the report to be made sooner.

Reports may be either preliminary or final.

The Select Committee shall in their report state whether or not, in their judgment, the Bill has been so altered as to require re-publication, whether the publication ordered by these Rules or by the Council has taken place, and the date on which the publication has taken place, or, where publication in more than one Gazette or in more than one language is ordered, the date on which the publication in each such Gazette and each such language has taken place.

If, in the judgment of the Committee, the Bill has been so altered as to require re-publication, the Secretary shall send a copy of the altered Bill to the Secretary of the Department to which it pertains.

When the Committee recommend the re-publication of a Bill which was originally ordered by these Rules or by the Council to be published in more than one Gazette or in more than one language, they shall, in the absence of anything to the contrary in their report, be taken to recommend that the Bill be re-published in every such Gazette and every such language.

If the Committee are of opinion that it is unnecessary to re-publish the Bill in any such Gazette or in any such language, they shall, in their report, state the grounds of their opinion.

26. The Secretary shall cause every report of a Select Committee to be printed, and shall send a copy of such report to each Member, and shall cause the report, with the amended Bill, to be published in the Gazette of India.

If any Member present is unacquainted with English, the Secretary shall also, if requested, cause the report to be translated into Hindustani for his use.

27. The report of the Select Committee on a Bill shall be presented to the Council by the Member in charge of the Bill, and shall be taken into consideration by the Council as soon as conveniently may be; but any Member may object to its being so taken into consideration when he has not been furnished for a week with a copy of the report; and such objection shall prevail, unless the President, in exercise of his power to suspend any of these Rules, allows the report to be taken into consideration.

V.—Consideration and Amendments of Bills.

28. When a Bill is taken into consideration by the Council, any Member may propose an amendment of such Bill.

29. If notice of such amendment has not been sent to the Secretary at least three days before the meeting of the Council at which the Bill is to be considered, any Member may object to the moving of the amendment, and such objection shall prevail, unless the President, in exercise of his power to suspend any of these Rules, allows the amendment to be moved.

The Secretary shall, if time permits, cause every notice of amendment to be printed, and send a copy for the information of each Member.

If any Member present is unacquainted with English, the Secretary shall also, if requested, cause every such notice to be translated into Hindustani for his use.

30. Amendments shall ordinarily be considered in the order of the clauses to which they respectively relate.

31. Notwithstanding anything in the foregoing Rules, it shall be in the discretion of the President, when a motion that a Bill be taken into consideration has been carried, to submit the Bill or any part of the Bill to the Council section by section. When this procedure is adopted, the President shall call each section separately, and when the amendments relating to it have been dealt with, shall put the question "that this section, or (as the case may be) this section as amended, stand part of the Bill."

32. Any Member may move that a Bill which has been amended by the Council or by a Select Committee be re-published or re-committed, and, if the Council so decide, the President may order the Bill to be re-published or re-committed, as the case may be.

33. If no amendment be made when a Bill is taken into consideration by the Council, the Bill may at once be passed.

If any amendment be made, any Member may object to the passing of the Bill at the same Meeting; and such objection shall prevail, unless the President, in exercise of his power to suspend any of these Rules, allows the Bill to pass.

Where the objection prevails, the Bill shall be brought forward again at a future Meeting, and may then be passed with or without further amendment.

34. When a Bill is passed by the Council, a copy thereof shall be signed by the President, and, when the Governor General has declared his assent thereto, such copy shall be signed by the Governor General, and the Bill shall be published as soon as possible in the official Gazettes, under the signature of the Secretary, as an Act of the Governor General in Council.

Such publication shall be made in the Gazette of India in English and in the official Gazettes of the Local Governments in English and in such vernacular languages spoken in the territories subject to such Governments respectively as may be ordered by the Council or directed by the Local Government:

Provided that, when the Act does not apply to the whole of British India, it shall be published only in the Gazette of India and in the Gazettes of the Local Governments to whose territories it applies.

VII.—Duties of Secretary.

35. At least two days before each meeting of the Council, the Secretary shall send to each Member a list of the business to be brought forward at such meeting.

Subject to the provisions of rule 29, no business shall be entered by the Secretary in a list, unless notice thereof has been given to him at least three days before the meeting

of the Council to which the lists relate: provided that business may be added to the list at any time before a meeting under the special orders of the President.

36. The Secretary shall keep a journal, in which all the proceedings of the Council shall be fairly entered.

The journal shall be submitted after each Meeting to the President for his confirmation and signature, and, when so signed, shall be the record of the proceedings of the Council.

37. The Secretary shall also cause to be prepared a full report of the proceedings of the Council at each of its Meetings, and publish it in the Gazette of India as soon as practicable. He shall send a copy of such report to each Member and also to the Permanent Under-Secretary of State for India.

38. In addition to the other duties specially required by these Rules, it shall be the duty of the Secretary—

1st, to draft all Bills originated by the Government of India, the Statements of their Objects and Reasons, and the Reports of the Select Committee to which such Bills are referred;

2nd, to take charge of the copies of the Bills signed by the Governor General and of all the other records of the Council;

3rd, to keep the books of the Council;

4th, to keep a list of the business for the time being before the Council;

5th, to superintend the printing of all papers printed in pursuance of these rules;

6th, to assist the Council and all Committees in such manner as they may direct;

7th, to send to the Secretary of the Department to which the Bill pertains, any Bill which an Additional Member has obtained leave to introduce under rule 16;

8th, to examine all Bills deposited by Additional Members, and report to the President on those which contain clauses trenching on subjects coming within section 19 or section 22 of the Indian Councils Act, 1861;

9th, to write all letters which the Council or the President, or any Select Committee, or the Law Member, directs to be written.

39. It shall be the duty of the Secretary to cause to be translated into Hindustani Bills, Statements of Objects and Reasons, Reports of Select Committees and Amendments of Bills, to cause papers to be explained to Members unacquainted with English, and otherwise to assist them in such manner as they may require.

VIII.—Miscellaneous.

40. Strangers may be admitted into the Council Chamber during the sittings of the Council on the order of the President.

Application for orders of admission is to be made to the Secretary.

41. The President, on the motion of any Member, may direct at any time during a sitting of the Council that strangers withdraw.

42. Any paper relating to any measure before the Council may be published by order of the President.

Copies of papers so published shall be sold at such rates as may be fixed by the Secretary.

43. Any Bill respecting which no motion has been made in the Council for two years may, by order of the President, be removed from the List of Business.

44. The President, for sufficient reason, may suspend any of the foregoing Rules.

J. M. MACPHERSON,
Secretary to the Government of India.

HOME DEPARTMENT.

NOTIFICATIONS.

SANITARY.

The 4th February, 1897.

No. 302.—Whereas certain parts of India are visited by, and others threatened with, an outbreak of dangerous epidemic disease known as bubonic plague, the Governor General in Council, in exercise of the powers conferred by section 2, sub-section (3) of the Epidemic Diseases Act, 1897, is pleased to direct that the powers conferred by the said Act may be exercised by Local Governments with regard to their respective territories as follows:—

(*a*) all the said powers by the Governors of Fort St. George and Bombay in Council, the Lieutenant-Governor of Bengal and Chief Commissioner of Burma;

(*b*) the powers conferred by section 2, sub-section (1) and sub-section (2), clause (*b*) by the Lieutenant-Governor of the North-Western Provinces and Chief Commissioner of Oudh, the Lieutenant-Governor of the Punjab and the Chief Commissioner of the Central Provinces, and

(*c*) the powers conferred by section 2, sub-section (2), clause (*b*) by the Chief Commissioners of Assam, Coorg and British Baluchistan.

The 5th February, 1897.

No. 324.—The following rules for quarantine against plague, which have been made by the Chief Commissioner, Burma, in exercise of the power conferred by section 1, Act I of 1870, with the previous sanction of the Governor General in Council, are published for general information.

The rules have effect from the 25th January 1897, as a temporary measure, in the Port of Moulmein:—

I.—The commander of every vessel, including junks or other native craft, arriving from Bombay or Karachi, shall, on arrival at the pilot station, hoist a yellow flag and indicate by signal the port from which she has come.

II.—Such commander shall not, except as hereinafter provided, allow any communication either with the shore or with any other vessel or boat except with the boat supplying a pilot, and in that case communication shall be limited to receiving on board the pilot, his servant, if any, and bag gage.

III.—The pilot shall not take such vessel higher than Lower Anchoring creek, but shall anchor it there until the Health Officer of the Port has visited it and ascertained by enquiry from the commander whether any person on board is suffering, or has during the voyage suffered, from plague. If the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, the Health Officer *may*, by writing under his hand to be delivered to the commander, permit such vessel to haul down the yellow flag and proceed upwards in the port and hold free communication with the shore and with vessels and boats in port. Provided that, if the vessel has undergone since leaving Bombay or Karachi a quarantine, which is properly proved, for not less than eight days at Colombo, or some other British Port, the Health Officer *shall* grant such permission as aforesaid.

If the vessel has not undergone eight days' quarantine at Colombo or some other British port since leaving Bombay or Karachi, the Health Officer *may* direct the commander to take the vessel to the quarantine anchorage and there to remain for a period of eight days from the date of arrival in the harbour. In such case the Health Officer shall also direct the commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for between such vessel and the shore, or other vessels and boats in the harbour.

IV.—If the Health Officer shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the commander to take the vessel to the quarantine anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour; and shall further

direct that during such fifteen days' intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule III.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rules III and IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Chief Commissioner as places of quarantine, there to remain for a period of eight days, or, if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Conservator of the Port to facilitate the conveyance to all vessels in quarantine or such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.

IX.—All vessels arriving at Moulmein, which may have communicated with any vessel coming from Bombay or Karachi, shall be subjected to the same quarantine as vessels arriving at Moulmein from Bombay or Karachi unless the communication was held after the vessel from Bombay or Karachi was released from quarantine.

No. 325.—The following rules for quarantine against plague, which have been made by the Chief Commissioner, Burma, in exercise of the power conferred by section 1, Act I of 1870, with the previous sanction of the Governor General in Council, are published for general information.

The rules have effect from the 26th January 1897, as a temporary measure, in the Port of Bassein :—

I.—The commander of every vessel, including junks or other native craft, arriving from Bombay or Karachi, shall, on arrival at the pilot station, Diamond Island, hoist a yellow flag and indicate by signal the port from which she has come.

II.—Such commander shall not, except as hereinafter provided, allow any communication either with the shore or with any other vessel or boat except with the boat supplying a pilot from the pilot station Diamond Island and in that case communication shall be limited to receiving on board the pilot, his servant, if any, and baggage.

III.—The pilot shall not take such vessels higher than Takaing, but shall anchor it there until the Health Officer of the Port has visited it and ascertained by enquiry from the commander whether any person on board is suffering, or has during the voyage suffered, from plague. If the Health Officer is satisfied by such enquiry that no person on board is suffering, or during the voyage has suffered, from plague, the Health Officer *may*, by writing under his hand to be delivered to the commander, permit such vessel to haul down the yellow flag and proceed upwards in the port and hold free communication with the shore and with vessels and boats in port. Provided that, if the vessel has undergone since leaving Bombay or Karachi a quarantine, which is properly proved, for not less than eight days at Colombo or some other British Port, the Health Officer *shall* grant such permission as aforesaid.

If the vessel have not undergone eight days' quarantine at Colomo or some other British ports since leaving Bombay or Karachi, the Health Officer *may* direct the commander to take the vessel to the quarantine anchorage and there to remain for a period of eight days from the date of arrival in the harbour. In such case the Health Officer shall also direct the commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for between such vessel and the shore, or other vessels and boats in the habour.

IV.—If the Health Officer shall have reason to believe at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the commander to take the vessel to the quarantine anchorage as aforesaid, and there to remain for a period of fifteen days from the day of arrival in the harbour, and shall further direct that during such fifteen days intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited as provided in Rule III.

V.—If during the period a vessel is at the quarantine anchorage aforesaid any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring, and be subject to all the prohibitions provided for in Rules III and IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health Officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected by the Chief Commissioner as places of quarantine, there to remain for a period of eight days, or, if the vessel has been placed in quarantine for fifteen days, for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Conservator of the Port to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores, and other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine to be subsequently removed by members of their crews.

IX.—All vessels arriving at Bassein, which may have communicated with any vessel coming from Bombay or Karachi, shall be subjected to the same quarantine as vessels arriving at Bassein from Bombay or Karachi unless the communication was held after the vessel from Bombay or Karachi was released from quarantine.

No. 326.—The following telegrams regarding quarantine and trade restrictions imposed at ports outside India, in consequence of the existence of bubonic plague in India, are published for general information :—

No. 186-*G.*—Colonel A. W. Roberts, Bengal General List (Cavalry), Political Agent of the 1st class, and Magistrate of Abu, is granted special leave for the 18th and 19th February, 1897, under Article 348 of the Civil Service Regulations.

No. 188-*G.*—The services of Colonel A. W. Roberts, Bengal General List (Cavalry), Political Agent of the 1st class, are replaced at the disposal of the Military Department, with effect from the 20th February, 1897.

The 4th February, 1897.

No. 443-*I. A.*—Whereas certain parts of India are visited by, and others threatened with, an outbreak of dangerous epidemic disease known as bubonic plague, the Governor-General in Council is pleased to apply the Epidemic Diseases Act, 1897, to all territories in India which are under the administration of the Governor-General in Council, but are not part of British India, including the territories for the time being administered by the Agent to the Governor-General in Baluchistan as such Agent, and including also all lands which are, or may hereafter be, occupied by railways, and in which the Governor-General in Council has or exercises jurisdiction.

2. For the purposes of the said enactment so applied the expression "Local Government" shall be construed to mean the person who for the time being administers executive government in the territories concerned.

No. 444-*I. A.*—Whereas certain parts of India are visited by, and others threatened with, an outbreak of dangerous epidemic disease known as bubonic plague, the Governor-General in Council, in exercise of the powers conferred by section 2, sub-section (3) of the Epidemic Diseases Act, 1897, as applied by the Notification of the Government of India in the Foreign Department, No. 443-I. A., dated the 4th February, 1897, to all territories in India which are under the administration of the Governor-General in Council, but are not part of British India, including all railway lands and the territories for the time being administered by the Agent to the Governor-General in Baluchistan as such Agent, is pleased to direct that the powers conferred by section 2, sub-section (2), clause (*b*), of the said Act as so applied, may be exercised by the Local Government in each case.

No. 453-*I. B.*—With reference to Notification No. 507-I., dated the 6th February, 1896, the Governor-General in Council is pleased to appoint Mr. E. Hewetson, District Superintendent of Police of the Civil and Military Station of Bangalore, to be Superintendent of Railway Police in the Mysore State, and to invest him with all the powers conferred by the said Notification on the Superintendent of Railway Police, with effect from the 12th January, 1897.

The 5th February, 1897.

No. 195-*G.*—With reference to notification No. 950-G., dated the 8th June, 1896, Mr A. Gerdes, Consul for Germany at Madras, resumed charge of his office on the 16th January, 1897.

No. 198 *G.*—The privilege leave granted to Lieutenant-Colonel J. H. Newill, Indian Staff Corps, Political Agent of the 1st class, in notification No. 1876-G., dated the 24th November, 1896, is extended by one day.

No 465-*I. A.*—In exercise of the powers conferred by section 27 of the Cantonments Act (XIII of 1889), as applied to the Cantonment of Bhuj by the Notification of the Government of India in the Foreign Department, No. 2840-I., dated the 9th July, 1891, the Governor-General in Council is pleased to declare that the provisions of section 434, sub-section (1), and section 73 of the City of Bombay Municipal Act (III Bo. C. of 1888), as extended to the Cantonment of Kirkee by the Notification of the Government of India in the Military Department, No. 87, dated the 22nd January, 1897, shall be in force in the Cantonment of Bhuj, in the modified form set forth below, namely :—

"(1) In the event of the Cantonment of Bhuj being at any time visited or threatened by an outbreak of any dangerous disease among the inhabitants thereof, the General Officer of the Command, if he thinks that the provisions of the law at the time in force are insufficient for the purpose, may, with the previous sanction of the Governor of Bombay in Council,—

(*a*) take such special measures, and

(*b*) by public notice prescribe such temporary regulations to be observed by the public or by any person or class of persons,

as he may think necessary to prevent the outbreak of such disease or the spread thereof.

"(2) Whoever commits a breach of any such temporary regulation prescribed as aforesaid shall be deemed to have committed an offence punishable under section 188 of the Indian Penal Code as applied to the Cantonment of Bhuj by the Notification of the Government of India in the Foreign Department, No. 2840-I., dated the 9th July 1891.

W. J. CUNINGHAM,
Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT.

NOTIFICATIONS.

LEAVE AND APPOINTMENTS.

Calcutta, the 4th February, 1897.

No. 574-*Gl.*—Mr. C. W. Sandford, Chief Superintendent in the office of the Accountant General, Bengal, was employed under the Government of Bengal from the 23rd December, 1896, to the 29th January, 1897, both days inclusive.

Mr. H. W. Ronaldson, Superintendent in the office of the Comptroller and Auditor General, officiated as Chief Superintendent in the office of the Accountant General, Bengal, from the 28th December, 1896, to the 21st January, 1897, both days inclusive.

The 5th February, 1897.

No. 606-*Gl.*—The privilege leave for one month granted to Mr. M. A. N. A. Hydari, Assistant Accountant General, Bombay, in the Notification in this Department, No. 5490-Gl., dated the 31st December, 1896, published in the *Gazette of India* of the 2nd January 1897, is extended to the 10th February, 1897.

The 5th February, 1897.

No. 602-*S. R.*—The following papers are published for general information :—

Telegram from Her Majesty's Secretary of State for India, dated the 28th January 1897.

"Belgium.—Importation of rags, etcetera, prohibited. Article 8, Dresden Convention, enforced."

Extract from the Sanitary Convention of Dresden, dated the 15th April 1893.

Chapter 8.—*Maritime Part.—Measures to be taken in Ports.*

A ship having cholera on board, or having had fresh cases of cholera on board within seven days, is an *infected* ship.

A ship having had cases of cholera on board at the time of departure or during the passage, but no fresh case within seven days, is a *suspected* ship.

A ship having had neither a death from, nor a case of, cholera on board before departure during the passage, or on arrival, even though she came from an infected port, is a *healthy* ship.

Infected ships are subject to the following treatment :—

1. The sick are immediately disembarked, and isolated.

2. The remaining persons on board are also to be disembarked, if possible, and to be submitted to an observation, the duration of which shall vary according to the sanitary condition of the ship and the date of the last case, but such observation shall not exceed five days.

3. Dirty linen, clothing ("effets á usage") and goods belonging to the crew and passengers which, in the opinion of the Port Sanitary authority, are held to be contaminated, shall be disinfected, as well as the ship, or only the part of the ship which has been contaminated.

Suspected ships are subject to the following measures :—

1. Medical inspection.

2. Disinfection; dirty linen, clothing "effets á usage" and goods belonging to the crew and passengers, which, in the opinion of the Local Sanitary authority, are held to be contaminated, shall be disinfected.

3. Evacuation of the bilge after disinfection, and substitution of good drinking-water for that which is on board.

It is recommended that the crew and the passengers should, for five days after the arrival of the ship, be subject to supervision as regards their health.

It is also recommended that the crew and passengers should not disembark except on business.

Healthy ships are immediately admitted to free pratique, whatever may be the nature of their bill of health.

The only treatment to which they may be subjected by the authorities of the port of arrival consists in the measures applicable to suspected ships (medical inspection, disinfection, evacuation of the bilge and substitution of good drinking water for that which is on board).

It is recommended that the crew and the passengers should, for five days after the date on which the ship left the contaminated port, be subject to supervision as regards their health.

It is also recommended that the crew and passengers should not disembark except on business.

It is understood that the competent authority of the port of arrival may require a certificate to show that no case of cholera occurred on board at the port of departure.

In applying these measures, the competent authority of the port shall make due allowance for the presence on board ships of the three above-mentioned classes of a doctor and disinfecting apparatus ("étuve").

Special measures may be taken with regard to crowded ships, particularly in the case of any ship in a bad sanitary condition.

So far as regards disinfection, prohibitions of importation, transit and quarantine, merchandize arriving by sea may not be treated otherwise than merchandize arriving by land. (See Chapter 4.)

If a ship is unwilling to submit to the obligations imposed by the authority of the port, she shall be free to put to sea again.

Such a ship may disembark her merchandize after the necessary precautions have been taken, namely:—

1. Isolation of the ship, crew, and passengers.
2. Evacuation of the bilge after disinfection.
3. Substitution of good drinking-water for the water stored on board.

She may also be allowed to disembark such passengers as asked to be disembarked, provided they submit to the measures prescribed by the local authorities.

CANTONMENTS.

REGULATIONS.

No. 162.—In exercise of the powers conferred by section 25 of the Cantonments Act (XIII of 1889), the Governor-General in Council is pleased to extend to all cantonments which are in the territories administered by the Governor of Bombay in Council the provisions of section 434, sub-section (*1*), and section 473 of the City of Bombay Municipal Act (III Bo. C. of 1888) in the modified form set forth below namely—

"(1) In the event of any of the cantonments mentioned above being at any time visited or threatened by an outbreak of any dangerous disease among the inhabitants thereof, the General Officer of the Command, if he thinks that the provisions of the law at the time in force are insufficient

for the purpose, may, with the previous sanction of the Local Government,—

(*a*) take such special measures, and

(*b*) by public notice, prescribe such temporary regulations to be observed by the public or by any person or class of persons,

as he may think necessary to prevent the outbreak of such disease or the spread thereof.

"(2) Whoever commits a breach of any such temporary regulation prescribed as aforesaid shall be deemed to have committed an offence punishable under section 188 of the Indian Penal Code."

2. The Notifications of the Gazette of India in the Military Department Nos. 1160, 87 and 118, dated 23rd October, 1896, 22nd January, 1897, and 29th January, 1897, respectively, are hereby cancelled.

Circular No. 3 Railway.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT—RAILWAY TRAFFIC.

Calcutta, the 3rd February 1897.

General Rules of 1895 for working open lines of railway in British India administered by the Government.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India circular No. 6 Railway, dated the 12th March 1895, and the General Rules, therewith promulgated, for all open lines of railway in British India administered by the Government.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Memorandum from the Director General of Railways, No. 324 T., dated the 29th June 1896, and its enclosures; also the Government of India Nos. 594—595 R. T., dated the 30th July 1896, with reference thereto.

Government of India, Public Works Department, notification No. 301, dated the 9th July 1896, publishing—in the *Gazette of India* of the 11th July 1896—the Government of India resolution No. 515 R. T., dated the 6th July 1896.

Government of India, Public Works Department, notification No 310, dated the 15th July 1896, publishing—in the *Gazette of India* of the 18th July 1896—the Government of India resolution No. 528 R. T., dated the 10th July 1896.

Letter from the Director General of Railways, No. 547 T., dated the 26th October 1896.

Government of India, Public Works Department, notification No. 453, dated the 27th October 1896, publishing—in the *Gazette of India* of the 31st October 1896—the Government of India resolution No. 835 R. T., dated the 23rd October 1896.

Letter from the Consulting Engineer to the Government of India for Railways, Calcutta, No. $\frac{2005 T.}{488}$, dated the 2nd December 1896, forwarding letter from the Agent and Chief Engineer of the Bengal Nagpur railway, No. 9146, dated the 27th November 1896.

Telegram from the Government of Bombay, No. T. 81, dated the 28th December 1896, and the Government of India telegram No. 990 R. T., dated the 31st December 1896, with reference thereto.

Letter from the Consulting Engineer to the Government of India for Railways, Calcutta, No. 5022, dated the 29th December 1896, forwarding letter from the Agent of the East Indian railway, No. 1328 G., dated the 27th November 1896.

Memorandum from the Consulting Engineer to the Government of India for Railways, Lucknow, No. 236, dated the 12th January 1897, forwarding certain correspondence from the Agent of the Bengal and North-Western and of the Rohilkund and Kumaon railway.

OBSERVATIONS.—By the Government of India circular No. 3 Railway dated the 22nd May 1896, read above, certain modifications were introduced in the general rules which were promulgated with Government of India circular No. 6 Railway, dated the 12th March 1895, for working open lines of railway

Since that date it has been brought to notice that certain errors and omissions had occurred in the rules, while certain modifications in the rules for the packing of turpentine and of kerosine oil, and the addition of bubonic fever or plague to the list of infectious diseases, were desirable. It is thought desirable to embody these in the said rules by the publication of corrigenda and addenda, and as the additions and modifications are not of a contentious nature it has been further suggested that, as a matter of convenience, these modifications should be applied to the various railway systems which had adopted the rules, instead of adopting the usual method of requiring each railway administration to apply for leave to adopt them.

RESOLUTION.—In exercise of the powers conferred by section 47(4) of the Indian Railways Act, IX of 1890, the Governor General in Council is pleased to sanction the annexed addenda and corrigenda to the general rules for working open lines of railway referred to above, being adopted on all railways, whether in British India, in foreign territory or in Native States, to which the said rules have been applied.

ORDER.—Ordered that this circular, with the corrigenda and addenda annexed, be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (3) of the Indian Railways Act, 1890, and that a copy thereof be kept open for inspection as directed by sub-section (6) of the same section.

Ordered, also, that a copy of this circular and of its enclosure be communicated to the Local Governments and Administrations, and to the officers noted in the margin, for information and guidance, and to the Governments of the North-Western Provinces and Oudh and the Punjab, the Chief Commissioner of the Central Provinces, the Agents to the Governor General in Central India and Baluchistan, the Resident in Mysore, and to the Accountant General, Public Works Department, for information.

The Governments of Madras, Bombay, and Bengal.
The Chief Commissioners of Burma and Assam.
The Resident at Hyderabad.
The Agent to the Governor General for Rajputana.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow and Assam.

[Enclosure to Government of India circular No. 3 Railway, dated the 3rd February 1897.]

Corrigenda and Addenda to the General Rules promulgated with the Government of India circular No. 6 Railway, dated the 12th March 1895.

CORRIGENDA—

Part I, chapter XIII, rule 141.—For the word "Guards," *read* "Guard."

Part II, chapter I, rule I (5).—*For the words* "authorised officer" means the person who is duly empowered to issue instructions or do any other thing of the nature referred to in each case," *read,* "authorised officer means the person who is duly empowered, by general or special order of the railway administration, either by name or by office, to issue instructions or to do any other thing of the nature referred to in each case," *and add the following* :—

"NOTE.—Such order shall not empower an authorised officer to depute the power conferred upon him thereby to any other person."

Part II, chapter IV, rule 33 (1).—*Against the words* "Fine which may extend to ten rupees," *insert, under the heading* "*Rule*," *the figure* "21."

Appendix A, rule IV (8) (*b*).—*Substitute the following* :—"Turpentine may be carried either in sound iron or steel drums or tins properly soldered, or in corked and capsuled bottles, the bottles or tins being securely packed in wooden cases."

ADDENDA—

Part II, chapter II, rule 7.—Before the word "Cholera," *add* "Bubonic fever."

Appendix A, rule I (1).—*After the word* "drums" in the last line *add the words* "or in tins without wooden cases, provided that in the latter case a layer of durma-matting or other suitable dunnage is placed on the floor of the wagon and between each tier of tins."

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 4th February 1897.

NOTIFICATIONS.

No. 389 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 30th January 1897:—

No. 25 of 1897.—G. Henke and Company, Henke's tile works, Feroke, India, for asphalte compressed tiles.

No. 26 of 1897.—John Stewart Brown, engineer, Bally, in the district of Howrah, for an improved process and apparatus for preparing vegetable fibres for textile and other purposes.

No. 27 of 1897.—Thomas Rowley, consulting india rubber expert, of Corporation street Manchester, for improvements relating to pneumatic tyres.

No. 28 of 1897.—Donald Barns Morison, engineer, of Hartlepool, in the county of Durham, for improvements in stamp mills or apparatus for crushing ores and other substances.

No. 29 of 1897.—The Anglo-French Motor Carriage Company, Limited, of Digbeth, Birmingham, for improvements in rotary motors and the like.

No. 30 of 1897.—Richard Longden Hattersley, machine maker, and Simeon Jackson, manager, both of North Brook Works, Keighley in the county of York, for improvements relating to looms for domestic purposes.

No. 31 of 1897.—Alexander Von Wagner, merchant, of No. 5, Henriettenstrasse, Chemnitz, Saxony, for a remedy for stomachic and other like disorders.

No. 32 of 1897.—Henry Allan Moss, executive engineer, Public works department, and general superintendent, Government workshops, Madras, of Parkside, Peters road, Royapetta, Madras, for a simple and strong lock, to be called "a friction lock and key."

No. 33 of 1897.—William John McArthur, tea planter, of Gyree Gong Tea Estate, Tung, Darjeeling-Himalayan Railway, Darjeeling, for an invention entitled "McArthur's patent composition or rubber washers."

No. 34 of 1897.—George Alexander Davis officiating superintendent, jail manufactures, Bengal, for a heat disseminator for preventing the breakage of lamp chimneys from excessive heat.

No. 390 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the

Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the Department of Land Records and Agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 88 of 1896.—Bulaki Rama Shastri, barrister-at-law, Dera Ismail Khan, Punjab, for automatic punkahs. (Specification filed 18th January 1897.)

No. 181 of 1896.—The Alternate Current Electro Motor Syndicate, Limited, of 2 and 4, Penywern road, Earls Court, in the county of Middlesex, for improvements relating to electro motors and transformers. (Specification filed 22nd January 1897.)

No. 192 of 1896.—Carl Bergmann, engineer, of 55, Thalstrasse, Meissen i/s, in the German Empire, for improvements in and relating to the spindles of spinning and like machines. (Specification filed 22nd January 1897.)

No. 206 of 1896.—William Herbert Hyatt, chemical engineer and metallurgist, Fellow of the Chemical Society of Great Britain, of No. 1, Milton road, Herne hill, in the county of Surrey, for a method for extracting gold without the use of water by means of a combined air blast and mercury, and apparatus for effecting the same. (Specification filed 8th January 1897.)

No. 209 of 1896.—Edward Thunderbolt, engineer, of Drummond street, Carlton, in the colony of Victoria, for improvements in governors for regulating the speed of machinery. (Specification filed 22nd January 1897.)

No. 210 of 1896.—George Jones Atkins, metallurgist, of 35, East bank, Stamford hill, in the county of Middlesex, for improved compounds or products applicable to the separation of metals from their ores and other material with which they may be combined. (Specification filed 22nd January 1897.)

No. 214 of 1896.—Reuben Thomas Preston, of the firm of J. Stone & Co., engineers, of Deptford, in the county of Kent, and James Holden, engineer, of Hermon house, Wanstead, in the county of Essex, for improved stays for steam and other boilers. (Specification filed 22nd January 1897.)

No. 391 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 168 of 1891.—Max Van Gülpen, cigar manufacturer, of Mülheim on the Rhine, Prussia, for improvements in the method of and apparatus for making fillers for cigars. (From 9th February 1897 to 9th February 1898.)

No. 196 of 1891.—Arthur Thomas Collier gentleman, of Caterham valley, Surrey, for improvements in telephone

receivers, usable also as transmitters. (From 5th February 1897 to 5th February 1898.)

No. 135 of 1892.—Lieutenant-Colonel R. H. F. Rennick, commanding the 18th Bengal Infantry, and Surgeon-Captain Fenton Evans, of the same regiment, stationed at Fort Aijal, Lushai, for improvements in cinerators for burning filth or human excrement. (From 28th January 1897 to 28th January 1898.)

No. 280 of 1892.—Heinrich, Count von Pückler, of Oberweistritz, Silesia, in the Empire of Germany, for an improved electric apparatus for alluring and destroying insects. (From 7th January 1897 to 7th January 1898.)

No. 392 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said inventions in British India and of authorising others so to do has ceased :—

No. 180 of 1891.—Richard Cunliffe and Edward Barlow's invention for improvements in the method of and apparatus for drying, calcining and evaporating town slaughter-house and other refuse, or substances, or materials. (Specification filed 27th October 1892.)

No. 214 of 1891.—Dr. Hermann, Mehner's invention for process and apparatus for the utilisation of the unchanged exhaust heat of thermo-dynamical processes for motive power, heating or cooling purposes. (Specification filed 26th October 1892.)

No. 169 of 1892.—John Arthur Dayrell Lloyd's invention for automatic signals for railway level crossing gates. (Specification filed 26th October 1896.)

No. 231 of 1892.—Henry Sheehy Keating's invention for an electrical safety cut out. (Specification filed 24th October 1892.)

No. 236 of 1892.—Robert Gordon Orr and Frederick William Emery's invention for jointless bar links. (Specification filed 27th October 1892.)

Fee in respect of the continuance of an exclusive privilege—

(*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The fee of ₹50 for each of the said inventions.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

Rangoon, Moulmein, Tavoy, and Mergui.	8th ,,	Ditto.
Rangoon, Moulmein, Penang, and Singapore.	6th ,,	Ditto.
Akyab, Kyaukpyu, Sandoway, and Rangoon	10th ,,	Ditto.
Port Blair	8th ,,	*Vid* Rangoon.

*Although the date entered in column 2 is, as far as can be calculated, the latest safe date of posting for the next Mail Steamer, full allowance being made for the steamer being in advance of her published timing, Mails for the places mentioned in column 1 are despatched daily to Colombo, so that they may proceed by any steamer that has been unusually accelerated or retarded, or by any special opportunity that may be afforded by a steamer not belonging to one of the regular lines.

The letter-box for Inland articles (including articles for Burma and Port Blair and for Ceylon by land route) will be cleared for the last time for articles without the late fee at 7-30 P.M. precisely, after which hour Inland letters and papers fully prepaid and bearing an extra postage stamp of half anna will be received up to 8-30 P.M. and up to 8-45 P.M. with a late letter fee of 1 anna for the Chord Mail only.

On the day of despatch of the Mail for the Australasian Colonie *via* Tuticorin, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 8-30 P.M., and late letters and papers fully prepaid will be received up to 9 P.M.

On the day of despatch of the Mail for Europe, the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 9 P.M., and late letters and papers fully prepaid will be received up to 9-30 P.M. On other days the letter-box for Foreign articles will be cleared for the last time for articles without the late fee at 7-30 P.M., and late letters and papers will be received up to 9 P.M. for despatch by any Foreign Mails despatched the same night. The late fee for Foreign articles is 4 annas, which must be prepaid in stamps affixed to the articles.

JOHN OWENS,
Presidency Postmaster, Calcutta.

THOMASON COLLEGE, ROORKEE.

NOTIFICATION.

Roorkee, 20th January, 1897.

The next Examination for Entrance to the Engineer and Telegraph classes will be held in June 1897. Passed candidates will join the College on the 1st November 1897. The course will extend over three years.

J. CLIBBORN, *Lieut.-Colonel, I.S.C.,*
Principal, Thomason College.

NOTICE.

All persons having claims against *ex*-King Thibaw, or his property, are hereby informed that they may notify such claims in writing to the Committee appointed under section 3 of Act XX of 1895, at the Collector's Office, Ratnagiri, within six months of the first publication of this notice, *viz.*, 9th January, 1897. Attention is called to section 5, paragraphs (1). (2), (3) and 4 of the Act, *viz.* :—

"5 (1) Every person notifying any claim in accordance with the said notice shall along with his claim present full particulars thereof;

(2) Every document relied upon as the foundation of, or as evidence in support of, any such claim shall be delivered to the Committee along with such claim;

(3) If any such document be an entry in any book, the claimant shall produce the book before the Committee, together with a copy of the entry on which he relies. The Committee shall mark the book for the purpose of identification, and, after examining and comparing the copy with the original, shall return the book to the claimant;

(4) If any document in the possession, or under the control of any claimant is not delivered or produced by him to the Committee along with the claim, the Committee may refuse to receive such document in evidence on the claimant's behalf at the inquiry into the claim."

W. W. DREW,
Collector.

V. V. WAGLE,
First Class Sub-Judge.

H. DEIGHTON,
Dist. Supdt. of Police, Officer in charge

Commissioners under the Act.

RATNAGIRI;
The 9th January, 1897.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post free, R18-12.
½ „ R 9, „ R9-8.
¼ „ R4-8, „ R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন . ১৮৲ বা ডাকমাশুল বিনা ১৮৲০
½ আধ „ „ ৯৲ „ ৯৲০
¼ সিকি „ „ ৪৲৮৲ „ ৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিনকোনাইন ও সিন্‌কোনীডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্টের কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের বোটানিক বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I.*

Section	I.	Building Materials	(1895),	R2-0.
,,	II.	Masonry	(1891),	R1-4.
,,	III.	Carpentry	(1889),	R1-4.
,,	IV.	Earthwork	(1892),	R1-4.
,,	V.	Tools and Plant (never published).		

VOLUME II.*

Section	VI.	Buildings	(1891),	R1-4.
,,	VII.	Bridges	(in the Press).	
,,	VIII.	Roads	(in the Press).	
,,	IX.	Railways	(1891),	R1-4.
,,	X.	Irrigation Works	(1873),	R1-8.

Roorkee Treatise on Civil Engineering, Vol. II (1897 edition). R3.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R8.

,, II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table (in the Press).

XIII Drawing (by Lieut. R. Pulford, R.E.).† R8.

XIIIa. Drawing, First Principles of Geometrical (by do.) (4th edition). R1-4

XIV. Simple Applied Mechanics (2nd edition), Parts I and II in one. R3.

Simple Applied Mechanics, Part II (1st edition). 8*a*.

XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition) (in the Press).

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 4*a*.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 0*a*

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4*a*.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 16 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1.

* Date of Edition on sale.
† Originally published at R15, reduced to R8.

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8.

O'Callaghan's Earthwork Tables for India, in one large sheet. 8*a*.; mounted on cloth and bound (in the Press). R1-12.

GEORGE WATT,
Reporter on Economic Products to the Govt. of India.

CALCUTTA,
The 28th November, 1894.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage*. . . . ₹32-8

	Without postage. ₹	a.	p.	With postage ₹	a.	p.
For the Calcutta Series	10	0	0	12	5	0
„ each of the Madras, Bombay, and Allahabad Series	6	0	0	7	0	0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...			2	0	0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...			1	0	0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.			For mofussil.		
	₹	a.	p.	₹	a.	p.
For the Calcutta Series; per copy . .	0	8	9	0	10	3
,, each of the Madras, Bombay, and Allahabad Series; per copy . . .	0	5	3	0	5	9
,, the Calcutta Series. For the year .	7	2	6	8	0	3
,, each of the Madras, Bombay, and Allahabad Series. For the year . .	4	4	6	4	11	3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	₹ 20	₹ 14	₹ 9
,, three issues . . .	,, 55	,, 36	,, 24
,, six ,, . . .	,, 100	,, 68	,, 45
,, nine ,, . . .	,, 145	,, 96	,, 64
,, twelve ,, . . .	,, 180	,, 120	,, 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.			With postage.		
	₹	a.	p.	₹	a.	p.
Bengal Law Reports, for one year . .	20	0	0	22	8	0
Single copies, ₹1 per copy.						
Full Bench Rulings, Parts I and II . .	20	0	0	22	8	0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, ₹22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

Cattle Disease in India. Manual of the more deadly forms of. Hindi version. Royal 8vo., stiff boards. 6a.

Ditto. Urdu version. Royal 8vo., stiff boards. 6a.

A Dictionary of the Economic Products of India.

BY DR. GEO. WATT, C.I.E.,

Reporter on Economic Products.

The first five volumes and Volume VI, Parts I, II, III & IV of the Dictionary are ready at the Office of the Superintendent of Government Printing, No. 8, Hastings Street, Calcutta, and will be supplied to non-subscribers on receipt of the price for the complete set, which is R45 in India, and 3 guineas in England (exclusive of the Index, for which a separate charge will be made): packing and postage, in India, 8 annas per volume; for England, 2 rupees 6 annas per volume. For copies bound in half calf or half morocco, R6 and 8 shillings, respectively, will be charged extra for the whole set.

The Dictionary is intended to deal with the products of India—animal, vegetable, and mineral; each product being treated after a uniform plan, the paragraphs of which give the scientific, vernacular, and European names, habitat or source; history, properties and uses (both chemical and industrial); trade statistics; markets, etc. The work is arranged alphabetically according to scientific nomenclature, but commercial and important vernacular names are also given as cross-references, so that little difficulty need be experienced in finding the account of a product even when its scientific name is unknown to the reader.

An important feature of the Dictionary consists in the fact that derived information is in every instance given under quotation marks, and with a reference to the original publication. Numerous contributors have, however, furnished the results of new discoveries, and confirmed the vernacular names, so that the Dictionary is not only a complete compilation of published information, but has been brought abreast of the most recent inventions and discoveries.

Volume I contains the letters A and B, and consists of 559 royal 8vo pages. Volume II embraces the letter C in 689 pages, Volume III contains the letters D, E, F, and half of G; Volume IV, latter half of G to middle of L, and Volume V contains the latter half of L to end of O; Vol. VI (which consists of four parts), Part I, contains letters P to R. The whole work completed in nine volumes (including Parts II to IV of Vol. VI), but a tenth volume may also be issued, consisting of an Index to all the vernacular and other names contained in the Dictionary. The Index will practically be a glossary of the vernacular and European names of the plants, animals, and minerals of India, and, as such, will be a work of reference, which, it is hoped, may prove of considerable value.

Technical Art Series published up to 1894, together with their explanatory Text—

1886-87, 6 Plates with Text. R1-8 a set (4a.)
1888-89, 18 Plates with Text. R4-8 a set (8a.)

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 4th February, 1897, and is hereby promulgated for general information :—

ACT NO. III OF 1897.

An Act to provide for the better prevention of the spread of Dangerous Epidemic Disease.

WHEREAS it is expedient to provide for the better prevention of the spread of dangerous epidemic disease; It is hereby enacted as follows :—

Short title, extent and commencement.

1. (*1*) This Act may be called the Epidemic Diseases Act, 1897.

(*2*) It extends to the whole of British India (inclusive of Upper Burma, British Baluchistan, the Santal Parganas and the Pargana of Spiti); and

(*3*) It shall come into force at once.

Power to take special measures and prescribe regulations as to dangerous epidemic disease.

2. (*1*) When at any time the Governor General in Council is satisfied that India or any part thereof is visited by, or threatened with, an outbreak of any dangerous epidemic disease, the Governor General in Council, if he thinks that the ordinary provisions of the law for the time being in force are insufficient for the purpose, may take or require or empower any person to take such measures and, by notification in the Gazette of India, or by notice given to any person or published in such manner as he may think sufficient, may prescribe such temporary regulations to be observed by the public or by any person or class of persons as he shall deem necessary to prevent the outbreak of such disease or the spread thereof, and may determine in what manner and by whom any expenses incurred (including compensation if any) shall be defrayed.

(*2*) In particular and without prejudice to the generality of the foregoing provisions, the Governor General in Council may take measures and prescribe regulations for—

(*a*) the inspection of any ship or vessel leaving, or arriving at, any port in British India and such detention thereof, or of any person intending to sail therein, or arriving thereby, as may be necessary; and

(*b*) the inspection of persons travelling by railway or otherwise and the segregation, in hospital, temporary accommodation or otherwise, of persons suspected by the inspecting officer of being infected with any such disease.

(*3*) The Governor General in Council may, by general or special order, direct that all or any of the powers conferred by this Act may also be exercised by any Local Government with respect to the territories administered by it.

Penalty.

3. Any person disobeying any regulation or order made under this Act shall be deemed to have committed an offence punishable under section 188 of the Indian Penal Code. XLV of 1860.

Protection to persons acting under Act.

4. No suit or other legal proceeding shall lie against any person for anything done or in good faith intended to be done under this Act.

J. M. MACPHERSON,

Secy.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 4th February, 1897, and is hereby promulgated for general information :—

ACT NO. IV OF 1897.

An Act to provide for certain matters relating to Fisheries in British India.

WHEREAS it is expedient to provide for certain matters relating to fisheries in British India; It is hereby enacted as follows :—

Title, extent and commencement.

1. (*1*) This Act may be called the Indian Fisheries Act, 1897.

(*2*) It extends to the whole of British India, except Burma; and

(*3*) It shall come into force at once.

Act to be read as supplemental to other Fisheries Laws.

2. Subject to the provisions of sections 8 and 10 of the General Clauses Act, 1887, this Act shall be read as supplemental to any other enactment for the time being in force relating to fisheries in any part of British India except Burma.

Definitions.

3. In this Act, unless there is anything repugnant in the subject or context,—

(*1*) "fish" includes shell-fish :

(*2*) "fixed engine" means any net, cage, trap or other contrivance for taking fish, fixed in the soil or made stationary in any other way : and

(*3*) "private water" means water which is the exclusive property of any person, or in which any person has for the time being an exclusive right of fishery whether as owner, lessee or in any other capacity.

EXPLANATION.—Water shall not cease to be "private water" within the meaning of this definition by reason only that other persons may have by custom a right of fishery therein.

Destruction of fish by explosives in inland waters.

4. (*1*) If any person uses any dynamite or other explosive substance in any water with intent thereby to catch or destroy therein, he shall be punishable with imprisonment for a term which may extend to two months, or with fine which may extend to two hundred rupees.

(*2*) In sub-section (*1*) the word "water" includes the sea within a distance of one marine league of the sea-coast : and an offence committed under that sub-section in such sea may be tried, punished and in all respects dealt with as if it had been committed on the land abutting on such coast.

Destruction of fish by poisoning of waters.

5. (*1*) If any person puts any poison, lime or noxious material into any water with intent thereby to catch or destroy any fish, he shall be punishable with imprisonment for a term which may extend to two months, or with fine which may extend to two hundred rupees.

(*2*) The Local Government may, by notification in the official Gazette, suspend the operation of this section in any specified area, and may in like manner modify or cancel any such notification.

Protection of fish in selected waters by rules of Local Government.

6. (*1*) The Local Government may make rules for the purposes hereinafter in this section mentioned, and may by a notification in the official Gazette apply all or any of such rules to such waters, not being private waters, as the Local Government may specify in the said notification.

(*2*) The Local Government may also, by a like notification, apply such rules or any of them to any private water with the consent in writing of the owner thereof and of all persons having for the time being any exclusive right of fishery therein.

(*3*) Such rules may prohibit or regulate all or any of the following matters, that is to say :—

(*a*) the erection and use of fixed engines;

(*b*) the construction of weirs; and

(*c*) the dimension and kind of the nets to be used and the modes of using them.

(*4*) Such rules may also prohibit all fishing in any specified water for a period not exceeding two years.

(*5*) In making any rule under this section the Local Government may—

(*a*) direct that a breach of it shall be punishable with fine which may extend to one hundred rupees, and, when the breach is a continuing breach, with a further fine which may extend to ten

of the first conviction during which the breach is proved to have been persisted in ; and

(*b*) provide for—

(i) the seizure, forfeiture and removal of fixed engines erected, or used, or nets used, in contravention of the rule, and

(ii) the forfeiture of any fish taken by means of any such fixed engine or net.

(*6*) The power to make rules under this section is subject to the condition that they shall be made after previous publication.

Arrest without warrant for offences under this Act.

7. (*1*) Any police-officer, or other person specially empowered by the Local Government in this behalf, either by name or as holding any office, for the time being, may, without an order from a Magistrate and without warrant, arrest any person committing in his view any offence punishable under section 4 or 5 or under any rule under section 6—

(*a*) if the name and address of the person are unknown to him, and

(*b*) if the person declines to give his name and address, or if there is reason to doubt the accuracy of the name and address if given.

(*2*) A person arrested under this section may be detained until his name and address have been correctly ascertained :

Provided that no person so arrested shall be detained longer than may be necessary for bringing him before a Magistrate, except under the order of a Magistrate for his detention.

PART V.

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to provide for the better prevention of the spread of Dangerous Epidemic Disease was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 4th February, 1897:—

From Secretary, Medical Board, Calcutta, No 225, dated 30th January, 1897; Paper No. 1.

WE, the undersigned, Members of the Select Committee to which the Bill to provide for the better prevention of the spread of Dangerous Epidemic Disease was referred, have considered the Bill and the paper noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

2. We have amended clause 2 by providing that the Governor General in Council must be satisfied that India is visited or threatened with epidemic disease before taking action under the Act.

We have also made it clear that the power to take measures conferred by the clause includes the power of compelling or authorising other persons to take measures. As regards the use of the term "person" in the Bill it must be read by the light of section 2 (3) of the General Clauses Act, 1868, which provides that "person" shall include any company or association or body of individuals whether incorporated or not. It is therefore clear that the term covers a local authority, whether incorporated or not.

In some cases measures might be required which would cause injury to private property and where it might be right that compensation should be given. We have therefore inserted words in the same clause to provide that the Government may determine in what cases and by whom compensation shall be given.

The amendments to sub-clause (2) are verbal and explain themselves.

3. We have added a new clause 4, giving express protection to officers and other persons who may be employed to carry out the provisions of the Act.

4. The Bill was published in the Gazette of India of the 30th January, 1897.

5. We do not think that the measure has been so altered as to require re-publication, and we recommend that it be passed as now amended.

No. II.

A Bill to provide for the better prevention of the spread of Dangerous Epidemic Disease.

WHEREAS it is expedient to provide for the better prevention of the spread of dangerous epidemic disease; It is hereby enacted as follows:—

Short title, extent and commencement.

1. (*1*) This Act may be called the Epidemic Diseases Act, 1897.

(*2*) It extends to the whole of British India (inclusive of Upper Burma, British Baluchistan, the Santal Parganas and the Pargana of Spiti); and

(*3*) It shall come into force at once.

Power to take special measures and prescribe regulations as to dangerous epidemic disease

2. (*1*) *When at any time the Governor General in Council is satisfied that* India or any part thereof *is* visited by, or threatened with, an outbreak of any dangerous epidemic disease, the Governor General in Council, if he thinks that the ordinary provisions of the law for the time being in force are insufficient for the purpose, may take *or require or empower any person to take* such measures and, by public notice, prescribe such temporary regulations to be observed by the public or by any person or class of persons as he shall deem necessary to prevent the outbreak of such disease or the spread thereof, and may determine in what manner *and by whom* any expenses incurred (*including compensation if any*) shall be defrayed.

(*2*) In particular and without prejudice to the generality of the foregoing provisions, the Governor General in Council may take measures and prescribe regulations for—

(*a*) the inspection of any ship or vessel leaving, or arriving at, any port in British India and such detention thereof, or of any person intending to sail therein, *or arriving thereby*, as may be necessary; and

(*b*) the inspection of persons travelling by railway or otherwise and the segregation, in hospital or otherwise, of persons suspected *by the inspecting officer* of being infected with any such disease.

(*3*) The Governor General in Council may, by general or special order, direct that all or any of the powers conferred by this Act may also be exercised by any Local Government with respect to the territories administered by it.

Penalty.

3. Any person disobeying any regulation, or order made under this Act shall be deemed to have committed an offence punishable under section 188 of the Indian Penal Code. XLV of 18

Protection to persons acting under Act.

4. *No suit or other legal proceeding shall lie against any person for anything done or in good faith intended to be done under this Act.*

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 4th February, 1897 :—

NO. 2 OF 1897.

THE GENERAL CLAUSES BILL, 1897.

CONTENTS.

Preliminary.

SECTIONS.

1. Short title and commencement.
2. Repeal.

General Definitions.

3. Definitions.
4. Application of foregoing definitions to previous enactments.

General Rules of Construction.

5. Coming into operation of enactments.
6. Effect of repeal and expiry.
7. Revival of repealed enactments.

27. Meaning of service by post.
28. Citation of enactments.
29. Saving for previous enactments, rules and bye-laws.

THE SCHEDULE.

ENACTMENTS REPEALED.

A Bill to consolidate and extend the General Clauses Acts, 1868 and 1887.

WHEREAS it is expedient to consolidate and extend the General Clauses Acts, 1868 and 1887; It is hereby enacted as follows:— [1 of 1868. 1 of 1887.

Preliminary.

Short title and commencement.

1. (*1*) This Act may be called the General Clauses Act, 1897; and

(*2*) It shall come into force at once.

Repeal.

2. The Acts mentioned in the schedule are repealed to the extent specified in the fourth column thereof.

General Definitions.

Definitions.

3. In this Act, and in all Acts of the Governor General in Council and Regulations made after the commencement of this Act, unless there is anything repugnant in the subject or context,—

"Abet."

(*1*) "abet," with its grammatical variations and cognate expressions, shall have the same meaning as in the Indian Penal Code; [1 of 1887, s. 3 (*1*). XLV of 1860.

"Act."

(*2*) "act," used with reference to an offence or a civil wrong, shall include a series of acts, and words which refer to acts done, extend also to illegal omissions; [*Cf.* XLV of 1860, ss. 32 and 33, and Mad. Act 1 of 1891, s. 3 (*3*).]

"Affidavit."

(*3*) "affidavit" shall include affirmation and declaration in the case of persons by law allowed to affirm or declare instead of swearing; [1 of 1868, s. 2 (*17*).]

"Barrister."

(*4*) "barrister" shall mean a barrister of England or Ireland, or a member of the Faculty of Advocates in Scotland; [1 of 1868, s. 2 (*14*).]

"Bengal Act."

(*5*) "Bengal Act" shall mean an Act made by the Lieutenant-Governor of Bengal in Council under the Indian Councils Acts, 1861 and 1892; 24 & 25 Vict., c. 67; 55 & 56 Vict., c. 14.

"Bombay Act."

(*6*) "Bombay Act" shall mean an Act made by the Governor of Bombay in Council under the Indian Councils Acts, 1861 and 1892; 24 & 25 Vict., c. 67; 55 & 56 Vict., c. 14.

"British India."

(*7*) "British India" shall mean all territories and places within Her Majesty's dominions which are for the time being governed by Her Majesty through the Governor General of India or through any Governor or other officer subordinate to the Governor General of India; [52 & 53 Vict., c. 63, s. 18(*4*). *cf.* 1 of 1868, s. 2 (*8*).]

"British possession." (8) "British possession" shall mean any part of Her Majesty's dominions, exclusive of the United Kingdom, and, where parts of those dominions are under both a central and a local legislature, all parts under the central legislature shall, for the purposes of this definition, be deemed to be one British possession: [52 & 53 Vict., c. 63, s. 18(2).]

"Chapter." (9) "Chapter" shall mean a Chapter of the Act or Regulation in which the word occurs: [I of 1887, s. 3 (2).]

"Collector." (10) "Collector" shall mean, in a Presidency-town, the Collector of Calcutta, Madras or Bombay, as the case may be, and, elsewhere, the chief officer in charge of the revenue administration of a district: [*Cf.* Bo. Act III of 1886, s. 3 (12), and N.-W. P. & O. Act I of 1887, s. 2 (12).]

"Colony." (11) "Colony" shall mean any part of Her Majesty's dominions, exclusive of the British Islands and of British India, and, where parts of those dominions are under both a central and a local legislature, all parts under the central legislature shall, for the purposes of this definition, be deemed to be one colony: [52 & 53 Vict., c. 63, s. 18 (3).]

"Commencement." (12) "commencement," used with reference to an Act or Regulation, shall mean the day on which the Act or Regulation comes into force; [I of 1887, s. 3 (4).]

"Commissioner." (13) "Commissioner" shall mean the chief officer in charge of the revenue administration of a division: [N.-W. P. & O. Act I of 1887, s. 2 (11).]

"Consular officer." (14) "consular officer" shall include consul-general, consul, vice-consul, consular agent, pro-consul and any person for the time being authorized to perform the duties of consul-general, consul, vice-consul or consular agent: [54 & 55 Vict., c. 36, s. 3.]

"District Judge." (15) "District Judge" shall mean the Judge of a principal Civil Court of original jurisdiction, but shall not include a High Court in the exercise of its ordinary or extraordinary original civil jurisdiction: [I of 1868, s. 2 (12).]

"Document" (16) "document" shall include any matter expressed or described upon any substance by means of letters, figures or marks, or by more than one of those means, which is intended to be used, or which may be used, for the purpose of recording that matter: [I of 1872, s. 3.]

"Enactment." (17) "enactment" shall include a Regulation (as hereinafter defined) and any Regulation of the Bengal, Madras or Bombay Code, and shall also include any provision contained in any Act or in any such Regulation as aforesaid:

"Father." (18) "father", in the case of any one whose personal law permits adoption, shall include an adoptive father: [Cf. I of 1868, s. 2 (19).]

"Financial year." (19) "financial year" shall mean the year commencing on the first day of April: [I of 1887, s. 3 (5).]

"Gazette." (20) "Gazette" used with reference to any notification by the Government of India, shall mean the Gazette of India; and, used with reference to any notification by a Local Government, a High Court, a local authority or an officer subordinate to a Local Government, it shall mean the local official Gazette (if any) published for the province by, or under the authority of, the Local Government, or, if there is no local official Gazette so published, the Gazette of India:

"Good faith." (21) a thing shall be deemed to be done in "good faith" where it is in fact done honestly, whether it is done negligently or not: [45 & 46 Vict., c. 61, s. 90; 56 & 57 Vict., c. 71, s. 62.]

"Government" (22) "Government" or "the Government" shall include the Local Government as well as the Government of India: [Cf. XIV of 1882, s. 2.]

"Government of India." (23) "Government of India" shall mean the Governor General in Council or, during the absence of the Governor General from his Council, the President in Council, or the Governor General alone, as regards the powers which may be lawfully exercised by them or him respectively: [I of 1868, s. 2 (9).]

"Her Majesty" or "the Queen." (24) "Her Majesty" or "the Queen" shall include Her successors: [Cf. I of 1868, s. 2 (7).]

"High Court." (25) "High Court,"—

(i) used with reference to civil proceedings, shall mean the highest Civil Court of appeal in the part of British India in which the Act or Regulation containing the expression operates; [I of 1868, s. 2 (11), and X of 1882, s. 4 (i).]

(ii) used with reference to criminal proceedings against European British subjects or persons jointly charged with European British subjects, shall mean the High Court of Judicature at Fort William, Madras or Bombay, the High Court of Judicature for the North-Western Provinces, the Chief Court of the Punjab or the Recorder of Rangoon, as the case may be; and,

(iii) used with reference to criminal proceedings against persons not being European British subjects or jointly charged with European British subjects, shall mean the highest Court of criminal appeal or revision in the part of British India in which the Act or Regulation containing the

expression operates, or, where no such Court as aforesaid is established under any law for the time being in force, such officer as the Governor General in Council may appoint in that behalf:

"Immoveable property." (26) "immoveable property" shall include land, benefits to arise out of land, and things attached to the earth, or permanently fastened to anything attached to the earth: [I of 1868, s. 2 (5).]

"Imprisonment." (27) "imprisonment" shall mean imprisonment of either description as defined in the Indian Penal Code: [I of 1868, s. 2 (18).] XLV of 1860.

"India." (28) "India" shall mean British India, together with any territories of any Native Prince or Chief under the suzerainty of Her Majesty exercised through the Governor General of India or through any Governor or other officer subordinate to the Governor General of India: [Cf. 52 & 53 Vict., c. 63, s. 18 (5).]

"Local authority." (29) "local-authority" shall mean a municipal committee, district board, body of port commissioners or other authority legally entitled to, or entrusted by the Government with, the control or management of a municipal or local fund: [I of 1887, s. 3 (5).]

"Local Government." (30) "Local Government" shall mean the person authorized by law to administer executive government in the part of British India in which the Act or Regulation containing the expression operates, and shall include a Chief Commissioner: [I of 1868, s. 2 (10).]

"Madras Act." (31) "Madras Act" shall mean an Act made by the Governor of Fort St. George in Council under the Indian Councils Acts, 1861 and 1892: 24 & 25 Vict., c. 67; 55 & 56 Vict., c. 14.

"Magistrate." (32) "Magistrate" shall include every person exercising all or any of the powers of a Magistrate under the Code of Criminal Procedure for the time being in force: [I of 1868, s. 2 (13).] X of 1882.

"Master" (of a ship). (33) "master," used with reference to a ship, shall mean any person (except a pilot or harbour-master) having for the time being control or charge of the ship: [I of 1887, s. 3 (8).]

"Month." (34) "month" shall mean a month reckoned according to the British Calendar. [I of 1868, s. 2 (4).]

"Moveable property." (35) "moveable property" shall mean property of every description, except immoveable property: [I of 1868, s. 2 (6).]

"North-Western Provinces and Oudh Act." (36) "North-Western Provinces and Oudh Act" shall mean an Act made by the Lieutenant-Governor of the North-Western Provinces and Oudh in Council under the Indian Councils Acts, 1861 and 1892: 24 & 25 Vict., c. 67; 55 & 56 Vict., c. 14.

"Notice." (37) "notice," used with reference to legal proceedings, shall mean notice in writing :

"Oath." (38) "oath" shall include affirmation and declaration in the case of persons by law allowed to affirm or declare instead of swearing : [I of 1868, s. 2 (17).]

"Offence." (39) "offence" shall mean any act or omission made punishable by any law for the time being in force : [I of 1887, s. 3 (9).]

"Part." (40) "Part" shall mean a Part of the Act or Regulation in which the word occurs : [I of 1887, s. 3 (2).]

"Person." (41) "person" shall include any company or association or body of individuals, whether incorporated or not : [I of 1858, s. 2 (3).]

"Political Agent." (42) "Political Agent" shall mean the principal officer representing the Government in any territory or place beyond the limits of British India, and shall include any officer of the Government of India or of any Local Government appointed by the Government of India or the Local Government to exercise all or any of the powers of a Political Agent for any place not forming part of British India under the law for the time being in force relating to foreign jurisdiction and extradition : [*Cf.* XXI of 1879, s. 3 and X of 1882, s. 190.]

"Presidency-town." (43) "Presidency-town" shall mean the local limits for the time being of the ordinary original civil judicature of the High Court of Judicature at Fort William, Madras or Bombay, as the case may be : [X of 1882, s. 4 (*h*); *cf.* Mad. Act I of 1891, s. 3 (25).]

"Privy Council." (44) "Privy Council" shall mean the Lords and others for the time being of Her Majesty's Most Honourable Privy Council : [52 & 53 Vict., c. 63, s. 12 (5).]

"Province." (45) "province" shall mean the territories for the time being administered by any Local Government : [X of 1882, s. 4 (*g*).]

"Public nuisance." (46) "public nuisance" shall mean a public nuisance as defined in the Indian Penal Code : [I of 1887, s. 3 (10)] XLV of 1860.

"Registered." (47) "registered," used with reference to a document, shall mean registered in British India under the law for the time being in force for the registration of documents : [I of 1887, s. 3 (11); *cf.* Mad. Act I of 1891, s. 3 (28).]

"Regulation." (48) "Regulation" shall mean a Regulation made under the Government of India Act, 1870 : 33 Vict., c. 3

"Rule." (49) "rule" shall mean a rule made in exercise of a power conferred by any enactment, and shall include a regulation made as a rule under any enactment :

"Schedule." (50) "schedule" shall mean a schedule to the Act or Regulation in which the word occurs : [I of 1887, s. 3 (2).]

"Scheduled District." (51) "Scheduled District" shall mean a "Scheduled District" as defined in the Scheduled Districts Act, 1874 : [*Vide* XIV of 1874, s. 1, para. 3.] XIV of 1874.

"Section." (52) "section" shall mean a section of the Act or Regulation in which the word occurs : [I of 1868, s. 2 (15).]

"Ship." (53) "ship" shall include every description of vessel used in navigation not exclusively propelled by oars : [I of 1887, s. 3 (7).]

"Sign." (54) "sign," with its grammatical variations and cognate expressions, shall, with reference to a person who is unable to write his name, include "mark", with its grammatical variations and cognate expressions : [I of 1887, s. 3 (12).]

"Son." (55) "son" shall include an adopted son in the case of any one whose personal law permits adoption : [*Cf.* I of 1868, s. 2 (19).]

"Sub-section." (56) "sub-section" shall mean a sub-section of the section in which the word occurs : [I of 1887, s. 3 (3).]

"Swear." (57) "swear", with its grammatical variations and cognate expressions, shall include affirming and declaring in the case of persons by law allowed to affirm or declare instead of swearing : [*Cf.* I of 1868, s. 2 (17).]

"Value." (58) "value," used with reference to a suit, shall mean the amount or value of the subject-matter of the suit as computed under the law for the time being in force in relation to the valuation of suits : [*Cf.* I of 1887, s. 3 (13).]

"Vessel." (59) "vessel" shall include any ship or boat or any other description of vessel used in navigation : [57 & 58 Vict., c. 60, s. 742; *cf.* XLV of 1860, s. 48.]

"Will" (60) "will" shall include a codicil and every writing making a voluntary posthumous disposition of property : [*Cf.* I of 1868, s. 2 (15).]

"Writing." (61) expressions referring to "writing" shall be construed as including references to printing, lithography, photography and other modes of representing or reproducing words in a visible form : and [52 & 53 Vict., c. 63, s. 20 ; *cf.* I of 1887, s. 3 (14).]

"Year." (62) "year" shall mean a year reckoned according to the British calendar. [I of 1868, s. 2 (4).]

Application of foregoing definitions to previous enactments.

4. (1) The definitions in section 3 of the following words and expressions, that is to say, "affidavit," "barrister," "British India," "District Judge," "father," "Government of India," "Her Majesty" or "the Queen," "High Court" (used with reference to civil proceedings), "immoveable property," "imprisonment," "Local Government," "Magistrate," "month," "moveable property," "oath," "person," "section," "son," "swear," "will" and "year," apply also, unless there is anything repugnant in the subject or context, to all Acts of the Governor General in Council made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887. [*Vide* I of 1868, s. 2, and I of 1887, s. 10.]

(2) The definitions in the said section of the following words and expressions, that is to say, "abet," "Chapter," "commencement," "financial year," "local authority," "master," "offence," "Part," "public nuisance," "registered," "schedule," "ship," "sign," "sub-section," "value" and "writing," apply also, unless there is anything repugnant in the subject or context, to all Acts of the Governor General in Council and Regulations made on or after the fourteenth day of January, 1887. [*Vide* I of 1887.]

General Rules of Construction.

Coming into operation of enactments.

5. (1) Where any Act of the Governor General in Council is not expressed to come into operation on a particular day, then it shall come into operation on the day on which it receives the assent of the Governor General. [*Cf.* Bo. Act III of 1886, s. 10.]

(2) Where any Act of the Governor General in Council is reserved under the Indian Councils Act, 1861, section 20, for the signification of Her Majesty's pleasure thereon, then, if no later date is expressed, it shall come into operation, if assented to by Her Majesty, on the day on which the assent of Her Majesty is duly proclaimed. 24 & 25 Vict., c. 67.

(3) Unless the contrary is expressed, an Act of the Governor General in Council or Regulation shall be construed as coming into operation immediately on the expiration of the day preceding its commencement. [52 & 53 Vict., c. 63, s. 36 (2).]

Effect of repeal and expiry.

6. (1) Where this Act, or any Act of the Governor General in Council or Regulation made after the commencement of this Act, repeals any enactment hitherto made or hereafter to be made, then, unless the contrary is expressed, the repeal shall not— [52 & 53 Vict., c. 63, s. 38; *cf.* Mad. Act I of 1891, s. 8.]

(i) revive anything not in force or existing at the time at which the repeal takes effect; or

(ii) affect the previous operation of any enactment so repealed or anything duly done or suffered thereunder; or

(iii) affect any right, privilege, obligation or liability acquired, accrued or incurred under any enactment so repealed; or

(iv) affect any penalty, forfeiture or punishment incurred in respect of any offence committed against any enactment so repealed; or

(v) affect any investigation, legal proceeding or remedy in respect of any such right, privilege, obligation, liability, penalty, forfeiture or punishment as aforesaid;

and any such investigation, legal proceeding or remedy may be instituted, continued or enforced, and any such penalty, forfeiture or punishment may be imposed as if the repealing Act or Regulation had not been passed.

(2) Sub-section (1) applies also to any Act of the Governor General in Council or Regulation which, having been originally limited to endure only for a specified period by a distinct provision, has expired, and to any Ordinance, made and

promulgated under the Indian Councils Act, 1861, section 23, which has under that section expired, as if the Act, Regulation or Ordinance had been repealed. 24 & 25 Vict., c. 67.

Revival of repealed enactments.

7. (*1*) In any Act of the Governor General in Council or Regulation made after the commencement of this Act, it shall be necessary, for the purpose of reviving, either wholly or partially, any enactment wholly or partially repealed, expressly to state that purpose. [1 of 1868, s. 3 (*1*).]

(*2*) This section applies also to all Acts of the Governor General in Council made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887.

Construction of references to repealed enactments.

8. (*1*) Where this Act, or any Act of the Governor General in Council or Regulation made after the commencement of this Act, repeals and re-enacts, with or without modification, any provision of a former enactment, then references in any other enactment or in any instrument to the provision so repealed shall, unless a different intention appears, be construed as references to the provision so re-enacted. [*Cf.* 52 & 53 Vict., c. 63, s. 38 (*1*).]

Commencement and termination of time.

9 (*1*) In any Act of the Governor General in Council or Regulation made after the commencement of this Act, it shall be sufficient, for the purpose of excluding the first in a series of days or any other period of time, to use the word "from," and, for the purpose of including the last in a series of days or any other period of time, to use the word "to." [1 of 1868, s. 3 (*2*) and s. 3 (*3*).]

(*2*) This section applies also to all Acts of the Governor General in Council made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887.

Computation of time.

10. (*1*) Where, by any Act of the Governor General in Council or Regulation made after the commencement of this Act, any act or proceeding is directed or allowed to be done or taken in any Court or office on a certain day or within a prescribed period, then, if the Court or office is closed on that day or the last day of the prescribed period, the act or proceeding shall be considered as done or taken in due time if it is done or taken on the next day afterwards on which the Court or office is open: [Madras Act I of 1891, s. 11; *cf.* I of 1887, s. 7 (*1*), and s. 7 (*2*).]

Provided that nothing in this section shall apply to any act or proceeding to which the Indian Limitation Act, 1877, applies. XV of 1877.

(*2*) This section applies also to all Acts of the Governor General in Council and Regulations made on or after the fourteenth day of January, 1887.

Measurement of distances.

11. In the measurement of any distance, for the purposes of any Act of the Governor General in Council or Regulation made after the commencement of this Act, that distance shall, unless a different intention appears, be measured in a straight line on a horizontal plane. [*Cf.* 52 & 53 Vict., c. 63, s. 34, and Bo. Act III of 1888, s. 524.]

Duty to be taken *pro rata* in enactments.

12. Where, by any enactment now in force or hereafter to be in force, any duty of customs or excise, or in the nature thereof, is leviable on any given quantity, by weight, measure or value [I of 1808, s. 4.]

of any goods or merchandize, then a like duty is leviable according to the same rate on any greater or less quantity.

Gender and Number.

13. (*1*) Words importing the masculine gender shall be taken to include females. [1 of 1868, s. (*1*) and (*2*).]

(*2*) Words in the singular shall include the plural, and *vice versâ*.

Powers and Functionaries.

Powers conferred on the Government to be exercisable from time to time.

14. (*1*) Where, by any Act of the Governor General in Council or Regulation made after the commencement of this Act, any power is conferred on the Government, then that power may be exercised from time to time as occasion requires. [1 of 1887, s. 5.]

(*2*) This section applies also to all Acts of the Governor General in Council and Regulations made on or after the fourteenth day of January, 1887.

Power to appoint to include power to appoint *ex officio*.

15. Where, by any Act of the Governor General in Council or Regulation made after the commencement of this Act, a power to appoint any person to fill any office or execute any function is conferred, then, unless it is otherwise expressly provided, any such appointment may be made either by name or by virtue of office.

Power to appoint to include power to suspend or dismiss.

16. Where, by any Act of the Governor General in Council or Regulation, a power to make any appointment is conferred, then, unless a different intention appears, the authority having power to make the appointment shall also have power to suspend or dismiss any person appointed by it in exercise of that power.

Substitution of functionaries.

17. (*1*) In any Act of the Governor General in Council or Regulation made after the commencement of this Act, it shall be sufficient, for the purpose of indicating the application of a law to every person or number of persons for the time being executing the functions of an office, to mention the official title of the officer at present executing the functions, or that of the officer by whom the functions are commonly executed. [1 of 1868, s. 3 (*6*).]

(*2*) This section applies also to all Acts of the Governor General in Council made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887.

Successors.

18. (*1*) In any Act of the Governor General in Council or Regulation made after the commencement of this Act, it shall be sufficient, for the purpose of indicating the relation of a law to the successors of any functionaries or of corporations having perpetual succession, to express its relation to the functionaries or corporations. [1 of 1868, s. 3 (*5*).]

(*2*) This section applies also to all Acts of the Governor General in Council made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887.

Official chiefs and subordinates.

19. (1) In any Act of the Governor General in Council or Regulation made after the commencement of this Act, it shall be sufficient, for the purpose of expressing that a law relative to the chief or superior of an office shall apply to the deputies or subordinates lawfully performing the duties of that office in the place of their superior, to prescribe the duty of the superior. [1 of 1868, s. 3 (4).]

(2) This section applies also to all Acts of the Governor General in Council made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887.

Provisions as to Orders, Rules, etc., made under Enactments.

Construction of orders, etc., issued under enactments.

20. Where, by any Act of the Governor General in Council or Regulation, a power to issue any instrument, that is to say, any order, warrant, scheme, rule or bye-law, is conferred, then expressions used in the instrument, if it is made after the commencement of this Act, shall, unless there is anything repugnant in the subject or context, have the same respective meanings as in the Act or Regulation conferring the power. [*Cf.* 52 & 53 Vict., c. 63, s. 31, and Mad. Act 1 of 1891, s. 10.]

Power to make, to include power to add to, amend, vary or rescind, orders, rules or bye-laws.

21. Where, by any Act of the Governor General in Council or Regulation, a power to make orders, rules or bye-laws is conferred, then that power includes a power, exercisable in the like manner and subject to the like sanction and conditions (if any), to add to, amend, vary or rescind any orders, rules or bye-laws so made. [*Cf.* Mad. Act 1 of 1891, s. 5.]

Making of rules or bye-laws and issuing of orders between passing and commencement of enactment.

22. Where, by any Act of the Governor General in Council or Regulation which is not to come into force immediately on the passing thereof, a power is conferred to make rules or bye-laws, or to issue orders with respect to the application of the Act or Regulation, or with respect to the establishment of any Court or office or the appointment of any Judge or officer thereunder, or with respect to the person by whom, or the time when, or the place where, or the manner in which, or the fees for which, anything is to be done under the Act or Regulation, then that power may be exercised at any time after the passing of the Act or Regulation; but rules, bye-laws or orders so made or issued shall not take effect till the commencement of the Act or Regulation. [1 of 1887, s. 4.]

Provisions applicable to making of rules or bye-laws after previous publication.

23. Where, by any Act of the Governor General in Council or Regulation, a power to make rules or bye-laws is expressed to be given subject to the condition of the rules or bye-laws being made after previous publication, then the following provisions shall apply, namely :— [1 of 1887, s. 6.]

(1) the authority having power to make the rules or bye-laws shall, before making them, publish a draft of the proposed rules or bye-laws for the information of persons likely to be affected thereby;

(2) the publication shall be made in such manner as that authority deems to be sufficient, or, if the condition with respect to previous publication so requires, in such manner as the Governor General in Council or the Local Government prescribes ;

(3) there shall be published with the draft a notice specifying a date on or after which the draft will be taken into consideration ;

(4) the authority having power to make the rules or bye-laws, and, where the rules or bye-laws are to be made with the sanction, approval or concurrence of another authority, that authority also, shall consider any objection or suggestion which may be received by the authority having power to make the rules or bye-laws from any person with respect to the draft before the date so specified ;

(5) the publication in the Gazette of a rule or bye-law purporting to have been made in exercise of a power to make rules or bye-laws after previous publication shall be conclusive proof that the rule or bye-law has been duly made.

Continuation of orders, etc., issued under enactments repealed and re-enacted.

24. Where any Act of the Governor General in Council or Regulation is, after the commencement of this Act, repealed and re-enacted with or without modification, then, unless it is otherwise expressly provided, any instrument, that is to say, any order, warrant, scheme, rule or bye-law, issued under the repealed Act or Regulation, shall, so far as it is not inconsistent with the provisions re-enacted, continue in force unless and until it is superseded by any instrument as aforesaid issued under the provision so re-enacted. [*Cf.* Mad. Act I of 1891, s. 18.]

Miscellaneous.

Recovery of fines.

25. Sections 63 to 70 of the Indian Penal Code and the provisions of the Code of Criminal Procedure for the time being in force in relation to the issue and the execution of warrants for the levy of fines shall apply to all fines imposed under any Act, Regulation, rule or bye-law, unless the Act, Regulation, rule or bye law contains an express provision to the contrary. [*Cf.* I of 1868, s. 5.] XLV of 1860. X of 1882.

Provision as to offences punishable under two or more enactments.

26. Where an act or omission constitutes an offence under two or more enactments, then the offender shall be liable to be prosecuted and punished under either or any of those enactments, but shall not be liable to be punished twice for the same offence. [I of 1887, s. 8.]

Meaning of service by post.

27. Where any Act of the Governor General in Council or Regulation authorizes or requires any document to be served by post, whether the expression "serve" or either of the expressions "give" or "send" or any other ex- [*Cf.* 52 & 53 Vict., c. 63, s. 26.]

pression is used, then, unless a different intention appears, the service, if made after the commencement of this Act, shall be deemed to be effected by properly addressing, pre-paying and posting, by registered post, a letter containing the document, and, unless the contrary is proved, to have been effected at the time at which the letter would be delivered in the ordinary course of post.

Citation of enactments.

28. (*1*) In any Act of the Governor General in Council or Regulation, and in any rule, bye-law, instrument or document, made under, or with reference to, any such Act or Regulation, any enactment may be cited by reference to the title or short title (if any) conferred thereon or by reference to the number and year thereof, and any provision in an enactment may be cited by reference to the section or sub-section of the enactment in which the provision is contained. [*Cf.* 52 & 53 Vict., c. 63, s. 35.]

(*2*) In this Act and in any Act of the Governor General in Council or Regulation made after the commencement of this Act, a description or citation of a portion of another enactment shall, unless a different intention appears, be construed as including the word, section or other part mentioned or referred to as forming the beginning and as forming the end of the portion comprised in the description or citation.

Saving for previous enactments, rules and bye-laws.

29. The provisions of this Act respecting the construction of Acts, Regulations, rules or bye-laws made after the commencement of this Act shall not affect the construction of any Act, Regulation, rule or bye-law made before the commencement of this Act, although the Act, Regulation, rule or bye-law is continued or amended by an Act, Regulation, rule or bye-law made after the commencement of this Act. [*Cf.* 52 & 53 Vict., c. 63.]

THE SCHEDULE.

ENACTMENTS REPEALED.

(*See section 2.*)

Year.	No.	Title or subject.	Extent of repeal.
1868	I	The General Clauses Act, 1868.	The whole
1872	I	The Indian Evidence Act, 1872.	So much as relates to Act I of 1868.
1887	I	The General Clauses Act, 1887.	The whole.
1891	XII	The Repealing and Amending Act, 1891.	So much as relates to Act I of 1868.

STATEMENT OF OBJECTS AND REASONS.

THIS Bill does not propose to effect any change in the law. Its object, like that of the Acts it consolidates, is to shorten the language of statutory enactments and to provide for uniformity of expression in cases where there is identity of subject-matter

2. The first enactment of the kind was Lord Brougham's Act (13 & 14 Vict., c. 21). The provisions of that Statute were adapted to India, and somewhat amplified, by the General Clauses Act (I of 1868), and the General Clauses Act (I of 1887) was a further extension of the same principle. It is obviously expedient that the legislative dictionary, as it may be called, should be contained in a single enactment, and that the two Acts above referred to should be consolidated, and it seems desirable to take the opportunity of making any additions that later experience may have suggested, and in particular to incorporate such provisions of the Interpretation Act, 1889 (52 & 53 Vict., c. 63), as are applicable to India. That Statute, like the Indian Act of 1887, was drafted by Sir C. Ilbert, and is in effect a careful revise and extension of the latter. For example, the definition of "British India" in the English Act of 1889 is merely an expansion of the definition given by the Indian Act of 1868. Its legal effect is the same, but it is more intelligible, and it avoids a reference to another Statute. The proposed measure will have this further advantage that it will tend to secure uniformity of language and construction in Indian and English legislation, in so far as both have to deal with the same subject-matter.

3. The references on the margin of the Bill indicate the origin of each provision contained therein, and the annexed Notes on Clauses furnish such further explanatory details as seem to be called for.

M. D. CHALMERS.

The 2nd February, 1897.

Notes on Clauses.

Clause 3.—This clause brings together and defines sixty-two words and phrases of more or less frequent occurrence in the Indian Statute-book. The arrangement is in alphabetical order, and, in accordance with that order, as also with a view to obviating the risk of oversight, the definitions of "father" and "son" and of the cognate expressions "affidavit," "oath" and "swear" have been separated and inserted each in its proper place.

Clause 3 (7).—The definition of British India is, as mentioned in the Statement of Objects and Reasons above, taken from the Interpretation Act, 1889 [52 & 53 Vict., c. 63, s. 18 (4)].

Clause 3 (17).—The definition of "enactment" suggested by this clause is intended to remove certain doubts which have from time to time been raised as to the meaning of the word.

Clause 3 (20).—The expression "Gazette" is here defined in accordance with the prevailing usage. The definition will be useful as tending to shorten and simplify the language of the provisions of very many enactments.

Clause 3 (21).—It will be observed that this definition differs materially from that contained in the Indian Penal Code, but it is believed that it is a better, being a more equitable and reasonable, definition of the expression "good faith." It is now well established in England; for, as Lord Denman, C. J., remarked as far back as in 1836 in *Goodman* against *Harvey* (4 A. & E., at page 876), "gross negligence may be evidence of malafides, but is not the same thing. We have shaken off the last remnant of the contrary doctrine." (See also *Jones* v. *Gordon*, L. R. 2 App. Cas. 629, and *Derry* v. *Peek*, L. R. 14 App. Cas. 337). Where it is intended to afford protection only in the case of a person who acts in good faith *and* without negligence, it seems better to say so in terms.

Clause 3 (22).—Experience has suggested the desirability of providing a definition of the expression "Government." The present practice is to refer specifically to the "Governor General in Council" when the Government of India only is meant and to the "Local Government" when a subordinate Administration alone is in view; but it is frequently useful to refer in general terms to "the Government," as, for example, in legislation affecting public

property, and the question has more than once arisen whether such phraseology includes the Local Government concerned as well as the Supreme Government. It is proposed, by introducing here the definition which is already to be found in the Code of Civil Procedure, to make it clear for the future that, unless a different intention appear from the context, it does.

Clause 3 (25).—The definition of the expression "High Court" in the General Clauses Act (I of 1868), section 2 (*11*), has reference only to civil proceedings. A definition in its relation to criminal proceedings, which has been taken from the Code of Criminal Procedure, 1882, section 4 (*i*), has been added.

Clause 3 (28).—This definition of "India" is taken *verbatim* from the Interpretation Act, 1889, s. 18 (*5*).

Clause 3 (47).—The phrase "used with reference to a document," and also the words "in British India," have been inserted in the existing definition of "registered" contained in section 3 (*11*) of the General Clauses Act (I of 1887), and the new definition is, by clause 4 (*2*) of the Bill, declared to govern all enactments passed since the 14th January, 1887. The additions, however, really do no more than indicate with greater precision the proper construction to be placed upon the definition of 1887, and it cannot be said that any change in the law will be effected thereby.

Clause 3 (57).—The words "with its grammatical variations and cognate expressions" have been interpolated in the definition of the word "swear" to be found in section 2 (*17*) of the General Clauses Act (I of 1868), but the law has no doubt always been so interpreted.

Clause 3 (58).—In this case also the definition contained in section 3 (*13*) of the existing Act (I of 1887) has been slightly amplified, but not, it is thought, so as to affect the substance.

Clause 3 (60).—In re-enacting the definition of "will" in section 2 (*16*) of the General Clauses Act (I of 1868) it has been thought expedient to substitute the word "disposition" for the word "distribution." The former would seem to express the intention more accurately than the latter.

Clause 3 (61).—The definition of "writing" given by the Interpretation Act, 1889 (52 & 53 Vict., c. 63, s. 20), is here proposed in substitution for that contained in section 3 (*14*) of the General Clauses Act (I of 1887). The English definition seems to be fuller and clearer than the Indian, but the latter has, it is believed, consistently been interpreted so as to be practically identical with the former.

Clause 4.—This clause is declaratory of the existing law. The first paragraph provides that all the definitions in the preceding clause which are reproduced from the General Clauses Act (I of 1868), apply also to all Acts of the Governor General in Council passed after the 3rd January, 1868 (the date on which the Governor General's assent was given to that law), and to all Regulations (as defined in clause 3) made after the 14th January, 1887 (the date on which the Governor General's assent was given to the General Clauses Act, 1887, section 10 of which should here be referred to). Paragraph 2, on the other hand, declares that the definitions in clause 3 which are at present contained in the General Clauses Act (I of 1887), apply also to all Acts of the Governor General in Council and Regulations made after the date of the coming into force of that enactment. Any alterations which have been made in the existing definitions have been referred to in the preceding notes, and the fact that the substance is in no case affected has, it is believed, been satisfactorily explained. Similar declaratory provisions have, where necessary, been added to the other clauses of the Bill.

Clause 5.—The first and second paragraphs are declaratory of the practice based upon the provisions of the existing law on the subject, while the origin of paragraph (3) is to be found in section 36 (*2*) of the Interpretation Act, 1889 (52 & 53 Vict., c. 63).

Clauses 6 (1) and 8.—These are borrowed from the English Act just referred to, and their utility in the direction of abbreviating the phraseology used in enactments scarcely requires demonstration. The second paragraph of clause 6 is an addition which has been suggested to meet the case of temporary Ordinances made and promulgated under section 23 of the Indian Councils Act, 1861 (24 & 25 Vict., c. 67) and of enactments, such as the Upper Burma Criminal Justice Regulation (VII of 1886), which are expressly limited to endure only for a specified period. It seems clear that the effect of the expiry of a law should be the same as that of its repeal and no more.

Clause 13.—The provisions of this clause take the form of "definitions" in the General Clauses Act (I of 1868), but they would seem to be more appropriately enacted as rules of construction.

Clause 15.—The practice hitherto observed in drafting in this country appears to have been to state explicitly in each Act that a person may be appointed "by name or by virtue of his office," if the admissibility of making *ex officio* appointments is contemplated. This may lead to the inference that no person can be appointed by office unless

express authority to that effect is conferred by the law under which the appointment is made. It will, from an administrative point of view, be most convenient to generalize the provision in the manner here indicated.

Clause 16.—A power to appoint should ordinarily include a power to remove the person appointed. It is, however, not certain that this construction would be adopted universally by the Courts, particularly in view of the fact that it has been usual in Indian Acts expressly to take both powers. The opportunity has, therefore, been sought to establish the rule once for all for the future.

Clause 20.—It has been held that, even in the absence of any such provision as this, the rule here laid down would hold good. Nevertheless, it seems advisable to follow the lead of the English Statute and to reproduce, with the necessary modifications, section 31 of the Interpretation Act, 1889. This course has already been taken by the Madras Council in the latest legislation of the kind in India, *viz.*, the Madras General Clauses Act (I of 1891), section 10.

Clause 21.—It has been usual in Indian legislation expressly to take power to add to, amend, vary or rescind rules once made in exercise of a statutory power conferred. This has, no doubt, been done *ex abundanti cautelâ*, inasmuch as it would probably be held that the power exists without any such declaration, especially if provisions of section 5 of the General Clauses Act (I of 1887) be borne in mind. But the practice above referred to might give countenance to an argument to the contrary, and the opportunity is now taken to set the matter finally at rest, as has been done for Acts of the Madras Council by section 15 of Act I of 1891 of the local Legislature.

Clause 24.—The enactment of this clause will obviate the necessity for including in every repealing and re-enacting Bill, such, for instance, as the Bill which became the Pilgrim Ships Act (XIV of 1895), a transitory provision to keep any orders, warrants, schemes, rules or bye-laws issued under the law which it is proposed to supersede, in force until replaced by fresh instruments duly promulgated under the new law. It will be observed from the marginal reference that a similar provision has been enacted locally in section 18 of the Madras General Clauses Act, 1891.

Clauses 25 and 26.—These provisions have been taken from the General Clauses Acts, 1868 and 1887. In strictness, the provision reproduced in clause 25 should apply only to Acts passed after the 3rd January, 1868 and to Regulations made on or after the 14th January, 1887, while that contained in clause 26 ought to be confined to enactments passed on or after the last-mentioned date; but there seems to be no danger in recognizing them as of universal application.

J. M. MACPHERSON,

Secretary to the Government of India.

SUPPLEMENT TO

The Gazette of India.

No. 6.] CALCUTTA, SATURDAY, FEBRUARY 6, 1897.

OFFICIAL PAPERS.

A SUPPLEMENT *to the* GAZETTE OF INDIA *will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Debates of the Legislative Council of His Excellency the Governor General will in future be published in* PART VI *of the* GAZETTE.

Non-Subscribers to the GAZETTE *may receive the* SUPPLEMENT *separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The* SUPPLEMENT *in* PART VI *of the* GAZETTE *can also be subscribed for separately on a payment of Rupees two per annum if delivered in Calcutta or Rupee one if sent by Post.*

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, January 23rd, 1897.

AT the commencement of the week the barometric gradients were unusually steep over North Bombay and were, as has happened on more than one occasion during the present cold-weather, associated with the appearance of a slight depression over Gujarat. This depression intensified slightly on the 18th and drifting eastwards passed into Berar on the 19th where it filled up during the day. Its march eastwards on the 18th was accompanied with the formation of a subsidiary depression over the area defined by the stations of Agra, Nowgong and Cawnpore, which however proved to be a very short-lived disturbance and filled up completely before the morning of the 20th. Weather was more or less cloudy over North-Western and Central India during the period from the 18th to the 20th and numerous light thunder showers were received in the North-West Himalayas and the submontane districts of the North-Western Provinces on the 19th and 20th. On the 21st a fresh depression appeared over Khandesh and Berar, and after giving much-needed showers of rain to the greater part of the Central Provinces, Bundelkhand, Baghelkhand, the North-Western Provinces and parts of the North-West Himalayas filled up without moving before 8 A. M. of the 23rd. Fine weather obtained generally in India at the close of the week.

There were large and rapid changes of the temperature conditions over the greater part of the country from day to day during the week. The mean temperature of the week was however in considerable defect of the normal in North-Western and Central India, in moderate to considerable excess in Madras and Burma, and practically normal in other divisions.

Daily Summary.—*Sunday, 17th January.*—Pressure had increased briskly to rapidly in Burma and had fallen slightly to briskly in Bombay, Gujarat and Kathiawar. In other parts of the country the barometric changes were slight

and of no importance. Pressure was above the normal over the greater part of Northern India and normal over the Peninsula and Burma. The general distribution of pressure was of the usual cold-weather type except that the gradients were very steep in North Bombay. Winds were anti-cyclonic in direction over Northern and Central India and variable in the Peninsula. Skies were generally clear and, except a few drops at Cochin, no rain had fallen anywhere during the previous 24 hours. The low temperature conditions had extended to the North-Western Provinces and Bihar and temperature had hence diminished rapidly in these areas. The mean temperature of the previous 24 hours averaged 11° below the normal in Sind and Rajpurana, 10½° below in Gujarat and Central India, 8° below in the Punjab, and 6° below in the North-Western Provinces. It was on the other hand in moderate to considerable excess in Madras and Bengal and in slight excess in Burma.

Monday, 18th January.—Pressure had given way briskly to rapidly in Upper and Central India, but was practically stationary elsewhere. Pressure did not vary to any extent from the normal over a large part of the country. The general distribution was, however, somewhat abnormal. Pressure was high over the North Punjab as well as in a belt stretching from East Rajputana to Bihar and lowest in Travancore. A slight depression covered Gujarat, Khandesh and the adjacent districts of the Central Provinces. Winds circulated cyclonically around the depression but were unaltered in other parts. The air was unusually dry in the North-West Himalayas. Skies were clouding over in Central India and parts of the North-Western Provinces. The only rainfall reported was a few drops at Cochin. Temperature had decreased rapidly in Bengal and was now in moderate defect in that area. It had on the other hand increased rapidly in North-Western and Central India and the amount of deficiency in these areas was hence less marked than on the previous day.

Tuesday, 19th January.—Pressure had changed very irregularly during the previous 24 hours. It had increased briskly in the area occupied by the Gujarat depression on the previous day and had fallen briskly to rapidly in the Gangetic plain and parts of the Punjab but was nearly steady elsewhere. The Gujarat depression had apparently advanced eastwards to the neighbourhood of Amraoti and had at the same time given rise to a subsidiary depression over the area defined by the stations of Agra, Nowgong and Cawnpore. Pressure although highest in West Rajputana and lowest in Ceylon was approximately uniform over the greater part of the country. Except in the neighbourhood of the depressions very variable winds and calms obtained generally on the plains. A moderate to strong humid south-east wind was blowing on the north-west Himalayas and was giving cloudy showery weather in that locality. Heavy rain had fallen at Colombo. Temperature was increasing rapidly in Northern and Central India, but was still below the average. It was stationary and above the average in the Peninsula and Burma.

Wednesday, 20th January.—Pressure had increased briskly to rapidly over the greater part of North-Western India and had decreased slightly in the Peninsula. Elsewhere the changes were slight and of no significance. Both depressions had disappeared and the general distribution of pressure had again become fairly normal. Very variable winds prevailed in the Peninsula and North-eastern India, but elsewhere the wind blew from the normal cold-weather direction. Light rain had again occurred in the North-west Himalayas and a few scattered showers in the North-western Provinces. The largest amount reported was 0·25 inch at Chakrata. Temperature was in moderate to large defect in Baluchistan, Upper India, and the Konkan, normal in Bengal and Assam, and above the average in the remainder of India and Burma. The excess was greatest in the Central Provinces (5½°) and Bundelkhand and Baghelkand (9°).

Thursday, 21st January—Pressure was steady over Gujarat, Khandesh and the neighbouring districts of Central India and of the Central Provinces, but had increased elsewhere, the change having been brisk to rapid over a considerable part of the country. Pressure was highest in the North-west Punjab and lowest in Travancore, and exceeded the normal generally except in Khandesh and Berar, where it was in very slight local defect. Winds were feebly cyclonic in Khandesh and Berar, but were unchanged in most other places. The force was rising at the hill stations in the North-west Himalayas. Light scattered showers of rain had been received in the North-western Provinces and the western districts of the Central Provinces, the heaviest of which amounted

to 0·40 inch at Khandwa. Temperature had increased generally and was above the normal except in North-western India and the Konkan. The excess was greatest at Allahabad and Sutna (11°) and the deficiency at Rajkot (7°).

Friday, 22nd January.—The pressure changes of the previous 24 hours were such as accentuated the conditions prevailing on the previous day Pressure had increased over nearly the whole of India, briskly to rapidly over North-west and Central India and slightly elsewhere. Except locally in Khandesh, where it remained in very slight defect, pressure was in excess of the normal everywhere. The excess was moderate to large in amount over a large part of the country, and was absolutely greatest at Rawalpindi, where it averaged three-tenths of an inch. The depression over Khandesh and Berar was better marked than on the preceding day. The air circulation was practically unchanged. Numerous thunderstorms had visited Bundelkhand, Baghelkhand, the North-Western Provinces, the Central Provinces, and the North-West Himalayas, and had given favourable rain to these districts. Pachmarhi had obtained 2·25 inches, Nowgong 1·65 inches, Jhansi 1·35 inches, and Jubbulpore 1·10 inches. Temperature had decreased rapidly in the North-Western Provinces, but was practically steady in other divisions.

Saturday, 23rd January.—Pressure had decreased generally except in the area covered by the depression on the previous day where it had risen slightly. Pressure continued above the average generally, but the amount of excess was not so large as on the previous day. Beyond the filling up of the depression in Khandesh and Berar, no important change had occurred in the general distribution of pressure. Winds blew from about their normal directions. Light showers of rain had fallen in Ceylon, and a few drops at one or two stations in India. The mean temperature exceeded the normal generally except in Upper India.

Temperature.—At the beginning of the week temperature exceeded the normal to a moderate extent in Madras, Bengal and Burma, and was below the average over the remainder of the country. The deficiency was moderate in amount in the Central Provinces, but increased northwards and westwards and exceeded 10° to the west of a line joining Surat, Delhi, Sirsa and Mooltan. It ranged between 11° and 14° in Kathiawar, Rajputana, and Lower Sind, and was absolutely greatest at Quetta in Baluchistan (14½°). The deficiency was exhibited almost equally in both the day and night temperatures. Temperature increased rapidly in North-Western and Central India, and decreased equally in Bengal during the next 24 hours, so that on the 18th temperature was from 2½° to 8° below the average over the whole of Northern India and Baluchistan and in slight excess in Burma, the Central Provinces and the Peninsula. Temperature continued to increase generally during the next four days, slowly in the south and rapidly in the north and centre, and at the end of the week exceeded the normal over the whole of the country, except in Upper India where it remained in slight defect.

The following table gives variation data for the week in illustration :—

Province.	January 1897.							Mean Variation of Week.

Rainfall.—The rainfall of the week occurred in connection with two depressions of a somewhat unusual character. The first of these advanced into Berar from Gujarat between the 17th and 19th, and gave rise to a short-lived subsidiary depression over the area represented by the stations of Nowgong, Agra and Cawnpore during the 18th. The disturbance disappeared on the 20th. The North-West Himalayas, Oudh and the submontane districts of the North-Western Provinces and of the Punjab obtained numerous light thunder-showers on the 19th and 20th, the heaviest of which was 1·35 inches at Rae Bareli. The second depression appeared over Berar and Khandesh on the 21st, and filled up rapidly during the next thirty-six hours without changing its position. It was, however, a much more influential disturbance than the previous and occasioned favourable rain over the greater part of the North-Western Provinces, Bundelkhand, Baghelkhand, and the central districts of the Central Provinces, and some light showers in the western districts of the Central Provinces and the Punjab hills on the 21st and 22nd. The precipitation due to the disturbance was most general and heaviest in South Oudh and the central districts of the North-Western Provinces, where several stations obtained amounts ranging between one and two inches.

From the accompanying rainfall statement it will be seen that the week was actually or practically rainless over a large part of the country, including Burma, the whole of Bengal, Assam, the Punjab (excepting the hill districts), Bombay, Berar, the eastern districts of the Central Provinces, North Bombay, Rajputana, the Western States of Central India and Madras (excepting the southern districts).

The North-Western Provinces, the western and central districts of the Central Provinces, Bundelkhand, Baghelkhand and South Madras were the only areas which received fair rain during the week. The chief feature was the excessive rainfall in some parts of the North-Western Provinces. The following gives data for the districts in which there was an excess of over an inch :—

District.	Average actual rainfall of week	Average normal fall of week.	Variation from normal
	Inches.	Inch.	Inches.
Sultanpur	1·79	0 11	+1·68
Rae Bareli	1·50	0·14	+1·42
Fatehpur	1·55	0 13	+1 42
Hamirpur	1·44	0·09	+1·35
Banda	1·40	0·08	+1·32
Jalaun	1·41	0·09	+1·32
Cawnpore	1·35	0 09	+1·26
Fyzabad	1·34	0 09	+1·25
Basti	1 28	0·06	+1·22
Barabanki	1·19	0 08	+1·11
Unao	1·18	0·10	+1·08
Sitapur	1·22	0 14	+1·08

The largest total rainfalls of the week were as follows :—

Amethi (Sultanpur) 2·70 inches, Mahoba (Hamirpur) 2·21 inches, Girwan (Banda) 2·04 inches. The seasonal rainfall is in considerable to large defect over Bengal, Coorg, Mysore, the South-East and South Punjab, Sind, East Rajputana, Ganjam, the Circars and South-Central Madras.

HEM RAJ,
Offg. Asstt. Meteorological Reporter to the Government of India.

SIMLA, *the 28th January 1897.*

DENZIL IBBETSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.
DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 30th January.*—No rain fell except a few trivial showers in the hill tracts in Ganjam and in Tinnevelly. The water-supply continues adequate in the Carnatic and in the Southern and in parts of the Central districts, as well as under large works elsewhere. Soakings under irrigation from large works and wells continue. The standing crop in the southern half of the presidency is good, elsewhere, unless protected by irrigation, the crops are bad or are lost. The harvest is proceeding on the West Coast and in the Central, Southern and Carnatic districts with moderate yield; elsewhere, except under irrigation works, the yield is poor or bad. Pasturage is very scarce and fodder very dear in parts of the Circars and the Deccan; elsewhere supplies are moderate. Cattle are in bad condition in parts of the Deccan. Prices are rather dearer in the Circars, parts of the Deccan, Central districts and on the West Coast; stationary or slightly easier elsewhere. The numbers on relief works are—32,111, the numbers of kitchen inmates 2,872, and the numbers weavers relieved 7,255, all in Deccan. 125 were also gratuitously relieved in Ganjam. Total number in receipt of relief:—42,369. The prices by which famine wages are regulated are:—Kurnool 15½, Bellary 14½, Anantapur 13½, Cuddapah 16½ seers per rupee.

Bombay.—*For week ending 2nd February.*— Slight rain fell in Shikarpur Poona, Ahmednagar and Khandesh. The standing crops have been damaged by frost slightly in one taluka of Karachi, in six of Hyderabad, and in two of Ahmedabad; by locusts and insects in one of Karachi; otherwise they are thriving in Sind and Gujarat and are indifferent elsewhere. The crops recently sown have withered or are withering in Nasik, Ratnagiri, Poona, Ahmednagar, Sholapur and Dharwar. The autumn harvesting has been completed, except in Khandesh and Dharwar. The reaping of the late crops has been commenced in Kaira, Broach, Nasik, Ahmednagar, Khandesh, Sholapur, Satara and Bijapur. Fodder is sufficient except in the Deccan, Karnatak, Shikarpur and parts of Baroda. The grain-supply is generally sufficient in the affected districts. Cotton-picking continues in Broach, Surat, Kathiawar and Wadhwan. The condition of agricultural stock is deteriorating in Poona, Ahmednagar, Sholapur, Bijapur, Belgaum and Dharwar, healthy elsewhere, except in parts of Sind, Nasik and Khandesh. Prices are rising in parts of Broach, Surat, Kolaba, Ratnagiri and Bijapur, falling in Upper Sind frontier, and parts of Broach, Kolaba, Poona, Sholapur and Bijapur, and stationary in Shikarpur, Hyderabad, Thar and Parkar, and the Panch Mahals, and parts of Broach, Surat, Poona and Bijapur. The prices of food-grains on which famine wages are based are:—Dharwar 14, Belgaum 12, Bijapur and Sholapur 10¼, Ahmednagar 10¼, Poona 10, Nasik, Satara, Khandesh 9¾, and Kolaba 8¾ seers per rupee. The average daily number employed on relief works, including non-working children, are:—Bijapur 76,507, Sholapur 83,482, Ahmednagar 48,253, Poona 25,032, Nasik 31,098, Satara 26,355, Khandesh 22,464, and Belgaum 2,490. Total 315,681, of which 221,914 are relief workers, and 93,767 non-working children. Two hundred and forty-one persons were also employed on one test work in Dharwar. The numbers on gratuitous relief are:—Bijapur 4,932, Sholapur 3,729, Ahmednagar 27, Poona 2,273, Belgaum 253, Nasik 57, and Satara 6. Total number in receipt of relief was 327,199.

Bengal.—*For week ending 1st February.*—Slight rain fell in parts of Lower Bengal, Bihar, and Chota Nagpur during the week. Calcutta received 1·26 inches on the 1st instant. The winter rice harvest is practically over, and threshing is going on. The spring and poppy crops in Bihar continue to

promise well. In Northern Bengal and in parts of Chota Nagpur the spring crops are reported to be fair. In all other parts of the Province the prospects of the spring crops are poor. Oilseeds and other early spring crops are being gathered, and sugarcane is being pressed. Spring rice is doing well, but wants rain in parts. Ploughing for autumn rice and jute is going on in parts of North Bengal and in Mymensingh. Prices remain almost stationary. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 9½ to 11 seers, Patna (common rice) 10½ seers, Shahabad (pea) 10½ seers, Saran (Indian-corn) 9 seers 14 chittacks, Champaran (Indian-corn) 10¾ seers, Muzaffarpur (Indian-corn) 10 seers, Darbhanga (common rice) 9¼ seers. These prices show slight falls in Shahabad, Saran, and Champaran, and a slight rise in Patna. In the other affected districts there has been no change. The numbers on relief works and in receipt of gratuitous relief on Saturday, the 30th January, were: Relief works—Nadia 6,060 (men 2,989, women 636, children 2,435); Khulna 147 (men 105, women *nil*, children 42); Rajshahi 536 (men 504, women *nil*, children 32); Patna 587 (men 299, women 209, children 79); Shahabad 2,274 (men 793, women 999, children 482); Saran 13,811 (men 3,947, women 5,521, children 4,343); Champaran 97,149 (men 40,438, women 35,417, children 21,294); Muzaffarpur 6,911 (men 3,892, women 1,418, children 1,601); Darbhanga 135,644 (men 62,570, women 52,902, children 20,172). Total 263,119 against 247,327 in the previous week. Gratuitous relief—Nadia 770 (men 141, women 539, children 90), Khulna 21 (men 4, women 9, children 8); Patna 36 (men 14, women 14, children 8); Saran 12,070 (men 2,126, women 7,212, children 2,732); Champaran 5,808 (men 1,345, women 2,619, children 1,844); Muzaffarpur 1,703 (men 500, women 706, children 497); Darbhanga 55,283 (men 10,920, women 27,774, children 16,589). Total 75,691 against 70,343 in the previous week. Total number in receipt of relief was 338,810.

Private relief—Relief works.—Darbhanga Raj 16,353 (men 10,689, women 3,766, children 1,898). Gratuitous relief—Darbhanga Raj 3,518 (figures incomplete); Saran district 2,210.

North-Western Provinces and Oudh.—*For week ending 3rd February.*—Good rain fell in the Bundelkhand districts; in the Allahabad district and in portion of the Jhansi district over one inch was recorded. Light showers fell in other districts. The spring crops continue to do well. Cane-pressing is still in progress in many districts. Slight damage has been caused by hail and frost to the crops in a few districts. The numbers in receipt of relief on Saturday, the 30th January 1897, in districts which have been officially recognised as distressed were as follows:—Agra 22,304, Etawah 150,010; Banda 152,863; Cawnpore 68,867; Hamirpur 60,001; Allahabad 183,351; Jhansi 47,006; Jalaun 80,694; Jaunpur 43,051; Mirzapur 18,072; Gorakhpur 22,138; Lucknow 56,308; Unao 40,440; Rae Bareli 70,144; Sitapur 44,103; Hardoi 176,575; Barabanki 27,078. Total 1,136,996. The total is distributed as follows among the various methods of relief prescribed by the Famine Code which are in operation:—Employed on relief works—729,298; relieved as dependants 165,611; relieved in poor-houses 42,046; relieved under other provisions of the Code 200,041. The numbers relieved in 20 districts which are under observation, but are not yet officially recognised as distressed were on the same date as follows:—Relieved on test works 76,397; relieved in poor-houses 18,519; relieved under other provisions of the Code 22,096. Total 117,012. The grand total in receipt of relief on the last day of the week was therefore 1,254,008. Supplies are generally sufficient. Fodder is somewhat scarce in places. Prices are still high, but are falling slightly. The prices of staple food-grains on which famine wages are based are as follows in the districts officially recognised as distressed:—Allahabad and Hardoi 9¼; Mirzapur and Jalaun 9½; Sitapur 10 5/16; Etawah and Barabanki 10¼; Cawnpore 10⅞; and the remainder 10 seers per rupee.

Punjab.—*For week ending 2nd February.*—Nearly 1½ inch of rain in parts of Hissar. Rain averaging about ¼ of an inch has also fallen in Ferozepore,

Lahore, Amritsar, Gujranwala and Rawalpindi and over half an inch in Sialkot; there was a slight drizzle in parts of Karnal, Umballa, and Dera Ismail Khan, there was also a general rainfall throughout the Jullundur district. Pressing of sugarcane is nearly finished in Sialkot, but is still going on in Jullundur and Amritsar. Sowings of the spring crops are over. Ploughings for the extra spring crops are in progress. The condition and prospects of the standing crops are generally reported good to fair on irrigated land, but average in Mooltan and Dera Ismail Khan. The standing crops have been greatly benefited by recent rain in Amritsar, Gujranwala and Lahore. The crops on dry land are suffering from want of further rain in some districts. To improve the condition of crops more rain is urgently wanted in Rohtak, Delhi, Umballa, and Shahpur. The crops on dry land in Gujranwala have been saved by the recent rainfall. Stocks of food-grain are insufficient with the cultivators of Lahore, Amritsar and Gujranwala; the stock in Jullundur has also been reduced and gram and fodder stock has been exhausted in Hissar. The standing spring crops are being damaged by insects in Delhi and rape and gram in parts of Ferozepore. Cattle are generally in poor condition for want of sufficient fodder. Their condition is good in Amritsar and Peshawar and fair in Gurgaon. In Hissar they are in miserable condition and are dying from starvation. One hundred and twenty-two cattle died of starvation in Rohtak. Fodder is said to be scarce in all districts except Umballa. Prospects have become brighter owing to the recent rain. The average number of persons employed on famine relief works was:—Rohtak 5,709. Gurgaon 1,589; Delhi 3,740; Karnal 2,465; Ferozepore 2,308; Gujrat 47,957; Hissar 29,209 including 2,185; 37; 696; 114; 228; 15,177 and 5,715, respectively gratuitously relieved: 1,003 in Umballa and 2,163 in Lahore were also gratuitously relieved. The number on test works was:—Ludhiana 125; Multan 302; Sialkot 270; Gujranwala 217; and in Rawalpindi 112. The total number in receipt of relief was 97,259. There were besides 1,018 persons on ordinary works. Prices are still high but have slightly fallen in all districts except Mooltan and Dera Ismail Khan where no variation has taken place and in Jullundur where they are still rising. Wheat is selling from 8½ to 11 seers, great millet 11 to 11½, bulrush millet 10 to 11¼, and maize 10 to 12¾ seers per rupee. Prices of staple food-grains on which the famine wage is reckoned are—Rohtak gram 11 seers; Delhi bulrush millet 10½ seers; Karnal gram and maize 12 seers; Umballa maize 10 seers; Ferozepur maize 13 seers; great millet and gram 12 seers; Gujrat wheat flour 7½ seers; Ludhiana maize 11 seers; Mooltan wheat 9½ seers; Gujranwalla wheat flour 9 seers; and Lahore wheat and maize 10 and 12 seers, respectively per rupee.

Central Provinces.—*For week ending 2nd February.*—The weather was somewhat cloudy and showery in the early part of the week. The Mandla, Betul, Sohora, and Merwara tahsils of Jubbulpore received more than an inch; Seoni three-fourths; Damoh, Balaghat, and Bilaspur half, and Raipur one-fourth of an inch. The spring crops are generally in good condition, and the recent rain has been on the whole beneficial especially to the late sown crops; but damage is reported in some localities and especially in Balaghat by rust and insects. Sugarcane planting has commenced. There has been slight hail in Jubbulpore, Mandla, Hoshangabad and Balaghat. Fodder is sufficient except in Seoni, Hoshangabad, in and parts of Nagpur and Sambalpur. Imports: Jubbulpore 35,000; Seoni 6,000; Nimar 6,500 maunds. The numbers on relief works are as follows:—Saugor 26,969; Damoh 18,639; Jubbulpore (on twenty-third) 70,178; Mandla 14,260; Seoni 3,304; Narsinghpur 18,043; Hoshangabad 30,907; Nimar 558; Betul 10,747; Chhindwara 4,950; Nagpur 1,312; Chanda 2,643; Bhandara 9,118; Balaghat 5,419; Raipur 7,658; and Bilaspur 6,244. Total 230,949. The numbers on gratuitous relief are:—Saugor 9,616; Damoh 2,456; Jubbulpore 13,727; Mandla 882; Seoni 1,179; Narsinghpur 4,365; Hoshangabad 6,033; Nimar 354; Betul 1,560; Chhindwara 1,843, Nagpur 830; Chanda 262; Bhandara 1,448; Balaghat 1,662, Raipur 1,377; and Bilaspur 1,443. Total 49,037. The total number in receipt of relief was 279,986. There were also 32,195 on railway and other works, in Saugor, Damoh, and Jubbul-

pore and on Jagir works in Chhindwara. Prices of food-grains on which the famine wages are based are:—Saugor 9; Damoh 8¾; Jubbulpore 9½; Mandla 8¼; Seoni and Raipur 9¾; Narsinghpur, Betul, Bhandara, and Bilaspur 10, Hoshangabad 10¾; Nimar 10½; Nagpur and Chanda 13⅓; Balaghat 8 seers per rupee. Relief workers in Nagpur are leaving to take up field labour and private works started with takkavi. There are large numbers on the latter class of work in Bilaspur.

Burma.—*For week ending 30th January.*—In Lower Burma reaping has been completed and threshing is progressing. In Upper Burma the cultivation of dry weather paddy and miscellaneous crops continues. The standing miscellaneous crops in Amarapura township, Mandalay, are withering from want of rain. The outturn of irrigated paddy which has been reaped in Minbu is 12 annas. Wheat in Minbu does not promise well. Peas and tobacco on islands in Myingyan have failed. With the above exceptions the dry weather paddy and miscellaneous crops are in fair condition. The price of paddy has risen slightly in Akyab and Myaungmya, fallen considerably in Minbu and slightly in Amherst and Thayetmyo; elsewhere it is stationary. The numbers on relief works are:—Meiktila 17,277; Myingyan 9,689; and on gratuitous relief, Meiktila 3,135, Myingyan 2,806, and Yamethin 323. Total number in receipt of relief was 33,230. In Meiktila the price of rice is 8 seers 15 chittacks and in Myingyan 9 seers 5 chittacks per rupee.

Assam.—*For week ending 2nd February.*—The weather is seasonable. A hailstorm is reported to have damaged chillies and tobacco in Cachar. Rain is wanted for ploughing for early rice in Kamrup. Mustard is being gathered. The pressing of sugarcane and pruning of tea continue. Prices: common rice, Silchar 9 seers 6 chittacks; Sylhet, Gauhati and Tezpur 10; and Sibsagar 12 seers per rupee. Fodder insufficient in Cachar, Naga Hills and Khasi Hills. Water is sufficient except in the Nowgong and Naga Hills Districts.

Mysore and Coorg.—*For week ending 2nd February.*—MYSORE: The prospects are generally good. Prices have slightly risen in Bangalore and Shimoga; and fallen in Kolar and Kadur. Raggi (*Eleusine coracana*) and paddy have been harvested in Kolar and Mysore.

COORG. The threshing of rice has commenced and the picking of coffee is completed in parts. Outturn is small. Prices of food-grains are normal. Public health is fair. Water and fodder for cattle are sufficient.

Berar and Hyderabad.—*For week ending 2nd February.*—BERAR: The weather is cool: hailstorms have occurred in parts of the Akola District with considerable damage to the winter crops. Cotton-picking is nearing completion. Threshing of Jowar (*Sorgnum vulgare*) in progress; wheat, gram and linseed are in poor condition. The land is being prepared for the next monsoon crop. Scarcity of fodder and water prevails. High prices for food-grains continue. Relief works have been opened in the Ellichpur District. Prices:—Melghat 11 seers per rupee.

HYDERABAD: Rainfall during week ended 30th January, ·7 cents. The spring crop is in fairly good condition except in certain talukas of the Southern Division, where prospects are poor. Sowing of the winter rice crop in the Eastern Division is completed. Water-supply is decreasing. Scarcity of fodder and pasture exists. Prices are as follows:—Wheat 7½; coarse rice 7¼; white jowari 11⅜; yellow jowari 10; gram 10½; and tur 11½ seers per current sicca rupee.

Central India.—*For week ending 3rd February.*—Rain fell in Bhopal, Bundelkhand and Baghelkhand during the week. Agricultural operations are in progress in Gwalior, Bhopal and Malwa, and have been completed elsewhere. Spring crops are in good condition in one district of Gwalior in some districts of Bundelkhand and in Malwa Agency, fair in three districts of Gwalior in the Bhopal Agency and in one district of Bundelkhand, indifferent elsewhere.

Crops have been damaged by hail in some places of the Bhopal Agency, and by want of rain in two pergunnahs of Gwalior. Agricultural stock is in good condition in three districts of Gwalior and in the Malwa Agency, fair in the Bhopal Agency, bad in four districts of Gwalior, and indifferent elsewhere. Pasturage is good in two districts of Gwalior and in the Malwa Agency, fair in Bhopal, bad in six districts of Gwalior, indifferent elsewhere. Prices are above normal in Bundelkhand, Baghelkhand and Malwa, steady elsewhere. Opium crops are in fairly good condition in Gwalior, Bhopal and Malwa. The numbers employed on famine relief works are:—Gwalior, 11,696; Bundelkhand 3,476; Baghelkhand 50,006; on gratuitous relief Bundelkhand 1,508; Baghelkhand 2,376; not reported from Gwalior. Total numbers in receipt of relief was 69,062. Prices of food-grains on which the famine wages are based, are:—Gwalior 10 to 10½; Baghelkhand 10 seers per rupee.

Rajputana.—*For week ending 3rd February.*—No rain has fallen throughout Rajputana. Agricultural operations are satisfactory in Jhallawar, Kotah, Jeypore, Kerowlee, and Kherwara; and poor in Dholepore. The spring crops are in good condition in Sirohi, Jaisulmere and Bikanir. The standing crops are generally good except in Dholepore. Harvests are good in Jhallawar and Jeypore and are below average in Haraoti. Cattle are generally in good condition except in Bhurtpore. Pasturage or fodder is generally sufficient but scarce in some tehsils of Jeypore; but is failing in Dholepore and in Bhurtpore. Prices are rising in Bhurtpore; are high in parts of Kerowlee; are falling in Partabgarh, Meywar, Kerowlee, Shahpura, Bikanir and Jaisulmere; and are steady elsewhere. The number of persons on relief works were:—Marwar 4,405; Kotah 1,034; Dholepore 5,284; Bhurtpore 384; Bikanir 10,634; and Jaisulmere 939. The numbers on gratuitous relief were:—Marwar 1,004; Bhurtpore 621; Bikanir 723; and Jaisulmere 13. Total number in receipt of relief was 25,041. The price of the staple food-grains on which the famine wages are based are:—Marwar 8 seers 7 chittacks, Kotah 14 seers ½ chittack; Dholepore 14 seers 10 chittacks; Bhurtpore 9 seers 8 chittaks; Bikanir 9 to 9 seers 2 chittacks; Jaisulmere 8 seers 9 chittacks per rupee.

Kashmir—KASHMIR VALLEY.—*For week ending 2nd February.*—Snow has fallen. Prices continue below normal. Normal price 24 seers per rupee.

JAMMU PROVINCE.—*For week ending 3rd February.*—Light showers of rain during the week. Prices are stationary. Fodder is scanty. Relief works are in progress, 455 persons are employed. Prices 10¾ seers per rupee.

Nepal.—*For week ending 30th January.*—The nights are still frosty, but the days are fine and getting warm. Prices 6½ and 7 seers per rupee.

The total numbers in receipt of relief during the preceding week are as follows:—

Name of Province.	Preceding week.			Present week.			Increase or Decrease.
	Relief works.	Gratuitous relief.	Total.	Relief works.	Gratuitous relief.	Total.	
1 Madras	26,852	6,974	33,826	32,111	10,252	42,363	+ 8,537

T. W. HOLDERNESS,
Deputy Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FAMINE.)

AGRICULTURAL PROSPECTS IN INDIA.

The following papers are published for general information :—

1.—Despatch from Her Majesty's Secretary of State for India, to the Government of India, No. 10 Rev., dated 15th January, 1897.

On learning from your Excellency that the probable extent of the famine could now be defined and that public subscriptions were being invited in India, I informed the Lord Mayor of London that your Government gratefully accept his offer to open a Mansion House Fund for subscriptions in aid of the relief of sufferers from famine in India ; and on the receipt of your letter No. 64 (Famine), dated the 23rd December 1896, I have communicated to His Lordship your views regarding the objects to which private charity can best be devoted and regarding the way in which charitable funds can best be administered. Since the month of October your weekly telegrams have kept me informed regarding the condition of affairs, while your present despatch, and your detailed telegram of the 10th January 1897, give the latest information concerning the extent of the calamity and the measures that have been taken for the relief and mitigation of suffering.

2. The famine has been caused by the absence of the usual rainfall during part of the autumn of 1896. Over a great part of India no rain fell from the middle of August to the middle of November, during which period more than one-third of the year's rainfall is usually expected. The failure of the rains stunted or destroyed the growing autumn food crops, such as millets, rice and pulse, the yield of which on unirrigated lands is estimated to range from nothing to nearly half an average crop. The irrigated autumn crop lands, about 14 per cent. of the whole, are expected to yield about three-quarters of an ordinary harvest. The drought also prevented or impeded ploughing and sowing for the spring crops such as wheat, barley, gram and pulse. The effect of the failure upon the people was aggravated, especially in the North-West Provinces and the Central Provinces, by the circumstance that food-stocks had been reduced and the resisting power of the people had been impaired by previous short harvests.

3. In the month of October all the Local Governments considered the situation and made preparations for meeting the calamity in the several ways prescribed by the Famine Codes. The great extension of railways and the increase in the irrigated area made the country and the people better able to resist famine, while the existence of the Famine Codes and the preparations made under those Codes placed your Government and your officers in a better position for administering timely relief than they had been on any previous occasion. During October the commoner food-grains became dearer over a great part of India than had ever been known before at that time of the year and over so great an area. In 74 districts the cheaper kinds of grain were dearer than ten seers per rupee. The detailed reports which have reached me from the several provinces show that in the North-West Provinces, Oudh, and Bengal timely and complete preparations had been made ; while in the Punjab, where pressure was less severe, in Bombay where the need arose later, and in Madras where subsequent rainfall removed cause for anxiety, adequate precautions appear to have been taken.

4. At the beginning of November it was apparent that, if the cold weather rainfall should be wanting, there must be serious famine over a large area of India, inhabited perhaps by 80 to 90 millions of people, and that it would be most severely felt in the North-West Provinces, in four districts of which the famine organization had been fully tried and had achieved a very satisfactory

success during the previous season of 1895-96. But the situation was much relieved by the rainfall of November, which secured a full winter harvest over the greater part of Madras and Mysore; and which spread in an unusual way to the Deccan, the Central Provinces and Northern India. In December and January also, cold weather showers have fallen over Central and Northern India, over Bengal and over parts of Bombay. The sowings for the spring crops have everywhere been extended, though the breadth of these crops is reported to be still considerably short of the normal area. The spring crops, however, where they have been sown and have germinated, are said to be practically safe; and it is certain that by April next a large addition will have been made to the food-supply of the people over the greater part of the affected area. In some tracts, however, such as North Behar, and some of the districts in the Central Provinces and Oudh, where the people depend mainly upon the autumn harvests for their food, the relief given by the spring crops will be less considerable.

5. According to your latest information on the 10th January, the position was that famine was felt or expected over districts inhabited by about 37 millions of people, while more or less distress was feared over other tracts containing 44 millions. *In British India the expected famine areas and the distressed areas appear to be distributed somewhat thus:—*

	Famine.		Distress.	
	Sq. Miles.	Population.	Sq. Miles.	Population.
Punjab	16,800	4,139,000	30,100	6,559,000
North-West Provinces	29,100	11,273,000	50,600	26,013,000
Bengal	6,700	5,281,000	9,900	8,265,000
Burma	1,900	212,000	8,000	555,000
Madras	8,500	1,206,000	—	—
Bombay	43,000	7,009,000	9,300	2,064,000
Central Provinces	60,200	7,824,000	13,200	1,019,000
TOTAL	164,000	36,944,000	121,700	44,475,000

In the famine areas full relief organization under the Famine Codes either has been or is being established as need arises; and in the distressed areas, relief works have been or are being opened in order to test the extent of the pressure. If hereafter in parts of the distressed area famine should appear, the relief organization will be at once extended.

6. The number of people in receipt of relief during the first week of January was 1,200,000, of whom about 248,000 were receiving gratuitous relief. It is expected that these numbers will increase until April; during March and April pressure will, it is hoped, abate in tracts where the spring harvests on large areas prove good; but in some parts the numbers on relief may go on increasing until the end of May. And in no case will anxiety be over until favourable rains have fallen in July and August next.

7. Besides organising relief works and the distribution of gratuitous relief, you have sanctioned suspensions of revenue where pressure is greatest; you have made available for irrigation as much water as possible; you have sanctioned large advances or loans to landholders who are ready to give work on their estates, and to ryots who are ready to dig wells; you have opened the Government forests to grazing in places where fodder is scanty, and you have reduced the railway rates for carriage of food.

8. You believe that the stocks of food are practically sufficient for the needs of the people, Burma and perhaps South India having a large surplus of food. You are relying on private trade to carry food to places where it is wanted, and you have made public your decision to abstain from any Government interference with the operations of the grain trade. But you have given Local Governments authority to arrange through local dealers for sending food to any relief work or relief centre, where the supply of food is apparently running short. I do not gather that supplies of food are yet coming into the distressed districts from Burma, Madras, or Siam; and I question if Indian

prices are, as yet, high enough to attract wheat or even maize from the west. I observe that the Famine Codes provide that the relief wage, or the gratuitous dole, shall be fixed at the value of a certain ration of food on the spot; so that if food becomes still dearer, the relief wage will be proportionately increased. I agree in your view, which was that expressed by the Famine Commission, that the trade, as a whole, can supply the food demand better and more effectively than Government could; and if reliance is placed on the trade, its operations, so long as they are effective, must not be subjected to competition by Government agency. No doubt careful watch will be kept by your Government not only on the food-supply generally, but its local distribution. The area in India possessing a surplus of food is unhappily not so extensive this year as it was in 1876-77.

9. I approve the orders you have given regarding the undertaking of canals and railways as relief works. I hope that local capitalists or local bodies will be found ready in many places to construct light railways under the liberal terms which you have offered in order to meet the present necessity. I understand that, if anywhere sufficient large relief works are not available in particular tracts, recourse will be had to village works, a system which appears to have been prosecuted very successfully in the Bundelcund relief operations of 1895-96. Whether for these petty works, or for other relief duties, a largely increased staff will certainly be required; and I gather that the Local Governments are taking early steps to organize a sufficient temporary staff of relief officers. In the Bundelcund report I observed with satisfaction the excellent service done by Indians, official and non-official, as well as by European relief officers, and I greatly regret that some of these excellent officers should have died or broken down in the struggle.

10. As I intimated by my telegram of the 28th October last, I shall be ready to sanction the expenditure needed to make your relief operations as complete and effective as possible. During a considerable number of years the Government of India has set apart a portion of its revenue to enable it more effectually to deal with such an emergency as has now arisen. You are therefore in a better position to provide the necessary funds for effectual relief without unduly burdening your finances. I am confident that public sentiment in India will support your Government in spending the public money ungrudgingly, though prudently, in the relief of distress. I can assure you of the sympathy of Her Majesty's Government, and of your countrymen at home, in the task before you.

11. On your Excellency and the officials in India must primarily rest the burden of battling with the grave calamity before us, and constant interference from home in the detailed working of the vast and complicated organization you are controlling would be useless and mischievous.

12. It is, however, necessary that I should receive prompt periodical information as to the progress, adequacy, and results of these relief works, so that I may be able to judge and advise upon the general conduct and course of your operations.

13. The courage, decision, and promptitude with which the outset of this visitation has been met by your Excellency and your coadjutors inspire me with every confidence and hope in the eventual success of your proceedings.

T. W. HOLDERNESS,

Deputy Secretary to the Government of India.

(*a*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company. The working of this line has been taken in hand by the company from the 1st January 1897.

(*b*) Includes the Bhopal-Itarsi railway.

(*c*) Includes the Godhra-Rutlam-Nagda railway.

(*d*) Includes the Guntakal-Mysore frontier section.

(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-Western Railway Company.

(*f*) Includes the Jammu and Kashmir and the Hyderabad-Shadipalli railways.

(*g*) This line has been transferred to a company from the 1st September 1896, but until arrangements are made for the line to be formally taken over, it will be worked by the state on behalf of the company.

(*h*) Includes the Wardha Coal, the Dhond-Manmad, the Khámgaon, and the Amraoti railways.

(*i*) Includes the Mysore-Nanjangúd and the Yesvantpur-Mysore frontier sections.

(*j*) This line is being worked by the Bombay, Baroda and Central

GOVERNMENT OF INDIA.
PUBLIC WORKS DEPARTMENT.
RAILWAY STATISTICS.

No. XL OF 1896-97.

STATEMENT OF APPROXIMATE GROSS EARNINGS OF INDIAN RAILWAYS.

N.B.—As regards the figures in column *Total Earnings from 1st April 1896*, audited figures have been used as far as possible.

Railway.	Average earnings per mile per week in 1895-96.	Week ending 25th January 1896. Mean mileage worked.	Earnings. Total.	Earnings. Per mile open per week.	Week ending 23rd January 1897. Mean mileage worked.	Earnings. Total.	Earnings. Per mile open per week.	Earnings from 1st April 1895 to 25th January 1896.	Earnings from 1st April 1896 to 23rd January 1897.	Increase.	Decrease.

(*a*) Although for convenience classed amongst state railways, this line is the property of the Bengal Central Railway Company. The working of the line has been taken in hand by the company from the 1st January 1897.
(*b*) Includes the Bhopal-Ratlai railway.
(*c*) Includes the Godhra-Rutlam-Nagdá railway.
(*d*) Includes the Guntakal-Mysore frontier section.
(*e*) Includes the Tirhoot state railway. Although for convenience classed amongst state railways, the company's section of this line is the property of the Bengal and North-W[illegible] Company.
(*f*) This line has been transferred to a company from 1st September 1896, but until arrangements are made for the line to be formally taken over it will be worked by the state on behalf of the company.
(*g*) Includes the Wardha Coal, the Dhond-Manmad, the Khamgaon, and the Amraoti railways.
(*h*) Total earnings from 1st May 1895 to 25th January 1896.
(*i*) Total earnings from 11th November 1895 to 25th January 1896.
(*j*) Total earnings from 15th July 1895 to 23rd January 1897.
(*k*) Total earnings from 1st April 1895 to 25th January 1896.
(*l*) Total earnings from 1st April 1896 to 23rd January 1897.
(*m*) Includes the Mysore-Nanjangud and the Yesvantpur-Mysore [illegible].
(*n*) [illegible]

PART VI.

Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House on Thursday, the 4th February, 1897.

PRESENT:

His Excellency the Earl of Elgin, Viceroy and Governor General of India, P.C., G.M.S.I., G.M.I.E., LL.D., *presiding*.
His Honour the Lieutenant-Governor of Bengal, K.C.S.I.
His Excellency Sir G. S. White, G.C.I.E., K.C.B., V.C., Commander-in-Chief in India.
The Hon'ble Sir J. Westland, K.C.S.I.
The Hon'ble Sir J. Woodburn, K.C.S.I.
The Hon'ble M. D. Chalmers.
The Hon'ble Major-General Sir E. H. H. Collen, K.C.I.E.
The Hon'ble A. C. Trevor, C.S.I.
The Hon'ble H. E. M. James.
The Hon'ble Sir A. S. Lethbridge, K.C.S.I., M.D.
The Hon'ble M. R. Ry. P. Ananda Charlu, Rai Bahadur.
The Hon'ble G. P. Glendinning.
The Hon'ble Nawab Amir-ud-Din Ahmad Khan, C.I.E., Bahadur, Fakhar-uddoulah, Chief of Loharu.
The Hon'ble Sir Lakshmishwar Singh, K.C.I.E., Maharaja Bahadur of Durbhanga.
The Hon'ble Rao Sahib Balwant Rao Bhuskute.
The Hon'ble P. Playfair, C.I.E.
The Hon'ble Rahimtula Muhammad Sayani, M.A., LL.B.
The Hon'ble Pandit Bishambar Nath.
The Hon'ble Joy Gobind Law.
The Hon'ble C. C. Stevens, C.S.I.
The Hon'ble Sir H. T. Prinsep, KT.

FISHERIES BILL.

The Hon'ble SIR JOHN WOODBURN moved that the Report of the Select Committee on the Bill to provide for certain matters relating to Fisheries

in British India be taken into consideration. He said :—" The Bill as introduced was designed for the protection and development of the fish supply in India, a very important article of diet to large classes of the people; and it was divided into two parts. The first part had for its object the prevention and prohibition of certain wasteful and wanton methods of fish capture, and the provision of a regulation giving a certain amount of control over methods for the capture of fish. The other part of the Bill concerned itself with the protection of the rights of private owners and private fisheries. The Bill was circulated to Local Governments according to the usual practice, and in reply the Government has received strong advice that the second portion of the Bill should not be proceeded with. It was represented that no complaints had been made by the owners of private fisheries, or applications for special protection, and that, although the protection of the fish supply was a most desirable object, there was no sufficient evidence at that time before the Local Governments of such general and considerable diminution of the fish supply throughout India at large as to justify any material interference with the customs of the people.

"It was argued that throughout India there were immemorial practices among the poorer classes of the people of fishing in waters which could certainly not be described as public waters, but that these practices amounted to privileges which might, or might not, be absolute rights, but which were much prized by the people, and that the withdrawal of the permission to carry on these practices would be resented as an infraction of long standing privileges. It was represented that, if we passed enactments to restrict these privileges, action, if not immediately taken, would be taken before long, and we were strongly advised that the circumstances of the case did not warrant such a material interference with the customs and practices of the people. These arguments were accepted by the Government of India. They have been endorsed by the Select Committee and I may say that I personally share very heartily the conclusions at which the Government of India and the Select Committee have arrived. The Select Committee was therefore practically concerned solely with the first part of the Bill which concerns the control of methods for the capture of fish. The Bill prohibits the use of dynamite and poisoning in all waters, methods which are very injurious, because they destroy a quantity of fish which is out of all proportion to the requirements of the fisher himself. They destroy probably not only more edible fish than he requires at the moment, and also multitudes of fry and small fish which are not edible at all. The Committee have agreed that these methods of capture should be almost, without exception, totally prohibited. They pressed upon me a provision that in thinly inhabited parts of the country where fishing by poison in small pools in the remote recesses of the forest is practised by the people, it should not be absolutely interdicted. I consented to this provision with a great deal of reluctance, because I do not myself know any part of India, however thinly inhabited, in which the requirements of the people living in the neighbourhood cannot be met by the use of nets. But I am willing to leave it to the Local Governments to decide in each case of the kind whether or not the practice should be permitted. The use of dynamite has not the support or sanction of any custom whatsoever. The rules and regulations for the capture of fish in the public rivers have been largely simplified. The most important of them is the regulation of the size of the meshes of the nets used in fishing. We are advised that, if the meshes are of sufficient size to permit the escape of fry and small fish, that the addition to the fish supply in the main rivers will be very considerable, for example, in the Mahanuddy in the Central Provinces where the supply of fish has without question very materially diminished of recent years. We have not proposed to take power to introduce any regulations that are in force in our own waters in any private waters without the consent of the owners. It is in the fish supply of the main rivers on which the supply of India at large depends, and we are quite content with a simple measure which regulates fishing in public waters and which altogether prohibits everywhere a system of fishing by dynamite and poison."

The Hon'ble SIR H. T. PRINSEP said :—" I would venture to make one suggestion, which seems to me to be of importance, in one portion of this Bill,

I do not think it is worth an amendment, but I do not wish in any way to prevent the passing of the Bill. I wish to direct attention to the second clause of section 6 of the Bill which empowers the Local Government to apply the rules with the consent in writing of the owner of a private water and of all persons having for the time being any exclusive right of fishery therein. This clearly indicates the desire of the Government not to take any interference with the private rights of fishery and to take such interference only with the consent of all those concerned in the matter. It seems to me that no sufficient protection is given to the Government for any action under that section. Either that portion of the Bill will be a dead-letter or the Local Government will be reluctant to act, or, if the Government should be willing to incur the risk, it is not unlikely that they will find themselves attacked by some person who has not given his consent. It seems to me, therefore, that there should be some protection to the Local Government if it desires to act in this matter, either by enacting that there should be some enquiry by some competent officer, or that, if after a notification made by the Local Government there is no objection thereto, the Local Government should be empowered to act without any possibility of an objection being raised in the future. I am content to leave the matter in the hands of the Hon'ble Member in charge of the Bill."

His Honour THE LIEUTENANT-GOVERNOR said :—"Objections have been taken in some of the Calcutta papers to this Bill on the ground that it interferes with zamindary rights. I am unable myself to agree in that objection because I cannot conceive it possible that the prohibition of the use of explosives can be held to interfere with any substantial rights of any zamindar. The provisions of the section dealing with poisonous matter are now in such a shape that they enable the Local Government to make exceptions where exceptions are required, which ought to satisfy objectors to that provision. I may also remark that this Bill leaves untouched the local Act, II of 1889, on which the original Bill was modelled, so that the poaching sections as they are termed will remain in force in Bengal, and, if they are of any use to the zamindars, they will still continue to enjoy the benefits of those sections. They may also probably furnish a useful object lesson. They are not much used at present, but, if they are found to work successfully, no doubt the Government will have in time such a body of evidence before it as will enable it to extend the sections to other parts of India."

The HON'BLE SIR JOHN WOODBURN said :—"The Hon'ble Sir Henry Prinsep is quite right in taking exception to the provisions of section 6, clause (2). Probably it would not give the Government a complete right if it introduced regulations of the kind under consideration in the lands of village communities. But I do not myself contemplate the probability of regulations of the kind being introduced in such waters. As I said before, the Government is quite content to introduce its own regulations in its own waters, extending them only to those parts of the country which are held by single owners who have the wisdom and prudence to consider that rules of the same kind will be beneficial to their own tenantry.

"The Lieutenant-Governor is also quite right in saying that the provisions of his local Act are left untouched by this Bill. I had an opportunity to consider with his Government the extent to which the provisions of that local Bill have been applied in the Province. Apparently up to the present very little action has been taken, and I should personally be glad to see that hesitation to take action is continued."

The motion was put and agreed to.

The Hon'ble SIR JOHN WOODBURN moved that the Bill, as amended, be passed.

The motion was put and agreed to.

REFORMATORY SCHOOLS BILL.

The Hon'ble SIR JOHN WOODBURN moved that the Hon'ble Sir Henry Prinsep be added to the Select Committee on the Bill to amend the law relating to Reformatory Schools and to make further provision for dealing with youthful offenders.

The motion was put and agreed to.

RULES OF BUSINESS.

The Hon'ble MR. CHALMERS moved that the Report of the Select Committee appointed to consider certain amendments in the Rules for the Conduct of the Business of the Legislative Council of the Governor General of India be taken into consideration. He said: —"The a nendments are all small amendments, and are, I think, sufficiently explained in the memorandum which accompanies them.

"I do not propose therefore to make any observations unless some Hon'ble Member wishes for an explanation. I may further mention that instead of merely amending the Rules we have published the whole in one set, so that the whole body of the Rules may be contained in a single document."

The motion was put and agreed to.

The Hon'ble MR. CHALMERS moved that the Rules, as amended, be passed.

The motion was put and agreed to.

EPIDEMIC DISEASES BILL.

The Hon'ble SIR JOHN WOODBURN presented the Report of the Select Committee on the Bill to provide for the better prevention of the spread of Dangerous Epidemic Disease.

The Hon'ble SIR JOHN WOODBURN moved His Excellency the President to suspend the Rules of Business to admit of the Report of the Select Committee being taken into consideration.

The PRESIDENT declared the Rules to be suspended.

Th Hon'ble SIR JOHN WOODBURN moved that the Report of the Select Committee be taken into consideration. He said:—"The Select Committee have made very few changes in the Bill, which I had the honour to introduce on Thursday. Those changes are explained in the short report which is in the hands of Hon'ble Members. These I will read, while Hon'ble Members follow.

"We have had useful criticism from the Government of Bombay and from the Medical Board of Calcutta, all of whose suggestions have been embodied in the amendments I have described. But from non-official bodies we have received hardly any suggestions at all, and from the remarks of the public press I understand that the general feeling of the public supports the Government in their sense of the cogency of the circumstances.

"This morning I received a memorandum from the Editor of an intelligent and interesting native newspaper complaining that the Bill was being passed too hurriedly and conveyed no explanation of the Regulations that were to be made under the Bill. I am afraid that it is imperative that, if anything be done at all, it be done at once. As to the Regulations themselves, I explained last Thursday that section 2, sub-section (1), was in effect the simple reproduction of the existing law as regards the City of Bombay. In the Municipal Act for Bombay, as indeed in that for Calcutta also, a very wide discretion is given to the local authority as to the action to be taken in certain grave and critical circumstances. Exactly the same powers are given to local authorities generally by the present Bill. It

is true that they are indefinite, but in those grave and critical circumstances the public must trust the discretion of their executive, and in the action of the Municipal Commissioner of Bombay they have evidence that every possible consideration will be given to the convenience of the public.

"But there are circumstances in which the safety of the people must overcome all considerations of private convenience. Should the Council be pleased to pass this Bill to-day, a notification will at once issue to all the Maritime Governments, arming them with authority to inspect all outward-bound vessels and detain any on which there is any reason to suspect the presence of plague. Detentions of the kind cannot be pleasant to the passengers, but it is a precaution our Governments are bound to take, if the commercial relations with the other States of the world are to be maintained, on which in the present circumstances of India so much depend. In this connection I may say that it will be suggested to His Honour the Lieutenant-Governor of Bengal that some assistance should be given to the Health Officer of the Port of Calcutta either through the Protector of Emigrants or in some other way.

"The second matter on which, should the Bill pass, authority will at once be given to all Local Governments is under section 2 (*2*) (*b*) as to the inspection of travellers by railway. The Government of India are satisfied that, if this inspection is to be of any use at all, it must be a real and efficient inspection. A cursory survey, possibly at night, of the occupants of a compartment has proved not to be enough, and on the advice of the Director General of the Medical Service, the travellers at the inspecting stations will be all required to leave their carriages and be inspected on the platform. This is inconvenient especially at night inspections, but under present circumstances cannot be avoided. The Local Governments will be asked as to the points at which these inspections should take place, but it is obvious that the principal junctions are the most convenient points to intercept converging or diverging streams of passengers. It will interest Hon'ble Members here to know that on the routes between Bombay and Calcutta it will be suggested that the inspections take place at Kalian, Bhusawal, Bilaspur, Naini and Assensol. At Assensol as at every other specially important point there will be a commissioned European medical officer; at almost all inspecting stations medical officers of a higher status than are now employed will be detailed; and every assistance will be given by the Government of India to Local Governments in the way of necessary additions to their medical staff.

"The inspections may entail a delay of 20 minutes to half an hour at each inspecting station, but the Public Works Department who have been consulted have arranged to carry out any necessary changes in the train services.

"It has been suggested that all travellers from Bombay should be detained in quarantine camps on the way to Calcutta. I venture to think that an arrangement of that kind would be completely avoided. A traveller from Bombay has only to book to Allahabad. On his renewed journey it would be impossible to detain him any more than the genuine travellers from Meerut and the Punjab. The case is serious, but not so serious as to warrant the entire interruption of railway traffic to Calcutta from Upper India. If travellers develope the fever after completion of the journey, it rests with the local authority to take the next step. If they will insist on the evacuation of every house in which a case occurs and its thorough cleansing and sanitation before it is permitted again to be occupied, we have reason to believe on the advice and authority of the Director General that the spread of the fever can be kept in thorough check. We will assist the local authorities meanwhile in preventing the entry of any traveller who shows any suspicious symptoms whatever. Of the necessary camps and hospitals, many of them are already ready. The Local Governments will be asked to prepare the others with promptitude. In these arrangements the health of the inspecting stations will be carefully considered, and, for example, at Assensol the isolation sheds will not be in Assensol itself, but at some place in the neighbourhood to be selected by the Local Government.

"At the European Conference which is about to take place at Venice India will be represented by Dr. Cleghorn, the Director General of the Medical

Service, the highest authority the Government of India could depute, not merely from his rank and experience in the profession, but from the local knowledge he has acquired by his personal visits to the infected centres at Bombay and Kurrachee, and the views he entertains that the plague is almost entirely due to local conditions, and is not yet at least materially infectious or contagious, will be communicated to the Conference with all the weight of his high standing and special knowledge."

The Hon'ble MR. JOY GOBIND LAW said:—"My Lord, in connection with this Bill I wish to say a few words. There is a good deal of alarm in the town in respect of the pilgrimages to Mecca. I see from the papers that the Madras Government has asked the sanction of the Government of India for stopping pilgrimages altogether from Madras, and it would allay the alarm very much if an assurance could be given by the Government that pilgrimages would be prohibited from Calcutta also. I need hardly say that pilgrimage is a great danger and requires drastic remedies. It is no doubt a serious thing to prohibit pilgrimages, but then the danger is so great that any measures that may be taken to guard against it would be welcomed by the people."

The Hon'ble MR. SAYANI said:—"My Lord, I do not propose to take up the time of this Council by offering lengthy observations on this Bill. It is true that this Bill has been hurriedly introduced in this Council and that it is intended to pass it by suspending the ordinary rules. It is also true that this Bill does not provide a definition of the diseases against which it is intended to provide, and that it is possible that this want of a definition may lead to mistakes. It is also true that the powers intended to be conferred by this Bill are of a far-reaching character and are at the same time vague. It is also true that in ordinary times and under ordinary circumstances the rules should be strictly adhered to and full opportunity should be given both to the public at large and to the parties likely to be affected by provisions of this Bill for full consideration and discussion, and also for making such representations as may be deemed necessary or desirable. It is also true that it is incumbent on this Council to define clearly and carefully the nature of the disease in respect to which measures are to be adopted and powers are to be conferred to enforce such measures, and that such powers should not be of a vague character, but should be clearly and carefully defined, and that every precaution should be taken to prevent not only evil use being made of such powers, but also the possibility of any indiscreet exercise of them. But, my Lord, the circumstances in the present case are of an extraordinary and exceptional character: Government deem it essential in public interest that this Bill should at once become law, and they urge that no time may be lost in clothing them with legal authority to deal with the plague, and ask for plenary powers to do so; and it is considered that it will be difficult, perhaps even impossible, to insert definitions which may not be successfully used to defeat the object of this Bill which is well known. Under these circumstances the duty of this Council is clear. It is to grant to Government what they ask for and to leave to Government the responsibility.

"It must be admitted that a measure like this Bill must necessarily entail hardship on some persons, but it must also be admitted that in the interests of public health and of public welfare, immediate and vigorous measures should be adopted, and that, if on account of such measures there arises some hardship, the same should be cheerfully borne in the interests of the public generally. So far as Bombay City and Bombay Presidency are concerned, from the experience we have had so far, it may be safely concluded that there is every hope that the powers intended to be given by this Bill, wide as they are, will be exercised with a due regard to the feelings of the people, and that there will be no valid ground for complaint. And here I consider it to be my duty to state publicly that the sincere thanks of the people of my Presidency are due to His Excellency, Lord Sandhurst, for his constant and unceasing as also calm and sympathetic efforts towards getting under control and preventing the spread of the plague now unfortunately prevailing in my city and in some parts of my Presidency; and it is to be hoped that the powers intended to be conferred by this Bill will very much strengthen His Excellency's hands as well as allow him free scope in dealing with

the plague; and as His Excellency is on the spot and knows well how to act best in the matter, his efforts will, I am sure, soon be crowned with success.

"My Lord, this Bill, wide as it is, is necessarily a temporary measure,—in fact, it is at best a palliative. It is my humble but sincere prayer that under merciful Providence this Bill may have the desired effect and that the efforts of those working under it may soon prove effectual, and that the plague may be got under control. But, my Lord, no evil can be completely eradicated unless and until the root of that evil is first eradicated. I trust, therefore, that as soon as convenient, Government will be pleased to devise measures with a view to eradicate the plague and to render its occurrence impossible. It will be readily admitted that it is incumbent on Government not only to ensure the safety of the country from the plague, but also to secure the country from what is equally as bad as, if not worse than, the plague, namely, the possibility of an utter collapse of its commerce, for a continuous liability to plague will, in addition to entailing human misery, mean, if I may be permitted to use the phrase, excommunication of India from the commercial union of the world. I will not discuss here the nature of such measures; I have no doubt an opportunity will be given to the public to offer suggestions; also that an exhaustive inquiry will be made into the causes of the plague. But I cannot help remarking that even this boasted metropolis of India in which this Council is now discussing this Bill is not free from the reproach of having higgledy-piggledy habitations, more fit to be denominated nurseries of disease rather than human dwellings, which might well be removed in the interests of health and even to the benefit of the Municipal coffers without any permanent loss to the owners, and that even in circles which ought to know better, there is a want of a proper appreciation of ordinary facts, such as the necessity of free sunshine and free air, the simultaneous appearance of drought, famine or scarcity and diseased grain, of famine and plague; the necessity of segregating the grain and keeping the place dry; the necessity of removing certain articles from the thickly-populated parts of the city to the open places outside, and other facts of a similar nature.

"In conclusion, I beg to support this Bill and hope that it will have the desired effect."

The Hon'ble RAO SAHIB B. BHUSKUTE said:—"My Lord, the Bill as it has been modified by the Select Committee hardly needs any comments. Whenever dangerous epidemics break out, the anxiety to which the native mind is subjected is inconceivably excruciating. Owing to want of proper sanitary arrangements, the outbreak first manifests itself in the quarters of the poor, and eventually rages there with fury. In times of scare a slight error or oversight in legislation, however well meant, renders those for whom it is meant utterly panic-stricken and unnecessarily uneasy.

"Consolation in death to which every individual has a right can only be had when a sufferer is in the midst of his relatives surrounded and tended by them. But in cases of fearful contagious epidemics an individual sufferer must be deprived of this inviolable right for the better preservation of those very persons who are so dear to him, not to think of the other members of his community. This is no doubt a painful necessity and it must be obeyed. But the harsher the legislation the greater is the probability of its evasion; and evasion would propagate a further spread of the disease.

"In the face of such insurmountable difficulties the best course would be what has been so laudably taken by the Select Committee of requiring or empowering through Your Excellency any person to take efficient measures for the eradication of any such disease. Just as in matters of taxation Your Excellency's Government would indicate the line and let alone the Local Governments in matters of detail, so also in matters like these, the guiding principle of Your Lordship's Government has been the same. In the present emergency such a step was infinitely desirable. If to meet it laws were made in this Chamber independent of Local Governments, those who have better opportunities for ascertaining details and for acting in unison with the desires and requirements of the people, and that, too, with no further severity, would have been made accessory to the spirit of this Bill. Their freedom of action would have been a little curtailed. Moreover, the people would have had no

chance of communicating with their law-makers, and of having had a satisfactory arrangement in keeping with the existing state of things.

"No doubt the provision contained in section 2, clause 3, of the original Bill aimed at obviating the difficulties I have referred to. But even in that case the Local Governments could not have effected an agreeable compromise with the people threatened. But, as it is, there is no use dwelling upon what would have been. The present Bill embodies measures of a general character which would give satisfaction to all. I would, however, wish that there would be no necessity for its application either in the nearest or in the remotest future.

"The heartfelt thanks of all those unfortunate individual sufferers who may be threatened with diseases the Bill aims at preventing are due to the Select Committee in general and to the Hon'ble Mover in particular."

The Hon'ble RAI BAHADUR ANANDA CHARLU said:—"I suppose this is the time when my amendments have to be spoken to. I wish to ask Your Lordship's leave to withdraw the first two amendments set against my name on the paper. There is also a large portion of the third amendment which I would ask Your Lordship to be allowed to drop. There is, however, some portion of it which I would desire to retain. That portion is that in clause 2, sub-clause (2), paragraph (*b*), between the words "in hospital" and "or otherwise" the words "temporary accommodation" may be inserted. I have explained the object of it to the hon'ble mover and I have his concurrence for submitting it to you.

"There are some other observations which I have to make on the Bill if this is the proper time to proceed with them."

His Excellency THE PRESIDENT said:—"I think the hon'ble mover is taking it the wrong way. What we are discussing now is the motion which has been made to take the Report of the Select Committee into consideration. Afterwards the Hon'ble Member can move his amendment."

The Hon'ble RAI BAHADUR ANANDA CHARLU said:—"My observation on the Bill is this, that I certainly support the favourable consideration of the Report."

"This Bill is the outcome of a grave emergency and equally grave is the objection that it is introduced at a time of wide-spread panic. At best, therefore, we have to make a choice between two evils. Influential as is the opinion on both sides, one may say that the passing of the measure is more likely to do good than withholding it, having regard to the changes made by the Select Committee.

"I take it that the working of the Bill will mainly rest with Local Governments, which are in touch with the local leaders and which therefore would be readily accessible to those local leaders. This removes all hitch, all possible overdoing or delayed redress. I take it also that the Government of India has reserved the privilege of *working* the Bill only as a matter of last resort.

"I was aware that the word 'otherwise' in the clause relating to segregation was elastic enough to include 'camps and accommodations that private persons might provide.' But I thought it best to indicate the direction in which the public at large would have it exemplified. I have no doubt that care would be taken to work this part of the Act with the least possible friction with the people, their feelings or their wishes.

"It is of supreme importance whose suspicion should lead to steps being taken in this direction. It is *here* that undue harassment and consequent breaches of peace are most widely feared. The introduction of the words 'the inspecting officer' is a decided improvement on the Bill as it originally was. There is still an element of vagueness in it. What is most expedient, to allay public excitement in this respect, is that the persons invested with the power of inspection must be men who have something to lose in the way of reputation or status. Decently qualified medical men would be the lowest grade of persons who should hold this sacred trust. As to this, the Bill leaves this open, I say no more."

The Hon'ble the MAHARAJA OF DURBHUNGA said :—"My Lord, I desire to congratulate Your Lordship's Government on having introduced this measure for the prevention of the spread of dangerous epidemic disease. It is a measure worthy of a great and enlightened Government which watches with anxious solicitude over the health and the happiness of the people. It is a part of that noble and beneficent policy which has recently found expression in that magnificent system of organisation which has been formed throughout the country to meet what has rightly been described as the greatest famine of this century. My Lord, war, pestilence and famine are the scourges of life—call them visitations of Providence if you like. A Government which sets about in right earnest to meet famine and pestilence, to mitigate the miseries of famine-stricken sufferers, and to prevent the spread of the plague is entitled to the lasting gratitude of the community over which it presides. I therefore give expression to the sense of the community when I say that we are deeply grateful to Your Lordship's Government for the Bill which is now before us. I could only wish that it had been introduced earlier, and that when it became definitely known that the plague had appeared in Bombay, decisive steps had been taken to root it out by establishing a cordon round the infected area or by taking such other measures as might have been deemed necessary by sanitary experts. I quite see that the matter is urgent, and that it does not admit of postponement. I for one, having regard to the gravity of the situation, would be the last person to counsel the adjournment of this important measure. But I cannot help remarking that, if the Bill had been introduced earlier, the opinions of representative men and of representative non-official bodies might have been obtained and valuable suggestions placed at our disposal which would have been of material help in legislating upon this novel and somewhat difficult subject. Nor is the fact to be overlooked that opposition from a certain class who hold very strong religious views is inevitable. Discussion would have allayed the spirit of opposition, and the course of legislation been rendered somewhat more smooth and easy. Under the circumstances, I am bound to say that it would have been a great advantage if this Bill could have been introduced at the very beginning of the session. Full opportunity would then have been afforded for the thorough discussion of the measure in all its bearings. I need hardly observe that a measure like this, in order that it may be successful, must enlist the sympathies of the people. Supported by popular feelings, the sanitarian may achieve great results, but he is doomed to failure if he has to work in the teeth of popular opposition. But, my Lord, I have no misgivings in the matter. The people of India are so law-abiding, so fully sensible of what is conducive to their best interests, that they will not throw difficulties in the way of the Government in the working of a measure like this if the officers of Government can bring home to their minds that the precautions which are taken are necessary to safeguard them against the visitation of one of the most dreadful scourges that have ever afflicted the human race. But, as I have mentioned before, there is a class of people who view with feelings of the greatest aversion some of the sanitary precautions necessary for the prevention of the disease. There are many instances where persons purposely neglect to report cases of contagious disease in their family on account of the great dislike they have to the removal of the invalid from their dwellings to a hospital. Consequently the objects that we have in view in these cases are frustrated. Everything should, therefore, be done to explain to the people the objects that the Government has in view, and to prevent any unnecessary misapprehension or irritation. It is essential for the successful working of the measure that it should receive the hearty co-operation of not only the educated classes but also the masses. Everything should be done to smooth any feelings of opposition, and in this respect we would have received some valuable suggestions if we had more time to consult the different non-official representative bodies. I am sure, my Lord, that this Bill, passed under circumstances of a pressing necessity, which will admit of no delay, is only a tentative measure ; that changes which experience may suggest will, from time to time, be promptly introduced, and that the suggestions of municipalities and other public bodies will, in the working of the measure, receive the consideration to which they are entitled, specially as regards the creation of barriers to protect local areas."

THE Hon'ble MR. CHALMERS said :—"Perhaps I may say one word with reference to what has fallen from the Hon'ble the Maharaja of Durbhanga. The considerations he has put forward are just those which we have felt ourselves. It is exactly because we have not had time to consult local bodies to get at local feeling, and to consult the leaders, that the Bill has necessarily had to be drafted in a vague form. The Regulations to be made under the Bill are left to be made hereafter as emergencies may arise or as necessity may require, but in making those Regulations we hope that we shall have the assistance of the people, and that we shall have the assistance of the leaders of the people and of the Local Governments, who will all co-operate with us and will make suggestions which will eventuate in the actual practical steps to be taken. Of course, we are legislating for India at large. Some parts of India may be exposed to a very different kind of peril to what other parts are exposed. If we had to provide precise measures to be expressed in the Bill itself, we might be providing measures much too drastic in some places and not drastic enough in other places. The disease is a sudden emergency which has arisen. It is urgent in some places; it is less urgent in others. The measures to be taken will have to depend on what may arise in each particular place, and will be taken with local knowledge, local experience and with reference to the particular circumstances which may arise. I quite sympathise with what the Maharaja of Durbhanga has said, that, if we had been warned in time, we might have proceeded sooner; but even then I think we should have been in the same difficulty. You cannot provide by hard-and-fast rules for emergencies which have to be met on the spot, at the moment, and in a particular way which cannot be foreseen."

His Honour THE LIEUTENANT-GOVERNOR said :—"My Lord, this is a question of such supreme importance to the city in which we are now sitting, and to the Province over which I have the honour to preside, that I trust I may be pardoned, if in reviewing the discussions and the Bill itself I enter upon some topics which would have been more appropriately touched upon at the time when leave was asked to bring in the Bill. I was not, however, present at the Council on that day, and I trust Your Lordship will excuse me if I travel somewhat beyond the limits of an ordinary debate on the Select Committee's Report. I welcome the Bill heartily, and I only regret that it was not introduced sooner. When Calcutta was first threatened with plague, or rather when the plague first broke out in Bombay and the possibility of Calcutta being attacked became apparent, I took, as Your Lordship is aware, every step that occurred to me to guard against its approach. I recognised that the law as it stood was hardly sufficient to cover the whole of the circumstances that might arise in such an eventuality. But when I appointed the Medical Board in Calcutta and gave them full powers, I assured them that, should the plague break out, any steps whatever that they might feel it necessary to take would receive the sanction of Government even should it become necessary to resort to special legislation. This Bill will, I am happy to see, prevent the necessity of my having any recourse to special legislation in the Bengal Council; for the Bill deals, as I read it, not merely with passengers by sea and with passengers by rail, but it also gives very effective powers to the Government of India and Local Governments to take any measures which appear to be necessary to deal with the emergency of plague should it occur. Dealing first with the question of passengers by rail, I should like to observe here that that was one of the very first points regarding which I took action. On the 1st of October last I addressed the Government of Bombay—I addressed His Excellency the Governor personally—asking whether I could feel assured that, if the plague increased in Bombay, Government would take effective measures to prevent the departure of any infected passengers from that city, and I was assured that His Excellency was in communication with the Railway Administrations and that all that could be done would be done if the necessity appeared clear. Almost immediately after that I addressed the Governments of the Central Provinces and the North-Western Provinces, suggesting to them certain block stations, at which passengers should be medically inspected. I was met by assurances from those Governments that steps would be taken to meet my views, and I arranged, in communi-

cation with the Medical Board, that we should have a second cordon, as it might be called, inside Bengal. There were to be examiners at Bhosawal, Warda, Itarsi, Allahabad and other stations in the Central Provinces and North-Western Provinces, and we arranged with the East Indian Railway to have inspections at Asansol. I also directed the Assistant Superintendents of Emigration, European officers, stationed at Asansol and Raniganj to assist the Railway officers in carrying out those inspections. Mr. Lyall, the Chief Commissioner of the Central Provinces, while undertaking to do what he could, informed me on the 13th October that he had addressed the Government of India suggesting that these were really matters of Imperial concern and should be taken in hand by the Government of India and not left to the disconnected efforts of Local Governments. And just about that same time the Government of India did address the leading Railway Administrations inviting them to take steps for the inspection of passengers at all stations in Bombay itself, and at all great changing stations and principal junctions. We were left under the impression that effective medical inspection was taking place. This has now, however, proved to be a mistake. What we have to recognise as regards this question of inspection is that no system of land quarantine or inspection,—and inspection really falls far short of quarantine—can be absolutely guaranteed to be effectual. The latest authority on the whole subject is a German writer, Dr. Scheube, who has spent many years of his life in the East and has published quite recently an extremely valuable book in German upon the whole question of oriental diseases. That book was only brought to my notice this morning, but I am endeavouring to arrange that the whole section dealing with the question of plague which I am given to understand is one of the most complete examinations of the subject that has yet appeared—I am endeavouring to arrange in communication with the German Consul or otherwise for a translation of that section of the book and for its early publication for the guidance and information of all concerned. But that you may understand what writers of that authority demand in an effective quarantine, I may tell you that what he recommends is that there should be seven days' quarantine at the frontier, as he calls it, for all passengers and a military cordon round the affected locality; but this really assumes, first, that we are adequately provided with a frontier, that a frontier in fact exists,—he uses the expression from the point of view of the continental authorities—and, secondly, that the military cordon or agency on the frontier is itself proof against infection, and neither of these assumptions is in accordance with facts. The Bengal Government will, under the instructions of the Supreme Government, do all that it can to form what I may call an inner line in Bengal, but I do very strongly insist upon this that the nearer to the affected locality that the first line is drawn, the more effective the check is likely to be. Once you have passed out into the great Railway system of Upper India where passengers are flowing in from all directions, you are subjecting thousands and thousands of people to restrictions which are only required in the case of persons who come from affected areas. Therefore I should have been glad, if it had been possible, to draw the line of railway inspecting stations as near as possible to Bombay itself. There is no doubt that the arrangements of the Bombay Government as regards railway inspection have, I fear I must say, broken down. Crowds have poured out from Bombay all over India, who may possibly have carried infection with them, and we must of course endeavour as best we can to guard against the results of that dissemination. Where they have already got into big towns like Calcutta, it will be extremely difficult, if not impossible, to discover or trace them. I understand, for instance, that numbers of Sonars, who come from a certain ward in Calcutta and who work in Bombay, have come back to their homes during the last few weeks, and although I have issued special instructions that their neighbourhood, their families and themselves, as far as they can now be discovered, should be carefully watched, yet it certainly is an uncomfortable thing to know that so many possible sources of infection have come into the city unchecked. You must also recognise that the difficulties connected with this medical inspection will be by no means small. You will have to segregate all suspected cases. Each day's 'receipts', if I may use the expression, will have to be kept separate because, for instance, if a case of plague breaks out

among the gang you separate on Monday, it would be very hard that the gang which arrives on Tuesday should be held to be contaminated by being mixed up with them. To mitigate the hardship to the passengers, very elaborate arrangements will have to be made for the detailed working of these camps. I have summoned a meeting of my Medical Board for Saturday, which I purpose to attend myself and to discuss with them the detailed arrangements which we will endeavour to make as complete as possible; but I must say this, that with the many avenues of traffic, the rivers, the roads, as well as the rail, I should not be surprised if these measures should fail, and, therefore, it is that I welcome the other provisions of the Bill of which comparatively little notice has been taken to-day. For instance, the Bengal Municipal Act which is in force outside Calcutta and which applies to such large, crowded and insanitary stations as Patna, Dacca and Howrah, contains no provisions dealing with disease at all. No one can be isolated, no one can be sent to hospital, no one need report disease, there are no provisions for cleansing houses, destroying huts, disinfecting or destroying clothing, or providing special conveniences under that Act, and in Howrah at the present time there is nothing to prevent a plague patient from using a ticca gharry or to require the owner of the gharry to disinfect it. Without bringing the Municipal Act of Bengal under amendment, this Bill, which I trust the Council will pass to-day, will give us the necessary power to lay down proper regulations on that subject in those towns. Then, as regards Calcutta itself, the Medical Board have already prepared, as most of the Council are aware, a series of draft Regulations under section 324 of the Act which are to be brought into force with the sanction of the Medical Board whenever plague appears. There was some difficulty in getting these regulations passed through the Municipal Corporation, and they are not, it appears to me, in all points complete or satisfactory. It will be possible for us under this Act to complete those regulations where they are deficient, and I shall not myself hesitate to do so. I have received this morning a letter from the Corporation in which it is admitted that the law is insufficient to enable them to deal with the various matters referred to in the reports of the sanitary officers which most of the members have seen, such as overcrowded houses, neglected latrines and huts, accumulations of filth, insanitary cowsheds and stables, and the disposal of house refuse. It is true that this report is only the Report of a Sub-Committee of the Corporation, and under the system in which business is managed there it is quite possible that the Sub-Committee's Report may be set aside by one of the other numerous Committees, or by the Corporation itself, but it has been forwarded to me under the Chairman's signature, and, as such, I feel bound to receive and accept it. This Act will enable the Government of Bengal to deal with shortcomings of that description pending that general revision and amendment of the Calcutta Act and the constitution of the Calcutta Corporation, which the more and more I see of it the more and more am I convinced is urgently called for.

"One word as to sea quarantine. We long ago put into operation the regulations for dealing with ships coming to Calcutta. The present Act will enable us to deal with the case of the pilgrims to which my friend the Hon'ble Babu Joy Gobind Law referred. I confess that, personally, I rather sympathise with his view, that in view of the enormous importance of not allowing a single plague case to get out of India westward, we might well do as the Dutch Government or other Governments would have done and stop the pilgrimage altogether; but that is a very large question, on which I am somewhat surprised that the Hon'ble Mr. Sayani or some other Mahomedan Member did not see fit to make any remarks. If that step is not taken, what the Act will enable us to do will be this. It will enable us to say that no pilgrim shall leave Calcutta unless he has been under medical observation for a reasonable period of time (Dr. Scheube says, seven days is sufficient ordinarily), and we hope that we shall probably be able to make arrangements for having pilgrims brought together for the purpose of that observation, which at present it is not possible to do without special arrangements. They come in undistinguished from ordinary passengers to Howrah from Bombay. Some of them who have been sent back from Bombay I have arranged to stop at Naihatti without allowing them to come near Calcutta at all; those who are not in

possession of means for bearing the extra expense involved in securing a passage from Calcutta to the Hedjaz. Many of them went on to Bombay hoping to get away from there and have come back, having spent their money, and those we have sent home direct. Those coming into Calcutta, thanks to Sir John Lambert, we endeavour to keep an eye on and in touch with through pilgrim brokers; but my own view is that the best plan would be to bring them all together in some place like one of the Colonial Depôts at Garden Reach and have them under strict observation.

I think, my Lord, I need say little more. We are all interested in doing all that we can to prevent the extension of the plague throughout India, and especially in preventing its extension to our seaports. A good deal has been said to-day about the Regulations under the law conflicting with native customs and prejudices, and it was said in the corporation here that many of the natives would rather die of the plague than allow themselves to be segregated or removed. My Lord, we hope that under the good advice and influence of leaders of the community those fears may be brought within reasonable exercise, because it is perfectly certain that we could not allow the whole town to run the risk of plague infection merely because the source of that infection happened to be a woman. I think that segregation can be enforced with every due regard to purdah requirements. We have lady doctors, lady nurses and female nurses of various creeds, whose services we can indent for, and I have no doubt the Medical Board, if it becomes necessary to enforce segregation, will lay down such Regulations as will prevent any infringement of Oriental decorum in the matter; but the powers of effective segregation appear to be absolutely essential, for nothing is clearer than this, that mere sanitary measures, when once disease gets hold of a town, are not sufficient to prevent its spread. In conclusion, my Lord, I may say that this is a matter which we all have deeply at heart, and that no pains will be spared by myself or the officers who serve under me in giving effect to the policy of the Government of India in connection with this measure."

The Hon'ble SIR JOHN WOODBURN said:—"Complaint has been made by His Honor the Lieutenant-Governor and by the Maharaja of Durbhanga that the Government of India did not take earlier action in the matter of introducing legislation. The medical advice on which the Government of India throughout relied in the earlier stages of the plague was that the plague was identical with that of Hong Kong, and would, like the Hong Kong plague, confine itself to the limits in which it broke out; that cases might occur among travellers who passed from Bombay into the interior, but that the plague would not establish itself in interior stations. That anticipation of our advisers has proved to be incorrect, but it is only within the last three weeks that it has been made clear that in places like Poona and Ahmedabad the plague did spread, and the Government of India was traditionally reluctant to arm itself with extraordinary powers until the necessity for those special powers had been established. The necessity has been established and action has been taken. I do not think the Government of Bengal has much reason to complain of the arrangements, preliminary and temporary, which have been made for the detection of cases of plague on the way from Bombay. The Sonars and other people have arrived, but to the best of my information there have been no cases of plague in Calcutta up to the present time. I trust, with His Honor the Lieutenant-Governor and with the other gentlemen who have spoken, that the additional precautions which are now being taken will prove more effective than they were in the past. I admit that they were not effective, but I hope that the result may yet be that we shall be able to confine to the Western Presidency cases of absolutely epidemic plague. I welcome the assurance of the Lieutenant-Governor that he and his officers will take every measure that is necessary in the way of segregation camps and otherwise to ensure that the plague shall not establish itself here or in this Presidency. I have said already that I do not anticipate the quarantine Regulations will be absolutely efficient; that cases will occur in which detection will be difficult, and that people affected with the malady will pass the barrier, but I have also the hope, which I repeat on the authority of the Director-General of the Medical Service, that, if

measures such as have been indicated are taken in those Municipalities in which a plague case may assert itself, the eradication of the plague centre can be made.

"My hon'ble friend Mr. Ananda Charlu spoke of the anxiety with which he regarded the provision of medical inspection at the different inspecting stations. I have said that at the more important ones we shall have in every case European Medical Officers, and at every other station we shall have the assurance of Local Governments that the officer detailed for the duty is of sufficient experience and perfectly efficient for the work. On the question of the movement of pilgrims I am afraid that my friend the Hon'ble Mr Sayani will not be quite of the same opinion as the Hon'ble Babu Joy Govind Law. The Government of India is traditionally unwilling to interfere with religious practices and prejudices and as by far the greater majority of the pilgrims to Mecca come from Upper India and the regions behind, it seems unnecessary to prohibit altogether the passage of pilgrims provided they come from a locality not in itself an affected one. I was informed only a week ago that there were 300 Muhammadan pilgrims in Bombay who had arrived there in anticipation of going to Mecca, and it was proposed that these pilgrims should be allowed to go to Calcutta. We sent an instant reply to the Bombay Government that the passage of these pilgrims should be stopped and that arrangements must be made for the segregation of these 300 pilgrims in an observation camp at Nassik or some other place from which they should not be allowed to proceed to Calcutta until the Medical officers had inspected and passed them. I am sorry to hear from His Honor the Lieutenant-Governor of Bengal that apparently some of these Bombay pilgrims have succeeded in evading the authorities and have escaped. I hope the measures which have been taken by the Bombay Government in consequence of the desire expressed by the Government of India will be effective in preventing any further pilgrims coming to Calcutta until they can proceed with safety."

The motion was put and agreed to.

The Hon'ble RAI BAHADUR ANANDA CHARLU moved that in clause 2, sub-clause (*2*), paragraph (*b*), of the Bill, between the words "in hospital" and "or otherwise", the words "temporary accommodation" be inserted. He said:—"I have in my previous remarks explained the necessity for this small amendment. The word 'otherwise' is wide enough in extent, but in giving an interpretation of the word it is desirable that an indication should be made by specifying other methods than hospital. In that view it was thought proper that I should have these words inserted, and I have explained my views to the hon'ble mover, and I believe I have his concurrence."

The Hon'ble SIR JOHN WOODBURN said:—"I have no objection to the amendment which Mr. Charlu proposes. He had not seen the revised Bill as it passed the Select Committee. I am sorry that Mr. Charlu was not a member of the Select Committee himself, for on other Bills he has given us much useful assistance. With the one exception which he has now proposed to the Council, all his other amendments had been already included in the amendments of the Select Committee."

The Hon'ble PANDIT BISHAMBAR NATH said:— "I beg to submit that, although the amendment is a small one, its adoption is calculated to be useful to the working of the measure which it is proposed to pass into law to-day. His Honour the Lieutenant-Governor of Bengal has no doubt been pleased to assure us that the details of the measure will be worked very smoothly and with a due regard to the decorum of Oriental customs and prejudices. I am also aware, my Lord, that the expression 'otherwise,' as used in the part of the clause referred to, is very elastic and is comprehensive enough, but in order to avoid all friction, suspicion and discontent, it is safe and proper that the amendment proposed by the Hon'ble Mr. Aranda Charlu should be adopted as a safegaurd. Your Excellency is aware, I believe, of the peculiar prejudices and habits prevailing chiefly in my part of the country. I refer to the

North-Western Provinces and Oudh, where segregation and isolation in such cases would always be looked upon by the people with feelings of terror and fear, and there are many people in that part of the country, especially the Mohamedans who are bound by the customs and observances relating to purdah, that on no account will they be willing to subject themselves calmly and quietly to the process of segregation and isolation. Therefore, my Lord, it is, I think, advisable that some latitude may be given in the exercise of the power of segregation and isolation. What I mean to submit is this: that where segregation is to be enforced as a precautionary measure, the people affected by disease may not be forcibly removed to hospitals, but that camps provided by the people or the community concerned may be allowed to be used for the exercise of the measure. That will afford some relief to the people, and they will not then regard this measure, which is indeed a beneficial one, as one calculated to excite too much needless terror. With these observations I again repeat the request that the amendment, though a small one, may be adopted if there can be no possible objection to its adoption."

The Hon'ble Mr. SAYANI said:—"Perhaps Your Lordship will allow me to take this opportunity to speak to one matter which was referred to by His Honour the Lieutenant-Governor of Bengal and the Hon'ble Sir John Woodburn. It is the pilgrimage matter. Naturally I did not say anything about pilgrimage because it is a delicate matter. It is one of the commandments that pilgrimage should be performed, but at the same time it is not incumbent on any one to perform a pilgrimage unless he has the means not only of supporting his family during the time, but also of supporting himself while he is travelling from the place he is in to the place of the pilgrimage. There is also another consideration and that is this: that although it is the duty of a good Moslem to go and perform a pilgrimage, still the traditional law says that, if a person is in a place where there is plague, he should not leave that place and also that, if there is plague at the place where he desires to go, and if his own country is safe, that he should not leave his country to go to that place. Therefore the reasonable thing to do is that the persons desirous of performing the pilgrimage might be persuaded to put off their intention till the danger has passed."

The Hon'ble SIR JOHN WOODBURN:—"That has been done already through the Local Governments."

The motion was put and agreed to.

The remaining amendments, of which notice was given by Rai Bahadur. Ananda Charlu, were not proposed.

The Hon'ble SIR JOHN WOODBURN moved that the Bill, as amended, be passed.

The motion was put and agreed to.

GENERAL CLAUSES BILL.

The Hon'ble MR. CHALMERS moved for leave to introduce a Bill to consolidate and extend the General Clauses Acts, 1868 and 1887. He said:—"It is not necessary to say much in asking for leave to introduce this Bill because the Bill is not intended in any way to change the existing law. The object of the Bill, like the Acts that it proposes to consolidate, is simply to shorten the language of future statutory enactments and, as far as possible, to provide for uniformity of expression where we have identity of subject matter. I think everyone will agree with me that it is convenient that both these Acts, which are already on the Statute-book, should be consolidated, so that we should have our Legislative Dictionary and our Rules for the construction of Acts in one and the same enactment. But I propose to go rather further and,

in support of going further, I may perhaps add a few words and may deal for a moment with the history of legislation of this kind. The first Act of the kind was passed in England. It was an Act called Lord Brougham's Act, and was passed, I think, in 1851. That Act contained definitions of certain words which were continually used and defined in Acts of Parliament, and further contained one or two convenient rules of construction. Lord Brougham's Act was adopted and somewhat extended by the Indian Act of 1868. The Acts in both countries were found to be convenient and to work well, and, in 1887, the second Indian General Clauses Act was passed, further extending the same principle. That Act was drafted by my friend Sir Courtenay Ilbert, now Parliamentary Counsel to the Treasury at home. When he went home, he carried the principle rather further, and he drafted the English Interpretation Act of 1889 which carries on the same principle. In this Bill I propose, first, to consolidate our two Indian Acts and then to adopt such of the provisions of the English Interpretation Act of 1889 as are applicable to Indian legislation and Indian circumstances. I may say that, before putting the draft into its final form, I consulted Sir Courtenay Ilbert about it, and he most kindly gave me the benefit of his criticisms and advice on the provisions of this Bill. The English Act was very carefully considered by a strong Committee of the Lawyers of the House of Lords and its provisions were very carefully sifted, and although Sir Courtenay Ilbert gave me his advice on the point privately, I am very glad to publicly acknowledge the help and assistance he has given me.

"About the actual provisions of the Bill I think I need say very little. It will of course go to Select Committee, and I shall have the benefit of the criticisms of the legal Members of this Council on the actual wording. The first operative clause is clause 3. Clause 3 contains a number of definitions. They are all terms which are constantly used in Acts. It is convenient to have one *primâ facie* meaning for every term which is in constant use, and in all Acts, where possible, the same words should have the same meaning, but of course the definitions are only *primâ facie* definitions. The clause provides that in future Acts these particular terms will have the meaning given to them unless a special Act otherwise provides, but of course in any particular Act you can always give a special definition if it is required for the purposes of that particular Act. Clause 4 saves the effect given by the past Interpretation Acts to past legislation. As regards the general principles of construction, it is convenient that the effect of a repeal should be enacted once for all; that people should know when an Act is repealed what the effect of the repeal is, and it is convenient also as far as possible that Indian and English legislation should move on the same lines, and that a repeal in England should have the same effect as a repeal in India. We have adopted instead of the old Indian clause the fuller clause of the English Act. Further on in the Bill we have reproduced certain clauses which we generally insert in Acts but which it is inconvenient to insert in every Act. It is far better to have them enacted as a general rule unless they are negatived; such, for instance, as when the Government is empowered to appoint a particular person it may appoint him either by name or by the name of his office. That is the clause which we very frequently insert. We have thought it convenient to have it as the general rule unless it is negatived. I think I may sum up what I have been describing by saying that this Bill is not one for creating new legislation, but that it may be described as a Drafting Accidents Prevention Bill."

The Hon'ble MR. JAMES said :—"I should like to say just one word. I hope that when the Bill is considered in Select Committee, two little English words will be satisfactorily defined. These little words are 'may' and 'shall.' The Legislature has frequently said that certain officers 'may' do such and such things. The Courts on the contrary lay down that they 'shall' do such and such things. Conversely, the Legislature says that certain officers 'shall' do such things. The Courts construe the word as 'may' or under certain circumstances 'shall not.' If these two words can be more accurately construed, it would be a great satisfaction to those who have to carry out the law."

The motion was put and agreed to.

The Hon'ble MR. CHALMERS introduced the Bill.

The Hon'ble MR. CHALMERS moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India in English, and in the local official Gazettes in English and in such other languages as the Local Governments think fit.

The motion was put and agreed to.

The Council adjourned to Thursday, the 11th February, 1897.

J. M. MACPHERSON,

Secretary to the Government of India,
Legislative Department.

CALCUTTA;
The 5th February, 1897.

offices specified in the first column of the annexed table to be the presiding officers of the Courts specified opposite those offices in the second column of that table, respectively :—

No. 274-*E.A.*—In exercise of the powers conferred by sub-section (3) of section 3 of the Baluchistan Agency Civil Justice Law, 1896, the Governor-General in Council is pleased to invest the Cantonment Magistrate of Quetta with the powers of the Assistant Political Agent in respect of the Quetta Cantonment.

No. 563-*I. B.*—In exercise of the power conferred by Article 101 (1) of the Indian Articles of War (Act No. V of 1869, as amended by Act No. XII of 1894), the Governor-General in Council is pleased to apply, with effect from the 15th February, 1897, the whole of the provisions of the said Articles to the following forces raised and maintained in India under the authority of the Governor-General in Council, namely :—

(1) The Central India Horse ;
(2) The Malwa Bhil Corps ;
(3) The Bhopal Battalion ;
(4) The Deoli Irregular Force ;
(5) The Erinpura Irregular Force ;
(6) The Mewar Bhil Corps ; and
(7) The Merwara Battalion.

No. 564-*I. B.*—With the approval of the Right Hon'ble the Secretary of State for India, the Governor-General in Council is pleased to direct that the following corps under the orders of the Government of India shall, from the 15th February, 1897, be placed under the orders of the Commander-in Chief in India :—

1. The Central India Horse.
2. The Malwa Bhil Corps.
3. The Bhopal Battalion.
4. The Deoli Irregular Force.
5 The Erinpura Irregular Force.
6. The Mewar Bhil Corps.
7. The Merwara Battalion.

2. Of the above named corps the Central India Horse and the Bhopal Battalion are allotted to the Bengal Command and will, for the future, form a portion of the troops under the General Officers Commanding the Bundelkhand and Narbada Districts respectively In order to facilitate the due exercise of command by these officers the western boundry of the Bundelkhand and Narbada Districts shall be extended as follows :—

From the point where the present boundary crosses the Indore-Gwalior Road the boundary shall follow the line of this road in a south-westerly direction until the alignment of the Bhopal-Rutlam Railway is reached. Thence it shall follow the line of that Railway to Rutlam where it will turn northward along the Rajputana-Malwa Railway to the point where that Railway crosses the Chambal river between Malhargarh and Hurkia Khal. Thence it shall follow the line of the Chambal river in a north-easterly direction until the present boundary is again reached.

The Narbada District shall be extended westwards so as to be contiguous to the Bundelkhand District up to the point where the boundary of both districts thus extended reaches the alignment of the Bhopal-Rutlam Railway. Thence the boundary of the Narbada District shall run in a south-easterly direction to the junction of the Sukia and Narbada rivers, at which point the present boundary is again reached.

3. The remaining corps are allotted to the Bombay Command and shall form portions of the troops under General Officers Commanding Districts as noted below :—

Mhow District.

The Malwa Bhil Corps.
The Deoli Irregular Force.
The Merwara Battalion.

Deesa District.

The Erinpura Irregular Force.
The Mewar Bhil Corps.

4. The whole of these troops shall remain localised at the stations now occupied by the Head-Quarters of each of the corps concerned, and they shall not be liable to removal from those stations except for short periods with the consent of the Agent to the Governor-General, or in case of war or other grave emergency.

5. The distribution of these troops shall be decided by the Agent to the Governor-General in Rajputana or Central India, as the case may be, in communication with General Officers Commanding Districts concerned, who, as a general rule, will issue the required orders stating that they are issued with the approval of the Agent to the Governor-General, but in case of emergency, when immediate movement is necessary, such movement may be ordered by the Agent to the Governor-General on his own responsibility, and orders so received shall be complied with by the Officer Commanding the unit concerned without delay. When an Agent to the Governor-General finds it necessary thus to issue orders direct to any corps or portion of a corps he shall at the same time inform the General Officer Commanding the District of the action he has taken.

6. The General Officer Commanding the District concerned shall obtain the opinion of the Agent to the Governor-General regarding all proposals which involve increased expenditure in connection with any of these corps, or alterations in their caste constitution or system of recruitment, and shall forward the same when submitting such proposals for the orders of Lieutenant-Generals In all such cases if the Lieutenant General finds himself unable to accept the opinion of the Agent to the Governor-General he shall submit the correspondence to the Commander-in Chief in India who will obtain the orders of the Government of India on the question at issue.

7. When an Agent to the Governor General desires to intrust political powers to an officer of one of these corps in addition to his military duties, he shall obtain the concurrence of the General Officer Commanding the District before addressing the Government of India in the Foreign Department, but officers at present exercising political powers whether *ex-officio* or otherwise will continue to do so without reference to the General Officer Commanding the District.

8. Subject to the limitations imposed by paragraphs 4, 5, 6, and 7 the Commander-in-Chief in India, Lieutenant-Generals Commanding, and General Officers Commanding Districts shall have the same powers and responsibilities in regard to these corps as they severally exercise with respect to corps already under the Commander-in-Chief.

No. 567-*I. A.*—Whereas the Epidemic Diseases Act (III of 1897) has been applied to, amongst other places, the Civil and Military Station of Bangalore by the Notification of the Government of India in the Foreign Department, No. 443 I A., dated the 4th February, 1897.

In exercise of the powers conferred by section 2, sub section (3), of the said Act as so applied, the Governor-General in Council is pleased to direct that all the powers conferred by section 2, sub-section (1), thereof may be exercised by the Local Government.

W. J. CUNINGHAM,
Secretary to the Government of India.

FINANCE AND COMMERCE DEPARTMENT.

Savings Bank.

RESOLUTION.

No. 709 A.

The 12th February 1897.

READ again—

Resolution by the Government of India in the Finance and Commerce Department, No. 2270 A., dated the 18th May 1895, prescribing revised rules for the guidance of depositors in the Post Office Savings Banks.

Read also—

Resolution No. 1968 A., dated the 4th May 1896, altering clause (*a*) of rule 12 of those rules.

RESOLUTION. The Governor General in Council is pleased to sanction the following further alteration in the rules:—

For rule 12, clause (*a*), as altered by the Resolution of the 4th May 1896, the following shall be substituted:—

"(*a*) Government servants, servants of Railway Companies, of local authorities and of Courts of Wards who are required by their employers to deposit security, and contractors who are required by the Government or local authorities to deposit security, may be allowed separate accounts for the security deposits only."

ORDER.—Ordered, that copy of the Resolution be forwarded to the Public Works Department with reference to the endorsement from that Department, No. 33 A. R., dated the 15th January 1897; to the Director General of the Post Office of India; to the Comptroller and Auditor General; and to the Comptroller, Post Office.

Ordered also, that this Resolution be published in the *Gazette of India* for general information.

L. F. FINLAY,
Secretary to the Government of India.

MILITARY DEPARTMENT.

Fort William, the 12th February, 1897.

DISMISSALS AND REMOVALS.

No. 181.—Sub-Conductor James Gallagher is struck off the rolls of the Commissariat Transport Department, Madras Command, and remanded to regimental duty, with effect from the 14th December, 1896.

JUDICIAL.

No. 182.—In exercise of the powers conferred by Part I, clause (*c*), sub-clause (*2*), and Article 190 of the Indian Articles of War (Act V of 1869), the Governor-General in Council is pleased to declare that the officer commanding the troops to which an accused person subject to the said Articles belongs, shall be "the prescribed military authority" for the purposes of Articles 174 and 175.

No. 130 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT.—RAILWAY TRAFFIC.

Calcutta, the 11th February 1897.

General Rules of 1895 for working railways open for traffic.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 267, dated the 11th June 1890, appointing the Director General of Railways as the officer who, under section 47 of the Indian Railways Act, 1890, is to make General Rules for railways administered by the Government.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of India circular No. 6 Railway, dated the 12th March 1895, and the General Rules, therewith promulgated, for all open lines of railway in British India administered by the Government.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Government of India, Public Works Department, notification No. 301, dated the 9th July 1896, publishing—in the *Gazette of India* of the 11th July 1896—the Government of India resolution No. 515 R. T., dated the 6th July 1896.

Government of India, Public Works Department, notification No. 319, dated the 15th July 1896, publishing—in the *Gazette of India* of the 18th July 1896—the Government of India resolution No. 528 R. T., dated the 10th July 1896.

Government of India, Public Works Department, notification No. 325, dated the 22nd July 1896, publishing—in the *Gazette of India* of the 25th July 1896—the Government of India resolution No. 535 R. T., dated the 14th July 1896.

Government of India, Public Works Department, notification No. 453, dated the 27th October 1896, publishing—in the *Gazette of India* of the 31st October 1896—the Government of India resolution No. 835 R. T., dated the 23rd October 1896.

Government of India, Public Works Department, notification No. 55, dated the 5th February 1897, publishing—in the *Gazette of India* of the 6th February 1897—the Government of India circular No. 3 Railway, dated the 3rd February 1897, and the addenda and corrigenda to the rules therewith promulgated.

Letter from the Director General of Railways, No. 49 T., dated the 9th February 1897.

OBSERVATIONS.—The Director General of Railways has applied that the General Rules for working open lines of railway in British India administered by the Government, which have been published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circular No. 3 Railway, dated 22nd May 1896, which was published under Public Works Department notification No. 257, dated the 28th May 1896 (*vide* the *Gazette of India* of the 30th May 1896), with such other modifications as may, for the time being, be in force on the North Western railway, may be made applicable to such portions of the Southern Punjab railway as may from time to time be opened for the public carriage of passengers, animals or goods

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules for working open lines of railway which may, for the time being, be in force on the North Western railway, to such portions of the Southern Punjab railway as may be situate in British territory and which may from time to time be opened for the public carriage of passengers, animals or goods.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India*, as required by section 47, sub-section (3), of the Indian Railways Act, 1890; also that the General Rules cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (6) of the same section.

Ordered, also, that this resolution be communicated to the Director General of Railways, for information and guidance.

W. S. S. BISSET, *Colonel, R.E.*,
Secretary to the Government of India.

The Gazette of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 11th February, 1897.

NOTIFICATIONS.

No. 442 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 6th February 1897:—

No. 35 of 1897.—George Herbert Ellis, engineer, of 2, Lansdowne grove, Neasden, in the county of Middlesex, for a new or improved knife cleaner.

No. 36 of 1897.—Herbert Jones, mill manager, Ahmedabad, Bombay Presidency, for improvements in cotton gins.

No. 37 of 1897.—Nathan William Horatio Sharpe, engineer, of 20, Perth road, Stroud Green, London, for an apparatus for cooling tea-leaf to facilitate oxidation or fermentation, and for withering the same.

No. 38 of 1897.—Richard Thomas Bellemey, chemist, of King Street, Sydney, in the colony of New South Wales, and Charles Bellemey, mechanical engineer, of Rush street, Woollahra, near Sydney, in the said colony, for improvements in wheels for cycles, road vehicles and the like.

No. 39 of 1897.—James Welsh, grocer of King street, Newcastle, in the colony of New South Wales, for improved driving mechanism for cycles and the like.

No. 40 of 1897.—Charles O'Brien, bleacher, of 22, Erskine street, and James Shearer, works manager, of Kinnoul Cottage, Maryfield, both of Dundee, for a process for improving the colour of jute fibre.

No. 41 of 1897.—James Shearer, works manager, of Kinnoul Cottage, Maryfield, Dundee, for a process for improving the colour of jute fibre.

No. 42 of 1897.—Samuel Cleland Davidson, merchant, of Sirocco engineering works, Belfast, Ireland, for improvements in the manufacture of black tea from the green tea leaf.

No. 43 of 1897.—Samuel Cleland Davidson, merchant, of Sirocco engineering works, Belfast, Ireland, for improvements in apparatus for withering or limping tea leaf in the course of its manufacture into black tea.

No. 44 of 1897.—Amended application. *See* No. 426 of 1896.

No. 45 of 1897.—Frederick Henry Haviland, solicitor, of St. Peter's Chambers, Arthur Holloway, science master, of Hagley, Drummond road, Boscombe, John Bruce Collier, electrical engineer, of Delphi Chambers, and William Henry Murch, engineer, of Upper Terrace road, all of Bournemouth, in the county of Hants, for improved method of and apparatus for the production of calcium carbide.

No. 46 of 1897.—Sophus Hartmann, manufacturer, of Berlin, and Hermann Bultmann, merchant, of Bremen, both in the Empire of Germany, for improved mechanism for transmission of force.

No. 4 of 1897.—Thomas Crisp Sanderson, chemical engineer, of Upton Manor, London, for improvements in apparatus for drying whitelead, colours, and other powdery, granular or nodular substances.

No. 48 of 1897.—Bhai Mohan Singh, head master, Khalsa college, Amritsar, for a notation and numeration ball frame.

No. 49 of 1897.—Messrs. Begg, Dunlop & Co, as managing agents of the Burma Coal Company, Limited, carrying on business at No. 12, Mission Row, Calcutta, for improvements in fuel briquettes.

No. 443 P.—A SPECIFICATION of the undermentioned invention has been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the department of land records and agriculture, North-Western Provinces and Oudh. This and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 417 of 1896.—Bernhard Baron, manufacturer, of 51, St. Mary Axe, London, for improvements in or relating to the manufacture of cigarettes. (Specification filed 28th January 1897.)

No. 444 P.—THE fee prescribed in Schedule 4 of Act V of 1888 has been paid for the continuance of exclusive privilege in respect of the undermentioned invention for the period shown against it :—

No. 118 of 1890.—William Burnett Mactavish, jute broker, and William Charles Hulbert, tea broker, both of 27, Dalhousie Square, Calcutta, for an improved method of extracting copper and other metals from ores. (From 26th November 1896 to 26th November 1897.)

No. 445 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that, under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling and using the said inventions in British India and of authorizing others so to do has ceased :—

No. 317 of 1890.—Odisseus Melachrino's invention for improvements in cigar boxes. (Specification filed 2nd November 1892.)

Fee in respect of the continuance of an exclusive privilege—

(4) (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for the said invention.

No. 206 of 1891.—Bohuslav Fiedler's invention for a match box. (Specification filed 5th November 1891.)

Fee in respect of the continuance of an exclusive privilege—

(4) (*b*) After the filing of the specification and before the expiration of the fifth year from the date of the filing thereof—

The sum of ₹50 for the said invention.

No. 246 of 1889.—John Ashington Thompson's invention for cutting and gathering tea leaves from off the tea bushes by means of specially constructed shears, scissors, knives, hooks, or sickles. (Specification filed 3rd November 1890.)

Fee in respect of the continuance of an exclusive privilege—

(4) (*c*) After the filing of the specification and before the expiration of the sixth year from the date of the filing thereof—

The sum of ₹50 for the said invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888.

RAILWAY DEPARTMENT.

NOTIFICATION.

Calcutta, the 9th February, 1897.

No. 24.—Under sections 39 and 42 of Act I of 1894, the following is published for general information :—

J. G. H. GLASS,
Secy. to the Govt. of Bengal.

MEMORANDUM OF AGREEMENT made and entered into this nineteenth day of December one thousand eight hundred and ninety-six *Between the Bengal District Roads Tramway Company Howrah-Sheakhalla Limited* incorporated under the Indian Companies Act 1882 and having its registered Office at Calcutta (hereinafter called the Company) of the one part and *The Secretary of State for India in Council* (hereinafter called the Secretary of State) of the other part. WHEREAS by order of the Government of Bengal acting in the premises for and on behalf of the Secretary of State published in the *Calcutta Gazette* of the 27th day of March one thousand eight hundred and ninety-five and being notification No. 112 the Company were empowered to make a Steam Tramway or light Railway between the town of Howrah within the district of Howrah and the town of Sheakhalla within the district of Hooghly *vid* Jonai being a distance of about twenty miles upon the gauge and in the manner described and in accordance with the provisions contained in the new reciting order and copies of the agreements entered into between the promoters on behalf of the Company and the respective local authorities were set forth in Parts I, II and III of the first schedule annexed to the now reciting order AND WHEREAS the Company in pursuance of the provisions of clause 10 of the said order have applied to the Government of Bengal for the acquisition by the Government for the Company under

the provisions of the Land Acquisition Act I of 1894 of such additional land as is required for the construction of the said tramway in the opinion of the Government of Bengal and a notification or notifications of the Government of Bengal Railway Department will be published in the *Calcutta Gazette* as required providing for the acquisition of such necessary lands AND WHEREAS the Government of Bengal in pursuance of section 41 of Act I of 1894 have called upon the Company to enter into such agreement with the Secretary of State is hereinafter contained. Now these presents witness that it is hereby mutually covenanted and agreed between and by the said parties hereto for themselves their successors and assigns in manner following that is to say :—

1. The Company shall pay to the Government of Bengal before the land to be acquired for the purposes of the Company is transferred to the Company the cost of price of the said land and any appurtenances thereof and all proper costs of the acquisition proceedings including the costs of any references and appeals to court and the charges for the necessary establishment an estimate of the charges for which establishment (which is only to be treated as an approximate estimate and not as limiting the powers of the Secretary of State his successors or assigns to employ a larger establishment if found necessary) being annexed hereto and marked Schedule A and the Company shall by way of securing such payment and immediately upon the amount being made known to them deposit with the Government of Bengal the amount that may be estimated by the Collector or Officer to be appointed under Act I of 1894 to make the acquisition as the cost of the land and the cost of the said proceedings and the Government of Bengal shall use and apply the monies so deposited in paying and satisfying the same costs and the Company shall from time to time deposit such further sum as may be required by the Collector to bring the amount in deposit up to the estimated cost of the land and of the acquisition proceedings respectively.

2. On payment or satisfaction in full by application of the monies deposited for the cost of such land and the proper costs of the acquisition proceedings and by payment of any balance remaining unsatisfied after such application the land shall at the cost of the Company be conveyed and transferred to the Company by the Secretary of State.

3. The land shall be held by the Company upon and subject to all the terms and provisions set forth in the above recited order the Company hereby agreeing with and to the Secretary of State that this agreement shall take effect in all respects as if the terms provisions and conditions referred to in this clause had been particularly set out at length in this agreement in relation to the said land in place of being incorporated herein by reference to the said order.

A

The Schedule above referred to.

Estimate for one year's establishment for the acquisition of the lands required for the abovementioned Howrah-Sheakhalla Tramway and the Howrah-Amta Tramway. The cost of such establishment to be borne in the proportions of 40 per cent. for the Howrah-Sheakhalla Tramway and 60 per cent. for the Howrah-Amta Tramway—

By Order,

S. G. KNOX, *Lieut.*,
Second Assistant.

THE RESIDENT IN MYSORE.

NOTIFICATION.

Bangalore, the 23rd January, 1897.

No. 323.—The following rules to regulate the qualification, admission, enrolment, suspension, and dismissal of Advocates and Pleaders in the Civil and Military Station of Bangalore, having been sanctioned by the Government of India, are published for general information, in supersession of those published with the Notification of the Resident in Mysore, No. 11, dated 4th January 1886 :—

1. Except as provided in the Codes of Civil and Criminal Procedure, or in any other law for the time being in force, no person shall appear, plead or act for another in any Court in the Civil and Military Station of Bangalore, unless he has been enrolled as an Advocate or Pleader under these rules :

Provided that any person accused before any Criminal Court of an offence may, with the permission of the Court, but not otherwise, appoint any person to assist him in his defence :

Provided further that any person, ex-officio or otherwise, authorized to act for Government in respect of any judicial proceeding, may make, and do appearances, acts, and applications, within the scope of his authority on behalf of Government.

2. Advocates and 1st Grade Pleaders enrolled in accordance with the rules heretofore in force shall be deemed to be Advocates and Pleaders respectively enrolled under these rules.

3. Advocates shall be entitled to appear, plead and act in the Court of the Resident in Mysore and in all Courts in the Civil and Military Station of Bangalore subordinate thereto, whether Civil or Criminal.

4. Pleaders shall be entitled to appear, plead and act in all the Courts in the Civil and Military Station of Bangalore, whether Civil or Criminal, except the Court of the Resident in Mysore.

5. Notwithstanding anything herein contained, Pleaders of the 2nd Grade enrolled in accordance with the rules heretofore in force may continue to practise in the Courts in which they are entitled to practise under those rules ; but for the purposes of rules 9 to 17 they shall be deemed to be Pleaders enrolled under these rules.

6. The following persons are qualified for admission as Advocates of the Court of the Resident in Mysore :—

(*a*) Any person who has been enrolled as and is an Advocate of the Chief Court of Mysore under the Mysore Legal Practitioners' Regulation III of 1884.

(*b*) Any Barrister of any of the Inns of Court in England or Ireland, or any Member of the Faculty of Advocates in Scotland.

(*c*) An Advocate, Vakil or Attorney of any of the High Courts of Judicature in British India.

(*d*) Any person who has obtained the degree of Master of Laws or Bachelor of Laws in any British or Indian University, and who produces a certificate of respectability and of good moral conduct.

7. The following persons are qualified for admission as Pleaders :—

(*a*) Any person who has been enrolled as and is a Pleader of the 1st Grade in Mysore under the Mysore Legal Practitioners' Regulation III of 1884.

(*b*) Any person who has passed the examination prescribed by the High Court of Madras for Pleaders of the 1st Grade and who produces a certificate of respectability and of good moral conduct.

8. Every person duly qualified under Rule 6 or 7 may apply to the Court of the Resident in Mysore to be admitted under these rules as an Advocate or as a Pleader as the case may be. The application shall be accompanied by certificates proving the qualifications of the applicant under these rules.

Provided that where the application is for admission as an Advocate, the applicant shall have given at least one month's previous notice in three successive issues of one of the local English newspapers or in such other mode as may from time to time be prescribed by the Resident in Mysore.

The Resident in Mysore may, *if he thinks fit*, grant the application, and on the application being granted, the name of the Advocate or of the Pleader, shall be entered in the roll of Advocates or Pleaders, which shall be kept in the Court of the Resident, and an extract from the roll shall be furnished to the applicant, and to the Court or Courts in which he is authorized to practise.

9. The Resident in Mysore may suspend or dismiss any Advocate or Pleader enrolled under the foregoing rules, who is convicted of any criminal offence implying a defect of character, which unfits him to be an Advocate or Pleader, or who is guilty of fraudulent or grossly improper conduct in the discharge of his professional duty.

10. If any Advocate or Pleader practising in the Resident's Court or in any Court subordinate thereto, is charged in such Court with fraudulent or grossly improper conduct in the discharge of his professional duty, the Judge of the Court shall cause a formal charge to be drawn up, setting forth concisely and exactly the alleged misconduct, and shall send a copy of the charge to the said Advocate or Pleader, and also a notice that on a day to be therein appointed, such charge will be taken into consideration. Such copy and notice shall be served upon the Advocate or Pleader at least 10 days before the day so appointed. On such day, or any subsequent day to which the enquiry may be adjourned, the Court shall receive and record all evidence properly adduced in support of the charge by the Advocate or Pleader, and shall proceed to adjudicate upon the charge.

11. If the Judge is the Judge of the Court subordinate to the Resident's Court, and he finds the charge established, and considers that the Advocate or Pleader should be suspended or dismissed in consequence, he shall record his finding and the grounds thereof, and shall report the same to the Resident's Court, and that Court shall proceed to acquit, suspend or dismiss the Advocate or Pleader.

12. Such report, when made by the Judge of any Court subordinate to the District Court, or by any Magistrate subordinate to the District Magistrate, shall be submitted through the District Judge or through the District Magistrate, as the case may be, who shall append to the report any remarks that he may think necessary and an expression of his own opinion of the case.

13. The District Judge or the District Magistrate may, pending the investigation and orders of the Resident's Court, suspend any Pleader charged before him or before any Court or Magistrate subordinate to him.

14. The Resident's Court, in any case in which an Advocate or Pleader has been acquitted otherwise than by an order of its own, may call for the record and pass such order thereon as it may deem fit.

15. The Resident's Court may also direct that any charge preferred against an Advocate or Pleader in any Court subordinate to it, shall be transferred for adjudication to itself or to any other Court of equal or superior grade to that in which the charge is preferred.

16. The suspension of any Advocate or Pleader shall be noted in the roll of Advocates or Pleaders in the Resident's Court, and notice thereof shall be sent to all Courts subordinate to that Court.

17. The name of any Advocate or Pleader dismissed under the foregoing provisions shall be struck off the roll of Advocates or Pleaders in the Resident's Court, and notice thereof shall be sent to all Courts subordinate to that Court.

By Order,

K. D. ERSKINE, *Captain*,
First Assistant to the Resident.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin, R18, or, post free, R18-12.

½ ,, R 9, ,, R9-8.
¼ ,, R4-8, ,, R5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিন্‌কোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	১৮৲	বা ডাকমাশুল বিনা	১৮৷৹
½ আধ ,, ,,	৯৲	,,	৯৷৹
¼ সিকি ,, ,,	৪৷৹	,,	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিন্‌কোনাইন ও সিনকোনিডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্ট কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং কলিকাতার নিকটস্থ শিবপুরের কোম্পানির বাগানের 'সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Application to be made to Curator.

CASH MUST ACCOMPANY ORDER. ARTICLES WILL BE SENT BY VALUE-PAYABLE POST TO PERSONS IN GOVERNMENT EMPLOYMENT ONLY.

It is advised that letters containing remittances be registered.

N.B.—The Revised Prices herein entered cover the cost of packing, postage, and other incidental charges (except commission for Value-payable supplies), and are for all purchasers other than resident College Students.

Drawing Instruments (electrum) are available at the College Book Depot at R02 per box. Drawing Instruments, drawing materials etc., are also obtainable from the Roorkee Workshops, and application should be made to the Superintendent.

ROORKEE TREATISE ON CIVIL ENGINEERING IN INDIA.

Royal Octavo, with numerous Plates.

Volumes I and II are published in separate convenient sized Sections, as below, but can be bound up if required:—

VOLUME I *

Section	I.	Building Materials (1895),	R2-0.
,,	II.	Masonry (1891),	R1-4.
,,	III.	Carpentry (1889),	R1-4.
,,	IV.	Earthwork (1892),	R1-4.
,,	V.	Tools and Plant (never published),	

VOLUME II *

Section	VI.	Buildings (1891),	R1 4.
,,	VII.	Bridges (in the Press),	
,,	VIII.	Roads (in the Press).	
,,	IX.	Railways (1891),	R1-4.
,,	X.	Irrigation Works (1873),	R1-8.

Roorkee Treatise on Civil Engineering, Vol. II (1867 edition). R3.

ROORKEE MANUAL OF APPLIED MECHANICS.

Vol. I. Direct and Transverse Strain, principally by Analytical Methods. R8

,, II. The Stability of Structures, mostly by Graphic Methods (in the Press).

MANUALS.

VII. Surveying (by Major Firebrace, R.E.) (6th edition), with Curve Table (in the Press).

XIII. Drawing (by Lieut. R. Pulford, R.E.).† R8

XIIIa. Drawing, First Principles of Geometrical (by do.) (4th edition). R1-4.

* Date of Edition on sale.

† Originally published at R15, reduced to R8.

XIV. Simple Applied Mechanics (2nd edition), Parts I and II in one. R3.

Simple Applied Mechanics, Part II (1st edition). 8a

XV. Examples of Estimating. Comprising a progressive series of Estimates (with Plans of Buildings and Bridges, worked in detail). By P. Keay, Esq., and revised by C. C. Sullivan, Esq., Head Master (5th edition) (in the Press).

XVI. Earthwork Estimating, with Practical Tables and Diagrams. By Major A. M. Brandreth, R.E. 4a.

XVII. Specimens of Printing used in the College Drawing Course and Entrance Examinations. 0a.

Note.—The complete Treatise forms the course of the Engineer Class at the Thomason College in Civil Engineering, and the same, omitting Section X, is the course for the Upper Subordinate Class. The other Manuals are the complete course for both Classes in the several subjects of which they treat.

MISCELLANEOUS.

ENGINEERING WORKS.

Curve Tables, complete, for laying any curve. 4a.

Scantlings of Timber for Roofs. Tables and investigation of formulæ for determining size of timbers for Flat Roofs from 8 to 22 feet span, and for Trussed Roofs from 10 to 50 feet span (2nd edition). By P. Keay, Esq., Head Master. R1

Useful Rules and Tables relating to Measurement of Timber. Rules for computing the cubic contents of Round Logs, as well as of Sawn Timbers, with Tables, etc. By Rai Kunhya Lal. R2-8

Vol. II, Estimates. R1.

Shakesperian Readings, *viz.*:—

1. Taming of the Shrew,
2. Othello,
3. Macbeth,
4. Comedy of Errors,
5. Merchant of Venice,

each 4a.

Graphic Hydraulic Diagrams for channels in earth, giving Discharges and mean Velocities for varying bed widths, depths, and slopes. By R. G. Kennedy, Executive Engineer. R7-8.

PLANS OF STATIONS.

Lithographed Plans of the Cantonments and Regiments Lines in the different Military Stations of India Drawn to a uniform scale, and prepared between 1864 and 1868 for the Government of India, P. W. Department. (Useful for Executive Engineers' and Superintending Engineers' Offices.)

Bengal, 51 Plans,
Madras, 99 Plans,
Bombay, 91 Plans,
N.-W. Provinces, 104 Plans,
Oudh, 21 Plans,
Rajputana, 4 Plans,
British Burma, 19 Plans,
Central Provinces,

each 8a.

* These include Question Papers for entrance to Engineer and Upper Subordinate Classes and Superior Accounts Branch, Public Works Department.

PROFESSIONAL PAPERS ON INDIAN ENGINEERING.

(FIRST SERIES.)

Vol. I. (Quarterly Nos. 1 to 5), bound R2, original price R18.

Quarterly Nos. 1, 2, 3, 4 and 5, at R1 each, original price R4 each.

Vol. II, Quarterly Nos. 6 and 7, at R1 each.
" III, " No. 13, R1.
" V, " Nos. 18, 19, 20, and 21, R1 each.
" VI, " Nos. 22, 23, 24, and 25, R1 each.
" VII, " Nos. 26, 27, 28, and 29, R1 each.
Extra No., April 1870, R1.

(SECOND SERIES.)

Quarterly Numbers of Vols. I, II, VIII, IX, and XI of the Series at R1 each

Quarterly Number 41A of Vol. X, at R1 each.

Cloth covers for Volumes 1st and 2nd Series, at As. 8 each.

(THIRD SERIES.)

Quarterly Numbers 5, 7, 8, 11, 12, 13, 14, and 15, at R1 each

Index to Professional Papers and loose Papers, 1st and 2nd Series, at 2a each.

FERROTYPE PRINTING.

Chemicals and Lithographic Paper for this process can be purchased from Thomason College Book Depôt. Application to be made to the Curator.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the 1st of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage.	With postage.
	R a. p.	R a. p.
For the Calcutta Series	10 0 0	12 8 0
" each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
" a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
" a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town. ₹ a. p.	For mofussil. ₹ a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
,, each of the Madras, Bombay, and Allahabad Series; per copy . . .	0 5 3	0 5 9
,, the Calcutta Series. For the year .	7 2 6	8 0 3
,, each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay.
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	₹ 20	₹ 14	₹ 9
,, three issues . . .	,, 55	,, 30	,, 24
,, six ,, . . .	,, 100	,, 68	,, 45
,, nine ,, . . .	,, 145	,, 96	,, 64
,, twelve ,, . . .	,, 180	,, 120	,, 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage. ₹ a. p.	With postage. ₹ a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies, ₹2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.
Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, ₹22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

PART V.

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 11th February, 1897 :—

No. 3 of 1897.

A Bill to repeal certain Obsolete Enactments and to amend and facilitate the citation of certain other enactments.

Act XII, 1891, preamble.

WHEREAS it is expedient that certain enactments specified in the first schedule to this Act which are spent, or have ceased to be in force otherwise than by express specific repeal, or have by lapse of time or otherwise become unnecessary, should be expressly and specifically repealed;

And whereas it is also expedient that certain formal amendments should be made in the enactments specified in the second schedule to this Act;

And whereas it is also expedient to facilitate the citation of the enactments specified in the third schedule to this Act;

It is hereby enacted as follows :—

Act XII, 1891, s. 1.] Title and commencement.

1. (*1*) This Act may be called the Repealing and Amending Act, 1897; and

(*2*) It shall come into force at once.

Act XII, 1891, s. 2.] Enactments in schedules repealed and amended respectively.

2. (*1*) The enactments specified in the first schedule are hereby repealed to the extent mentioned in the fourth column thereof.

(*2*) The enactments specified in the second schedule shall be modified to the extent and in the manner mentioned in the fourth column thereof.

[*Cf.* Act XII 1891, s. 3.] Savings.

3. The repeal by this Act of any enactment shall not affect any Act or Regulation in which such enactment has been applied, incorporated or referred to;

and this Act shall not affect the validity, invalidity, effect or consequences of anything already done or suffered, or any right, title, obligation or liability already acquired, accrued or incurred, or any remedy or proceeding in respect thereof, or any release or discharge of or from any debt, penalty, obligation, liability, claim or demand, or any indemnity already granted, or the proof of any past act or thing;

nor shall this Act affect any principle or rule of law, or established jurisdiction, form or course of pleading, practice or procedure, or existing usage, custom, privilege, restriction, exemption, office or appointment, notwithstanding that the same respectively may have been in any manner affirmed, recognized or derived by, in or from any enactment hereby repealed;

nor shall the repeal by this Act of any enactment provide or restore any jurisdiction, office, custom, liability, right, title, privilege, restriction, exemption, usage, practice, procedure or other matter or thing not now existing or in force.

[*Cf.* 59 & 60 Vict., c. 14, s. 1.] Citation of certain enactments.

4. Each of the enactments described in the first three columns of the third schedule may, without prejudice to any other mode of citation, be cited for all purposes by the short title mentioned in that behalf in the fourth column thereof.

THE FIRST SCHEDULE.

A description or citation of a portion of an enactment includes the words, section or other part mentioned or referred to as forming the beginning or as forming the end of the portion comprised in the description or citation.

1	2	3	4	5
Year.	No.	Short title or subject.	Extent of repeal.	Explanation.*
		Part I.—Acts of the Governor General in Council.		
1854	XXVI	Court of Wards .	The whole Act, so far as it applies to Assam.	This Act was declared in force, on the 22nd August, 1878, in the districts of Kamrup, Nowgong, Darrang, Sibsagar, Lakhimpur, Goalpara (excluding the Eastern Dvars) and Cachar (excluding the North Cachar Hills) and, on the 3rd October, 1879, in the district of Sylhet. It is possibly also applicable to the North Cachar Hills, the Garo Hills, the Khasi and Jaintia Hills and the Naga Hills, which were acquired before 1854. The Act has been superseded by Bengal Act IX of 1879 in the districts of Goalpara, Cachar (excluding the North Cachar Hills) and Sylhet, and will be superseded by the same Act in the districts of Kamrup, Nowgong, Darrang, Sibsagar and Lakhimpur on the issue of proposed Draft II; and it is probably not required in any of the Hill Districts.
1855	XXXII	Embankments .	The whole Act, so far as it applies to Assam.	This Act is quite general in its terms, and therefore applied to Assam along with the other territories comprised in Bengal at the time that it was passed. It has been repealed in the districts of Sylhet, Kamrup, Nowgong, Darrang, Sibsagar, Lakhimpur, Goalpara (excluding the Eastern Dvars) and Cachar (excluding the North Cachar Hills), by Bengal Act VI of 1873, which has been declared in force in all these places, but it is unrepealed as regards the rest of Assam. It is proposed to repeal Bengal Act VI of 1873 in Assam, as being of no practical use there, and Act XXXII of 1855 is no doubt similarly useless in the tracts in which it is nominally in force.
1857	XIII	Opium . . .	The whole Act, so far as it applies to Assam.	This Act was declared in force in the district of Sylhet by Notification No. 1152, dated the 3rd October, 1879, issued under the Scheduled Districts Act, 1874, but it is a dead-letter there, the cultivation of opium in Assam being prohibited.
1882	I	Assam Labour and Emigration Act, 1882	In the title, *the words* Bengal and. In the preamble, *the words* Chittagong, the Chittagong Hill Tracts and *the words* Khasi Hills.	There are now no "labour-districts" in Bengal, and the Khasi Hills District in Assam has ceased to be a "labour-district." The words now suggested for repeal appear to have become obsolete, in consequence of the repeals made by Act VII of 1893, s. 3 (1).

*This column will be omitted from the Bill before it is passed into law.

THE FIRST SCHEDULE—*contd.*

1	2	3	4	5
Year.	No.	Short title or subject.	Extent of repeal.	Explanation.
		***Part I.—Acts of the Governor General in Council*—contd.**		
1882	I—*contd.*		In section 116, *the words from* Every labourer *to* the same.	These words ought to have been repealed when section 115 of the Act was amended by Act VII of 1893. It was apparently through oversight that this was not done.
1892	IV	Court of Wards (amending Bengal Act IX of 1879).	Section 9 . . .	Repealing clause. Spent.
1893	VII	Inland Emigration Act, 1893.	Section 3, *from* in the definition of the expression *to* repealed. Sections 11 and 38.	Repealing clauses. Spent.
		Part II.—Acts of the Lieutenant-Governor of Bengal in Council.		
1862	VIII	Zamindari Daks .	The whole Act, so far as it applies to Assam.	See paragraph 16 of the Chief Commissioner's letter No. $\frac{94 \text{ L. \& L.}}{2307}$ J., dated the 11th June, 1896.
1864	V	The Canals Act, 1864	The whole Act, so far as it applies to Assam.	See paragraph 17, *ibid.*
,,	VII	The Salt Act, 1864 .	The whole Act, so far as it applies to Assam.	See the Chief Commissioner of Assam's letter No. $\frac{167 \text{ L. \& L.}}{4514}$ J dated the 26th October, 1896.
1865	VII	Slaughter-houses .	The whole Act, so far as it applies to Assam.	See paragraph 17, *ibid.*
,,	VIII	Sale of Under-tenures	Sections 4 to 17 and the Schedule, so far as they apply to Assam.	See paragraph 15, *ibid.*
1867	V	General Clauses .	Section 5 . . .	Commencement clause. Spent.
1871	I	Amending the Village Chaukidari Act, 1870.	Section 6 . . .	Superseded by Bengal Act I of 1892, s. 13.
,,	X	District Road Cess Act, 1871.	The whole Act, so far as it applies to Assam.	See paragraph 10, *ibid.*
1873	I	Amending the Salt Act, 1864.	The whole Act, so far as it applies to Assam.	See the Chief Commissioner's letter No. $\frac{167 \text{ L. \& L.}}{4514}$ J., dated the 20th October, 1896.
,,	VI	Bengal Embankment Act, 1873.	The whole Act, so far as it applies to Assam.	This Act has been declared, by notification under the Scheduled Districts Act, 1874, to be in force in several districts of Assam, but it is not in practical operation in any part of the province.
1878	VII	Bengal Excise Act, 1878.	In section 2, the last twenty-five words.	Commencement clause. Spent.
1879	IX	Court of Wards Act, 1879.	The third paragraph of section 1.	Commencement clause Spent.

THE FIRST SCHEDULE—*contd.*

1	2	3	4	5
Year.	No.	Short title or subject.	Extent of repeal.	Explanation.
		***Part II.—Acts of the Lieutenant-Governor of Bengal in Council*—contd.**		
1880	VII	Public Demands Recovery Act, 1880.	The second and third paragraphs of section 1.	These paragraphs were peculiar to Bengal, and never applied to Assam.
			In section 7, clause (3), *the words and figures* in Act V of 1875, section 57.	Bengal Act V of 1875 was repealed in Assam by Act XII of 1891.
			Clause (5) of section 7 .	This clause refers to Bengal Regulation VI of 1819, which has been repealed in Assam by Act XVII of 1878. The clause is superseded there by Act XVII of 1878, section 9.
			In sections 10, 11 and 18, *the words and figure* section 5 or.	Section 5 was repealed by Regulation I of 1886. (The whole of the Act was repealed for Assam so far as it relates to the recovery of arrears of land-revenue, and section 5 is the section which deals specifically therewith.)
				[Act VII of 1880 is repealed in Bengal by Bengal Act I of 1895.]
1881	III	Court of Wards (amending Bengal Act IX of 1879).	In section 1, the last twenty-six words.	Commencement clause. Spent.
			Section 2 . . .	Repealing clause. Spent.
,,	IV	Bengal Excise Act Amendment Act, 1881.	In section 1, the last twenty-six words .	Commencement clause. Spent.
			Section 2 . . .	Repealing clause. Spent.
1886	I	Amending the Village Chaukidari Act, 1870	Section 2 . . .	Superseded by Bengal Act I of 1892, s. 3.
			Section 8 . . .	Superseded by Bengal Act I of 1892, s. 13.
1887	II	Vaccination (amending Bengal Act V of 1880).	The second paragraph of section 1.	Commencement clause. Spent.
1889	I	Inland Emigrants' Health Act, 1889.	In section 1, *the words from* and *to the end.*	Commencement clause. Spent.
1892	I	Amending the Village Chaukidari Act, 1870.	In section 3, *the words and figures* as amended by section 2 of Bengal Act I of 1886.	These words and figures are superfluous. It is, moreover, now proposed to repeal section 2 of Bengal Act I of 1886.
		Part III.—Regulations made under the Statute 33 Victoria, Chapter 3.		
1873	V	Bengal Eastern Frontier Regulation, 1873.	The whole Regulation, so far as it applies to the Garo Hills District.	The Regulation was repealed as to the Garo Hills by Reg. I of 1876, but it probably revived on the expiry of Reg. I of 1870. It is superseded as to the Garo Hills District by Reg. I of 1882.
				[For title to this Regulation, see *Gazette of India*, 1875, Pt. I, p. 529.]
1875	III	The Assam Hill Districts Whipping Regulation, 1875.	The whole Regulation .	See the Chief Commissioner's letter No. $\frac{401 \text{ P. and J.}}{4711}$ J., dated the 24th November, 1896.

THE FIRST SCHEDULE—*concld.*

1	2	3	4	5
Year.	No.	Short title or subject.	Extent of repeal.	Explanation.
PART III.—Regulations made under the Government of India Act, 1870 (33 Vict., c. 3)—contd.				
1876	I	Garo Hills Regulation, 1876.	The whole . . .	Expired—see Reg. I of 1882, preamble.
1878	I	Garo Hills and Goalpara Boundary Regulation, 1878.	The whole . .	Validation enactment—see saving in section 3 of this draft.
1879	III	Assam Local Rates Regulation, 1879.	The *Explanation* to section 5.	See paragraph 34 of letter to Chief Commissioner dated , 1896.
1880	I	Repeal of parts of Regulations V of 1873 and I of 1876.	The whole . . .	So far as it affects Reg. V of 1873, Reg. I of 1880 has expired, Act VI of 1879 having been extended to all the districts of Assam to which Reg. V of 1873 applied, *proprio vigore*. [The Regulation of 1873 has since been extended to parts of Goalpara and the Naga Hills, but with the exception of the sections (8, 9 and 10) which the Regulation of 1880 repeals; and, if the former Regulation should in future be extended to any other district, the repealed sections will similarly be excepted by the extending notification.]
				So far as it affects Reg. I of 1876, Reg. I of 1880 is obsolete, the Regulation of 1876 having expired (see Reg. I of 1882, preamble).
1890	IV	Assam Military Police Regulation, 1890.	Section 2 . . .	Repealing clause. Spent.
Part IV.—Regulations of the Bengal Code.				
1806	XI	Passage of Troops .	In section 2, *the words from* the Commanding Officer will at the same time *to the end*.	See paragraph 12 of the Chief Commissioner's letter No. $\frac{94 \text{ L. \& L.}}{2307}$ J., dated the 11th June 1896.
			In section 7, *the words* and the Magistrates to report to the Nizamat Adalat for the information of the Governor General in Council.	See paragraph 12, *ibid.*
1810	XIX	Native Endowments: Escheats.	The whole Regulation, so far as it applies to Assam.	See paragraph 19, *ibid.*
1817	XX	Police . . .	So much as is unrepealed, so far as it applies to Assam.	See paragraph 14, *ibid.*

THE SECOND SCHEDULE.

1	2	3	4	5
Year.	No.	Short title or subject.	Amendment.	Explanation.*
		Part I.— Act of the Governor General in Council.		
1882	I	Assam Labour and Emigration Act, 1882.	In the schedule *for* the Inland Emigration Act, 1882, *read* the Assam Labour and Emigration Act, 1882.	The title of Act I of 1882 was altered by Act VII of 1893, section 2.
		Part II.—Acts of the Lieutenant-Governor of Bengal in Council.		
1862	VIII	Zamindari Dâks .	In section 11, *for* Act XVII of 1854 (*for the management of the Post Office, for the regulation of the duties of postage, and for the punishment of offences against the Post Office*) *read* the Indian Post Office Act, 1866.	Act XVII of 1854 has been repealed by Act XIV of 1866. The saving as to references contained in section 4 of the latter Act is confined to references to particular sections of the former Act.
1883	I	Excise (amending Bengal Act VII of 1878)	In section 12, *for the words* In the second paragraph *to the end of the section, read* In the second paragraph of the same section, as amended by Bengal Act IV of 1881, section 8, the following words shall be inserted after the word "sea," that is to say, "which are in the possession of any common carrier or warehouseman as such or."	The amendment (substituting "liquors" for "excisable article" in section 61 of Bengal Act VII of 1878) made by Bengal Act IV of 1881, section 8, seems to have been overlooked when section 12 of Bengal Act I of 1883 was drawn.
1884	III	Bengal Municipal Act, 1884.	In section 37-J. (inserted by Bengal Act IV of 1894, section 23), *for* the Loans Act, 1870, *read* the Local Authorities Loan Act, 1879.	Clerical error
			In section 219 (as amended by Bengal Act IV of 1894, section 64), *for* or two hundred and ten two hundred and ten A *read* 210 or 210A.	Clerical error.
1887	II	Vaccination (amending Bengal Act V of 1880).	To section 3 *add* :— "The Schedule hereto annexed shall be annexed as The First Schedule to the Bengal Vaccination Act, 1880."	Bengal Act II of 1887 contains no specific provision for incorporating the schedule annexed to it in Bengal Act V of 1880.
1889	I	Inland Emigrant's Health Act, 1889.	In the preamble and also in section 2, *for* the Inland Emigration Act, 1882, *read* the Assam Labour and Emigration Act, 1882.	The title of Act I of 1882 was altered by Act VII of 1893, section 2.

* This column will be omitted from the Bill before it is passed into law.

THE SECOND SCHEDULE—*contd.*

1	2	3	4	5
Year.	No.	Short title or subject.	Amendment.	Explanation.
Part III.—Regulations made under the Government of India Act, 1870 (33 Vict., c. 3).				
1875	III	Assam Hill Districts Whipping Regulation, 1875	In section 2, *for* Governor General in Council *read* Local Government, *and after* Garo Hills Act, 1869, *insert* or section 6 of the Scheduled Districts Act, 1874, as the case may be.	See paragraph 35 of letter to Chief Commissioner, No. 613, dated the 30th April, 1896.
1883	I	Sylhet and Cachar Rural Police Regulation, 1883.	In section 18, clause 10th, *for* the Indian Forest Act, 1878, *read* the Assam Forest Regulation, 1891.	Act VII of 1878 was repealed in Assam by Regulation VII of 1891, but the Regulation does not contain the usual clause saving references to repealed matter.
1886		Assam Land and Revenue Regulation, 1886	To section 1 *add* :— "(3) The Chief Commissioner may in like manner amend vary or rescind any notification issued under sub-section (2).	See paragraph 13 of the Chief Commissioner's letter No. $\frac{94 \text{ I. } 8 \text{ I.}}{1307}$ J., dated the 11th June, 1890.
Part IV.—Regulations of the Bengal Code.				
1806	XI	Passage of Troops	In section 4 clause third, *for* Governor General in Council, *in each place in which these words occur, read* Local Government.	See paragraph 12 of the Chief Commissioner's letter No. $\frac{94 \text{ I. } 8 \text{ I.}}{1307}$ J., dated the 11th June, 1890
1812	XI	Removal of Foreign Immigrants.	In section 5 clause second, *for* to the Nizámat Adálat, who will recommend to the Governor General in Council such abbreviation of the prescribed punishment as they may judge proper, *read* to the Local Government, and the Local Government shall pass such orders thereon as it may think fit.	See paragraph 12, *ibid.*
			For Governor General in Council, *wherever those words occur*, read Local Government.	See paragraph 12, *ibid.*
1823	VII	Loans to covenanted officers.	In section 3, *for the words from* All Judges *to* powers of such Collector, *read* All Commissioners, District and Sessions Judges, Deputy Commissioners and Assistant Commissioners being members of the Indian Civil Service.	See paragraph 12, *ibid.*
			In section 6, and also in section 8, *for* Governor General in Council *read* Local Government.	See paragraph 12, *ibid.*

THE THIRD SCHEDULE.

1	2	3	4
Year.	No.	Subject.	Short title.
		Part I.—Local Acts of the Governor General in Council in force in Assam.	
1850	XXV	For the forfeiture to Government of deposits made on incomplete sales of land under Regulation VIII, 1819.	The Forfeited Deposits Act, 1850.
...	XXXIII	For amending the forms necessary for the sale of patni tenures in Bengal.	The Sale of Patni Tenures Act, 1850.
1853	VI	Relating to summary suits for arrears of rent, to sales of patni talugs and other saleable tenures, and to sales of land in satisfaction of summary decrees for rent.	The Rent Recovery Act, 1853.
...	XIX	To amend the law of evidence in the Civil Courts of the East India Company in the Bengal Presidency.	The Recusant Witnesses Act, 1853.
1856	XII	To amend the law respecting the employment of Amins by the Civil Courts in the Presidency of Fort William.	The Civil Courts Amins Act, 1856.
1867	III	To provide for the punishment of public gambling and the keeping of common gaming-houses in the North-Western Provinces of the Presidency of Fort William, and in the Punjab, Oudh, the Central Provinces and British Burma.	The Public Gambling Act, 1867.
1871	XIX	To provide for the appointment of Sessions Judges in Bengal and the North-Western Provinces.	The Bengal Sessions Courts Act, 1871.
1874	VIII	To provide for the exercise of the powers hitherto exercised by the Lieutenant-Governor and Board of Revenue of Bengal in the territories forming the Chief Commissionership of Assam.	The Assam Chief Commissionership Act, 1874.
...	XII	To provide for the exercise, in Sylhet, of the powers of the Lieutenant-Governor and Board of Revenue in Bengal.	The Sylhet Act, 1874.
1886	III	To amend the Northern India Ferries Act, 1878	The Northern India Ferries Act Amendment Act, 1878.
1892	IV	To amend the Bengal Court of Wards Act, 1879 [Act IX (B. C.) of 1879].	The Court of Wards Act (Bengal) Amendment Act, 1892.
		Part II.—Regulation made under the Government of India Act, 1870 (33 Vict., c. 3).	
1884	III	To empower the extension of the Assam Frontier Tracts Regulation, 1880, to certain tracts in Assam, and to declare that Act X of 1872 (the Code of Criminal Procedure) shall be deemed never to have come into force in the Garo Hills District, the Naga Hills District and the Khasi and Jaintia Hills District.	The Assam Frontier Tracts Regulation, 1884.
		Part III.—Regulations of the Bengal Code in force in Assam.	
1793	I	For enacting into a Regulation certain Articles of a Proclamation bearing date the 22nd March 1793.	The Bengal Permanent Settlement Regulation, 1793.
...	II	For abolishing the Courts of Mál Adálat or Revenue Courts, and transferring the trial of the suits which were cognizable in those Courts to the Courts of Dewáni Adálat; and prescribing Rules for the conduct of the Board of Revenue and the Collectors.	The Bengal Land-revenue Regulation 1793

THE THIRD SCHEDULE—*contd.*

1	2	3	4
Year.	No.	Subject.	Short title.
		Part III.—Regulations of the Bengal Code in force in Assam—contd.	
...	VIII.	For re-enacting, with modifications and amendments, the rules for the Decennial Settlement of the public revenue payable from the lands of the zamindárs, independent taluqdars and other actual proprietors of land, in Bengal, Behar and Orissa, passed for those provinces respectively on the 18th September 1789; the 25th November 1789; and the 10th February 1790, and subsequent dates.	The Bengal Decennial Settlement Regulation, 1793.
1793	XI . .	For removing certain restrictions to the operation of the Hindu and Muhammadan laws with regard to the inheritance of landed property subject to the payment of revenue to Government.	The Bengal Inheritance Regulation, 1793.
...	XXXVIII.	For re-enacting, with modifications, such part of the rule passed on the 27th June 1787, as prohibits Covenanted Civil Servants of the Company employed in the administration of justice or the collection of the public revenue lending money to zamindárs, independent taluqdars or other actual proprietors of land, or dependent taluqdars or farmers of land holding farms immediately of Government, or the under-farmers or raiats of the several descriptions of proprietors and farmers of land above mentioned, or their respective sureties.	The Indian Civil Service (Bengal) Loans Prohibition Regulation, 1793.
1799	V . .	To limit the interference of the Zila Court of Diwání Adalat in the execution of wills and administration to the estates of persons dying intestate.	The Bengal Wills and Intestacy Regulation, 1799.
1800	X . .	For preventing the division of landed estates in the Jungal Mahals of the Zila of Midnapore and other Districts.	The Bengal Inheritance Regulation, 1800.
1804	X . .	For declaring the powers of the Governor General in Council to provide for the immediate punishment of certain offences against the State by the sentence of Courts-martial.	The Bengal State Offences Regulation, 1804.
1806	XI . .	For facilitating the progress of detachments of troops through the Company's territories for affording any requisite assistance to persons travelling through those territories.	The Bengal Troops Transport and Travellers Assistance Regulation, 1806.
1812	XI . .	To empower the Governor General in Council to order the removal of emigrants from foreign countries, and their descendants, from any place in the vicinity of the frontier of the State from which they may have emigrated; and, in certain cases, to place and detain any such persons in safe custody; and likewise to provide for the trial of emigrants and their descendants who may excite disturbances in the countries from which they may have emigrated, and of persons aiding them in the prosecution of such attempts.	The Bengal Foreign Immigrants Regulation, 1812.
1818	III . .	For the confinement of State Prisoners . .	The Bengal State Prisoners Regulation, 1818.
1819	VIII .	To declare the validity of certain tenures, and to define the relative rights of zamíndárs and patni taluqdars; also to establish a process for the sale of such taluqs in satisfaction of the zamindár's demand of rent.	The Bengal Patni Taluqs Regulation, 1819.

THE THIRD SCHEDULE—*concld.*

1	2	3	4
Year	No.	Subject.	Short title.
		Part III.—Regulations of the Bengal Code in force in Assam—contd.	
1820	I	For providing that all sales of certain taluqs made answerable by sale for arrears by the zamindár's rent shall be conducted in the mode provided by Regulation VIII, 1819, for the sales therein described.	The Bengal Patni Taluqs Regulation, 1820.
1823	VII	For prohibiting loans by Covenanted Civil Servants from persons subject to their official authority and influence.	The Indian Civil Service (Bengal) Loans Prohibition Regulation, 1823.
1825	VI	For rendering more effectual the rules in force relative in supplies and preparations for troops proceeding through the British territories.	The Bengal Troops Transport Regulation, 1825.
...	XI	For declaring the rules to be observed in determining claims to lands gained by alluvion, or by dereliction of a river or the sea.	The Bengal Alluvion and Diluvion Regulation, 1825.
1827	III	For modifying and amending the rules in force relative to the law officers and ministerial native officers of the Courts of Judicature, who may be guilty of corruption or extortion.	The Bengal Corruption and Extortion Regulation, 1827.
1827	V	For modifying the rules at present in force for the management of estates under attachments by orders of the Courts of Justice in certain cases.	The Bengal Attached Estates Management Regulation, 1827.
1829	XVII	For declaring the practice of Sati or of burning or burying alive the widows of Hindus illegal and punishable by the Criminal Courts.	The Bengal Sati Regulation, 1829.

STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is, as stated in the preamble, to repeal certain enactments which are spent, or have ceased to be in force otherwise than by express repeal, or have by lapse of time or otherwise become obsolete or unnecessary, and also to make certain formal amendments in the Statute-book suggested in the course of the preparation in the Legislative Department of the Government of India of a Code of the Acts and Regulations in force in the territories administered by the Chief Commissioner of Assam. The opportunity has been taken to facilitate the citation, where necessary, of the enactments (other than those of the Bengal Council) contained in that Code by following the example set by Parliament in passing the Short Titles Acts of 1892 and 1896.

M. D. CHALMERS.

The 9th February, 1897.

J. M MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the Negotiable Instruments Acts, 1881, was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 11th February, 1897 :—

WE, the undersigned, Members of the Select Committee to which the Bill to amend the Negotiable Instruments Act, 1881, was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

From Registrar, High Court, Calcutta, No. 478, dated 26th February, 1896 [Paper No. 1].
From Chief Commissioner, Ajmere-Merwara, No. 298-C., dated 28th February, 1896 [Paper No. 2]
From Secretary to Chief Commissioner, Coorg, No. 144-C., dated 24th February, 1896 [Paper No. 3].
From Officiating Chief Secretary to Chief Commissioner, Central Provinces, No. 1404, dated 2nd March, 1896 [Paper No. 4].
From Chief Secretary to Chief Commissioner, Burma, No. 658—L.-10, dated 28th February, 1896 [Paper No. 5].
From Acting Secretary to Government, Bombay, No. 797, dated 28th February, 1896, and enclosures [Papers No. 6].
From Chief Secretary to Government, Madras, No. 462, dated 5th March, 1896 [Paper No. 7].
From Agent to Governor General in Baluchistan, No. 1714, dated 6th March, 1896 [Paper No. 8].
From Secretary for Berar to Resident, Hyderabad, No. 69, dated 5th March, 1896, and enclosures [Papers No. 9].
From Secretary to Government, North-Western Provinces and Oudh, No. 255—VII-798 B., dated 11th March, 1896, and enclosures [Papers No. 10]
From Chief Secretary to Government, Bengal, No. 1667 J., dated 17th March, 1896, and enclosures [Papers No. 11].
From Secretary to Chief Commissioner, Assam, No. 55 L. & L.—926-J., dated 13th March, 1896, and enclosures [Papers No. 12].
From Officiating Junior Secretary to Government, Punjab, and its Dependencies, No. 454, dated 6th April, 1896, and enclosures [Papers No. 13].

2. The object of this Bill is to assimilate the law contained in the Negotiable Instruments Act, 1881, to the law contained in section 74 of the Bills of Exchange Act, 1882 (45 and 46 Vict., c. 61), as appears from the Statement of Objects and Reasons.

3. We think that object can best be attained by adopting the language of the English Act. We have therefore substituted the terms of section 74 of the English Act for the present provisions of section 84 of the Indian Act. We have also added two illustrations to make the object of the new provisions clearer.

4. As section 84 qualifies the provisions of section 72 and the two sections must be read together, we have thought it best to amend section 72 by prefixing the words "subject to the provisions of section 84".

5. We have substituted these amendments for the proposals of the original Bill, which have been subjected to many criticisms, some of which seem to us to be well founded.

6. The publication ordered by the Council has been made as follows :—

No. II.

A Bill to amend the Negotiable Instruments Act, 1881.

WHEREAS it is expedient to amend the Negotiable Instruments Act, 1881; It is hereby enacted as follows :—

Short title and commencement.

1. (1) *This Act may be called the Negotiable Instruments Act Amendment Act, 1897; and*

(2) *It shall come into force at once.*

Amendment of section 72, Act XXVI of 1881.

2. *To* section 72 of the said Act the following *words* shall be *pr fixed*, namely, "*Subject to the provisions of section 84.*"

Substitution of new section for section 84, Act XXVI of 1881.

3. For section 84 of the said Act the following section shall be substituted, namely :—

When cheque not duly presented and drawer damaged thereby.

"84. (1) *Where a cheque is not presented for payment within a reasonable time of its issue, and the drawer or person on whose account* it is drawn had the right, at the time when *presentment ought to have been made, as between himself and the banker, to have the cheque paid and suffers actual damage through the delay, he is discharged to the extent of such damage, that is to say, to the extent to which such drawer or person is a creditor of the banker to a larger amount than he would have been if such cheque had been paid.*

(2) *In determining what is a reasonable time, regard shall be had to the nature of the instrument, the usage of trade and of bankers, and the facts of the particular case.*

(3) *The holder of the cheque as to which such drawer or person is so discharged shall be a creditor, in lieu of such drawer or person, of such banker to the extent of such discharge and entitled to recover the amount from him.*

Illustrations.

(a) A draws a cheque for Rs. 1,000, and, when the cheque ought to be presented, has funds at the bank to meet it. The bank fails before the cheque is presented. The drawer is discharged, but the holder can prove against the bank for the amount of the cheque.

(b) A draws a cheque at Umballa on a bank in Calcutta. The bank fails before the cheque could be presented in ordinary course. A is not discharged, for he has not suffered actual damage through any delay in presenting the cheque.

PART VI.

Proceedings of the Council of the Governor General of India, assembled for the purpose of making Laws and Regulations.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE COUNCIL OF THE GOVERNOR GENERAL OF INDIA, ASSEMBLED FOR THE PURPOSE OF MAKING LAWS AND REGULATIONS UNDER THE PROVISIONS OF THE INDIAN COUNCILS ACTS, 1861 AND 1892 (24 & 25 VICT., CAP. 67, AND 55 & 56 VICT., CAP. 14).

The Council met at Government House on Thursday, the 11th February, 1897.

PRESENT:

His Excellency the Earl of Elgin, Viceroy and Governor General of India, P.C., G.M.S.I., G.M.I.E., LL.D., *presiding*.
His Excellency Sir G. S. White, G.C.I.E., K.C.B., V.C., Commander-in-Chief in India.
The Hon'ble Sir J. Westland, K.C.S.I.
The Hon'ble Sir J. Woodburn, K.C.S.I.
The Hon'ble M. D. Chalmers.
The Hon'ble Major-General Sir E. H. H. Collen, K.C.I.E.
The Hon'ble A. C. Trevor, C.S.I.
The Hon'ble H. E. M. James.
The Hon'ble Sir A. S. Lethbridge, K.C.S.I., M.D.
The Hon'ble M. R. Ry. P. Ananda Charlu, Rai Bahadur.
The Hon'ble Sir G. H. P. Evans, K.C.I.E.
The Hon'ble Alan Cadell, C.S.I.
The Hon'ble J. D. Rees, C.I.E.
The Hon'ble G. P. Glendinning.
The Hon'ble Nawab Amir-ud-Din Ahmad Khan, C.I.E., Bahadur, Fakhar-uddoulah, Chief of Loharu.
The Hon'ble Rao Sahib Balwant Rao Bhuskute.
The Hon'ble P. Playfair, C.I.E.
The Hon'ble Rahimtula Muhammad Sayani, M.A., LL.B.
The Hon'ble Pandit Bishambar Nath.
The Hon'ble Joy Gobind Law.
The Hon'ble C. C. Stevens, C.S.I.
The Hon'ble Sir H. T. Prinsep, KT.

NEGOTIABLE INSTRUMENTS BILL.

The Hon'ble MR. CHALMERS presented the Report of the Select Committee on the Bill to amend the Negotiable Instruments Act, 1881. He

said:—"We have reported on this Bill and we have considerably altered the Bill as it stood when referred to us; so I ought to say a few words in explanation of what we have done.

"The object of the Bill is to introduce the provisions of section 74 of the English Bills of Exchange Act into the Indian Negotiable Instruments Act, 1881. We thought that the best way of doing that was to incorporate the words of the English Act, and that is what we have done. The object of the change is this: By the English Common Law the drawer of a cheque is liable on that cheque until the Statute of Limitations runs against it, but there was an exception to this liability. Supposing the cheque was not presented in the ordinary course, and supposing that in the interval the bank on which the cheque was drawn failed, it was clear that the drawer was damaged by the omission to present the cheque, and the rule of the Common Law was that the drawer, having been damaged, was discharged. When the English Act of 1882 was going through a Committee this rule was altered by Lord Bramwell. He pointed out that it was not fair that the drawer should be absolutely discharged from his debt on the cheque, and from his debt in respect of which the cheque was given, and also that he should have his right of proof against the bank, who perhaps might pay a very substantial dividend. Take this case: Suppose a cheque is drawn for £1,000. The holder of the cheque instead of presenting it at once circulates or keeps it. Well, the bank fails; the drawer of course is discharged, but the bank may pay ten shillings in the pound. The result of the Common Law rule was that the drawer was discharged from his debt, and he also had a right of proof against the bank which realised for him eventually £500. Lord Bramwell pointed out that this was inequitable, and he introduced the present clause which is now section 74 of the Bills of Exchange Act, 1882. It provides that although the drawer is discharged, the holder of the cheque, in such case, is made a creditor of the bank and has the drawer's right of proof against the bank; so that in the case I have mentioned the holder would be able to prove against the bank and get £500 from it. The drawer would be discharged from liability, but the holder of the cheque would be substituted for the drawer as regards proving against the bank. The Indian Act, 1881, had adopted the English Common Law rule, but it was suggested to the Government of India some two years ago that the English rule was more equitable, and that the English rule ought to be incorporated into the Indian Act. The object of the present Bill is to incorporate into our Indian Act the provision of the English Act. We have adopted the words of the English Act, and we have added a couple of illustrations to show its operation."

GENERAL CLAUSES BILL.

The Hon'ble MR. CHALMERS moved that the Bill to consolidate and extend the General Clauses Acts, 1868 and 1887, be referred to a Select Committee consisting of the Hon'ble Sir James Westland, the Hon'ble Mr. James, the Hon'ble Rai Bahadur Ananda Charlu, the Hon'ble Sir Griffith Evans, the Hon'ble Mr. Sayani, the Hon'ble Sir Henry Prinsep and the mover, with instructions to report within one month.

The Hon'ble PANDIT BISHAMBAR NATH said:—"I crave permission to say a few words in respect of the Bill that has just been proposed to be referred to the Select Committee.

"I believe the thanks of the Profession are due to the Hon'ble the Legal Member for his forensic labour in having so ably digested, for the use of the Indian Statute-book, an improved revise, so to say, of the Legislative Thesaurus, which he aptly describes as 'Draft Accidents Prevention Bill.'

"The Bill, when passed into law, will, I think, be of great service not only to the Legislature but to the Bench and the Bar in determining the *prima facie* meaning of the terms that are constantly used in almost all the Acts.

"As explained in the Statement of Objects and Reasons, the Bill consolidates the two existing enactments on the subject, namely, the Acts I of 1868 and I of 1887, incorporating certain provisions of the English Interpretation Act, 1889 (52 & 53 Vict., cap. 63). I notice section 4, clauses 1 and 2 of the Bill are declara-

tory of the existing law as regards previous enactments. A reproduction of the several definitions, as given in the preceding section 3, renders both these clauses, in my opinion, somewhat inartistic in their present form, which, I venture to suggest, might perhaps be avoided without affecting their substance or object, if they were worded differently or on the lines suggested below, namely :—

"*Section 4* (*1*).—Notwithstanding the repeal of Act I of 1868 the General Clauses Act, 1868) all the definitions and expressions contained in the aforesaid Act apply, unless there is anything repugnant in the subject or context, to all the Acts of the Governor General in Council, made after the third day of January, 1868, and to all Regulations made on or after the fourteenth day of January, 1887.

"(*2*) Notwithstanding the repeal of Act I of 1887 (the General Clauses Act, 1887) all the definitions contained in the aforesaid Act apply, unless there is anything repugnant in the subject or context, to all Acts of the Governor General in Council, and Regulations made on or after the fourteenth day of January, 1887.

"A further observation, I have to submit, is that section 5 and the following sections prescribe general rules of construction. While I fully appreciate the usefulness of these rules, which are, indeed, an improvement upon the old law, I am not sure whether they can appropriately, or in strict conformity with juristic notions, be embodied as such, and as a part, in an Act, the main object of which is the abbreviating the phraseology employed in Legislative enactments.

"The question, however, being purely one of academic interest, the law upon it, I confess, is to be taken from the Hon'ble the Legal Member, whose minute shows that a cognate matter has been very carefully considered already by competent lawyers elsewhere.

"These are, my Lord, some of the matters, amongst others, that I beg ought to receive the attention of the Select Committee, in discussing the various provisions of the Bill.

"It may as well be observed incidentally, that the proposed measure being not an emergent one, it would have been rather satisfactory had the Bill been allowed to be circulated for eliciting suggestions by the several High Courts, with the object of giving a finishing touch to the Bill, before passing it into law."

The Hon'ble MR. CHALMERS said that he was much obliged for the Hon'ble Member's suggestions. He could only say that they would be most carefully considered in Select Committee.

The motion was put and agreed to.

REPEALING AND AMENDING BILL.

The Hon'ble MR. CHALMERS moved for leave to introduce a Bill to repeal certain obsolete enactments and to amend and facilitate the citation of certain other enactments. He said :—"The object of the Bill is stated in the title. The Bill is an Assam repealing and amending Bill. It is a class of legislation with which Hon'ble Members are familiar, and the object is to enable the Legislative Department to publish a complete edition of the Assam Acts. The Bill in no wise differs from other Acts of the kind which are passed before the local codes are edited. There is only one feature in the present Bill which I ought to refer to. In accordance with modern English practice we have given short titles to the Acts which did not previously possess them The modern English practice is always to give an Act a short title, and I think it has its conveniences. In this Bill we have given short titles to those Assam Acts which have not already got them."

The motion was put and agreed to.

The Hon'ble MR. CHALMERS introduced the Bill.

The Hon'ble MR. CHALMERS moved that the Bill and Statement of Objects and Reasons be published in the Gazette of India and in the Assam Gazette in English.

The motion was put and agreed to.

The Council adjourned to Thursday, the 25th February, 1897.

J. M. MACPHERSON,

Secretary to the Government of India,
Legislative Department.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, January 30th, 1897.

Pressure was very unsteady over Northern and Central India during the week, and there were hence large and rapid modifications of the general distribution of pressure in that area. Over the Peninsula on the other hand the pressure changes were slight and the distribution was in consequence fairly steady. As might be expected under these conditions the weather, while fine and settled over the Peninsula, was more or less disturbed over Northern and Central India. Fair rain was received in the Central Provinces, Berar, Assam, and parts of the Punjab and of the North-Western Provinces. The mean temperature of the week was practically normal in the Punjab, Central India and Gujarat, and in moderate to considerable excess of the normal over the remainder of the country.

Daily Summary.—*Sunday, 24th January.*—Pressure had given way briskly to rapidly in North-Western and Central India, and was in slight to considerable excess in that area. Pressure had increased slightly to rapidly in Bengal and Assam, and was in considerable excess in these districts. It was practically unchanged in the Peninsula where it was slightly above the average. The general distribution of pressure was abnormal. Pressure was highest in Upper Assam and lowest in West Ceylon and Travancore, while a slight depression lay over the western districts of Central India. Winds were cyclonic in direction around the depression, but blew from about their normal cold weather directions elsewhere. Skies were heavily clouded in the North-West Himalayas and partially clouded in Northern India and Baluchistan. No rain had fallen in India and only light rain in Baluchistan. Temperature was normal in the Punjab, considerably below the average in Sind, West Rajputana and Kathiawar, and generally in excess of the normal elsewhere. The excess averaged as much as 5½° for Berar and the Central Provinces.

Monday, 25th January.—With a few local exceptions of no importance the barometer had fallen over the whole of India and Baluchistan. The fall was brisk over the greater part of North-Western India as well as in Bundelkhand, Baghelkhand and the adjacent districts of the Central Provinces. Pressure was in moderate to considerable excess to the east of a line joining Peshawar, Allahabad, Nagpur and Cocanada and normal to the west of it. The feeble depression had advanced east-north-eastwards to the neighbourhood of Saugor, but was very faintly indicated in the chart. The general distribution remained unaltered in other respects. Winds were rather irregular in direction, though chiefly from between east and north. Calms were numerous in North-Western and Central India. Humidity had risen fast in the North-West Himalayas. Skies were free from cloud in Burma and Western India, and more or less clouded in most other places. General showers had occurred over the greater part of the Central Provinces and of Central India and a few scattered showers in the North-Western Provinces. The principal amounts were 0·85 inch at Jubbulpore, 0·82 inch at Pachmarhi, and 0·66 inch at Sutna. Temperature had increased very rapidly in Sind and Rajputana, and briskly in the Punjab, and was from 2° to 4½° above the average in these areas. The excessive temperature in the Central Provinces was even more marked than on the previous day, the mean temperature of the previous 24 hours averaging 7° in excess in that area. Elsewhere temperature was practically unchanged.

Tuesday, 26th January.—The barometric changes of the previous 24 hours were generally small and unimportant except in the Indus Valley where pressure had increased briskly to rapidly. Pressure was normal in Western and Central India, and above the average in the remainder of India and Burma. The excess was greatest in the Punjab where it ranged up to ·11″. The general distribution of pressure had altered considerably and was now of the usual cold weather type, pressure being highest in the West Punjab and lowest in the extreme south of the Indian region. The shallow depression near Saugor on the previous day had shifted slightly north-eastwards and was central near Nowgong. It was however very ill-defined, and its existence on the chart was revealed mainly by the peculiar bend of the isobar of 30·05″ over Bundelkhand and Baghelkhand. Winds were much the same as on the preceding day. Scattered showers had fallen in Berar, the Central Provinces and the sub-montane Punjab, the heaviest of which was 1·20 inches at Akola. The temperature continued very abnormal over by far the greater part of the country. Temperature was in defect of the normal in Baluchistan, the North-West Punjab and Kathiawar and in excess over the remainder of the country. The provincial variations varied from 2½° in Madras to 7½° in Berar and the Central Provinces. The excess was due chiefly to unusually high night temperatures.

Wednesday, 27th January. Pressure had given way throughout the Indian area, slightly in Western and Southern India, and briskly to rapidly elsewhere. Pressure differed but little from the normal in the Peninsula, Sind and Baluchistan, but was in slight to considerable defect of the normal over the remainder of the country. Pressure was fairly uniform, though high in the north-west and north-east, and low over the North Western Provinces, over Central Bengal and over the extreme south. Variable winds and calms obtained generally over the land area. Skies were clear on the north-west frontier, overcast in the North-West Himalayas, and moderately clouded in the remainder of India and Burma. Light rain had again been received in the central parts of the country, light rain and snow in the North-West Himalayas, and a few local showers in Northern India. The largest amount reported was 0·60 inch at Seoni. The chief feature of the weather was the excessive temperature over the Indian area. The excess ranged generally between 2° and 10°, and was absolutely greatest at Sutna (11°). The night temperature was about 10° above the average in the Central Provinces and 8° in the North-Western Provinces.

Thursday, 28th January.—Pressure had recovered slightly to rapidly in North-West and Central India, but over the remainder of the country the downward movement still continued. Pressure was now normal, or in slight excess over North-West and Central India, and more or less below the normal elsewhere. The deficiency was large in Central Bengal and the adjacent districts of Bihar. An anticyclone overlay North-West India, while pressure was low over Burma, over Bengal and over the south of the Indian region. The air circulation was of the ordinary cold weather type. Skies were generally clouded, and snow and hail had occurred in the North-West Himalayas and

some thunder-showers in the Central Provinces and North-West Provinces. The largest amount recorded in the hills was 1·13 inches at Mussooree and on the plains 0·83 inch at Dera Dun. . Temperature had increased in Bengal and Assam, and had fallen in all other divisions. The temperature conditions were hence less abnormal than for some days past. Temperature was normal in Baluchistan and Upper India, and above the average over the remainder of the country. The provincial variations were less than 3° except in the case of the Central Provinces and Bengal and Assam, where they averaged 3½° and 6½° respectively.

Friday, 29th January.—Pressure had increased locally in Central and Lower Bengal, and had again fallen over the remainder of the country. The fall had been brisk over Baluchistan, the Punjab and Rajputana. Pressure was everywhere below the average. The deficiency ranged from ·03″ to ·08″ over a large part of the country. It exceeded a tenth of an inch to the north of a line joining Lucknow, Gya and Bhamo, and was absolutely greatest at Sibsagar, where it equalled ·18″. Winds were little changed. Light to moderate rain had been received on the coasts of Ceylon, and a few showers in Bengal and Assam. Temperature was approximately normal in North-West and Central India and in moderate to considerable excess in the remainder of India and Burma.

Saturday, 30th January.—Pressure was practically steady over the whole of the Indian area except locally in North-Eastern India, where it had increased slightly to briskly. Pressure continued below the average throughout the country, but the amount of deficiency had diminished considerably and was at the majority of stations less than a twentieth of an inch. The general distribution of pressure was similar to that of the previous day. Westerly winds held down the Gangetic Plain and northerly winds around the Northern Coasts of the Bay, but elsewhere the directions were very irregular. Skies were moderately clouded in Baluchistan, North-West India and the south of the Peninsula, and serene elsewhere. Snow had fallen on the higher elevations in Kashmir, but elsewhere there had been no rain or snow. Temperature was in large excess in Baluchistan and in moderate excess in the Peninsula, Burma and Sind; but over the remainder of the country the departures from the normal were small and of no significance.

Temperature.—The temperature conditions were very abnormal during the greater part of the week. Temperature was in moderate to large excess over nearly the whole Indian area during the first four days of the week. The crest (or the area of greatest excess) of this high temperature area was over the Central Provinces from the 24th to the 26th and over the North-Western Provinces on the 27th. The excess, it may be noted, was due chiefly to much higher night temperature than usual. Temperature decreased rapidly over Northern and Central India during the next two days, and became practically normal at the end of the week over the greater part of that area. In the Peninsula and Burma on the other hand there was a steady moderate excess of temperature on these three days.

The mean temperature for the week exceeded the normal in all divisions. The excess was slight in the Punjab, Gújarat and Central India, and moderate to considerable in the remaining divisions.

The following gives data in illustration: —

Province.	January 1897.							Mean variation of week.
	24th.	25th.	26th.	27th.	28th	29th.	30th.	
Burma	+3·9	+3·1	+2·8	+3·0	+2·9	+2·7	+2·6	+3·0

Mean for whole of India	+2·2	+3·2	+4·2	+4·2	+2·2	+1·2	1 8	+2·6

Rain.—The pressure conditions were very unsteady over Northern and Central India, but no definite depression appeared or formed in that area at any time during the week. A fair amount of rain, however, accompanied these unsettled conditions over the central parts of the country, the North-Western Provinces, the Punjab and Assam chiefly between the 25th and 28th. The rainfall was on the whole heaviest and most general in the Central Provinces and Berar. The daily falls were light in the great majority of cases, but exceeded 1 inch at Amraoti (1·20 inches) and Mandla (1·10 inches). More or less rain was received in twenty-eight of the rainfall divisions, but in only fifteen of these twenty-eight divisions was the average actual rainfall effective, *i.e.*, exceeded a tenth of an inch. These divisions included Assam (Surma and Brahmaputra), the North-Western Provinces (Central, East, Submontane West and Hills), the Punjab (South, Submontane, Hills and North), Berar, the whole of the Central Provinces and Central India (East). The average actual rainfall exceeded half an inch in the Submontane and Hill Divisions of the Punjab and in the whole of the Central Provinces. The third column of the rainfall statement shows that the rainfall of the week was in excess of the normal in Assam (Surma), in the North-Western Provinces (Central), in the Submontane Punjab, in Berar, in the Central Provinces and in Central India (East). The excess was greatest in the Western and Central Divisions of the Central Provinces where it slightly exceeded half an inch in amount.

The seasonal rainfall is in considerable to large excess of the normal in the Central Provinces, the North Punjab, South Oudh and the central districts of the North-Western Provinces, in moderate excess in North Oudh, the Punjab Hills and Berar, and about normal in Cachar, the Western and Submontane Districts of the North-Western Provinces, the Submontane and West Punjab, Baluchistan, West Rajputana and Central India (East). Over the remainder of the country the rainfall of the period is more or less in defect of the normal. The deficiency is large and serious in the South-East Punjab, the whole of Bengal, the western districts of the North-Western Provinces and parts of Madras.

The largest totals recorded during the week were 2·41 at Batala (Gurdaspur) and 2·21 inches at Tikaria (Mandla).

HEM RAJ,
Offg. Asst. Meteorological Reporter to the Government of India.

SIMLA, *the 4th February 1897.*

DENZIL IBBETSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.
DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 6th February.*—No rain except a few small showers in Ganjam. The water-supply continues adequate in the Carnatic and Southern Districts, but is diminishing elsewhere; and in places in the Deccan and Circars scarcity of drinking water is already felt. Cultivation is confined to areas under irrigation now, chiefly from wells, except under larger irrigation works. The standing crops in the Carnatic, Central, West Coast and the Southern Districts are generally thriving; in these parts the harvest is proceeding with fair outturn; in the Deccan and the Circars such standing crops as there are, except those under large irrigation works and wells, are either bad or lost. The scanty harvests of the early crop are rapidly approaching completion. Pasture is sufficient in the southern half of the Presidency, elsewhere it is scarce or wanting. Fodder is abundant nowhere and very dear in parts of the Deccan and the Circars; cattle except in the latter areas have not yet suffered much. Prices have generally risen slightly except in the districts in the extreme south. The numbers on relief work are—36,291; gratuitously relieved 2,915; weavers 7,732; total 46,938 in the Deccan against revised figure 40,610 for last week. A test work has been opened in Ganjam with 1,018 workers, and 127 persons are also gratuitously relieved in that district. Total number in receipt of relief 48,163. The price by which wages are regulated average—Kurnool 15, Bellary and Anantapur 14, and Cuddapah 17 seers per rupee.

Bombay.—*For week ending 10th February.*—Rain in Sind except Karachi. Standing crops have been damaged by frost slightly in two talukas of Hyderabad, otherwise they are thriving in Sind and Gujarat but are indifferent elsewhere. The crops recently sown have withered or are withering in Nasik, Ratnagiri, Poona, Ahmednagar, Belgaum and Dharwar. Autumn harvesting has been completed except in Khandesh and Dharwar. Reaping of later crops has commenced in Broach, Surat, Khandesh, Nasik, Ahmednagar, Satara, Bijapur, Dharwar and Baroda. Fodder is sufficient except in the Deccan, Karnatak, Shikarpur and in parts of Karachi and Baroda The grain-supply is generally sufficient in the affected districts. Cotton-picking continues in Broach, Sura, Rajkot, Wadhwan and Baroda. Condition of agricultural stock is deteriorating in Poona, Ahmednagar, Bijapur and Dharwar; healthy elsewhere except in parts of Sind, Khandesh, Nasik, Ratnagiri and Kanara. Prices are rising in parts of Shikarpur, Broach, Surat, Kolaba, Ratnagiri, Poona and Bijapur; falling in Upper Sind frontier, and in parts of Surat and Poona, and are stationary in Panch Mahals and parts of Broach, Surat, Poona and Bijapur. The prices of staple food grains in the affected districts are:—Dharwar 14, Belgaum 11½, Sholapur 11, Bijapur 10¾, Poona 10¼, Ahmednagar 10, Nasik and Satara 9¾, Khandesh 9½, and Kolaba 8¾ seers per rupee. The average daily number on relief works, including non-working children, are:—Bijapur 79,069, Sholapur 86,311, Ahmednagar 75,153, Poona 22,879, Nasik 30,531, Satara 23,635, Khandesh 27,643, Belgaum 2,581. Total 348,402, of which 244,845 are relief workers and 103,557 non-working children. The numbers on two test works in Belgaum are 127, besides 43 non-working children. The number on gratuitous relief are:—Bijapur 5,564, Sholapur 4,784, Ahmednagar 353, Poona 1,974, Belgaum 347, Nasik 93, and Satara 11. Total number in receipt of relief 361,698.

Bengal.—*For week ending the 8th February.*—Scattered showers of rain fell in parts of the Burdwan Presidency and Chota Nagpur Divisions, and also in Backergunge and Noakhali, and did good to the standing crops. In Lohardaga and Palamau there was hail, which did some slight damage in the latter district. Prospects of the spring crops continue favourable in Bihar, but in all

other parts (save in portions of North Bengal and Chota Nagpur) they are generally very poor. The poppy crop promises well in Bihar, but in Patna it has slightly suffered from the late unsettled weather. Spring rice is doing well, but wants rain in some districts Ploughing for autumn rice and jute has begun in some districts. Prices show but little change during the week. In the distressed districts the prices of the food-grains on which the relief wages are based are—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 8¼ to 11 seers, Patna (common rice) 10½ seers, Shahabad 10½ seers, Saran (Indian-corn) 10 seers 2 chittacks, Champaran (Indian-corn) 10 seers 2 chittacks, Muzaffarpur (Indian-corn) 10½ seers, Darbhanga (common rice) 9½ seers, and (*makai*) 11 seers. These prices show a slight tendency to fall in Saran, Champaran, Muzaffarpur, and Darbhanga. The numbers on relief works and in receipt of gratuitous relief on Saturday, the 6th February, were: Relief works—Nadia 6,364 (men 3,388, women 750, children 2,226); Khulna 355 (men 271, women *nil*, children 84); Rajshahi 548 (men 526, women 6, children 16); Patna 184 (men 104, women 72, children 8); Shahabad 1,255 (men 40, women 1,548, children 297); Saran 14,123 (men 3,925, women 6,092, children 4,106); Champaran 100,501 (men 42,759 women 37,663, children 20,079); Muzaffarpur 19,741; Darbhanga 122,276 (men 59,611, women 45,488, children 17,177). Total 265,347 against 263,119 in the previous week. Gratuitous relief—(including dependants)—Nadia 1,073 (men 375, women 543, children 155); Khulna 40 (men 8, women 21, children 11); Patna 125 (men 35, women 50, children 40); Shahabad 833 (men 192, women 287, children 354; Saran 14,680 (men 2,791, women 8,913, children 2,976); Champaran 15,912 (men 3,083, women 6,411, children 6,438); Muzaffarpur 2,041 (men 521, women 690, children 830); Darbhanga 66,496 (men 12,818, women 33,338, children 20,340). Total 101,220 against 75,691 in the previous week. Total in receipt of relief—366,567. Private relief—Relief works—Darbhanga Raj 17,819 (men 11,760, women 4,079, children 1,980); Hatwa Raj 2,753. Gratuitous relief—Darbhanga Raj 7,872 (men 1,582, women 3,592, children 2,698); Hatwa Raj 717. Rest of Saran district 1,111.

North-Western Provinces and Oudh.—*For week ending 10th February.*—Slight showers are reported from hill districts. Spring crops still promise well and should be above the average in many districts. Rain is wanted for the crops in other districts. Slight damage by hail is reported from Garhwal and by frost from Meerut and Hamirpur. Arhar (*Cajanus indicus*) and early spring crops are being harvested and sugarcane pressing is in progress. Prospects of the poppy crop are excellent. The numbers in receipt of relief on Saturday, 6th February 1897, in eighteen districts which have been officially recognised as distressed were as follows:—Agra 26,735, Etawah 17,201, Banda 170,293, Cawnpore 87,022, Hamirpur 64,080, Allahabad 174,699, Jhansi 62,346, Jalaun 95,701, Jaunpur 56,002, Mirzapur 29,329, Gorakhpur 28,648, Lucknow 67,299, Unao 44,513, Rae Bareli 78,211, Sitapur 50,657, Hardoi 152,053, Barabanki 42,409, Azamgarh 8,105. Total 1,255,303. The total is distributed as follows among the various methods of relief prescribed by the Famine Code which are in operation:—Employed on relief works 827,136, relieved as dependants 192,169, relieved in poor houses 42,466, relieved under other provisions of the Famine Code 193,532. The numbers relieved in nineteen districts which are under observation but not yet officially recognised as distressed were on the same date as follows:—Relieved on test works 106,984, relieved in poor houses 16,246, relieved under other provisions of the Famine Code 26,003. Total 149,233. The grand total in receipt of relief on the last day of the week was therefore 1,404,536. Supplies are generally sufficient. Fodder is somewhat scarce in places. Prices are distinctly easier in most districts. The price of the staple grain on which the famine wages are based varied from 9 to 11 seers in the districts officially recognised as distressed.

Punjab.—*For week ending 9th February.*—Rain averaging about ⅓ of an inch has fallen in Sialkot, ⅕ in Gujranwala and ½ in Dera Ismail Khan and in the plain tracts of Rawalpindi, about 3⅓ inches rain has also fallen in the hill tracts of the latter district. There was also a slight drizzle in parts of Umballa, Ferozepore and Mooltan. Extra spring crops are being sown on irrigated land.

The sugar-cane crop is somewhat damaged in parts of Jullundur: it is being pressed in this as well as in the Amritsar district. The condition and prospects of the standing crops are generally reported good to fair; they are average in Mooltan. Crops on dry land have failed in Hissar and are withering in Rohtak but saved so far by the recent rains in Gujranwalla. More rain is urgently wanted in the Rohtak, Gurgaon and Umballa districts and also in Shahpur and Dera Ismail Khan to improve the condition of standing crops. Stocks of food-grain have been nearly exhausted in Hissar and are insufficient with the cultivators of Lahore and Amritsar; the stock in Jullundur has been reduced. Rape and gram crops are being damaged by insects in parts of Ferozepore. Cattle are generally in poor condition for want of fodder; their condition is good to fair in Gurgaon and Amritsar. Fodder is reported scarce in all districts except Umballa; the supply of green fodder has been improved by recent rain in Sialkot and Gujranwala. The average number of persons on famine relief works was:—6,778 in Rohtak, 592 in Gurgaon, 4,142 in Delhi, 2,099 in Karnal, 1,579 in Ferozepore, 47,346 in Gujrat and 39,572 in Hissar, including 2,571, 38,874, 24,222, 15,336 and 7,510 persons, respectively, gratuitously relieved. 1,752 persons were also on relief works in Umballa and 2,571 in Lahore. 1,092 persons from private subscriptions were on ordinary works in Gurgaon, where R2,552 were collected attended the test works in Ludhiana, 295 in Mooltan, 103 in Lahore, 237 in Gujranwala and 27 in Rawalpindi. Sialkot works have been closed. Prices are generally high and they have again commenced to rise in most districts; prices are falling slightly in Sialkot, Shahpur and Rawalpindi. Wheat is selling from 8½ to 10½ seers, gram 10½ to 12¼, great millet 10½ to 11¾ seers, bulrush millet 10 to 11 seers and maize 10½ to 13 seers per rupee. Total number in receipt of relief:—106,239. Prices of the staple food-grains on which the famine wage is reckoned are:—Rohtak great millet and gram 11½ seers, Delhi bulrush millet 9½ seers, Karnal gram and maize 10 seers, Ferozepore great millet and gram 13 seers, Gujrat wheat flour 8 seers, Ludhiana maize seers, Mooltan and Gujranwalla wheat 9½ seers and Lahore wheat and maize 10 and 11 seers, respectively, per rupee.

Central Provinces.—*For week ending 9th February.*—Weather slightly cloudy, occasionally with high winds. Days getting warm. Spring crops are generally in fair to good condition, but some damage has been caused by cloudy weather in Hoshangabad, Chanda, Bhandara, by frost in Damoh, by rust in Balaghat, and by hail in Wardha. The reaping of spring crops and sowing of sugar-cane continue. Fodder is sufficient except in Seoni, Hoshangabad, and parts of Nagpur and Sambalpur. The water-supply is sufficient. Imports: Jubbulpore 21,677, Mandla 300, Seoni 632, and Nimar 6,000 maunds. The numbers on relief works are:—Saugor 26,122, Damoh 22,379, Jubbulpore 84,763, Mandla 16,194, Seoni 6,711, Narsinghpur 15,698, Hoshangabad 29,211, Nimar 552, Betul 11,321, Chhindwara 5,742, Nagpur 1,110, Chanda 2,441, Bhandara 8,933, Balaghat 4,169, Raipur 9,226, Bilaspur 7,224. Total 251,796; and on gratuitous relief, Saugor 16,081, Damoh 3,562, Jubbulpore 15,543, Mandla 1,230, Seoni 1,533, Narsingpur 7,390, Hoshangabad 5,999, Nimar 401, Betul 1,755, Chindwara 2,209, Nagpur 1,446, Chanda 302, Bhandara 2,114, Balaghat 1,955, Raipur 1,791, Bilaspur 1,506. Total 64,817. The grand total in receipt of relief was therefore 316,613. There were also 43,527 on railway and private works in Saugor, Damoh, Jubbulpore, Chhindwara and Bilaspur. People are leaving the relief works in Narsinghpur, Hoshangabad and Nagpur, on account of the commencement of the harvest. Prices of staple food-grains on which famine wages are based are:—Saugor and Mandla 8¾, Damoh 8¾, Jubulpore 9½, Seoni, Narsinghpur, Hoshangabad, Betul, Chhindwara, Bhandara and Raipur 10, Nimar and Bilaspur 10½, Nagpur 11½, Chanda 12½ and Balaghat 8 seers per rupee.

Burma.—*For week ending 6th February*—In Lower Burma threshing and winnowing are progressing. The crop estimate for Akyab has been reduced to 12 annas. In Upper Burma the cultivation of dry weather paddy is progressing. Ploughing for early wet weather paddy has commenced in Mandalay. Prospects of dry weather paddy and miscellaneous crops remain fair. The price

of paddy has risen largely in the Upper Chindwin, considerably in Akyab, and slightly in Thayetmyo; while it has fallen considerably in Minbu and slightly in Tharrawaddy. Numbers on relief works are:—Meiktila 17,561; Myingyan 9,664; and on gratuitous relief, Meiktila 2,953, Myingyan 2,613, Yamethin 291. Total numbers on relief 33,082. In Meiktila the price of rice is 8 seers 15 chittacks and in Myingyan 9 seers 5 chittacks per rupee.

Assam.—*For week ending 9th February.*—The weather is seasonable. Rain is wanted in Kamrup for early rice ploughing. Mustard is being gathered and pressing of sugar-cane and pruning of tea continue. Prices: Common rice, Silchar 9, Sylhet 10½, Gauhati and Tezpur 10 and Sibsagar 11 seers per rupee. Fodder is insufficient in Cachar, Naga Hills and Khasia and Jaintia Hills. Water is sufficient except in Nowgong and the Naga Hills.

Mysore and Coorg.—*For week ending 9th February.*—MYSORE: The standing crops are in good condition. Prices have risen in all districts excepting Bangalore and Hassan. Ragi (*Eleusine coracana*) has been harvested in Bangalore and Kolar.

COORG: The threshing of rice continues. The picking of coffee is completed. Prices are normal. Water and fodder for cattle are sufficient.

Berar and Hyderabad.—*For week ending 9th February.*—BERAR: The weather is cool. Cotton-picking is almost completed. Wheat, gram and linseed are not thriving satisfactorily. Ploughing of fields for the ensuing rain crop is in progress. Fodder and water are inadequate to wants. High prices continue. 2,152 persons are employed on relief works. Prices: Melghat 11 seers per rupee.

HYDERABAD:—Rainfall during the week ended 6th February 4 cents, total from 1st January 11 cents. Spring crop being harvested in certain parts Agricultural prospects poor. Scarcity of fodder exists. Water-supply decreasing. Relief works on a small scale have been started in Raichore, Lingsagad and at Parenda in the Naldrug district. Prices Wheat 7, coarse rice 6 and jowari 12 seers per current sicca rupee.

Central India.—*For week ending 10th February.*—No rain fell in Central India during the week. Agricultural operations have been completed in Bundelkhand and Baghelkhand and are in progress in other agencies. The crops have been damaged by hail in three parganas of Gwalior. Agricultural stock are in good condition in Bundelkhand and Malwa and in two districts of Gwalior, fair in Bhopal, and indifferent in Baghelkhand. Pasturage is fair in Bhopal and Malwa, good in two districts of Gwalior and indifferent in Bundelkhand, Baghelkhand and in some districts of Gwalior. Prices are above normal in Bundelkhand and Malwa, slightly falling, but still high in Baghelkhand; steady elsewhere. Opium is in good condition in Malwa and in two districts of Gwalior; fair in Bhopal and in some districts of Gwalior. The number of persons employed on famine relief works are:—Gwalior 6,038, Bundelkhand 2,240, Baghelkhand 60,143, and on gratuitous relief in Bundelkhand 1,610, Baghelkhand 2,734; not reported from Gwalior. Total number on relief 73,665. The price of the staple food grain on which the famine wages are based, are: Gwalior 10 to 10½; Baghelkhand 10¼ seers per rupee.

Rajputana.—*For week ending 10th February.*—No rain has fallen throughout Rajputana. Agricultural operations are satisfactory in Jhallawar, Kotah, Jeypore, and in Ajmere-Merwara; fairly satisfactory in Kherwara; poor in Dholpore. The standing crops are generally in a good condition except in Dholpore. The prospects of the harvests are good in Jhallawar, favourable in Jeypore; an average outturn is expected in Ajmere-Merwara. The cattle are in good condition except in Dholpore, Bickaneer, Jaisulmere and Bhurtpore. Fodder is sufficient but scarce in some tehsils of Jeypore, and failing in Dholpore and Bhurtpore. Prices falling in Pertabgurh, Bhurtpore, Bickaneer, Jaisulmere and in Ajmere-Merwara, rising in Meywar and Kerowli, and steady elsewhere. The number of persons on relief works was:—Marwar

4,646, Kotah 1,067, Dholpore 6,033, Bickaneer 11,742, Jaisulmere 839; and on gratuitous relief: Marwar 1,004, Bickaneer 1,802, Jaisulmere 13. Total number on relief 27,146. The price of the staple food-grain on which the famine wages are based are:—Marwar, 8 seers 7 chittacks, Kotah 14½ seers, Dholpore 14 seers 10 chittacks, Bhurtpore 10 seers 1 chittack, Bickaneer, 8 seers 14 chittacks to 9 seers, Jaisulmere 8½ seers per rupee.

Kashmir.—*For week ending 8th February.*—Snow has fallen. Prices continue below normal. Price 24 seers per rupee.

JAMMU PROVINCE.—*For week ending 10th February.*—There has been slight rain during the week. Prices are sationary and fodder is scanty. Relief works are in progress. Prices 10¾ seers per rupee.

Nepal.—*For week ending 6th February.*—Weather fine with high winds. Prospects good. Prices 7⅛ seers per rupee.

The total numbers in receipt of relief during the preceding and present weeks are as follows:—

T. W. HOLDERNESS,
Deputy Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FAMINE).

Return of the number of persons in receipt of relief in districts affected by scarcity.

E.—The figures are compiled from the Local Gazettes, and give the District details of the Provincial totals published weekly in the Crop ther Summary in the *Gazette of India*.
total area and the total population of the district in each case are given, though a portion only of the district may be affected. Non- children and other dependants of relief workers are classed as on relief works when distinguished in the local returns from persons ely relieved in poor-houses or at their homes.

(*k*) Total earnings from 11th November 1895 to 1st February 1896.
(*l*) Total earnings from 15th July 1896 to 30th January 1897.
(*m*) Includes the Mysore-Nanjangud and the Yesvantpur-Mysore frontier sections.

No. 92 R. Stat.

GOVERNMENT OF INDIA.

PUBLIC WORKS DEPARTMENT.

RAILWAY STATISTICS.

Calcutta, the 5th February 1897.

Results of the working of automatic vacuum brakes in use on railways in India during the six months ending with the 30th June 1896.

Read again—

Government of India letter No. 62 R. Stat., dated the 19th October 1891.

Government of India letter No. 354 R. Stat., dated the 4th September 1894.

Government of India order No. 348 R. Stat., dated the 28th August 1896.

Read also—

Endorsement by the Director General of Railways, No. 58 Stat., dated the 26th January 1897, forwarding tables Nos. I and II showing the railways on which automatic vacuum brakes were in use, the number and proportion of rolling stock fitted with the brakes, the progress made in fitting stock since the previous half-year, and the results of working the brakes during the six months ending with the 30th June 1896.

ORDER.—Ordered, that tables Nos. I and II be forwarded, for information, to the Local Governments and Administrations, and to the officers noted in the margin.

The Governments of Madras, Bombay, Bengal, the North-Western Provinces and Oudh, and the Punjab.
The Chief Commissioners of the Central Provinces, Burma and Assam.
The Resident at Hyderabad.
The Resident in Mysore.
The Agents to the Governor General for Central India, Rajputana and Baluchistan.
The Director General of Railways.
The Consulting Engineers to the Government of India for Railways, Calcutta, Lucknow, and Assam.

Ordered, also, that copies be forwarded for the information of Her Majesty's Government.

Further, that this order, with the tables, be published in the Supplement to the *Gazette of India*.

G. A. ANDERSON,
Under Secretary.

Documents accompanying.

Tables Nos. I and II showing the railways on which automatic vacuum brakes were in use, the number and proportion of rolling stock fitted with the brakes, the progress made in fitting stock since the previous half-year, and the results of working the brakes during the six months ending with the 30th June 1896.

TABLE No. I.

ent showing, for the six months ending with the 30th June 1896, the railways on which automatic vacuum brakes re in use, the mileage run by trains fitted with the brakes, the number and proportion of rolling stock fitted, and the ogress made in fitting stock since the previous half-year.

ays (including branch lines worked).	Period.	Locomotives.		Vehicles.*			Number of motor vans by trains fitted.	Total number of passengers by which the train is fitted, also number carried for whom the brakes are worked by means of taps.	Proportion per cent.		
		Fitted.	Not fitted.	Braked.	Piped.	Not fitted.			Vehicles fitted or piped per cent.	Mileage run by trains fitted (partially fitted trains included) to total train-mileage.	Number of failures as compared with mileage run by trains fitted.

TABLE No. II.

Statement showing, for the six months ending with the 30th June 1896, all cases in which the automatic vacuum brakes failed to act when required to be brought into action, or caused delay in the working of trains.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of:— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with automatic vacuum brakes.
STANDARD GAUGE.				
East Indian . . .	Vacuum automatic.		(i) and (ii)—*Nil.*	
		4th January 1896 .	(iii) Failure of machinery.—No. 2 down mail train lost 20 minutes at Dánar and Hatras junction stations, owing to the brake blocks of the brake-van sticking on.	
		6th January 1896	(iii) Failure of material.—No. 1 up Jubbulpore mail train lost 15 minutes at Bhadunpur station, owing to the piston of a third class carriage leaking badly.	
		7th January 1896 .	(iii) Failure of machinery.—No. 2 down Jubbulpore mail train lost 7 minutes at Dabhaura station. The train was brought to a stand, owing to the release valve of a first class carriage leaking.	
		13th January 1896	(iii) Failure of machinery.—No. 1 up Jubbulpore mail train lost 10 minutes at Katni station, owing to a defect in the brake of brake-van	
		10th February 1896	(iii) Failure of machinery.—No. 2 down mail train lost 3 minutes in the run from Ariah to Dinapore and 17 minutes from Dinapore to Futwah stations, owing to the brakes sticking, and 25 minutes at Futwah station in releasing brakes.	
		17th February 1896	(iii) Failure of material.—No. 1 up mail train lost 5 minutes at Malwa station, owing to a crack in the train pipe attached to the combination ejector top flanges.	See page 2
		19th February 1896	(iii) Failure of material.—No. 1 up mail train lost 10 minutes between Buxar and Dheena stations, owing to the pipe between ejector and indicator leaking	
		14th March 1896 .	(iii) Failure of material.—No. 1 up mail train lost 10 minutes at Phaphúnd station, owing to a defect in the rubber washer of universal coupling of a horse box.	
		1st April 1896 .	(iii) Neglect of servants.—No. 1 up mail train lost 15 minutes at Cawnpore station, owing to a carriage not having been coupled up properly	
		13th April 1896 .	(iii) Failure of material.—No 2 down mail train detained 5 minutes at Raneegunge station in disconnecting pipe of rear van as the driver was unable to maintain sufficient vacuum.	
		23rd April 1896 .	(iii) Failure of machinery.—No. 1 up mail train lost 3 minutes between Tundla and Barhan stations and detained 5 minutes at the latter station, owing to the brakes on a first class carriage sticking, due to a defect in the vacuum relief valve which was drawing air.	

TABLE No. II—*contd.*

nt showing, for the six months ending with the 30th June 1896, all cases in which the automatic vacuum brake failed to act when required to be brought into action, or caused delay in the working of trains—contd.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of — (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with automatic vacuum brakes.
BD GAUGE—*contd.*				
dian—*concld.*	Vacuum automatic.	9th May 1896 .	(iii) Neglect of servants.—No. 1 up mail train detained 18 minutes at Dádri station, owing to the train pipe on a carriage, 3rd from the engine, having become disconnected, due to the pipe not being properly coupled up.	
		21st May 1896 .	(iii) Failure of material.—No. 36 down local train detained 4 minutes at Bandyabáti station in releasing brakes, owing to the vacuum train pipe on the engine breaking close to ejector.	
		24th June 1896 .	(iii) Failure of machinery.—No. 2 down mail train lost 28 minutes at Karnál station, owing to a defect in the brake of a reserved carriage, and 16 minutes at Ghaziabad station in releasing the brakes and substituting communication cord.	641,089
		25th June 1896 .	(iii) Failure of machinery.—No. 2 down mail train lost 7 minutes at Bankipur station, owing to the rocking arm on a North-Western railway postal van working stiff.	
an Midland . .	Vacuum automatic.		(i) and (ii)—*Nil.*	
		12th January 1896	(iii) Failure of material.—No. 2 up mail train lost 2 minutes between Jhánsi and Tálbahat stations, owing to defects in brake blocks.	
		9th March 1896 .	(iii) Failure of material.—No. 2 up mail train lost 9 minutes between Dholpur and Hetampur stations, as the driver was unable to create sufficient vacuum owing to defects in the rubber washers of the hose couplings of two composite carriages belonging to the Oudh and Rohilkhand and Great Indian Peninsula railways.	
		10th March 1896 .	(iii) Failure of material.—No. 2 up mail train lost 10 minutes at Lána station, as the driver was unable to create vacuum owing to a leakage in the train pipe of a Great Indian Peninsula railway through carriage.	191,100
		8th April 1896 .	(iii) Failure of material.—No 2 up mail train lost 36 minutes between Dewanganj and Bhopal stations in examining and releasing defective brake blocks	
		17th June 1896 .	(iii) Failure of material.—No. 5 down mail train lost 14 minutes between Jhansi and Moth stations, owing to a defect in the piston.	
		23rd June 1896 .	(iii) Failure of material.—No. 5 down mail train lost 6 minutes at Ata station in releasing brakes. The driver was unable to create sufficient vacuum owing to the regulator disc having been cut.	

TABLE No. II—*contd.*

Statement showing, for the six months ending with the 30th June 1896, all cases in which the automatic vacuum brakes failed to act, when required to be brought into action, or caused delay in the working of trains—contd.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of :— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material. STANDARD GAUGE—*cont'd.*				
North Western (state)	Vacuum automatic.		(i) and (ii)—*Nil.*	
		7th January 1896	(iii) Failure of material.—No. 4 down mail train detained 11 minutes at Rájpura station in detaching a reserved carriage, the hose pipe of which was defective.	
		14th January 1896	(iii) Neglect of servants.—No. 5 up mail train detained 3 minutes at Sansáwa station, owing to the vacuum hose pipe of the rear brake-van not having been properly placed on the dummy.	
		22nd January 1896	(iii) Failure of material.—No. 23 up mail train detained 6 minutes at Ghoráki station. After the brake was applied, the engine vacuum cylinder piston stuck up and would not release itself until prized down.	
		25th January 1896	(iii) Neglect of servants.—No. 7 up mail train lost 3 minutes between Bálah and Bárára stations, in consequence of the brake blocks remaining on the wheels of a carriage due to the vacuum piston sticking.	
		4th February 1896	(iii) Neglect of servants.—No. 5 up mail train detained 22 minutes at Umbala Cantonment station. The vacuum ran down owing to defects in the cylinder of an intermediate class carriage which had to be detached.	
		5th February 1896	(iii) Neglect of servants.—No. 5 up mail train lost 7 minutes between Ghaziabad and Meerut City stations. The driver was unable to maintain sufficient vacuum in consequence of defective couplings between carriages.	See page 5.
		6th February 1896	(iii) Neglect of servants.—No. 19 up mixed train lost 5 minutes at Chháwa station. The driver was unable to maintain sufficient vacuum in consequence of defective couplings between carriages.	
		6th February 1896	(iii) Neglect of servants.—No. 1 up Quetta mail train detained 6 minutes at Allahbándni flag station. The driver could not create a vacuum in consequence of defective couplings between carriages.	
		8th February 1896	(iii) Neglect of servants.—No. 1 up Quetta mail train detained 5 minutes at Bálah station. The driver was unable to maintain sufficient vacuum in consequence of defective couplings between carriages.	
		12th February 1896	(iii) Failure of material.—No. 3 up train lost 7 minutes between Ghaziabad and Mahéshnagar stations. The vacuum pipe of a Great Indian Peninsula railway second class carriage was out of order.	
		13th February 1896	(iii) Neglect of servants.—No. 8 down mail train detained 3 minutes at Mirpur station, as the train could not be moved owing to brake blocks having been jammed on the wheels.	
		2nd March 1896	(iii) Neglect of servants.—No. 3 up mail train detained 20 minutes at Jagádhri station, owing to the vacuum pipe having been left disconnected between two [illegible]

...D GAUGE—*contd.*				
Western (state)—	Vacuum automatic.	19th March 1896 .	(iii) Neglect of servants.—No. 8 down mail train detained 5 minutes at Bákráni station, owing to the rod bolt dropping from a second class carriage which caused the brake to go on.	
		19th March 1896 .	(iii) Neglect of servants.—No. 1 up mail train lost 5 minutes between Madeji and Ruk stations, owing to brake blocks seizing on the wheels, due to want of oil in the shafts.	
		20th March 1896 .	(iii) Failure of material.—No. 7 up mail train lost 2 minutes at Ghotki, 2 minutes at Sarhad, 5 minutes at Rahim Yárkhán, and 7 minutes at Kotsamabá stations, owing to the engine vacuum cylinder piston sticking up.	
		3rd April 1896 .	(iii) Failure of material.—No. 6 down passenger train detained 6 minutes at Begamabad station, owing to the brakes of two carriages being on.	
		3rd April 1896 .	(iii) Failure of material.—No. 6 down passenger train detained 5 minutes at Murádnagar station, owing to the pistons of two carriages having stuck up.	
		13th April 1896 .	(iii) Neglect of servants.—A troop special train started late from Sibi station, owing to dirt getting into the ejector.	
		20th April 1896 .	(iii) Neglect of servants.—No. 5 up mail train detained 5 minutes at Sahárunpur station, owing to the universal coupling of an Oudh and Rohilkhand railway 2nd class carriage not having been properly connected.	See page 5.
		24th April 1896 .	(iii) Neglect of servants.—No. 4 down mail train detained 7 minutes at Saháranpur station, as the driver was unable to create vacuum in consequence of defective couplings between carriages.	
		6th May 1896 .	(iii) Neglect of servants.—No. 12 down mixed train detained 15 minutes at Sambhu station. The train was brought to a stand owing to the hose pipe having come off the rear dummy.	
		6th May 1896 .	(iii) Neglect of servants.—No. 6 down passenger train detained 5 minutes at Umballa City station. The driver was unable to create a vacuum in consequence of defective couplings between carriages.	
		22nd May 1896 .	(iii) Neglect of servants.—No. 8 down mail train detained 6 minutes at Rohri station. The driver could not create a vacuum, owing to an intermediate class carriage attached at that station having no rubber washer on the hose-pipe coupling.	
		22nd May 1896 .	(iii) Failure of material.—No. 2 down mail train detained 7 minutes at Ruk station, owing to the coupling of a third class carriage having been defective.	
		10th June 1896 .	(iii) Neglect of servants.—No. 7 up mail train detained 6 minutes at Phulji station. The driver could not create a vacuum owing to the tender vacuum piston rod having slackened back.

North Western (state)—*concld.*	Vacuum automatic.	27th June 1896 .	(iii) Failure of material.—No. 5 up mail train detained 11 minutes at Beas station, owing to the small pipe leading from main train pipe to engine brake cylinder snapping off at a faulty thread.	1,634,357
Oudh and Rohilkhand (state).	Vacuum automatic.		(i) and (ii)—*Nil.*	
		16th May 1896 .	(iii) Inexperience of servants.—No. 1 up mail train detained 10 minutes at Sháhjahánpur station. The driver was unable to work brake when required to be brought into action.	150,230
Eastern Bengal (state) .	Vacuum automatic.		(i) and (ii)—*Nil.*	
		12th January 1896	(iii) Failure of material.—No 33 up train detained 10 minutes at Khoksa station, in consequence of the train pipe leaking.	
		30th January 1896	(iii) Failure of material.—No. 36 down train detained 12 minutes at Jagati station, owing to train pipe leaking.	
		3rd February 1896	(iii) Failure of material.—No. 21 up train detained 8 minutes at Ránaghat station, in consequence of the coupling of the train pipe having become disconnected.	
		9th February 1896	(iii) Failure of material.—No. 27 up train lost 27 minutes between Naihátí and Chogdah stations, owing to the train pipe leaking and the brake not releasing properly.	
		11th February 1896	(iii) Neglect of servants.—No. 7 up train detained 4 minutes at Munshiganj station, owing to the vacuum pipe on the fourth carriage from the brake-van not having been adjusted.	356,902
		10th March 1896 .	(iii) Failure of material.—No. 36 down train lost 6 minutes at Chooadangah station and 3 minutes between Poráḍaha junction and Hálsa stations, owing to a leakage in the train pipe.	
		26th April 1896 .	(iii) Failure of material.—No. 7 up mail and mixed train detained 5 minutes at Shámnagar station, owing to a leakage in the train pipe.	
		8th May 1896 .	(iii) Failure of material.—No. 21 up train lost 11 minutes on the road, owing to a leakage in the train pipe.	
		10th May 1896 .	(iii) Failure of material.—No. 7 up mail and mixed train detained 8 minutes at Barrackpore station, owing to a leakage in the train pipe.	

TABLE No. 11—*contd.*

out showing, for the six months ending with the 30th June 1896, all cases in which the automatic vacuum brakes failed to act, when required to be brought into action or caused delay in the working of trains—contd.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of :— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent. (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with automatic vacuum brakes.
ARD GAUGE—*contd.*				
Indian Peninsula.	Vacuum automatic.		(i)—*Nil.*	
		28th January 1896	(ii) No. 213 down passenger train worked non-automatic from Bhusaval to Budnera stations, owing to leakage in a post office composite carriage.	
		22nd May 1896	(ii) The brake hanger bracket of a second class carriage on No. 194 up passenger train broke between Dádar and Parel stations.	
		11th January 1896	(ii) Failure of material.—Owing to pipes leaking in consequence of a defective rubber washer in the coupling of a horse box attached to No. 10 up passenger train, there was a slight delay at Devláli station in releasing brake, and a detention of 6 minutes at Kására station in replacing the defective washer.	
		16th January 1896	(iii) Failure of material.—The brake hanger of a third class carriage having broken, No. 147 down passenger train was detained for 11 minutes at Brenlla station in examining and removing broken brake rigging and shunting off carriage.	
		19th January 1896	(iii) Failure of material.—No. 213 down passenger train detained 20 minutes at Nárgáon station in replacing the flange joint of ball valve of a third class carriage which was leaking.	See page 8.
		26th January 1896	(iii) Failure of material.—No. 213 down passenger train lost 30 minutes between Wárangáon and Nárgáon stations, on account of the couplings of a road van, a postal carriage and four third class carriages leaking.	
		27th January 1896	(iii) Inexperience of servants.—No. 91 down passenger train lost 4 minutes between Bombay and Chinchpokli stations, owing to an ejector tappet valve in the engine being improperly fitted.	
		28th January 1896	(iii) Failure of machinery.—On account of the rolling ring of a third class carriage having been jammed in cylinder, No. 31 down passenger train lost 18 minutes on the road and in uncoupling brake gear of engine.	
		29th January 1896	(iii) Neglect of servants.—The coupling of a vehicle on No. 112 up passenger train not remaining on dummy plug which was not properly fixed, the train was delayed 11 minutes at Dhond station in securing coupling to dummy.	
		5th February 1896	(iii) Failure of machinery.—On account of the piston of a brake-van attached to No. 6 up mail train failing to release properly, the train lost 20 minutes on the road and in disconnecting vacuum gear of brake-van.	

TABLE No. II—*contd.*

***Statement showing, for the six months ending with the 30th June 1896, all cases in which the automatic vacuum brake failed to act, when required to be brought into action, or caused delay in the working of trains*—contd.**

1	2	3	4	
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of :— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent. (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with automatic vacuum brakes.
STANDARD GAUGE—*contd.*				
Great Indian Peninsula—*contd.*	Vacuum automatic.	18th February 1896	(iii) Failure of machinery.—No. 145 down mail train was detained for 7 minutes in uncoupling a first class carriage at Kalyán station, as the brake of this carriage hard on between Byculla and Kalyán stations could not be released.	
		27th February 1896	(iii) Inexperience of servants.—The coupling of a third class carriage attached to No. 10 up passenger train could not be kept in position on dummy plug at Manmád station. The train lost 20 minutes on the road and at Manmád station in finding out the defect.	
		1st March 1896 .	(iii) Inexperience of servants.—No. 64 up passenger train lost 20 minutes at Budnera station, due partly to shunting operations and partly to the driver having failed to create vacuum and to release the brake pistons of the engine which had seized.	
		6th March 1896 .	(iii) Failure of material.—The hose pipes and couplings of a postal van, a third class carriage and a road van of No. 213 down passenger train drawing air, owing to inferior India-rubber pipes having become hard and stiff through the climate, the train was delayed for 5 minutes at Khánkhed station.	
		8th March 1896 .	(iii) Failure of material.—The hose pipes and couplings of a second class carriage, a third class carriage and a road van of No. 213 down passenger train drawing air, owing to inferior India-rubber washer pipes having become hard and stiff through the climate, the train was detained for 20 minutes at Bhusaval station.	See page 8.
		10th March 1896 .	(iii) Failure of machinery.—No 35 down passenger train detained 15 minutes at Lonávla station, as the tender brake of the engine could not be released.	
		26th March 1896 .	(iii) Neglect of servants.—A defective washer of a third class carriage on No. 151 down passenger train was found glued on to the coupling at Bombay station, and the train was delayed for 22 minutes in searching for the leak and endeavouring to remove the washer.	
		30th March 1896 .	(iii) Failure of machinery.—No. 107 down passenger train detained 19 minutes at Jalgaon station, as the piston of a second class carriage could not be released.	
		8th April 1896 .	(iii) Failure of material.—The small India-rubber flexible pipe to right hand cylinder of engine of No 6 up mail train broke at mile 176¼ and caused a delay of 18 minutes.	
		13th April 1896 . .	(iii) Failure of machinery.—Two bracket bolts of a second class carriage attached to No. 180 up passenger train broke at Thána, causing a detention of 3 minutes in uncoupling brake gear.	
		14th April 1896 .	(iii) Failure of machinery.—The piston of a third class carriage of No. 64 up passenger train got jammed and could not be released at Murtajápur, resulting in delay of 15 minutes in uncoupling cylinder.	

TABLE No. II—*contd.*

ent showing, for the six months ending with the 30th June 1896, all cases in which the automatic vacuum brakes failed to act, when required to be brought into action, or caused delay in the working of trains—contd.

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of :— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains having occurred. (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defects in, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with automatic vacuum brakes.
)ARD GAUGE—*contd.*				
Indian Peninsula—*concld.*	Vacuum automatic.	16th April 1896 .	(iii) Failure of material.—The small India-rubber flexible pipe to cylinder of a third class carriage on 4 up passenger train broke at Lonávla when vacuum was being created, causing slight delay in detaching carriage.	
		23rd April 1896 .	(iii) Failure of machinery.—The piston of a third class carriage attached to No. 43 down passenger train got jammed and could not be released at Victoria Terminus station. The train was delayed for fifteen minutes in discovering defect and uncoupling cylinder.	
		16th May 1896 .	(iii) Failure of machinery.—The piston of a brake-van on No. 29 down passenger train becoming jammed and wheels skidding, the train was delayed for twelve minutes at Lonávla station in examining and detaching defective vehicle.	
		27th May 1896 .	(iii) Failure of material.—The brake hanger bracket of a third class carriage on No. 216 up passenger train broke at Kurla station, damaging truss-bar hanger links and brake block and causing a delay of 9 minutes in detaching broken brake gear	1,096,995
		4th June 1896 .	(iii) Failure of machinery.—The piston of a third class carriage on No. 306 up passenger train became jammed and brake could not be released at Mazagaon station, resulting in 11 minutes delay in disconnecting.	
		12th June 1896 .	(iii) Failure of machinery.—The truss rod pin of a road van on No. 152 up passenger train worked out at mile 5 —4, allowing the rod to drop and caused a delay of 8 minutes in replacing missing pin by a bolt.	
		22nd June 1896 .	(iii) Failure of material.—The small India-rubber pipe of the engine on No 208 up passenger train broke at Thána station, as vacuum was being created. Fifteen minutes' delay resulted in plugging up the pipes.	
		28th June 1896 .	(iii) Failure of material.—The brake hanger bracket of a third class carriage on No. 168 up passenger train broke at Sion station and delayed the train for 13 minutes in disconnecting the gear.	
ıbay, Baroda and Central India.	Vacuum automatic.		(i)—*Nil.*	
		2nd January 189 .	(ii) No. 4 up ordinary train had to run non-automatic from Dáḳáṇu Road to Colába stations, owing to a hole in the engine vacuum pipe caused by hot ashes falling on it when dropping the fire at Amroli shed.	
		1st January 1896 .	(iii) Failure of material —No. 5 down ordinary train lost 19 minutes on the road, owing to a leak in the pipe joints of a brake-van.	See page 9.
		2nd January 1896 .	(iii) Neglect of servants.—No. 8 up ordinary train detained 6 minutes at Mehmadabad station in releasing brakes owing to the engine brake blocks getting jammed on the wheels through the rubber pipes getting burnt when cleaning fire.	

TABLE No. II—*concld.*

***Statement showing, for the six months ending with the 30th June 1896, all cases in which the automatic vacuum brakes failed to act, when required to be brought into action, or caused delay in the working of trains*—concld.**

1	2	3	4	5
Railway.	Name or description of brakes which failed or caused delay in the instances specified in column 4.	Date of failure.	Instances under the three following heads separately, of :— (i) Failure or partial failure to act when required in case of an accident to a train, or a collision between trains being imminent. (ii) Failure or partial failure to act under ordinary circumstances to stop a train when required. (iii) Delay in the working of trains in consequence of defective, or improper action of, the brakes, distinguishing whether they arose from neglect or inexperience of servants, or failure of machinery or material.	Number of miles run by trains fitted with automatic vacuum brakes.
STANDARD GAUGE—*concld.*				
Bombay, Baroda and Central India—*concld.*	Vacuum automatic.	3rd January 1896 .	(iii) Neglect of servants.—No. 2 up mail train detained 3 minutes at Ankleswar station in releasing brakes, owing to engine vacuum pipes getting burnt by hot ashes when cleaning fire.	530,486
		21st March 1896 .	(iii) Failure of machinery.—No. 1 down mail train detained 4 minutes at Grant Road station in releasing brakes, owing to ejectors having failed through some dirt getting in.	
		15th April 1896 .	(iii) Failure of material.—No. 5 down ordinary train detained 8 minutes at Vidvada station in releasing brakes, as the vacuum pipes between engine and tender gave way.	
		26th May 1896 .	(iii) Neglect of servants.—No. 1 down mail train detained 14 minutes at Amroli station to pull off the wires of the carriages, as the driver could not get sufficient vacuum on account of there being no washer or front dummy of engine.	
		9th June 1896 .	(iii) Neglect of servants.—No. 4 up ordinary train detained 7 minutes at Baroda station in releasing brakes as the train pipes were leaking, owing to a third class carriage being fitted with a pipe one inch shorter than the standard size, and sufficient vacuum could not consequently be created.	
		12th June 1896 .	(iii) Neglect of servants.—No. 4 up ordinary train detained 5 minutes at Bárejádi station as the driver could not get sufficient vacuum, the ejector being out of order.	
METRE GAUGE.				
South Indian . . .	Vacuum automatic.		(i) —*Nil.*	227,945
		7th March 1896 .	(ii) The brake of No. 31 mail train failed to act when entering the Trichinopoly junction station, owing to waste having got into the flexible pipe between the tender and the brake-van. The brake gear was in order.	
		20th June 1896 .	(iii) Failure of material.—No. 15 mail train lost 13 minutes between Trichinopoly junction and Kolattúr south stations. The driver could not maintain vacuum owing to the ejector cones of engine being defective which caused the brakes to grind on the wheels.

CALCUTTA, SATURDAY, FEBRUARY 20, 1897.

HOME DEPARTMENT.

NOTIFICATION.

SANITARY.

Calcutta, the 20th February, 1897.

No. 625.

THE question of the suspension of the pilgrimage to the Hedjaz having been under the consideration of the Government of India and Her Majesty's Government, Her Majesty's Government have now come to the conclusion that, in consequence of the strong opinions of all European Governments, including Turkey, regarding the danger of plague being communicated to Europe, it is impossible to meet their demands by any measure short of the suspension of the pilgrimage for the time being.

The Governor General in Council is therefore pleased, under section 2, sub-section 1, of the Epidemic Diseases Act, 1897, to order that the pilgrimage to the Hedjaz shall be altogether suspended for the current season.

J. P. HEWETT,
Secretary to the Government of India.

No. 584.—The following decrees of His Majesty the King of the Belgians respecting sanitary precautions in Belgium against the plague are published for general information :—

SERVICE DE SANTÉ HYGIENE PUBLIQUE ET VOIRIE COMMUNALE.

Choléra.—Mesures relatives à l'importation et au transit de certaines marchandises.

LÉOPOLD II, Roi des Belges,

A tous présents et à venir, SALUT.

Vu le décret sanitaire du 18 juillet 1831, ainsi que les règlements pris pour son exécution ;

Vu la convention du 15 avril 1893 adoptée par la Conférence sanitaire internationale de Dresde, relativement aux marchandises ou objets susceptibles envisagés au point de vue des défenses d'importation ou de transit, ainsi qu'aux mesures à prendre aux frontières de terre et de mer ;

Revu les arrêtés royaux des 30 juillet 1893, 17 juin 1894, 24 septembre 1894 et 22 février 1895, relatifs à l'importation et au transit de certaines marchandises et à des mesures à prendre en temps de choléra aux frontières de terre et de mer ;

Sur la rapport et la proposition de Notre Ministre de l'Agriculture et des Travaux publics,

Nous avons arrêté et arrêtons :

ARTICLE PREMIER.—Sont interdits à l'entrée et au transit par les frontières de terre et de mer : les chiffons et drilles, les linges de corps hardes et vêtements portés (effets à usage), les literies ayant servi, venant des pays ou des circonscriptions territoriales, déclarés contaminés, conformément à l'article 5 ci-après.

ART. 2.—Sont exceptés de la disposition qui précède :

1° Les chiffons comprimés mécaniquement, qui sont transportés comme marchandises en gros, par ballots cerclés de fer ou solidement maintenus par des fils de métal, et portant des marques et des numéros d'origine, acceptés par l'administration des douanes ;

2° Les déchets neufs provenant directement d'ateliers de filature, de tissage, de confection ou de blanchiment, les laines artificielles (kunstwolle, shoddy) et les rognures de papier neuf, munis d'un certificat d'origine, légalisé par l'autorité locale ou par le consul de Belgique du lieu d'expédition ;

3° Les marchandises et les objets désignés à l'article 1er, expédiés en transit sous la surveillance de la douane, lorsqu'ils sont emballés de telle façon qu'ils ne puissent être manipulés en route ;

4° Les bagages des voyageurs et les objets transportés à la suite d'un changement de domicile.

ART. 3.—L'importation et le transit des marchandises et objets visés à l'article 1er et provenant de pays ou de circonscriptions territoriales non contaminés peuvent être soumis à des justifications de provenance, à la satisfaction de l'administration des douanes.

Ils seront admis à l'importation et au transit, même lorsqu'ils ont traversé une circonscription contaminée, s'il est démontré à la dite administration qu'ils n'ont pas été en contact avec des objets souillés, pendant leur transport à travers cette circonscription.

ART. 4.—Les marchandises et objets visés à l'article 1er ne tomberont pas sous l'application des mesures de prohibition à l'entrée, s'il est démontré à l'administration des douanes qu'ils ont été expédiés d'une région contaminée cinq jours au moins avant le début de l'épidémie.

ART. 5.—Notre Ministre de l'Agriculture et des Travaux publics désignera les pays ou parties de pays à l'égard desquels le régime prévu par les dispositions qui précèdent sera rendu applicable et réglera la mise à exécution et la durée des mesures prescrites.

ART. 6.—Les mesures à prendre aux frontières de mer seront réglées par Notre Ministre de l'Agriculture et des Travaux publics à l'égard des navires

considérès comme infectés, suspects ou indemnes, au point de vue de la visite médicale, de l'isolement et de la désinfection.

Il pourra appliquer les mesures jugées nécessaires aux frontières de terre et de mer en ce qui concerne les voyageurs, les bagages et les objets transportés à la suite d'un changement de domicile.

Toutes ces mesures seront prises dans les limites arrêtées par la convention prérappelée du 15 avril 1893.

ART. 7.—Sont abrogés les arrêtés susvisés des 30 juillet 1893, 17 juin 1894, 24 septembre 1894 et 12 février 1895.

ART. 8.—Notre Ministre de l'Agriculture et des Travaux publics est chargé de l'exécution du présent arrêté.

Donné à Ostende, le 15 juillet 1895.

LÉOPOLD.

Peste bubonique.—Mesures aux frontières.

LÉOPOLD II, Roi des Belges,

A tous présents et avenir, SALUT.

Vu le décret sanitaire du 28 juillet 1831, et les règlements pris pour son exécution;

Considérant que la peste bubonique sévit à l'état épidémique dans plusieurs localités de l'Inde anglaise et qu'il y a lieu de prescrire, à l'égard des pays ou des circonscriptions territoriales contaminés, des précautions concernant l'importation et le transit de certaines marchandises, ainsi que des mesures aux frontières de terre et de mer;

Sur la proposition de Notre Ministre de l'Agriculture et des Travaux publics,

Nous avons arrêté et arrêtons:

ARTICLE PREMIER.—Notre arrêté du 15 juillet 1895, relatif au choléra, est rendu applicable à la peste bubonique.

ART. 2.—Notre Ministre de l'Agriculture et der Travaux publics est chargé de l'exécution du présent arrêté.

Donné à Laeken, le 8 janvier 18 97

LÉOPOLD.

COMPTROLLER GENERAL'S OFFICE,
CALCUTTA;
The 13th February 1897.

A. F. COX,
Offg. Comptroller and Auditor General.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

INVENTIONS and DESIGNS.

Calcutta, the 18th February, 1897.

NOTIFICATIONS.

No. 547 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 13th February 1897 :—

No. 50 of 1897.—William James Hadden, assistant surgeon, medical officer, East Coast Railway, Vizagapatam, for drying crushed and granular salt or any such substance.

No. 51 of 1897.—Jonathan Henry Poulson, indigo planter of Munihari factory, district Purnea, for a process for oxygenating the liquor obtained from the indigo plant, after the process of steeping or fermentation, called "Poulson's patent Indigo oxygenating process."

No. 51A of 1897.—Amended application. *See* No 397 of 1896.

No. 51B of 1897.—Amended application. *See* No. 398 of 1896.

No. 52 of 1897.—Frederick Edward Blackett Beaumont, Colonel, of 27, Martin's lane, Cannon street, London, E.C., for improvements in brakes for velocipedes and the like.

No. 53 of 1897.—Charles James Grist, electrical engineer, of 20, Gracechurch street, in the city of London, for improvements in the manufacture of waterproofing coating compositions for wearing apparel, covers, engine and other packings, acid tank linings, and for other uses.

No. 54 of 1897.—Charles James Grist, electrical engineer, of 20, Gracechurch street, in the city of London, for improvements in the manufacture of insulating compositions for electrical purposes.

No. 55 of 1897.—Max Brab, banker, of 11-13, Wupper-Strasse, Solingen, Prussia, for an electric motor.

No. 56 of 1897.—James Crofts, surgeon-major of the Indian medical service, of 28, South Terrace, and James Johnson, carriage builder, of Nelson Place, both of Cork, Ireland, for improvements in wheels for vehicles, particularly adapted for use in hot climates.

No. 57 of 1897.—Edward Lloyd Pease, engineer, of Harworth Moor, Harworth-on-Tees, in the county of Durham, for improvements in structural arrangements for combining strength with rigidity in a manner applicable to flooring, walling, and the like structural purposes.

No. 548 P.—SPECIFICATIONS of the undermentioned inventions have been filed,

Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the department of land records and agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 371 of 1895.—Shidramappa Ishwarappa Jamma, and Shanker Baba Mandrupker, both of Pait Sukrawar, Sholapur, for a machine for raising water, *i.e.*, a water lift. (Specification filed 9th February 1897.)

No. 163 of 1896.—Vivian Edward DePenning of the firm of DePenning and DePenning, patent agents of Calcutta, for an automatic punkah-pulling machine. (Specification filed 8th January 1897.)

No. 171 of 1896.—The Morris Tube Ammunition and Safety Range Company, Limited, of No. 11, Haymarket, in the county of London for an improvement in electric primers for firing guns. (Specification filed 5th February 1897.)

No. 212 of 1896.—Frederick Elijah Blaisdell, gentleman, of Wayne Junction, in the city and county of Philadelphia, state of Penn-sylvania, United States of America, for a method of and machine for manufacturing pencils and the like. (Specification filed 4th February 1897.)

No. 215 of 1896.—Tom Drewet, junior, and Palonji Dadabhoy Chowna, both partners in the firm of Drewet Chowna & Co., engineers and contractors, 17, Elphinstone Circle, Fort, Bombay, for a gland to prevent any leakage of water from an inverted hydraulic cylinder on to the work beneath it, to be styled the "invincible gland"—"Drewet and Chowna's patent." (Specification filed 8th February 1897.)

No. 220 of 1896.—Arthur George Brown, engineer, of No. 38, Victoria Buildings, Manchester, for improvements in and connected with moulds for casting metals. (Specification filed 5th February 1897.)

No. 221 of 1896.—Alexander Kryschev, imperial Russian state councillor, and Sergei Demmenie, imperial Russian college assessor, both of St. Petersburg, Russia, for a new pyrochemical process and apparatus for the direct production of iron and other metals from their ores. (Specification filed 5th February 1897.)

No. 222 of 1896.—Arthur George Brown, engineer, of No. 38, Victoria Buildings, Manchester, for improvements in cycles. (Specification filed 5th February 1897.)

No. 223 of 1896.—Arthur George Brown, engineer, of No. 38, Victoria Buildings, Manchester, for improved means for the production of metal castings. (Specification filed 5th February 1897.)

No. 224 of 1896.—Messrs. Leopold Cassella & Co., of 19, Liebig-strasse, Frankfort on Main, Germany, for new processes for producing polyazo dyestuffs from amidon aphtolsulpho acids. (Specification filed 5th February 1897.)

No. 262 of 1896.—Nathan William Horatio Sharpe, engineer, of 26, Perth road, Stroud Green, London, for improvements in apparatus for packing tea or such like substances. (Specification filed 9th February 1897.)

No. 307 of 1896.—Pettibone, Mulliken & Co., a corporation of the state of Illinois, manufacturer of railway and other supplies, with office in the Rockery Building, Chicago, Illinois, for an improvement in gas generators. (Specification filed 4th February 1897.)

No. 379 of 1896.—Samuel Cleland Davidson merchant, of Sirocco Engineering works, Belfast, Ireland, for improvements in tea leaf rolling machines. (Specification filed 5th February 1897.)

No. 549 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each:—

No. 90 of 1888.—Samuel Cleland Davidson, merchant, of Sirocco works, Belfast, Ireland, for improvements in apparatus for employing heated air in drying or baking vegetable or other substances. (From 6th March 1897 to 6th March 1898.)

No. 153 of 1888.—John Robert Jefferies, engineer, and iron founder, and James King, draughtsman, both of Orwell works, Ipswich, England, for improvements in threshing machines. (From 1st March 1897 to 1st March 1898.)

No. 20 of 1889.—The Honorable Erastus Wiman, of New York, United States of America, for improvements in apparatus for crushing or pulverizing ores and other substances. (From 7th February 1897 to 7th February 1898.)

No. 135 of 1889.—Damodardas Jamnadas Tolat, at present proprietor of the Patent Hand Loom Warp Manufacturing Company, at Surat, for a chain mule warping machine. (From 21st February 1897 to 21st February 1898.)

No. 13 of 1893.—William Bull, civil engineer, at present residing in Calcutta, for an improvement in the burning of bricks and tiles. (From 13th March 1897 to 13th March 1898.)

No. 66 of 1893.—Alois Riedler, professor in the polytechnic school, of 78, Friedrich Strasse, Berlin, for improvements in and connected with compressing and pumping apparatus. (From 14th April 1897 to 14th April 1898.)

No. 255 of 1895.—Conrad Field Mendham, engineer of the Cosmopolitan Docks, Hongkong in China, for a new cap or stopper for sealing or fastening tins, cans, drums, and the like containing oils, paints, kerosine and other inflammable and explosive materials. (From 9th November 1899 to 9th November 1909.)

No. 550 P.—WHEREAS the inventor of the undermentioned invention has failed to pay within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fee hereinafter mentioned, it is hereby notified that

under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling, and using the said invention in British India and of authorising others so to do has ceased :—

No. 226 of 1892.—Charles Ludwig Horack's invention for improvements in aqua ammonia engines which may also be used as steam engines. (Specification filed 11th November 1892.)

Fee in respect of the continuance of an exclusive privilege—

(4) (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of R50 for the above invention.

No. 236 of 1889.—Paul Giffard's invention for improvements in and relating to guns, projectiles or shells and mining or blasting cartridges. (Specification filed 16th October 1889.)

Fee in respect of the continuance of an exclusive privilege—

(4) (*c*) After the filing of the specification and before the expiration of the sixth year from the date of the filing thereof.

The sum of R50 for the above invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings.

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

A. T. PRINGLE,
Offg. Secy. under the Inventions and Designs Act, 1888.

PURE SULPHATE OF QUININE.

Manufactured at the Bengal Government Cinchona Plantation.

From 1st April, 1896, the price of this Quinine will be as follows:—

1-pound tin,	₹18,	or, post free,	₹15-12.
½	,,	₹ 9,	,,	₹9-8.
¼	,,	₹4-8,	,,	₹5.

Analysis shows this Quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids, Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanic Garden, Seebpore, near Calcutta.

বঙ্গদেশের গবর্ণমেণ্টের সিনকোনা আবাদে প্রস্তুত বিশুদ্ধ কুইনাইন।

১৮৯৬ সালের ১লা এপ্রেল হইতে এই কুইনাইনের নিম্নলিখিত মূল্য হইবে, যথা—

১ এক পৌণ্ড টিন	...	১৮৲	বা ডাকমাশুল বিনা	১৮৲০
½ আধ ,,	,,	৯৲	,,	৯৲০
¼ সিকি ,,	,,	৪৲৮	,,	৫৲

পরীক্ষা করিয়া দেখা গিয়াছে যে এই কুইনাইন অতি বিশুদ্ধ রূপে প্রস্তুত করা হইয়াছে। এবং ইহা যে সিনকোনাইন ও সিনকোনিডাইন নামক অপকৃষ্ট ক্ষারের সহিত ইচ্ছা পূর্ব্বক মিশান হয় নাই তাহার গারাণ্টী দেওয়া যাইতেছে। ইহা নগদ মূল্যে কেবল গবর্ণমেণ্ট কর্ম্মচারীগণের নিকট বিক্রয় করা যাইবে, এবং সিবপুরের কোম্পানির বাগানের সুপারিণ্টেণ্ডেণ্টের নিকট পাওয়া যাইতে পারিবে।

Catalogue of Books procurable from Thomason College Book Depot, Roorkee.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*

Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depot, and the Madras, Bombay, and Allahabad series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In supersession of the previous advertisements, on and from the 1st January, 1889, the terms of subscription and sale will be as follows for current issues, as well as for back numbers of the Reports from 1876.—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . ₹—

	Without postage.	With postage
	₹ a. p.	₹ a. p.
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.	For mofussil.
	₹ a. p.	₹ a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series; per copy . . .	0 5 3	0 5 9
„ the Calcutta Series. For the year .	7 2 6	8 0 3
„ each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Reports should apply to—

Superintendent, Government Press, Madras.
The Superintendent, Government Central Press, Bombay
The Curator of Government Books, North-Western Provinces and Oudh.
The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance.—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	₹ 20	₹ 14	₹ 9
„ three issues . . .	„ 55	„ 30	„ 24
„ six „ . . .	„ 100	„ 68	„ 45
„ nine „ . . .	„ 145	„ 96	„ 64
„ twelve „ . . .	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.	With postage
	₹ a. p.	₹ a. p.
Bengal Law Reports, for one year . .	20 0 0	22 0 0
Single copies, ₹2 per copy.		
Full Bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, ₹22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

BOOKS AND PUBLICATIONS

FOR SALE BY THE

SUPERINTENDENT OF GOVERNMENT PRINTING, INDIA,

8, HASTINGS STREET, CALCUTTA.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA *is required by Law, or which it has been customary to publish in the* CALCUTTA GAZETTE, *will be included in the* SUPPLEMENT. *For such Orders and Notifications the body of the* GAZETTE *must be looked to.*

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weather Review of India for the week ending at 8 a.m. on Saturday, February 6th, 1897.

With the exception of Baluchistan and Upper India on the one hand and of Bengal on the other, the whole of the Indian area experienced fine day weather throughout the week under review. The disturbed weather in the North-West was due to actions in the plateau area between the Euphrates and Indus valleys, and in Bengal to a very feeble depression, which appeared in Berar on the last of January and was transmitted eastwards to Orissa during the next two days. Deltaic Bengal, Chota Nagpur, Sind and the North and West Punjab received fair rain during the week and Baluchistan heavy rain.

Weather was warmer than usual over nearly the whole of the country throughout the week, and more especially over the Central Provinces and Berar, where the mean temperature of the week averaged about $4\frac{1}{2}^{\circ}$ above the normal of the period.

Daily Summary.—*Sunday, 31st January.*—Pressure had given way slightly to briskly in Baluchistan, Upper and Central India and the Central Provinces, and was practically stationary over the remainder of the country. Pressure was below the average of the day throughout the Indian area by amounts varying from ·01″ in Southern India to ·13″ in the Central Provinces and ·15″ in Sind. Pressure was fairly uniform over India, though slightly higher in East Rajputana than elsewhere. The chief feature of the pressure conditions, however, was a shallow low pressure area over Berar and the southern districts of the Central Provinces. Winds were cyclonic around the depression and very variable elsewhere. The force was generally light. Skies were over-

cast over the greater part of North-West India and Baluchistan and clear elsewhere. Moderate rain had been received in Baluchistan and a few drops in the West Punjab and Sind The heaviest fall was 0·63 inch at Quetta. Light snow was falling in Kashmir. Temperature was in considerable excess in Madras, Sind, Rajputana, the Central Provinces and Baluchistan and in slight excess in the Punjab, Bombay, Central India and Burma. Over the remainder of the country the temperature variations from the average were slight and unimportant.

Monday, 1st February.—Pressure had recovered briskly to rapidly in Baluchistan, Upper India, Khandesh, Berar and the neighbouring districts of the Central Provinces and of Central India, and had decreased briskly in Chota Nagpur and the eastern districts of the Central Provinces. Elsewhere the barometer had not changed to any important extent. The depression over Berar on the previous day had moved east-north-eastwards, and lay over the east of the Central Provinces at 8 A.M. Pressure was in defect of the normal over the Central parts of the country, the Deccan, the Gangetic Plain and Bengal and practically normal in most other places. The deficiency was greatest on the depression area, where it slightly exceeded a tenth of an inch. Northerly winds obtained over the greater part of Upper India, southerly winds at the head of the Bay, cyclonic winds around the depression and very variable winds elsewhere. Skies were more or less clouded over the greater part of Northern India, and numerous showers had occurred in Bihar, the Punjab and Upper Sind, the heaviest being 1·06 inches at Patna. Light snow and rain had fallen on the North-West Himalayas. Temperature was normal on the Punjab and Bombay, and higher than usual in other divisions. The excess was largest in the Central Provinces and Berar (5°)

Tuesday, 2nd February.—The changes of pressure were generally small in amount except on the North-Western Provinces, East Rajputana, Bundelkhand, Baghelkhand and parts of the Central Provinces and of Chota Nagpur where pressure had increased briskly. Pressure was below the average to a moderate extent in a broad belt stretching from Khandesh and the Bombay Deccan to Arakan. Over the remainder of the country the pressure variations from the average were of no significance. The low pressure area had marched eastwards from the east of the Central Provinces into Orissa. It was, however, filling up rapidly. Pressure was highest over Upper Sind and lowest over Orissa, and the general distribution of pressure was hence somewhat abnormal. Winds continued southerly at the head of the Bay, easterly over the Central Provinces, and northerly over Rajputana. Elsewhere the directions were very variable. Skies were heavily clouded in Baluchistan, the Punjab, Upper Sind and parts of Bengal. Scattered thundershowers had occurred in South and East Bengal, Bihar and Chota Nagpur, the heaviest of which was 1·26 inches at Calcutta. Light snow had fallen on the higher ranges of the Kashmir Himalayas Temperature was normal in Bombay, Gujarat, and Central India and exceeded the normal in all other districts by amounts varying from 1½° in Burma to 3½° in the North-Western Provinces

Wednesday, 3rd February.—Pressure had increased slightly in Orissa, and the depression in that area on the preceding day had filled up. Pressure was steady over the remainder of the Indian area, and the general pressure conditions remained unchanged. A fresh though very feeble depression was shown near Kurnool. Northerly winds obtained in North-Western and Western India, southerly winds in Orissa and variable winds and calms in most other places. Skies were much less clouded than on the previous day. Slight rain had been received in Baluchistan and locally at Balasore and Minimarg. Temperature had decreased briskly in the Punjab, and was now normal in that area. The temperature conditions were practically unchanged in the remainder of the country.

Thursday, 4th February.—Pressure was unchanged in the Peninsula and Burma, but had decreased slightly to rapidly over the remainder of India and in Baluchistan. Pressure was below the average almost everywhere. The deficiency exceeded a twentieth of an inch in amount over the Deccan, the Central Provinces and North-Eastern India, and was absolutely greatest at Sibsagar, where it equalled ·13″. The shallow depression near Kurnool on the previous day had advanced northwards to the southern districts of the Central Provinces.

Winds were practically unchanged. Skies were overcast in Baluchistan, and cloud was increasing in Northern India. Light rain was again received in Baluchistan. No rain had fallen in India beyond a few drops in Orissa. The temperature conditions were similar to those of the previous day.

Friday, 5th February.—The barometric changes of the previous 24 hours were very irregular in character. Pressure had decreased briskly to rapidly in the North-West Punjab, Sind and Baluchistan, and was in considerable to large defect in that area. It had increased briskly to rapidly in Burma and North-Eastern India, and was now normal in these districts. Over the remainder of India the changes were of no importance. The depression over the Central Provinces had expanded, and was shown in the chart as an elongated low pressure area extending north-eastwards from Bellary to Cuttack. At the same time a fresh depression had appeared over Lower Sind. Pressure was highest in Upper Assam and lowest in Ceylon and Travancore, but the intervening gradients were very slight. Winds were exceedingly variable. The force was rising on the North-West Himalayas. Skies were overcast in Baluchistan and the greater part of North-West India and heavily clouded in Lower Bengal. Light to moderate rain had fallen in Baluchistan and light rain in Sind. A few drops had occurred also in the Punjab and Orissa. Temperature was normal in the Punjab and slightly to considerably above the average in the remaining Provinces.

Saturday, 6th February.—Pressure had recovered with great rapidity in Baluchistan, the Indus Valley and the East Punjab, thus re-establishing well-marked anticyclonic conditions in North-West India. Pressure was in slight to moderate excess in the Punjab and Upper Sind, in slight defect in the Deccan, and practically normal elsewhere. The Sind depression had disappeared. The general distribution of pressure was fairly normal, the only irregularity being an area of low pressure over the centre of the Peninsula. Winds were irregularly cyclonic around the low pressure area, north-westerly over North-West India, and variable elsewhere. Skies were clear in Baluchistan, and cloud was decreasing rapidly in North-West India. The West Punjab and Baluchistan had obtained light to moderate general showers, the more noteworthy of which were 0·91 inch at Cherat and 0·75 inch at Dera Ismail Khan. Light snow and rain had fallen in Kashmir and the North-West Himalayas. Temperature was in slight defect in the Punjab, normal in the North-Western Provinces, in moderate to large excess in the remainder of the country.

Temperature.—The week under review was characterized by higher temperature than usual over the whole of the country. The excess of temperature was slight in the Bombay Presidency, but exceeded 2° over the remainder of the Indian area, and was absolutely greatest in the Central Provinces and Berar, for which it averaged 4½°. The following Table gives variation data of the week in illustration :—

Province.	January 1897.	February 1897.						Mean variation of week
	31st.	1st.	2nd.	3rd.	4th.	5th.	6th.	
Burma	+1·3	+1·2	+1·5	+3·0	+3·2	+1·7	+2·5	+2·1
Bengal and Assam	+0·2	+2·8	+3·4	+3·0	+4·5	+4·7	+4·0	+3·4
North-Western Provinces and Oudh	+0·5	+3·3	+3·5	+2·7	+2·3	+2·1	—0·3	+2·0
Punjab	+1·7	+0·2	+3·1	+0·8	+2·2	+0·4	+0·5	+2·1
Bombay	+1·8	+0·9	+0·3	+0·4	+0·6	+1·4	+1·7	+1·0
Central Provinces and Berar	+4·4	+5·1	+1·8	+3·4	+5·0	+5·3	+6·0	+4·5
Central India and Gujarat	+1·5	+2·9	+0·3	+1·5	+1·5	+3·0	+5·1	+2·3
Sind and Rajputana	+4·3	+2·3	+3·2	+3·0	+4·0	+3·5	+3·5	+3·5
Madras	+3·5	+3·8	+3·4	+3·6	+3·1	+3·6	+3·0	+3·5
MEAN FOR WHOLE OF INDIA	+2·1	+2·5	+2·3	+2·5	+2·9	+2·9	+3·8	+2·7

The Table shows that the mean temperature of the whole of India and Burma was above the average on each day of the week, and that the amount of variation ranged between 2° and 4°.

Rain.—The general character of the precipitation of the week has been fully indicated on the preceding summary. Ranchi in Chota Nagpur obtained a smart shower on the 31st January and Deltaic Bengal light to heavy general rain on the 2nd February from the southerly winds occasioned by the slight depression which crossed eastwards from the Central Provinces to Orissa. The largest fall in 24 hours recorded in these areas was 1·26 inches at Alipore. A local disturbance gave moderate general rain in Baluchistan on the 31st and some showers in the Punjab (excepting the southern and south-eastern districts). On the 1st weather was feebly unsettled over the plateau area of Iran and Baluchistan from the 2nd to the 4th. These disturbed conditions extended to the Indus Valley during the 4th, and occasioned light rain in Sind on the 5th and in the North and West Punjab on the 6th. Light to moderate snow fell on the Punjab and Kashmir Himalayas on the 1st and over the whole of the North-West Himalayas on the 6th. With the exceptions noted above the week was rainless over the whole Indian region.

The rainfall of the week was slightly in excess in Deltaic Bengal, Chota Nagpur and the North and West Punjab and in large excess in Baluchistan (as represented by Quetta). Over the remainder of the country the rainfall of the week was either normal or in defect. The deficiency was on the whole most marked in Assam, North Bengal, Bengal Hills, Bihar, the Hill, Western and North-Western divisions of the North-Western Provinces, the South-East, South and Submontane Punjab and the Punjab Himalayas.

A reference to the accompanying table shows that the rainfall of the present period has been abundant or excessive in Berar, the Central Provinces, the North Punjab, the Central Districts of the North-Western Provinces, South Oudh and Baluchistan and normal or in slight excess in North Oudh, the West and Central Punjab, the Punjab Himalayas and the Eastern States of Central India. It is in defect over the remainder of India. The only districts in which there is a serious deficiency are as follows :—Assam, Bengal (excluding the Deltaic Division), Bihar, the Western districts of the North-Western Provinces, the South-East and South Punjab, Ganjam, South Hyderabad, South Madras and the southern coast districts of Madras.

The principal totals recorded during the week were :— Murree 3·60 inches, Quetta 1·81 inches, Contai (Midnapore) 1·46 inches, Alipore 1·39 inches and Howrah 1·21 inches.

An important feature of the precipitation of the week was the great irregularity of its distribution in some parts of the Punjab. This is shown clearly by the data of Dera Ismail Khan and Shahpur (less than a hundred miles apart) which obtained 0·80 inch and 0·07 inch of rain respectively. An even more striking example is afforded by the returns of Murree and Goragali, the total fall for the week being 3·60 inches at the former place and only 0·07 inch at the latter.

HEM RAJ,
Offg. Asstt. Meteorological Reporter to the Government of India.

SIMLA, *the 11th February 1897.*

DENZIL IBBETSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Weekly Report on the state of the Season and Prospects of the Crops.

Madras.—*For week ending 13th February.*—There was no rain except a few trivial showers in parts; but since the close of the week rain has been general over portion of the presidency south of Madras but amounts are not yet fully known. The water-supply continues to decrease and is very deficient in parts of the Circars and Deccan and it is growing scanty for drinking even in parts; elsewhere the supply is generally fair. Some cultivation is still proceeding under large irrigation works, channels and wells. The standing crop in the Carnatic, Central, Southern, and West coast districts is generally in fair condition and the recent rain should benefit the cotton crop where it is grown in them. The standing crop in the Deccan is drying up. Harvests are proceeding with fair to moderate yield over the southern half of the presidency, elsewhere they are generally poor or bad. Pasturage is decreasing but may revive somewhat where rain has fallen. Fodder is generally available though dear in many places and very scarce in parts of the Deccan. In the latter cattle are suffering; elsewhere they are generally in good condition. Prices have risen in the Circars and in parts of the Deccan, Central and West coast districts; elsewhere they are almost stationary or fluctuating irregularly. The numbers on relief works are:—Relief workers 42,169; weavers 7,946; and gratuitously relieved 3,151 in the Deccan, and 1,33[illegible] on test work in Ganjam as well as 498 gratuitously relieved in that district. Total relief workers 51,454, gratuitously relieved 3,649. Total number in receipt of relief 55,103. Marked increase in all districts except Cuddapah. Prices by which wages are regulated are:—Kurnool 13½; Bellary and Anantapur 14; Cuddapah 17; and Ganjam 12½ seers per rupee.

Bombay.—*For week ending 17th February.*—Rain fell in the Upper Sind Frontier. The standing crops have been slightly damaged by drought in three talukas of Karachi, by locusts in two of Karachi, by frost in two of Karachi and three of Hyderabad; otherwise they are thriving in Sind and Gujarat, but indifferent elsewhere. Crops recently sown have withered or are withering in Nasik, Ratnagiri, Poona, Ahmednagar, Sholapur, Belgaum, and Dharwar. Autumn harvesting has been completed except in Khandesh. Reaping of the late crops has commenced in Panch Mahals, Broach, Surat, Thana, Khandesh, Nasik, Ahmednagar, Sholapur, Satara, Bijapur, and Dharwar. Fodder is sufficient except in the Deccan, Karnatak, Shikarpur, and parts of Karachi and Baroda. The grain-supply is generally sufficient in the affected districts. Cotton-picking continues in Broach, Surat, and Rajkot. The condition of the agricultural stock is deteriorating in Poona, Ahmednagar, Sholapur, and Bijapur; but is healthy elsewhere, except in parts of Sind, Khandesh, Nasik, Ratnagiri, and Kanara. Prices are rising in parts of Kolaba, Ratnagiri, Poona, and Sholapur; falling in parts of Kolaba, Poona, Sholapur, and Bijapur; stationary in Surat and in parts of Poona and Bijapur. The prices of staple food-grains in the affected districts are:—Dharwar 13¾; Belgaum 11½; Sholapur 11; Bijapur 10¾; Ahmednagar 10¼; Poona 10; Nasik and Satara 9¾; Khandesh 9½; Kolaba 8¾ seers per rupee. The average daily numbers on relief works, including non-working children, are:—Bijapur 83,679; Sholapur 94,662; Ahmednagar 72,732, Poona 9,035; Nasik 20,970; Satara 25,613; Khandesh 3[illegible],37[illegible]; Belgaum 2,967. Total 342,036, of which 237,057 are relief workers and 104,979 non-working children. Of relief workers 75,152 are men; 104,315 women; and 57,590 children. The numbers on gratuitous relief are:—Bijapur 6,210 including 41 persons in one poor-house; Sholapur 6,138; Ahmednagar 796; Poona 2,775; Nasik 112; Satara 13; Belgaum 351. Total 16,402, of which 8,185 are men; 4,829 women; and 3,388 children. Total number in receipt of relief 358,438.

Bengal.—*For week ending 15th February.*—Good and general rain fell in Bihar and Chota Nagpur, and showers in North and South-West Bengal.

The rain has benefited the standing crops, but has slightly injured the pulses, which are ripe or being harvested. It has also facilitated the ploughing for *aus* (autumn rice) and jute, which is in progress in several districts of Bengal Proper. In Palamau there was a severe storm with hail on the 11th and some damage to the spring crops is reported. The pressing of sugarcane is going on. In the distressed districts the prices of the food-grains on which the relief wages are based are :—Nadia (common rice) 9 seers, Khulna (common rice) 10 seers, Rajshahi common rice) 9½ seers, Patna (common rice) 10½ seers, Shahabad 10½ seers, Saran (Indian-corn) 9 seers 14 chittacks, Champaran (Indian-corn) 10¾ seers, Muzaffarpur (Indian-corn) 10 seers, Darbhanga (common rice) 9 seers and (Indian-corn) 10 seers, Bhagulpur (common rice) 10 seers per rupee. These figures show a slight rise in Saran, Muzaffarpur, and Darbhanga, and a slight fall in Champaran. The numbers on relief works and in receipt of gratuitous relief on Saturday, the 13th February, were :—Relief works : Nadia 4,713 (men 2,433 women 818, children 1,462), Khulna 156 (men 129, women *nil*, children 27), Rajshahi 897 (men 874, women 6, children 17), Shahabad 1,177 (men 368, women 494, children 315), Saran 14,099 (men 3,901, women 5,915, children 4,283), Champaran 117 539 (men 48,916, women 43,374, children 25,249), Muzaffarpur 23,042 (men 13,157, women 5,176, children 4,709), Darbharga 133,981 (men 57,977, women 55,276, children 20,728), Bhagulpur 2,232 (men 1,009, women 781, children 442), Palamau 1,727, Manbhum 1,200. Total 3.0,763 against 265,347 in the previous week. Gratuitous relief : Nadia 1,872 (men 438, women 1,196, children 238), Khulna 216 (men 38, women 111, children 67), Patna 80 (men 23, women 36, children 21), Shahabad 2,050 (men 449, women 868, children 733), Saran 14,198 (men 2,668, women 8,863, children 2,667), Champaran 30,173 (men 5,613, women 12,431, children 12,129), Muzaffarpur 2,549 (men 705, women 918, children 926), Darbhanga 82,108 (men 15,733, women 41,704, children 24,671), Bhagulpur 11 (men *nil*, woman 1, children 10), Palamau 381, Manbhum 632. Total 134,270 against 101,220 in the previous week. Grand total 435,033. Private relief—Relief works : Darbhanga Raj 21,715 (men 14,929, women 4,990, children 1,796), Hatwa Raj 3,599 Gratuitous relief : Darbhanga Raj 11,274 (men 2,122, women 5,272, children 3,880), Hatwa Raj 771. Rest of Saran district 1,042.

North Western Provinces and Oudh.—*For week ending 17th February.*—Heavy rain fell in the hill districts, while in most of the other districts in the provinces there were light showers. The spring crops continue to promise well. Cane-pressing continues and the harvesting of arhur (*Cajanus indicus*) and the early spring crops are beginning. The crops in portions of a few districts have been slightly damaged by hail and frost. The numbers in receipt of relief on Saturday, 13th February, in nineteen districts officially recognised as distressed, were as follows :—Agra 30,308, Etawah 20,250, Cawnpore 104,127, Banda 180,753, Hamirpur 69,824, Allahabad 178,576, Jhansi 38,241, Jalaun 93,496, Mirzapur 34,385, Jaunpur 66,677, Gorakhpur 38,157, Azamgarh 15 846, Lucknow 81,767, Unao 56,939, Rae Bareli 86,473, Sitapur 60,988, Hardoi 157,959, Barabanki 36,564, Fatehpur 9,887. Total 1,367,517. The total is distributed as follows among the various methods of relief prescribed by the Famine Code which are in operation :—Employed on relief works 907,055 relieved as dependants 215,878, relieved in poor-houses 43,305, relieved under other provisions of the Code 201,279. The numbers relieved in eighteen districts which are under observation, but not yet officially recognised as distressed, were on the same date as follows :—Relieved on test works 127,325, relieved in poor-houses 14,019, relieved under other provisions of the Code 21,070. Total 162,414 ; the grand total in receipt of relief on the last day of the week was therefore 1 529,931. Supplies are generally sufficient. Fodder is scarce and dear in places. Prices continue to show a yielding tendency in most districts. The price of the staple grain on which the famine wage is based varied from nine and half to eleven seers in the districts officially recognised as distressed.

Punjab.—*For week ending 16th February*—Rain averaging about ⅛th of an inch has fallen in Hissar, ⅛th in Karnal, ⅓rd in Mooltan and Lahore, ½ in

Sialkot and Rawalpindi, 1½ in Amritsar, and nearly an inch in Umballa, ⅓rd of an inch in Ferozepore, and ½ Gujrat and Gujranwala. There was a slight drizzling in Rohtak, Shahpur and Dera Ismail Khan. Sugarcane-pressing is still going on in Amritsar. Ploughings and sowings of extra spring crops are going on. The condition and prospects of irrigated crops are generally reported good to fair; they are not good in parts of Rohtak where well water is brackish and also in the parts which have not received a sufficient supply of canal water. The crops on dry land have failed in Hissar and are withering in Roktak and Delhi. More rain is wanted in Shahpur as well as in the Delhi division. The unirrigated crops are said to be good in Lahore; their condition has been improved by the recent rain in certain districts. The stock of grain has been nearly exhausted in Hissar where the supply is imported from Sindh. Stocks are also insufficient in Shahpur and with the cultivators of Amritsar. Barley, gram and rape crops are reported to have been damaged by caterpillars in parts of Ferozepore. Hail fell in parts of Dera Ismail Khan, but did no damage, and locusts also appeared, but passed over without doing any damage. Cattle are generally in poor condition for want of fodder. Forty head of cattle died of starvation in Rohtak. Their condition is reported good to fair in Gurgaon, Umballa, Ferozepore, Lahore, and Amritsar; and average in Sialkot. Fodder is scarce in all districts except Umballa. The recent rain will probably improve the pasturage. The average daily number of persons on famine relief works was as follows:—Rohtak 6,725; Gurgaon 614; Delhi 3,242; Karnal 2,746; Ferozepore 844; Gujrat 48,512 and Hissar 40,570, including 3,027, 43,948, 18,145, 17,459 and 8,043 persons respectively gratuitously relieved. There were also 2,329 gratuitously relieved in Umballa and 2,061 in Lahore. Gratuitous relief otherwise than on relief works was afforded to 1,101 in Gujrat, and 754 persons were on ordinary works in Gurgaon. The number of persons on test works was 126 in Ludhiana, 258 in Mooltan; 76 in Lahore; and 292 in Gujranwala, where the works are being closed. Test works, have also been closed in Rawalpindi. Total number on relief and test works, including gratuitously relieved, was 109,594. Prices are generally still high; they have again risen in most districts. A fall in prices, though slight, is reported from Delhi, Karnal and Dera Ismail Khan. The figures are unchanged in Mooltan. Wheat is selling from 8¼ to 10 seers; gram 9 to 10¼; great millet 10 to 10¼, bulrush millet 9½ to 12⅜ and maize 10½ to 11½ seers per rupee. Prices of staple food-grains on which the famine wages are reckoned are:—Rohtak gram 11; Delhi bulrush millet 9; Karnal gram 9½ and maize 11; Umballa maize 10; Ferozepore great millet 12; Lahore wheat 10 and maize 11; Gujrat wheat flour 8; Ludhiana maize 11; Mooltan wheat 9½; and Gujranwala wheat, 9 seers per rupee.

Central Provinces.—*For week ending 16th February.*—The weather was cloudy and unsettled with light showers. Mandla received an inch and a half, Seoni, Raipur, and Sambalpur about one inch and most other districts smaller quantities. Prospects of the food crops continue from fair to good, but the recent hail and rain have caused slight damage to standing crops in Jubbulpore and Seoni. Insects are complained of in Mandla and Bhandara. The linseed crop is generally a poor one. Clear weather is required for harvesting which is being impeded in some places, especially in Mandla. Fodder is growing scarce in Seoni and in parts of Nagpur and Sambalpur. People are leaving relief works for harvesting in Saugor, Damoh, Jubbulpore, Seoni, and Hoshangabad; while greater numbers are seeking relief in Mandla, Narsinghpur, Betul, Chhindwara, and in the affected districts of the Nagpur and Chattisgarh divisions, except Nagpur itself. Numbers on relief works are:—Saugor 25,069; Damoh 21,038; Jubbulpore 65,723; Mandla 17,563; Seoni 5,359; Narsinghpur 16,518; Hoshangabad 25,753; Nimar 487; Betul 13,220; Chhindwara 7,053; Nagpur 1,038; Chanda 2,615; Bhandara 10,709; Balaghat 6,950; Raipur 10,822; Bilaspur 8,382. Total 238,299. The numbers on gratuitous relief were:—Saugor 13,388; Damoh 3,765; Jubbulpore 16,929; Mandla 2,422; Seoni 1,761; Narsingnpur 7,157; Hoshangabad 7,541; Nimar 399; Betul 1,072; Chhindwara 2,328; Nagpur 980; Chanda 355; Bhandara 3,100; Balaghat 3,165; Raipur 2,338; Bilaspur 2,049. Total 68,749. The grand total in receipt of relief was therefore 307,048. There were also 50,228 on railway and private works in

Saugor, Damoh, Jubbulpore, Seoni, Balaghat and Bilaspur. Prices of staple food-grains on which the famine wages are based are:—Saugor, Jubbulpore, and Bhandara 9½, Damoh, Narsinghpur, Betul, Chanda, Raipur, and Bilaspur 10, Mandla 8½, Seoni 9¾, Hoshangabad 10½, Nimar 10½, Chhindwara and Nagpur 11½, Balaghat 8 seers per rupee.

Burma.—*For week ending 13th February.*—In Lower Burma threshing and winnowing continues. The dry weather paddy crop in Tavoy is in good condition. In Upper Burma the cultivation of dry weather paddy is progressing. The reaping of jowar (*Sorghum vulgare*) is completed in Meiktila and the gathering of peas on islands is progressing in Myingyan. In Sagaing wheat, gram and beans are in poor condition from want of rain. Prospects of miscellaneous crops elsewhere are fair. Slight rain has fallen in Thayetmyo and Ruby Mines districts and heavy rain in Yamethin; but too late to benefit crops. The price of paddy has risen considerably in Amherst; slightly in Henzada and Thayetmyo; and has fallen slightly in Rangoon, Pegu, Thongwa, Bassein, Myaungmya, and Minbu. Numbers on relief works are:—Meiktila 14,714, Myingyan 9,201; and on gratuitous relief, Meiktila 2,578; Myingyan 2,598; Yamethin 287. Total numbers on relief 29,378. In Meiktila the price of rice is 8 seers 12 chittacks, in Myingyan 9 seers 5 chittacks per rupee.

Assam.—*For week ending 16th February.*—Slight rain has fallen in all districts except Sylhet, Kamrup, Nowgong and the Khasi Hills; but rain is wanted in Sylhet and Kamrup. Ploughing for early rice has commenced. Pressing of sugar-cane and pruning of tea continues. Prices: common rice Silchar 9½, Sylhet 10½, Gauhati 10, Tezpur 10½ and Sibsagar 11 seers per rupee. Fodder is insufficient in Cachar, the Naga and Khasi Hills, and in parts of the Kamrup district. Water is scanty in Nowgong, the Naga Hills and in parts of Sibsagar and the Khasi Hills.

Mysore and Coorg.—*For week ending 16th February.*—MYSORE: Prospects are fair. Prices have fallen slightly in Tumkur, Mysore and Shimoga. Ragi (*Eleusine coracana*) has been harvested in the Bangalore and Tumkur districts.

COORG: Rainfall 5 cents. The threshing of rice continues. Prices are normal. Health is fair. Water and fodder for cattle are sufficient.

Berar and Hyderabad.—*For week ending 16th February.*—BERAR: The weather is warm. The winter crops are in poor condition owing to insufficient moisture. The preparation of the land for the ensuing rain crops continues. Fodder and water are inadequate to wants. There has been a rise in the price of food-grains. Number of persons on relief works:—Akola 3,528; Basim 400; Melghat 1,955. Total 5,883. Prices:—Akola 11, Basim 10, and Melghat 10 seers per rupee.

Central India.—*For week ending 16th February.*—No rain fell in Central India during the week. Agricultural operations have been completed in Bundelkhand and Baghelkhand, and are in progress in other Agencies. The crops have been damaged for want of rain in Gwalior, and slightly in Bhopawar. The agricultural stock is fair in Bhopal; good in Baghelkhand, Malwa, and two districts of Gwalior; indifferent in Bundelkhand and some parts of Gwalior. Pasturage is fair in Bhopal and Malwa; good in Baghelkhand and one district of Gwalior; sufficient in Bhopawar; and indifferent in Bundelkhand and some districts of Gwalior. Prices are above normal in Malwa and Bhopawar. They have fallen slightly but are still high in Baghelkhand; steady elsewhere. The opium crops are fair in Bhopal, Bhopawar and in one district of Gwalior; good in Malwa; and in two districts of Gwalior. The numbers of persons employed on famine relief works were:—Gwalior 14,277, Bundelkhand 8,161, Baghelkhand 68,492. The numbers on gratuitous relief were:—Bundelkhand 1,547, Baghelkhand 3,350. Not reported from Gwalior. Total number in receipt of relief, excluding number gratuitously relieved in Gwalior, 95,827. The prices of staple

food-grains are :—10 to 10½ in Gwalior, 10¾ seers per rupee in Bagelkhand ; not reported from Bundelkhand.

Rajputana.—*For week ending 17th February.*—No rainfall throughout Rajputana. Agricultural operations are satisfactory in Jhallawar, Kotah, Jeypore, and in Ajmere-Merwara ; fairly satisfactory in Kherwara, and poor in Dholepore. The standing crops are in good condition generally, except in Dholepore, Harvests are good in Jeypore ; average in Ajmere-Merwara ; and below average in Harowtee. Cattle are in good condition generally, except in Dholepore, Bhurtpore, Meywar, Bikanir and Jaisulmere. Fodder is sufficient, but failing in Dholepore and Bhurtpore ; and scarce in some tehsils of Jeypore. Prices are rising in Pertabgurh, Meywar and Bhurtpore ; falling in Shahpura and Bikanir ; high in Harowtee ; steady elsewhere. The number of persons on relief works was :—Marwar 5,427, Kotah 1,112, Dholepore 7,052, Bhurtpore 241, Bikanir 4,742, Jaisulmere 918 ; and on gratuitous relief : Merwara 1,010, Bhurtpore 704, Bikanir 621, and Jaisulmere 13. Total numbers on relief 21,840. The price of the staple food-grain, on which the famine wages are based, are :—Marwar 8 seers 8 chittacks, Kotah 14, Dholepore 14 seers 10 chittacks, Bhurtpore 9 seers 9 chittacks, Bikanir 9 seers 9 chittacks, Jaisulmere 8 seers 9 chittacks per rupee.

Kashmir—*For week ending 16th February.*—Snow has fallen. Spring crops are under snow. Prices continue below normal. Price 24 seers per rupee.

JAMMU PROVINCE.—*For week ending 17th February.*—No rain. Prices stationary. Fodder scanty. Relief works closed. Prices 10¾ seers per rupee.

Nepal—*For week ending 13th February.*—No rain has fallen, but the weather has been dull, threatening, and cold. Prospects continue good. Price 7⅛ seers per rupee.

The total numbers in receipt of relief during the preceding and present weeks are as follows :—

Name of Province.	Preceding week.			Present week.			Increase or Decrease.
	Relief works.	Gratuitous relief.	Total.	Relief works.	Gratuitous relief.	Total.

T. W. HOLDERNESS,
Deputy Secretary to the Government of India.

GOVERNMENT OF INDIA.

FINANCE AND COMMERCE DEPARTMENT.

ANNUAL REPORT ON THE OPERATIONS OF THE SAVINGS BANKS IN INDIA DURING THE YEAR 1895-96.

No. 768-A., dated Calcutta, the 17th February 1897.

ORDER—By the Government of India, Finance and Commerce Department.

READ—

Report by the Comptroller and Auditor General, No. 1650, dated the 26th January 1897, on the operations of the Savings Banks in India during 1895-96, and the statements annexed to it.

ORDERED that the Report and the Statements be published in the *Gazette of India* for general information.

J. F. FINLAY,
Secretary to the Government of India.

No. 1650, dated Calcutta, the 26th January 1897.

From—The Comptroller and Auditor General,

To—The Secretary to the Government of India, Finance and Commerce Department.

I have the honour to submit my Annual Report on the operations of the Savings Banks in India during the year 1895-96.

2. There are two descriptions of these Banks, *viz.*, Banks open to the public and Service Institutions; the former comprise the Presidency and Post Office Banks, and the latter, the State Railway Provident Institution, the Civil Engineers' Provident Fund, and the Military Banks. The State Railway Provident Institution is for the non-pensionable employés of the State Railways, the Civil Engineers' Provident Fund is for the Officers of the Public Works and Telegraph Departments, and the Military Banks are for the benefit of Non-Commissioned Officers and Privates of British Regiments.

3. I enclose the usual Statements marked I to VII, containing the accounts and statistics for the year.

4. The principal features of the returns are shown in the following table, which also compares them with those of the previous year :—

Description of Banks.	Banks.		Depositors.		Interest earned.		Balance.		Nominal value of Government Promissory Notes.		Average of Depositor's Balance.	
	Number.	Increase + or Decrease — over previous year.	Number.	Increase + or Decrease — over previous year.	Amount.	Increase + or Decrease — over previous year.	Amount.	Increase + or Decrease — over previous year.	Balance of Government Promissory Notes held for depositors.	Net purchased or received + sold or returned — during the year.	Amount.	Increase + or Decrease—.
		₹		₹	₹	₹	₹	₹	₹	₹	₹	₹
Presidency, Calcutta .	1	...	7,230	—3,429	59,937	—11,776	17,10,030	—6,81,780	42,300	—2,900	236	+12

Military . . .	162	—3	15,283	—1,697	67,561	+9,402	17,45,500	+94,848	..		114	+17
Post Office . .	6,343	—41	6,53,892	+41,945	26,71,951	+3,96,378	9,04,23,071	+64,05,148	4,69,000	—3,200	138	+1
Total .	6,520	—44	7,16,554	+33,345	33,84,958	+4,15,271	11,12,12,524	+58,62,351	5,29,100	—3,600	...	...

5. The Statement shows that on the 31st March 1896 there were 6,520 Government Savings Banks in India, containing 7,16,554 accounts, which earned interest from Government to the amount of R33,84,958 and held balances aggregating R11,12,12,524 exclusive of Government securities held on behalf of the depositors to the nominal value of R5,29,100. As compared with the year 1894-95 there has been a decrease of 44 in the number of Banks and an increase of 33,345 in the number of depositors, and of R58,62,35[illegible] in the amount of the balances. There has also been an increase in the amount of interest earned of R4,15,271.

6. Upon the working of the Post Office Banks, the Director-General of the Post Office has submitted a detailed report, and it is therefore necessary here to make some observations in respect of the other Banks only.

7. The decrease in the number of the depositors and in the balances of the Presidency Savings Banks noticed in previous years is again noticeable in the year under review. The impending transfer of the Presidency Savings Banks Accounts to the Post Office no doubt materially contributed to this result.

8. As in the previous year, the Military Banks show an increase in the balances, but unlike that year there is a falling off in the number of accounts which occurred almost wholly in the Punjab Command.

9. The balances of the other Service Institutions still continue to increase, and now amount to R1,00,43,534—an increase over the previous year of R8,93,359.

10. The balances of the Savings Banks proper, including the Military Banks, amount to R10,11,68,990, which is an increase of R49,68,992 over the balances of 1894-95. These balances are held by Government at call. There has been a decrease of 3,600 in the balance of Government Promissory Notes held on account of depositors at the close 1895-96, which now stands at 5,29,100.

Statement I.

Number of Working Banks and of the Depositors therein on the 31st March 1896.

Banks.	Number of Working Banks.		Number of Depositors.		Increase (+) or Decrease (—) in number of Depositors.	Average Number of Depositors per Bank.

7.

T. W. HOLDERNESS,

Deputy Secretary to the Government of India.

GOVERNMENT OF INDIA.

HOME DEPARTMENT.

PROGRESS OF EDUCATION IN INDIA DURING THE YEAR 1895-96.

No. $\frac{\text{1 Education}}{30-11}$.

Extract from the Proceedings of the Government of India in the Home Department (Education),—under date Calcutta, the 12th February 1897.

READ—

The several Reports on the Progress of Education in India during the year 1895-96, with the orders passed on them by Local Governments and Administrations.

RESOLUTION.

Under the orders contained in Home Department Circular No. $\frac{9\text{-}11a}{2\text{-}1\text{-}97}$, dated the 18th July 1895, a quinquennial report showing the progress of education during the period 1892-93 to 1896-97 will be submitted next year by Local Governments and Administrations, in place of the annual report for 1896-97. In reviewing the quinquennial report, the Government of India propose to notice in detail the history of education throughout the five-year period: and it is therefore unnecessary to do more at present than publish for general information the statistics for the year 1895-96 with a brief summary of the most striking features presented by them. The Governor General in Council takes the opportunity, however, to remind Local Governments and Administrations of the necessity for giving early instructions for the preparation of the quinquennial report, so that there may be no delay in its submission to the Government of India.

2. The rise noticed last year in the total number of Public and Private Institutions was maintained in the year under review, when the number reached 152,841, the number in 1894-95 having been 149,496 and in 1893-94, 147,297. The increase occurred entirely among institutions for males (141,800 in 1894-95 and 145,195 in 1895-96), the number of institutions for females (7,646) having been 10 less than in the preceding year. The number of Public Institutions (107,909) was higher than in 1894-95 (105,359): and, in this class of institutions, the rise was again highest in the case of primary schools (from 99,558 in 1894-95 to 102,036 in 1895-96). The number of secondary schools rose from 5,099 to 5,178. There was a slight increase in the number of institutions imparting a University Education, from 153 in 1894-95 to 158 in 1895-96. The number of Arts Colleges (119) was 4 in excess of the number in the previous year, and the number of Professional Colleges (39) was one in excess of that in 1894-95. While there was an increase of 13 in the number of Training schools (172), the number of all other special schools fell from 300 in 1894-95 to 305 in the year under review. Private Institutions, which numbered 44,137 in 1894-95, numbered 44,932 in 1895-96. The increase was distributed over both Advanced and Elementary Schools, which numbered, respectively, 5,609 and 38,528 in 1894-95, and 5,743 and 39,189 in 1895-96. There were 5,741 Private Institutions for males giving instruction of an advanced character, as compared with 5,609 in 1894-95; and 38,063 elementary Private Institutions as compared with 37,194 in the preceding year. It is satisfactory to notice that two Private Institutions for females affording instruction of an advanced character, but the Government of India regret that the number of elementary schools for girls fell from 1,334 in 1894-95 to 1,121 in 1895-96.

3. The number of scholars under instruction in schools of all classes, which had risen from 4,066,235 in 1893-94 to 4,189,770 in 1894-95, reached 4,303,109 in the year 1895-96. The increase in the male and female scholars, respectively, was 106,751 and 6,588. On the assumption that 15 per cent. of the entire population are of the school-going age, the percentage of scholars to the total population of the school-going age was 12·05. This figure is slightly higher than in 1894-95 (12·02); and the increase was distributed among scholars of both sexes, the percentage of males having risen from 21·43 to 22·02, and that of females from 2·28 to 2·34.

4. The statement given in the margin compares the average monthly attendance at the different classes of Public Institutions during the years 1894-95 and 1895-96. Similar statistics regarding Private Institutions (advanced and elementary) are not available. The steady rise in the attendance at Public Institutions noticed in previous years, from 3,228,114 in 1892-93 and 3,308,121 in 1893-94 to 3,414,303 in 1894-95, was maintained in the year under review, when the average monthly attendance was 3,515,593. The increase occurred chiefly among pupils in primary schools in which it amounted to 87,369. On the 31st March 1896 there were 14,705 students on the rolls of Arts Colleges, as compared with 14,422 students on the rolls on 31st March 1895. The number on the rolls of Colleges or Departments of Colleges for Professional Training was 1,719, as compared with 1,062 in the preceding year. The number of pupils at Secondary and Primary Schools, which had increased from 3,455,188 in 1893-94 to 3,572,984 in 1894-95, rose to 3,666,177 in 1895-96. The increase was shared by both classes of schools, the attendance at the former having risen from 525,303 to 533,481, and that at the latter from 3,016,781 to 3,132,696. The attendance at Training Schools for Masters and Mistresses fell away from 1,207 and 934, respectively, to 1,112 and 904; but the numbers at other schools for Special Instruction increased from 18,228 to 20,007.

	Schools for Special Instruction	2,826	2,456
	TOTAL	3,414,303	3,515,593

5. The number of scholars studying English was 440,866, as compared with 428,593 in 1894-95, but the percentage of such students to the total number under instruction (10·2) was the same in both years. There has been a steady advance in the number of pupils studying English in Secondary Schools from 301,376 in 1892-93, 310,621 in 1893-94 and 328,602 in 1894-95 to 338,004 in 1895-96. The number of pupils studying a classical language increased from 598,484 to 627,229. Of the latter number, 316,764 were studying in Private Institutions, and 172,840 of these belonged to Koran Schools. The number

reading a classical language in Secondary Schools rose from 115,181 to 121,236, and in Primary Schools from 157,649 to 173,935. There were in all 3,514,992 pupils studying a vernacular, as compared with 3,811,050 in the preceding year. The number of these who were in Primary Schools rose from 3,035,981 to 3,120,835. The continued improvement in these figures is satisfactory.

6. The following statement shows the race and religion of the 4,189,770 and 4,303,100* scholars on the rolls of Public and Private Institutions during the years 1894-95 and 1895-96, respectively, as well as the ratio per cent. of each class to the total number:—

* The statement excludes 13 pupils whose classification according to race or creed is unknown.

Race and Religion.	1894-95.		1895-96.	
	Number.	Ratio per cent. to total number.	Number.	Ratio per cent. to total number.
Hindus	2,795,311	66·67	2,861,625	66·57
Muhammadans	955,482	22·80	976,630	22·70
Europeans and Eurasians	28,824	·69	29,196	·69
Native Christians	102,153	2·45	108,471	2·52
Miscellaneous races or religions	308,700	7·30	323,814	7·52

It will be observed that the numerical increase was universal, and highest (71,314) in the case of Hindus. The percentage of Native Christians to the total number was slightly higher than in 1894-95: but the percentage of Europeans and Eurasians (·69) remained stationary, while that of Hindus and Muhammadans diminished by ·1. Of the students at Colleges (19,454), 83·9 per cent. were Hindus, 7·0 per cent. Muhammadans, 3·2 per cent. Native Christians, and 2·1 per cent. Europeans and Eurasians. Of those receiving a secondary education (533,481), 71·4 per cent. were Hindus, 14·0 per cent. Muhammadans, 5·4 per cent. Native Christians, and 4·7 per cent. Europeans and Eurasians. Of the 3,132,683 pupils under primary instruction at Public Institutions, 2,223,411 (70·9 per cent.) were Hindus; 616,132 (20·6 per cent.) were Muhammadans; 72,912 (2·3 per cent) were Native Christians; 3,360 (·1 per cent) were Europeans and Eurasians, and the remainder (186,868) belonged to other classes.

7. The steady rise which was noticed last year in the gross expenditure (direct and indirect) on Public Instruction, from R3,05,19,632 and R3,16,72,827 in 1891-92 and 1892-93 to R3,22,79,706 and R3,30,88,134 in 1893-94 and 1894-95, continued in the year under review, when the expenditure reached R3,50,65,302. The direct expenditure rose from R2,65,39,921 to R2,75,43,101, and the indirect expenditure from R65,48,513 to R75,22,201. The increase in direct expenditure is to be found mainly in that assigned to secondary and primary education which rose from R1,03,10,970 and R1,06,48,066, respectively, in 1894-95 to R1,13,94,334 and R1,09,51,700 in 1895-96. There was also an increase in the expenditure on Arts Colleges, from R22,85,129 to R23,58,696; Professional Colleges, from R9,07,820 to R9,33,075; Training Schools for Masters and Mistresses, from R6,96,781 to R7,06,891, and other Special Schools, from R11,91,155 to R11,98,495. The increase in indirect expenditure (which includes charges on account of direction, inspection, scholarships, buildings, furniture and apparatus, and miscellaneous items) was distributed over every head except "furniture and apparatus."

8. Educational expenditure is met from Provincial and Local and Municipal funds, fees, and miscellaneous sources such as endowments and subscriptions. The sums spent from each of these sources, and the proportion of each sum to the total cost of education, in the years 1894-95 and 1895-96, are shown in the following statement :—

Sources from which expenditure on education is met.	1894-95.		1895-96.	
	Amount.	Proportion to total cost.	Amount.	Proportion to total cost.
	R	Per cent.	R	Per cent.
Provincial Revenues . . .	90,35,463	27·31	91,06,153	26·02
Local Funds	57,03,693	17·24	58,79,505	16·77
Municipal Funds . . .	14,16,174	4·37	14,97,732	4·27
Fees	97,74,640	29·54	1,01,98,952	29·04
Miscellaneous	71,28,461	21·54	77,82,960	22·20
TOTAL .	3,30,88,434	100·00	3,50,65,302	100·00

It will be observed that the variations from the preceding year's figures are not large. There was again some small falling off in the proportion of expenditure met from Municipal Funds, but the rise in the proportion met from fees and miscellaneous sources is satisfactory. On the whole the Government of India consider that the results summarized above point to a steady advance in the work of the Departments of Public Instruction during the year 1895-96.

Warburton, M.D., Inspector General of Civil Hospitals, North-Western Provinces and Oudh, is appointed to officiate as Director General, Indian Medical Service, and Sanitary Commissioner with the Government of India, during the absence on deputation of Surgeon-Major-General J. Cleghorn, M.D., or until further orders.

No. 91.—With effect from the date of assuming charge, Brigade-Surgeon-Lieutenant-Colonel T. H. Hendley, C.I.E., Residency Surgeon, Jeypore, and Administrative Medical Officer, Rajputana, is appointed to officiate as Inspector General of Civil Hospitals, North-Western Provinces and Oudh, during the absence on deputation of Surgeon-Colonel W. P. Warburton, M.D., or until further orders.

SANITARY.

The 11th February, 1897.

No 414.—The following rules for quarantine against plague which have been made by the Government of Bombay in exercise of the power conferred by Act I of 1870, with the previous sanction of the Governor General in Council, in modification of those issued in the Notification of the Government of India in the Home Department, No. 354, dated the 22nd October, 1896, are published for general information.

The rules have effect from the 3rd February in the Port of Karachi as a temporary measure :—

I.—The Commander of every vessel, including buggalows or other native craft, arriving at Karáchi from Bombay shall, before entering the harbour, hoist a yellow flag (or, if entering a port at night time, show whatever quarantine night signals are customary in the port) and indicate by signal the port from which such vessel has come, and shall keep such flag and signals flying until permitted to take them down as hereinafter provided. The pilot on going alongside a vessel from Bombay shall direct the flag prescribed above to be hoisted, if it has not already been done.

II.—Such Commander shall not, without first having obtained permission as hereinafter provided, allow any communication, except orally, with the shore or any other vessel or boat, excepting with the boat supplying pilots, and in that case communication shall be limited to receiving on board the pilot, his servant and baggage.

III.—On any such arrival being signalled, the Health Officer of the Port shall, as soon as possible, go alongside the vessel and ascertain by enquiry from the Commander and by careful individual medical examination of passengers and crew whether any person on board is suffering, or has during the voyage suffered, from plague, or any death has occurred during the voyage from unknown or suspicious causes, and if the Health Officer is satisfied by such enquiry and examination that no person on board is suffering, or during the voyage has suffered, from plague, and that no death has occurred during the voyage from unknown or suspicious causes, and if the ship carries a qualified Medical Officer, quarantine shall be dispensed with, and pratique granted.

If the vessel does not carry a qualified Medical Officer, he shall direct the Commander to take the vessel to the quarantine anchorage duly appointed and notified by the Commissioner in Sind, and there to remain for a period of eight clear days from the date of arrival in the harbour. The Health Officer shall also direct the Commander to prohibit, during the period for which the vessel remains at the quarantine anchorage as aforesaid, all communication, except such as is hereinafter provided for, between such vessel and the shore or other vessels and boats in the harbour.

IV.—If the Health Officer, as the result of the enquiry and examination made under paragraph III above, shall have reason to believe or suspect at the time when the vessel arrives in the harbour that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct that such person, if alive, and, in any case, the family and others, who have been in immediate attendance on, or in contact with, him on the voyage, together with all his or their baggage and personal effects other than articles, which the Health Officer directs to be immediately destroyed, be removed to such particular spots as may from time to time be selected by the Commissioner in Sind as places of quarantine, there to remain until permitted to leave by the Health Officer. After such removal, all other persons may be allowed to land under such precautions as the Health Officer considers necessary. The vessel shall then be thoroughly disinfected under the direction and supervision of the Health Officer, and pratique shall be granted after such disinfection has been completed.

V.—Any mails, baggage or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health Officer may deem necessary to prevent the spread of the disease.

VI.—It will be the duty of the Port Officer to facilitate the conveyance to all persons in quarantine of such supplies of provisions, stores and other articles as may be required.

VII.—All vessels arriving at Karachi which may have communicated with vessels coming from Bombay shall be subjected to the same rules as vessels arriving at Karáchi from Bombay.

The 12th February, 1897.

No. 441.—It is notified for general information that the Government of Bombay have, with the previous sanction of the Governor General in Council, declared that quarantine will be imposed on persons landing at Aden up to ten days from date of leaving Bombay or Karachi.

No. 449.—The following communications regarding quarantine and trade restrictions imposed at ports outside India, in consequence of the existence of bubonic plague in India, are published for general information :—

Telegram, dated the 6th February 1897.

From—The Secretary of State, London,

To—The Viceroy, India.

Egypt. Vessels passing canal in quarantine cannot arrive Port Said at night.

Telegram, dated the 6th February 1897.

From—The Secretary of State, London,

To—The Viceroy, India.

Egypt. Vessels arriving from infected ports cannot be medically inspected at night Fao. Funds are to be supplied for temporary Lazaret.

Telegram, dated the 8th February 1897.

From—The Secretary of State, London,

To—The Viceroy, India.

Roumania. Muslims dissuaded Mecca pilgrimage. On return inspected. Constanza closed to all ships coming from Indian ports, unless previously quarantined Ottoman ports. If quarantined foreign lazaretto inspected Constanza, and admitted to free pratique. Special order all ships coming from Indian ports undergo sanitary measures Sulina. Unwashed clothes, old clothes, bed linen, rags cannot be admitted. Passengers' dirty clothes disinfected.

Telegram, dated the 8th February 1897.

From—The Secretary of State, London,

To—The Viceroy, India.

Your telegram of 5th February last. Foreign Office report importation of raw hides (fresh or dry), wool, horsehair, animals or parts thereof, rags, into Italy, prohibited in December last.

Telegram, dated the 9th February 1897.

From—The Secretary of State, London,

To—The Viceroy, India.

France. Absolute prohibition against landing cargoes from plague infected ports. Duration passengers' quarantine not yet settled.

HOME DEPARTMENT.

NOTIFICATIONS.

ESTABLISHMENTS.

Calcutta, the 24th February, 1897.

No. 168.—Under the authority conveyed by the 29th section of the Act 21 and 22 Vict., Cap. 106, His Excellency the Governor General of India is pleased, with the approbation of Her Majesty the Queen, Empress of India, to appoint Mr. W. Mackworth Young, C.S.I., of the Indian Civil Service, to be Lieutenant-Governor of the Punjab and its Dependencies.

SANITARY.

The 20th February, 1897.

No. 625.—The question of the suspension of the pilgrimage to the Hedjaz having been under the consideration of the Government of India and Her Majesty's Government, Her Majesty's Government have now come to the conclusion that, in consequence of the strong opinions of all European Governments, including Turkey, regarding the danger of plague being communicated to Europe, it is impossible to meet their demands by any measure short of the suspension of the pilgrimage for the time being.

The Governor General in Council is therefore pleased, under section 2, sub-section 1, of the Epidemic Diseases Act, 1897, to order that the pilgrimage to the Hedjaz shall be altogether suspended for the current season.

The 23rd February, 1897.

No. 703.—The following rules for quarantine against plague, which have been made by the Madras Government, in exercise of the power conferred by section 1, Act I of 1870, with the previous sanction of the Governor General in Council, are published for general information.

The rules have effect from the 13th February 1897, in the several ports of the South Canara and Malabar Districts, and also in the port of Tuticorin as regards vessels arriving from Goa:—

I.—The Commander of every vessel arriving from Bombay, Karachi or Goa shall, before entering the port, indicate his arrival by signal.

II.—Such Commander shall not, except as hereinafter provided, allow any communication, either with the pilot boat, except orally, or with the shore, or with any other vessel or boat in the port.

III.—Immediately on any such arrival being signalled, the Health (or other medical) officer of the port shall go alongside the vessel and ascertain by inquiry from the Commander whether any person on board is suffering, or has during the voyage suffered, from plague. If there is no case of plague on board, pratique may be granted at the discretion of the Health officer whether the vessel carries a qualified medical officer or not.

IV.—If the Health officer shall have reason to believe at the time when the vessel arrives in the port that any person on board is suffering, or during the voyage has suffered, from plague, he shall direct the Commander to take the vessel to the quarantine anchorage, and there to remain for a period of fifteen days from the day of arrival in the port; and shall further direct that, during such fifteen days, intercourse between the said vessel and the shore or other vessels and boats in the harbour shall be prohibited.

V.—If, during the period a vessel is at the quarantine anchorage aforesaid, any case or cases of plague should occur on board, the said vessel shall remain in quarantine for a period of fifteen days from the date of the last case occurring and be subject to all the prohibitions provided for in rule IV.

VI.—When any vessel has been placed in quarantine as aforesaid, the Health officer may direct the removal of so many of the passengers and crew as may not be suffering from illness, and whose services may not be required on board the vessel, to such particular spots as may from time to time be selected as places of quarantine, there to remain for a period of fifteen days. If a case of plague occurs among such passengers and crew during any such period, they shall remain in a place of quarantine for a period of fifteen days from the date of the occurrence of the last case of such illness.

VII.—Any mails or cargo which may be brought by any vessel so arriving shall be landed under such precautions as the Health officer may deem necessary to prevent the spread of the disease.

VIII.—It will be the duty of the Port officer to facilitate the conveyance to all vessels in quarantine of such supplies of provisions, stores or other articles as may be required by those on board. Such supplies will be placed on the boats of the vessels in quarantine, to be subsequently removed by members of their crews.

IX.—All vessels arriving at the port which may have communicated with infected vessels coming from Bombay, Karachi or Goa shall be subjected to the same quarantine as vessels arriving from Bombay, Karachi or Goa with plague on board.

The 26th February, 1897.

No. 752.—The following report and decree respecting new sanitary arrangements at the ports of France consequent on the outbreak of plague at Bombay are published for general information :—

PARTIE OFFICIELLE.

Paris, 20 Janvier 1896.

RAPPORT.

AU PRÉSIDENT DE LA RÉPUBLIQUE FRANÇAISE.

Monsieur le Président,

La police sanitaire maritime est régie, en l'état actuel, conformément à la loi du 3 mars 1822, par un décret réglementaire du 22 février 1876. Elle a pour objet de protéger la France et l'Algérie, à l'aide d'un réseau de surveillance qui embrasse tout le littoral, contre l'importation des maladies pestilentielles exotiques, le choléra, la fièvre jaune et la peste. A l'arrivée dans les ports, les capitaines sont interrogés sur la provenance des navires et sur leur état sanitaire, et ces navires sont soumis, s'il y a lieu, à des mesures de quarantaine soit en rade, soit dans les lazarets. Ces mesures, vexatoires et onéreuses, ont soulevé de tout temps les réclamations de la navigation : elles étaient indispensables, à défaut d'autres moyens, pour défendre les populations contre l'invasion de redoutables fléaux ; elles ne sont plus justifiées aujourd'hui.

Grâce aux découvertes de la science pastorienne, la prophylaxie des maladies épidémiques s'est précisée ; l'hygiène a désormais à sa disposition des procédés surs et rapides pour la destruction des germes morbifiques ; la chaleur et les agents chimiques lui fournissent de puissants moyens de désinfection. Une connaissance mieux établie de la période d'incubation permet de limiter son action.

L'administration sanitaire, s'inspirant de ces données scientifiques, est entrée résolument dans la voie des réformes. Les principaux ports ont été dotés par elle d'étuves à désinfection, et, en même temps qu'elle s'efforçait de faire pénétrer dans les habitudes maritimes une pratique qui devait transformer si avantageusement le régime sanitaire, elle atténuait graduellement la rigueur des mesures quarantenaires. Depuis 1892, les quarantaines ont en fait à peu près cessé d'exister, malgré la présence du choléra sur divers points de l'Europe : elles ont été remplacées par une inspection médicale au depart et à l'arrivée des navires, par une désinfection appropriée, et enfin par la délivrance aux passagers, immédiatement débarqués, d'un passeport sanitaire permettant d'établir leur origine, de leur appliquer en cas de maladie les mesures d'isolement nécessaires et d'éviter ainsi la création d'un foyer.

Ce sont ces principes, base d'un nouveau régime sanitaire, qu'ont fait prévaloir les représentants de la France dans les conférences sanitaries internationales de Venise en 1892, de Dresde en 1893 et de Paris en 1894.

La convention sanitaire signée à Dresde, le 15 avril 1893 par les représentants des divers pays de l'Europe à eu pour but "d'établir des mesures communes pour sauvegarder la santé publique en temps d'épidémie cholérique sans apporter d'entraves inutiles aux transactions commerciales et au mouvement des voyageurs ".

Il restait à mettre le règlement du 22 février 1876 en harmonie avec les dispositions adoptées par cette convention promulguée pour la France par décret du 22 mai 1894. L'œuvre a été longue et laborieuse en raison des intérêts complexes qu'elle met en cause et de l'intervention de tous les services publics appelés à y coopérer.

A deux reprises, les directeurs du la santé du littoral, les chambres du commerce spécialement intéressées, les principales compagnies de navigation ont été consultés, en France et en Algérie, soit sur le bases des réformes à introduire, soit sur le texte du projet. Ce projet a été élaboré, en tenant compte des différents éléments, par les soins du comité de direction des services de l'hygiène, composé lui-même des représentants les plus autorisés de l'hygiène et du commerce ; puis il a été soumis au comité consultatif d'hygiène publique de France qui en a adopté les termes, à l'unanimité, dans sa séance du 8 juillet 1895 ; il a été enfin communiqué à chacun des départments ministériels qui doivent concourir à son exécution, pour être examiné au point de vue spécial les concernant, et a reçu de leur part, sous réserve de quelques modifications de détail, qui presque toutes ont pu être adoptées, une adhesion définitive.

Tel qu'il se présente, le nouveau règlement réalise sur le précédent un progrès considérable : il diminue grandement les charges de la navigation ; il augmente les garanties qu'exige la protection de la santé publique ; il supprime les quarantaines pour les remplacer par des informations sanitaires précises,— par des mesures prophylactiques prises, autant que possible, soit au départ, soit à bord du navire, sous le contrôle d'un médecin spécialement agréé à cet effet,—par une surveillance médicale appliquée, en cas de nécessité, aux passagers, après leur mise en libre pratique, pendant une période de quelques jours correspondant à la durée d'incubation de la maladie ; il accorde des facilités et des avantages particuliers, tels qu'une notable

réduction de taxes, aux navires qui, secondant les vues du service sanitaire, auront à bord un médecin sanitaire et une étuve à désinfection, et pourront certifier à leur arrivée que toutes les mesures de désinfection et d'assainissement prescrites ont été rigoureusement effectuées durant la traversée.

J'ai la confiance, monsieur le Président, que le nouveau règlement de police sanitaire maritime, pour la réduction duquel il a été fait appel à toutes les compétences techniques, apporte, tout en servant les intérêts sanitaires, un allègement considérable à la navigation, et il ne dépendra que d'elle désormais d'accroître encore ce bénéfice par la sincérité de ses déclarations et l'emploi des moyens de plus en plus perfectionnés que la science met à sa disposition. D'accord avec mes collègues, les ministres de la justice, des affaires étrangères, des finances, de la guerre, de la marine, des travaux publics, du commerce, de l'industrie, des postes et des télégraphes, de l'agriculture, des colonies, je vous prie, monsieur le Président, de vouloir bien revêtir de votre signature le projet de décret ci-annexé.

Veuillez agréer, monsieur le Président, l'hommage de mon profond respect.

Le président du conseil,
ministre de l'intérieur,

LEON BOURGEOIS.

Le Président de la République française,

Sur le rapport du président du conseil, ministre de l'intérieur ;

Vu la loi du 3 mars 1822 sur la police sanitaire ;

Vu le décret du 22 février 1876, portant règlement de police sanitaire maritime ;

Vu les décrets des 15 avril 1879, 19 décembre 1883, 19 octobre 1894 et 22 juin 1895, relatifs à l'importation des drilles et chiffons par voie de mer ;

Vu le décret du 30 décembre 1884, modifiant la composition des conseils sanitaires ;

Vu le décret du 15 décembre 1888, relatif au recouvrement des amendes en matière de police sanitaire ;

Vu la convention sanitaire internationale signée à Dresde le 15 avril 1893, notamment l'annexe I, titres Ier, II, III, IV et VIII, et le décret du 22 mai 1894, portant promulgation en France de la dite convention ;

Vu le décret du 25 juillet 1894, modifiant les taxes sanitaries applicables à la navigation d'escale ;

Vu le décret du 20 juin 1895, relatif à la police sanitaire maritime ;

Vu les décrets des 25 mai 1874, 26 janvier 1882 et 29 octobre 1885, portant application du règlement du 22 février 1876 aux ports de l'Algérie ;

Vu le décret du 5 janvier 1889, transférant les services de l'hygiène au ministère de l'intérieur ;

Vu le projet présenté par le comité de direction des services de l'hygiène et l'avis du comité consultatif d'hygiène publique de France ;

Vu les avis du ministre de la justice, du ministre des affaires étrangères, du ministre des finances, du ministre de la guerre, du ministre de la marine, du ministre des travaux publics, du ministre du commerce, de l'industrie, des postes et des télégraphes, du ministre de l'agriculture et du ministre des colonies,

Décrète :

TITRE Ier

OBJET DE LA POLICE SANITAIRE MARITIME

Art. 1er.—Le choléra, la fièvre jaune et la peste sont les seules maladies pestilentielles exotiques qui, en France et en Algérie, déterminent l'application de mesures sanitaires permanentes.

D'autres maladies graves, transmissibles et importables, notamment le typhus et la variole, peuvent être exceptionnellement l'objet de précautions spéciales.

Art. 2.—Des mesures de précaution peuvent toujours être prises contre un navire dont les conditions hygiéniques sont jugées dangereuses par l'autorité sanitaire.

TITRE II

PATENTE DE SANTÉ

Art. 3.—La patente de santé est un document qui a pour objet de mentionner l'état sanitaire du pays de provenance et particulièrement l'existence ou la non-existence des maladies visées à l'article 1er. La patente de santé indique, en outre, le nom du navire, celui du capitaine, la nature de la cargaison, l'effectif de l'équipage et le nombre des passagers, ainsi que l'état sanitaire du bord au moment du départ.

La patente de santé est datée ; elle n'est valable que si elle a été délivrée dans les quarante-huit heures qui ont précédé le départ du navire.

Art. 4.—Un navire ne doit avoir qu'une patente de santé.

Art. 5.—La patente de santé est nette ou brute. Elle est nette quand elle constate l'absence de toute maladie pestilentielle dans la ou les circonscriptions d'où vient le navire ; elle est brute quand la présence d'une maladie de cette nature y est signalée.

Le caractère de la patente est apprécié par l'autorité sanitaire du port d'arrivée.

Art. 6.—En France et en Algérie, la patente de santé est établie conformément à une formule arrêtée par le ministre de l'intérieur après avis du comité de direction des services de l'hygiène ; elle est délivrée gratuitement par l'autorité sanitaire à tout capitaine qui en fait la demande.

Art. 7.—Lorsqu'une maladie pestilentielle vient à se manifester dans un port ou ses environs, l'autorité sanitaire de ce port avise immédiatement l'administration supérieure et, une fois l'existence du foyer constatée, signale le fait sur la patente de santé qu'elle délivre.

L'épidémie est considérée comme éteinte lorsque cinq jours pleins se sont écoulés sans qu'il y ait eu ni décès ni cas nouveau. La cessation complète de la maladie est alors immédiatement signalée à l'administration supérieure, et, si les mesures de désinfection ont été convenablement prises, elle est mentionée sur la patente de santé, avec la date de la cessation.

Art. 8.—A l'étranger, la patente de santé est délivrée aux navires français à destination de France ou d'Algérie par le consul français du port de départ ou, à défaut de consul, par l'autorité locale.

Pour les navires étrangers à destination de France ou d'Algérie, la patente peut être délivrée par l'autorité locale ; mais, dans ce cas, elle doit être visée et annotée, s'il y a lieu, par le consul français.

Art. 9.—La patente de santé délivrée au port de départ est conservée jusqu'au port de destination. Le capitaine ne doit en aucun cas s'en dessaisir.

Dans chaque port d'escale, elle est visée par le consul français ou, à son défaut, par l'autorité locale, qui y relate l'état sanitaire du port et de ses environs.

Art. 10.—Les navires qui font un service régulier dans les mers d'Europe peuvent être dispensés par l'autorité sanitaire de l'obligation du visa de la patente à chaque escale.

Art. 11.—La présentation d'une patente de santé à l'arrivée dans un port de France ou d'Algérie est en tout temps obligatoire pour les navires provenant : 1° des pays situés hors d'Europe, l'Algérie et la Tunisie exceptées ; 2° du littoral de la mer Noire et des côtes de la Turquie d'Europe sur l'Archipel et la mer de Marmara.

Art. 12.—Pour les régions autres que celles désignées à l'article 11, la présentation d'une patente de santé est obligatoire pour les navires provenant d'une circonscription contaminée par une maladie pestilentielle.

La même obligation peut être étendue, par décision du ministre de l'intérieur, aux pays se trouvant soit à proximité de ladite circonscription, soit en relations directes avec elle. Dans ce cas, l'obligation de la patente est immédiatement portée à la connaissance du public, notamment par la voie du *Journal officiel* de la République française.

Art. 13.—Les navires faisant le cabotage français (l'Algérie comprise) sont, à moins de prescription exceptionnelle, dispensés de se munir d'une patente de santé. La même dispense s'applique aux navires qui relient directement dans les mêmes conditions la France et la Tunisie.

Art. 14.—Le capitaine d'un navire dépourvu de patente de santé alors qu'il devrait en être muni, ou ayant une patente irrégulière, est passible, à son arrivée dans un port français, des pénalités édictées par l'article 14 de la loi du 3 mars 1822, sans préjudice de l'isolement et des autres mesures auxquels le navire peut être assujetti par le fait de sa provenance, et des poursuites qui pourraient être exercées en cas de fraude.

TITRE III

MÉDECINS SANITAIRES MARITIMES.

Art. 15.—Tout bâtiment à vapeur français affecté au service postal ou at transport d'au moins cent voyageurs, qui fait un trajet dont la durée, escales comprises, dépasse quarante-huit heures, est tenu d'avoir à bord un médecin sanitaire.

Ce médecin doit être Français et pourvu du diplôme de docteur en médecine : il prend le titre de " médecin sanitaire maritime ".

Art. 16.—Les médecins sanitaires maritimes sont choisis sur un tableau dressé par le ministre de l'intérieur, après examen passé devant un jury qui est désigné par le ministre, sur l'avis du comité de direction des services de l'hygiène.

L'examen porte sur l'épidémiologie, prophylaxie et la réglementation sanitaires et leurs applications pratiques. Les conditions et les époques de l'examen sont arrêtées par le ministre de l'intérieur, sur la proposition des services de l'hygiène.

Il est délivré aux candidats agréés par le ministre un certificat d'aptitude aux fonctions de médecin sanitaire maritime.

Art. 17.—Au cas où le nombre des médecins sanitaires maritimes portés sur la liste serait insuffisant, le ministre de l'intérieur pourvoit, sur la proposition du comité de direction des services de l'hygiène, aux nécessités du service médical.

Art. 18.—Un délai de trois mois est accordé, à partir de la date du présent décret, pour permettre aux médecins d'obtenir le certificat prévu par l'article 16 et aux compagnies de navigation et armateurs d'assurer l'embarquement de ces médecins.

Les médecins sanitaires antérieurement commissionnés auprès des compagnies maritime peuvent être inscrits au tableau des médecins sanitaires maritimes, sur leur demande transmise, avec avis motivé, par les directeurs de la santé de leurs ports d'attache et sur la proposition du comité de direction des services de l'hygiène.

Art. 19.—Le médecin sanitaire maritime a pour devoir d'user tous les moyens que la science et l'expérience mettent à sa disposition :

a) Pour préserver le navire des maladies pestilentielles exotiques (choléra, fièvre jaune, peste) et des autres maladies contagieuses graves ;

b) Pour empêcher ces maladies, lorsqu'elles viennent à faire apparition à bord, de se propager parmi le personnel confié à ses soins et dans les populations des divers ports touchés par les navires.

Art. 20.—Le médecin sanitaire maritime s'oppose à l'introduction sur le navire des personnes ou des objets susceptibles de provoquer à bord une maladie contagieuse.

Art. 21.—Le médecin sanitaire maritime fait observer à bord les règles de l'hygiène. Il veille à la santé du personnel, passagers et équipage, et leur donne ses soins en cas de maladie.

Art 22.—Le médecin sanitaire maritime se concerte avec le capitaine pour l'application des dispositions contenues dans les trois articles qui précèdent.

En cas d'invasion à bord d'une maladie pestilentielle ou suspecte, il prévient immédiatement le capitaine et assure, d'accord avec lui, les mesures de préservation nécessaires.

Art. 23.—Le médecin sanitaire maritime inscrit jour par jour, sur un registre, toutes les circonstances de nature à intéresser la santé du bord.

Il mentionne les dates d'invasion, de guérison ou de terminaison par la mort de tous les cas de maladies contagieuses, avec indication des détails essentiels que comporte la nature de chaque cas.

A chaque escale ou relâche, il consigne sur son registre la date de l'arrivée et celle du départ, ainsi que les renseignements qu'il a pu recueillir sur l'etat de la santé publique dans le port et ses environs.

Il inscrit sur le même registre les mesures prises pour l'isolement des malades, la desinfection des déjections, la destruction ou la purification des hardes, du linge et des objets de literie, la désinfection des logements ; il indique la nature, les doses, le mode d'emploi des substances désinfectantes et la date de chaque opération.

Art. 24.—Le médicin sanitaire maritime est tenu, à l'arrivée dans un port français, de communiquer son registre à l'autorité sanitaire, qui ne statue qu'après en avoir pris connaissance.

Il répond à l'interrogatoire de celle-ci et lui fournit de vive voix, ou par écrit si elle l'exigeq tous les renseignements, qu'elle demande.

Art. 25.—Les déclarations du médecin sanitaire maritime sont faites sous la foi du serment.

Le délit de fausse déclaration est poursuivi conformément aux lois.

Art. 26.—Le médecin sanitaire maritime fait parvenir au moins chaque année au ministre l'intérieur un rapport relatant les observations de toute nature qu'il a pu recueillir au cours de ses voyages sur les questions intéressant le service sanitaire, l'étiologie et la prophylaxie des épidémis.

Les rapports des médecins sanitaires maritimes sont soumis au comité consultatif d'hygiène publique de France. Ils peuvent donner lieu à l'attribution de récompenses honorifiques décernées par le ministre de l'intérieur et publiées au *Journal officiel* de la République française.

Art. 27.—En cas d'infraction aux règlements sanitaires ou de non-exécution des devoirs résultant de ses fonctions, une décision ministérielle, prise sur l'avis du comité de direction des services de l'hygiène, l'intéressé entendu, peut rayer un médecin sanitaire, à titre temporaire ou définitif, du tableau dressé en vertu de l'article 16.

Art. 28.—Le capitaine d'un navire ne pouvant justifier de la présence à bord d'un médecin sanitaire régulièrement embarqué, ou d'un motif d'empêchement légitime, est passible, à son arrivée dans un port français, des penalités édictées par l'article 14 de la loi du 3 mars 1822, sans préjudice des mesures sanitaires exceptionnelles auxquelles le navire peut être assujetti pour ce motif et des poursuites qui pourraient être exercées en cas de fraude.

Art. 29.—Sur les navires qui n'ont pas de médecin sanitaire, les renseignements relatifs à l'état sanitaire et aux communications en mer sont recueillis par le capitaine et inscrits par lui sur son livre de bord.

TITRE IV.

MESURES SANITAIRES AU PORT DE DÉPART.

Art. 30.—Le capitaine d'un navire français ou étranger se trouvantdans un port de France ou d'Algérie et se disposant à quitter ce port est tenu d'en faire la déclaration à l'autorité sanitaire avant d'opérer son chargement ou d'embarquer ses passagers.

Art. 31.—Dans le cas où elle le juge nécessaire, l'autorité sanitaire a la faculté de procéder à la visite du navire avant le chargement et d'exiger tous renseignements et justifications utiles concernant la propreté des vêtements de l'équipage, la qualité de l'eau potable embarquée et les moyens de la conserver, la nature des vivres et des boissons, l'état de la pharmacie et, en général, les conditions hygiéniques du personnel et du matériel embarqués.

L'autorité sanitaire peut, dans le même cas, prescrire la désinfection du linge sale soit à terre, soit à bord.

Le cas échéant, ces diverses opérations sont effectuées dans le plus court délai possible, de manière à éviter tout retard au navire.

Art 32.—L'autorité sanitaire s'oppose à l'embarquement des personnes ou des objets susceptibles de propager des maladies pestilentielles

Art. 33.—Les permis nécessaires sont pour opérer le chargement, soit pour prendre la mer, ne sont délivrés par la douane que sur le vu d'une licence remise par l'autorité sanitaire.

Art. 34 — Les bateaux de pêche et en général les navires qui s'écartent peu du port de départ sont dispensés, à moins de prescription exceptionnelle, de la déclaration prévue à l'article 30.

TITRE V.

MESURES SANITAIRES PENDANT LA TRAVERSÉE.

Art. 35. — Le linge de corps des passagers et de l'équipage, sali pendant la traversée, est lavé aussi souvent que possible.

Art. 36.— Les lieux d'aisances sont lavés et désinfectés deux fois par jour.

Dans les cabines dont les occupants ne se déplacent pas, il est déposé une certaine quantité de substances désinfectantes, et des instructions sont données pour leur emploi, qui est obligatoire.

Art. 37.—Dès qu'apparaissent les premiers signes d'une affection pestilentielle, les malades sont isolés, ainsi que les personnes spécialement désignées pour remplir les fonctions d'infirmier.

Art. 38.—Dans les cabines où se trouvent des malades, s'il y a des lits superposés, ceux du bas sont seuls occupés ; les matelas, couvertures, etc., des lits non occupés sont enlevés de la cabine, dans laquelle on ne laisse que les objets strictement indispensables.

Art 39.—Les déjections des malades sont immédiatement désinfectées.

Les vêtements, le linge, les serviettes, draps de lits, couvertures, etc, ayant servi aux malades sont, avant de sortir du local isolé, plongés dans une solution désinfectante.

Les vêtements et le linge des infirmiers sont soumis au même traitement avant d'être lavés.

Les objets infectés ou suspectés, de peu de valeur, sont immédiatement jetés, à la mer si le navire est au large. Dans le cas où le navire est dans un port, ils sont brûlés.

Le sol des locaux affectés à l'isolement des malades et des infirmeries est lavé deux fois par jour à l'aide de solutions désinfectantes.

Art. 40.—Ces locaux ne sont rendus au service courant qu'après lavage complet de toutes leurs parois à l'aide de solutions désinfectantes, réfection des peintures ou blanchiment à la chaux chlorurée et désinfection du mobilier. Ils ne reçoivent de nouveau passager en santé qu'après avoir été largement ouverts pendant plusieurs jours après ces désinfections.

Art. 41.—Lorsque la mort d'un malade isolé est dûment constatée, le cadavre est jeté à la mer ; les objets de literie à l'usage du malade au moment de son décès sont également jetés à la mer si le navire est au large, ou désinfectés.

TITRE VI.

MESURES SANITAIRES DANS LES PORTS D'ESCALES CONTAMINÉS.

Art. 42.—En arrivant en rade d'un port contaminé, le capitaine mouille à distance de la ville et des navires. S'il est contraint d'entrer dans le port et de s'amarrer à quai, il doit éviter autant que possible le voisinage des bouches d'égout ou des ruisseaux par lesquels se déverseraient les eaux vannes.

Aucun débarquement n'est autorisé qu'en cas de nécessité absolue. Personne ne doit coucher à terre ni, autant que possible, sur le pont du navire.

Art. 43.—L'eau prise dans un port contaminé est dangereuse ; s'il y a nécessité de renouveler la provision, l'eau est immédiatement bouillie ou stérilisée.

Art. 44.—Le lavage du pont est interdit si l'eau qui entoure le navire placé près de terre est souillée ou suspecte ; le pont est alors frotté à sec

Art. 45.—Le médecin sanitaire maritime ou, à son défaut, le capitaine s'oppose à l'embarquement des malades ou des personnes suspectes de maladie pestilentielle, ainsi que des convalescents de même maladie dont la guérison ne remonte pas à quinze jours au moins.

Le linge sale est refusé ou désinfecté.

Art. 46. —Seuls les compartiments de la cale dont l'ouverture est indispensable au chargement, au déchargement ou à des opérations d'assainissement sont ouverts

Art. 47.—Si pendant le séjour dans le port une affection pestilentielle se montre à bord du navire, les malades chez lesquels les premiers symptômes ont été dûment constatés sont, chaque fois qu'il est possible, dirigés sur le lazaret ou, à son défaut, sur l'hôpital, et tous leurs effets, les objects de literie qui leur ont servi, sont détruits ou desinfectes.

TITRE VII.

MESURES SANITAIRES A L'ARRIVÉE.

Art. 48.—Tout navire qui arrive dans un port de France et d'Algérie doit, avant toute communication, être *reconnu* par l'autorité sanitaire.

Cette opération obligatoire a pour objet de constater la provenance du navire et les conditions sanitaires dans lesquelles il se présente.

Elle consiste en un interrogatoire dont la formule est arrêtée par le ministre de l'intérieur, après avis du comité de direction des services de l'hygiène, et dans la présentation, s'il y a lieu, d'une patente de santé.

Réduite à un examen sommaire pour les navires notoirement exempts de suspicion, elle constitue la *reconnaissance proprement dite ;* dans les cas qui exigent un examen plus approfondi elle prend le nom *d'arraisonnement.*

L'arraisonnement peut avoir pour conséquence, lorsque l'autorité sanitaire le juge nécessaire, *l'inspection sanitaire*, comprenant, s'il y a lieu, la *visite médicale* des passagers et de l'équipage.

Art. 49.—Les opérations de reconnaissance et d'arraisonnement sont effectuées sans délai.

Elles sont practiquées même de nuit, toutes les fois que les circonstances le permettent. Cependant, s'il y a suspicion sur la provenance ou sur les conditions sanitaires du navire, l'arraisonnement et l'inspection sanitaire ne peuvent avoir lieu que de jour.

Art. 50.—Les résultats soit de la reconnaissance, soit de l'arraisonnement sont relevés par écrit et consignés simultanément sur le registre médical et le livre de bord et sur un registre spécial tenu par l'autorité sanitaire du port.

Art. 51.—Les bateaux de la douane, les bateaux des ponts et chaussées affectés au service des ports de commerce, des phares et balises, les bateaux-pilotes, les gradepêche, les bateaux qui font la petite pêche sur les côtes de France ou d'Algérie ou sur la partie des côtes de Tunisie qui s'étend du cap Nègre à la frontière algérienne, et en général tous ceux qui s'écartent peu du rivage et qui peuvent être reconnus au simple examen sont, à moins de circonstance exceptionnelle dont l'autorité sanitaire est juge, dispensés de la reconnaissance.

Art. 52.—Tout capitaine arrivant dans un port français est tenu de :

1° Empêcher toute communication, tout déchargement de son navire avant que celui-ci ait été reconnu et admis à la libre pratique ;

2° Produire aux autorités chargées de la police sanitaire tous les papiers de bord ; répondre, après avoir prêté serment de dire la vérité, à l'interrogatoire sanitaire, et déclarer tous les faits, donner tous les renseignements venus à sa connaissance et pouvant intéresser la santé publique ;

3° Se conformer aux règles de la police sanitaire ainsi qu'aux ordres qui lui sont donnés par lesdites autorités.

Art. 53.—Les gens de l'équipage et les passagers peuvent, lorsque l'autorité sanitaire le juge nécessaire, être soumis à de semblables interrogatoires et obligés, serment, à de semblables déclarations.

Art. 54.—Les navires dispensés de produire une patente de santé ou munis d'une patente de santé *nette* sont admis immédiatement à la libre pratique, après la reconnaissance ou l'arraisonnement, sauf dans les cas mentionnés ci-après :

a) Lorsque le navire a eu à bord, pendant la traversée, des accidents, certains ou suspects, de choléra, de fièvre jaune ou de peste, ou d'une maladie grave, transmissible et importable ;

b) Lorsque le navire a eu en mer des communications de nature suspecte ;

c) Lorsqu'il présente, à l'arrivée, des conditions hygiéniques dangereuses ;

d) Lorsque l'autorité sanitaire a des motifs légitimes de contester la sincérité de la teneur de la patente de santé ;

e) Lorsque le navire provient d'un port qui entretient des relations libres avec une circonscription voisine contaminée ;

f) Lorsque le navire, provenant d'une circonscription où régnait per auparavant une maladie pestilentielle, a quitté cette circonscription avant qu'elle ait cessé d'être considérée comme contaminée.

Dans ces différents cas, le navire, bien que muni d'une patente nette, peut être assujetti aux mêmes mesures que s'il avait une patente brute.

Art. 55.—Tout navire arrivant avec patente brute est soumis au régime sanitaire déterminé ci après.

Ce regime diffère selon que le navire est *indemne, suspect* ou *infecté.*

Art. 56.—Est considéré comme *indemne*, bien que venant d'une circonscription contaminée, le navire qui n'a eu ni décès ni cas de maladie pestilentielle à bord, soit avant le départ soit pendant la traversée, soit au moment de l'arrivée.

Est considéré comme *suspect* le navire à bord duquel il y a eu un ou plusieurs cas, confirmés ou suspects, au moment du départ ou pendant la traversée mais aucun cas nouveau de choléra depuis *sept* jours de fièvre jaune ou de peste depuis *neuf* jours.

Est considéré comme *infecté* le navire qui présente à bord un ou plusieurs cas, confirmés ou suspects, d'une maladie pestilentielle, ou qui en a présenté pour le choléra depuis moins de sept jours, pour la fièvre jaune et la peste depuis moins de neuf jours.

Art. 57.—Le navire *indemne* est soumis au régime suivant :

1° Visite médicale des passagers et de l'équipage ;

2° Désinfection du linge sale, des effets à usage, des objets de literie ainsi que de tous autres objets ou bagages que l'autorité sanitaire du port considère comme contaminés.

Si le navire a quitté la circonscription contaminée depuis plus de cinq jours en cas de choléra, depuis plus de sept jours en cas de fièvre jaune et de peste, les mesures ci-dessus sont immédiatement prises et le navire est admis à la libre pratique.

Si le navire a quitté depuis moins de cinq jours une circonscription contaminée de cholore, l est délivéré à chaque passager un passeport sanitaire indiquant la *date du jour où le navire a*

quitté le port contaminé, le nom du passager et celui de la commune dans laquelle il se rendre. L'autorité sanitaire donne en même temps avis du départ du passager au de cette commune et appelle son attention sur la nécessité de surveiller ledit passager, point de vue sanitaire, jusqu'à l'expiration des cinq jours à dater du départ du navi. (*surveillance sanitaire*).

L'équipage est soumis à la même surveillance sanitaire.

Si la circonscription quittée par le navire depuis moins de sept jours était contaminée de fièvre jaune ou de peste, les mêmes précautions sont prises, sauf les modifications suivantes :

1° Le délai de surveillance est porté à sept jours ;

2° Le déchargement des marchandises n'est commencé qu'après le débarquement de tous less passagers ;

3° L'autorité sanitaire peut ordonner la désinfection de tout ou partie du navire ; mais cette désinfection n'est faite qu'après le debarquement des passagers.

Dans tous les cas, l'eau potable du bord est renouvelée et les eaux de cale sont évacuées après désinfection

Art 58.—Le navire *suspect* est soumis au régime suivant :

1° Visite médicale des passagers et de l'équipage ;

2° Désinfection du linge sale, des effets à usage, des objets de literie, ainsi que de tous autres objets ou bagages que l'autorité sanitaire du port considère comme contaminés.

Les passagers sont débarqués aussitôt après l'accomplissement de ces opérations Il est délivré à chacun d'eux un passeport sanitaire indiquant la *date de l'arrivée du navire*, le nom du passager et celui de la commune dans laquelle il déclare se rendre L'autorité sanitaire donne en même temps avis du départ du passager au maire de cette commune et appelle son attention sur la nécessité de surveiller ledit passager, au point de vue sanitaire, jusqu'à l'expiration d'un délai de cinq jours à partir de l'arrivée du navire.

L'équipage est soumis à la même surveillance sanitaire.

L'eau potable du bord est renouvelée et les eaux de cale sont évacuées après désinfection.

Si la maladie qui s'est manifestée à bord est le choléra et si la désinfection du navire ou de la partie due navire contaminée n'a pas été faite conformément aux prescriptions du titre V, ou si l'autorité sanitaire juge que la désinfection n'a pas été suffisante, il est procédé à cette opération aussitôt après le débarquement des passagers.

Si la maladie qui s'est manifestée à bord est la fièvre jaune ou la peste, le déchargement des marchandises n'est commencé qu'après le débarquement de tous les passagers ; la désinfection du navire est obligatoire et n'a lieu qu'après le débarquement des passagers et le déchargement des marchandises.

Art. 59.—Le navire *infecté* est soumis au régime suivant :

1° Les malades sont immédiatement débarqués et isolés jusqu'à leur guérison ;

2° Les autres personnes sont ensuite débarquées aussi rapidement que possible et soumises à une *observation* dont la durée varie selon l'état sanitaire du navire et selon la date du dernier cas. La durée de cette observation ne pourra dépasser *cinq* jours pour le choléra et *sept* jours pour la fièvre jaune et la peste après le débarquement ou après le dernier cas survenu parmi les personnes débarquées : celles-ci sont divisées par groupes aussi peu nombreux que possible, de façon que, si des accidents se montraient dans un groupe, la durée de l'isolement ne fût pas augmentée pour tous les passagers ;

3° Le linge sale, les effets à usage, les objets de literie, ainsi que tous autres objets ou bagages que l'autorité sanitaire du port considère comme contaminés, sont désinfectés ;

4° L'eau potable du bord est renouvelée. Les eaux de cale sont évacuées après désinfection ;

5° Il est procédé à la désinfection du navire ou de la partie du navire contaminée après le débarquement des passagers et, s'il y a lieu, le déchargement des marchandises.

Si la maladie qui s'est manifestés à bord est la fièvre jaune ou la peste, le déchargement des marchandises n'est commencé qu'après le débarquement de tous les passagers et la désinfection du navire n'est opérée qu'après le déchargement.

Art. 60.—Dans tous les cas, les personnes qui ont été chargées de la désinfection totale ou partielle du navire, qui ont procédé avant ou pendant la désinfection du navire au déchargement et à la désinfection des marchandises, ou qui sont restées à bord pendant l'accomplissement de ces opérations, sont isolées pendant un délai que fixe l'autorité sanitaire et qui ne peut dépasser, à partir de la fin desdites opérations, cinq jours pour les navires en patente brute de choléra, sept jours pour les navires en patente brute de fièvre jaune ou de peste.

Le navire est soumis à l'isolement jusqu'à ce que les opérations de déchargement et de désinfection pratiquées à bord soient terminées.

Art. 61.—En France, du 1er novembre au 20 février, si le navire provient d'une circonscription contaminée de fièvre jaune, qu'il soit indemne, suspect ou infecté, on se contentera de la visite médicale des passagers, de la désinfection du linge sale, des effets à usage, objets de literie et autres objets ou bagages suspects, et de la désinfection du navire ou de la partie du navire que l'autorité sanitaire jugerait contaminée.

S'il y a à bord des malades atteints de fièvre jaune, ils sont immédiatement débarqués et isolés jusqu'à leur guérison : les autres passagers et l'équipage sont soumis à la *surveillance sanitaire* (prévue par l'article 57) pendant sept jours.

Art. 62.—Les mesures concernant les navires soit indemnes, soit suspects, soit infectés peuvent être atténuées par l'autorité sanitaire du port s'il y a à bord un médecin sanitaire maritime et une étuve à désinfection remplissant les conditions de sécurité et d'efficacité prescritos par le comité consultatif d'hygiène publique de France, et si le médecin certifie que les mesures de désinfection et d'assainissement ont été convenablement pratiquées pendant la traversée.

Art. 63.—Les mesures prescrites par l'autorité sanitaire du port sont notifiées sans retard et par écrit au capitaine, sous réserves des modifications que des circonstances ultérieures pourraient rendre nécessaries.

Art. 64.—Tout navire soumis à l'isolement est tenu à l'écart dans un poste déterminé et surveillé par un nombre suffisant de gardes de santé.

Art. 65.—Un navire infecté qui ne fait qu' une simple escale sans prendre pratique ou qui ne veut pas se soumettre aux obligations imposées par l'autorité du port est libre de reprendre la mer. Dans ce cas, la patente de santé lui est rendue avec un visa mentionnant les conditions dans lesquelles il part. Il peut être autorisé à débarquer ses marchandises, après que les précautions nécessaires ont été prises.

Il peut également être autorisé à débarquer les passagers qui en feraient la domande, à la condition que ceux-ci se soumettent aux mesures prescrites pour les navires infectés.

Art. 66.—Lorsqu'un navire infecté se présente dans un port sans lazaret, il est envoyé au lazaret le plus voisin.

Toutefois, si le port possède une station sanitaire, ce navire peut y débarquer ses malades et ses suspects et y recevoir les secours dont il aurait besoin.

Il peut même être dispensé exceptionnellement de se rendre dans un lazaret, si la station sanitaire dispose de moyens suffisants pour assurer l'isolement et la désinfection prescrits en pareille circonstance. Dans ce cas, l'autorité sanitaire avise immédiatement, soit le ministre de l'intérieur, soit le gouverneur général de l'Algérie, de la décision qu'elle a prise.

Art. 67.—Un navire étranger à destination étrangère qui se présente en état de patente brute dans un port à lazaret pour y être soumis à l'isolement peut, s'il doit en résulter un danger pour les autres personnes, déjà isolées, ne pas être admis à débarquer ses passagers au lazaret et être invité à continuer sa route pour sa plus prochaine destination, après avoir reçu tous les secours nécessaires.

S'il y a des cas de maladie pestilentielle à bord, les malades sont autant que possible, débarqués à l'infirmerie du lazaret.

Art. 68.—Les navires chargés d'émigrants, de pèlerins, de corps de troupes, et en général tous les navires jugés dangereux par une agglomération d'hommes dans de mauvaises conditions, peuvent, en tout temps, être l'objet de précautions spéciales que détermine l'autorité sanitaire du port d'arrivée, après avis du conseil sanitarie, s'il en existe, sauf à en référer sans délai soit au ministre de l'intérieur, soit au gouverneur général de l'Algérie.

Art. 69.—Outre les diverses mesures spécifiées dans les articles qui précèdent, l'autorité sanitaire d'un port a le devoir, en présence d'un danger imminent et en dehors de toute prévision, de prescrire provisoirement telles mesures qu' elle juge indispensables pour garantir la santé publique, sauf à en référer dans le plus bref délai soit au ministre de l'intérieur, soit au gouverneur général de l'Algérie.

TITRE VIII

MARCHANDISES: IMPORTATION, TRANSIT, PROHIBITION, DÉSINFECTION

Art. 70.—Sauf les exceptions ci-après, les marchandises et objects de toute sorte arrivant par un navire qui a patente nette et qui n'est dans aucun des cas prévus par l'article 54 sont admis immédiatement à la libre pratique.

Art. 71.—Les peaux brutes fraiches ou sèches, les crins bruts et en général tous les débris d'animaux peuvent, même en cas de patente nette, être l'objet de mesures de désinfection que détermine l'autorité sanitaire.

Lorsqu'il y a à bord des matières organiques susceptibles de transmettre des maladies contagieuses, s'il y a impossibilité de les désinfecter et dangar de leur donner libre pratique, l'autorité sanitaire en ordonne la destruction après avoir constaté par procés-verbal, conformément à l'article 5 de la loi du 3 mars 1822, la nécessité de la mesure et avoir consigné sur ledit procès-verbal les observations du propriétairé ou de son représentant.

Art. 72.—La désinfection est dans tous les cas obligatoire :

1° Pour les linges de corps, hardes et vêtements portés (effets à usage) et les objets de literie ayant servi, transportés comme marchandises;

2° Pour les vieux tapis ;

3° Pour les chiffons et les drilles, à moins qu'ils ne rentrent dans les catégories suivantes, qui sont admises en libre pratique ;

a) Chiffons comprimés par la force hydraulique, transportés comme marchandises en gros, par ballots cerclés de fer, à moins que l'autorité sanitaire n'ait des raisons légitimes pour les considérer comme contaminés ;

b) Déchets neufs provenant directement d'ateliers de filature, de tissage, de confection ou de blanchiment ; laines artificielles et rognures de papier neuf.

Art. 73.—Les marchandises débarquées de navires munis de patente brute peuvent être considérées comme contaminées, et à ce titre l'autorité sanitaire peut en prescrire la désinfection soit au lazaret, soit sur des allèges.

Art. 74.—Les marchandises en provenance de pays contaminés sont admises au transit sans désinfection si elles sont pourvues d'une enveloppe prévenant tout danger de transmission.

Art. 75.—Les lettres et correspondances, imprimés, livres, journaux, papiers d'affaires (non compris les colis postaux) ne sont soumis à aucune restriction ni désinfection.

Art. 76.—Les animaux vivants autres que les bestiaux ou ceux visés par la loi du 21 juillet 1881 sur la police sanitaire des animaux domestiques peuvent être l'objet de mesures de désinfection.

Les certificats d'origine peuvent être exigés pour les animaux embarqués sur un navire provenant d'un port au voisinage duquel règne une épizootie.

Des certificats analogues peuvent être *délivrés pour des animaux embarqués en France* ou en Algérie.

Lorsque des cuirs verts, des peaux ou des débris frais d'animaux sont expédiés de France ou d'Algérie à l'étranger, ils peuvent, à la demande de l'expéditeur, être l'objet de certificats d'origine délivrés d'après la déclaration d'un vétérinaire assermenté.

TITRE IX

STATIONS SANITAIRES ET LAZARETS

Art. 77.—Le service sanitaire comprend des *stations sanitaires* et des *lazarets* répartis dans les ports, après avis du comité de direction des services de l'hygiène, suivant décision soit du ministre de l'intérieur, soit du gouverneur général de l'Algérie.

Art. 78.—La station sanitaire comporte :

1° Des locaux séparés (tentes ou bâtiments) destinés au traitement des malades et à l'isolement des suspects :

2° Une étuve à désinfection remplissant les conditions de sécurité et d'efficacité prescrites par le comité consultatif d'hygiène publique de France ;

3° Des appareils reconnus efficaces pour les désinfections qui ne peuvent être faites au moyen de l'étuve, notamment pour les tentes et, à leur défaut, pour les batiments où est pratiqué l'isolement des malades et des suspects.

Le service sanitaire et l'administration hospitalière se concertent pour l'usage commun des locaux et des appareils et pour l'emploi commun du personnel de service.

Art. 79.—Le lazaret est un établissement permanent disposé de manière à permettre l'application de toutes les mesures commandées par le débarquement et l'isolement des passagers, la désinfection des marchandises et celle du navire.

Art. 80.—La distribution intérieure du lazaret est telle, que *les personnes et les choses* appartenant à des isolements de dates différentes puissent être séparées.

Deux corps de bâtiments, isolés et à distance convenable, sont affectés l'un aux malades, l'autre aux suspects.

Art. 81.—Des parloirs sont disposés pour les visites, avec les précautions nécessaires pour éviter la contamination.

Art. 82.—Des magasins distincts sont affectés, d'une part, aux marchandises et objets à purifier et, d'autre part, aux marchandises et objets purifiés.

Art. 83.—Le lazaret possède nécessairement une ou plusieurs étuves à désinfection remplissant les conditions de sécurité et d'efficacité prescrites par le comité consultatif d'hygiène publique de France et les autres appareils reconnus efficaces pour les désinfections qui ne peuvent être faites au moyen de l'étuve.

Art. 84.—Le lazaret est pourvu :

1° D'eau saine à l'abri de toute souillure, en quantité suffisante ;

2° D'un système d'évacuation sans stagnation possible des matières usées. Si un tel système est impraticable, les évacuations sont faites au moyen de tinettes mobiles placées dans une fosse étanche. Ces tinettes renferment en tout temps une substance désinfectante. Elles sont vidées au loin le plus souvent possible et en tout cas après l'expiration de chaque période d'isolement.

Art. 85.—Un médecin est attaché au lazaret ; il est chargé notamment de visiter les personnes isolées, de les soigner, le cas échéant, et de constater leur état de santé à l'expiration de la durée de l'isolement.

Art. 86.—Les malades reçoivent dans le lazaret les secours religieux et les soins médicaux qu'ils trouveraient dans un établissement hospitalier ordinaire.

Les personnes venues du dehors pour les visiter ou leur donner des soins sont, en cas de compromission, isolées.

Chaque malade a la faculté, sous la même, condition, de se faire traiter par un médecin de son choix et de se faire asister par des grades malades de l'extérieur.

Art. 87.—Les soins et les visites du médecine du lazaret sont *gratuits*.

Art. 88.—*Les frais de traitement et de médicaments sont à la charge des personnes isolées, et le décompte en est fait suivant le tarif qui est approuvé annuellement, après avis du comité de direction des services de l'hygiène, soit par le ministre de l'intérieur, soit par le gouverneur général de l'Algérie.*

Art. 89.—*Les frais de nourriture sont à la charge des personnes isolées, et le décompte en est fait suivant un tarif approuvé annuellement par le préfet du département.*

Art. 90.—Pour les émigrants, les pèlerins, qui voyagent en vertu d'un contrat, les frais de traitement et de nourriture au lazaret sont à la charge de l'armement; pour les militaires et les marins, ces frais incombent à l'autorité dont ils relèvent.

Art. 91.—Les indigents ne rentrant pas dans la catégorie définie à l'article 89 sont traités et nourris gratuitement.

Art. 92.—Les personnes isolées ont en outre à supporter les droits sanitaires énumérés au titre x.

Art. 93.— Les règlements locaux prévus par l'article 132 déterminent les limites de la station sanitaire, du lazaret et des autres lieux réservés dont il est fait mention dans les articles 17, 18 et 19 de la loi du 3 mars 1822.

Ils déterminent également la zone affectée à l'isolement des navires.

TITRE X

DROITS SANITAIRES.

Art. 94.—Les droits sanitaires sont:

(*a*) Droit de reconnaissance à l'arrivée, savoir:

Navires naviguant au cabotage français (l'Algérie comprise) d'une mer à l'autre, par tonneau, 5 centimes;

Navires naviguant au cabotage international, par tonneau, 10 centimes;

Navires naviguant au long cours, par tonneau, 15 centimes;

Navires faisant un service régulier d'un port européen dans un port de la Manche ou de l'Océan, par tonneau, 5 centimes;

Navires venant d'un port étranger dans un port français de la Méditerranée, si la durée habituelle et totale de la navigation n'excède pas douze heures, par tonneau, 5 centimes.

Les navires appartenant à ces deux dernières catégories pourront contracter des abonnements de six mois ou d'un an. L'abonnement sera calculé à raison de 50 centimes par tonneau et par an, quel que soit le nombre des voyages;

Navires à vapeur faisant escale sur les côtes de France pour prendre ou laisser des voyageurs:

S'ils viennent d'un port européen:

Par voyageur embarqué ou débarqué, 50 centimes;

Par tonneau de marchandises débarquées, jusqu'à concurrence de 3 tonneaux, 10 centimes;

S'ils viennent d'un port situé hors d'Europe:

Par voyageur embarqué ou débarqué, 1 fr.;

Par tonneau de marchandises débarquées, jusqu'à concurrence de 3 tonneaux, 15 centimes,

b) Droit de station, payable par les navires soumis à l'isolement, par jour et par tonneau, 3 centimes;

c) Droits de séjour dans les stations sanitaires et lazarets, par jour et par personne:

1re classe	2 „
2e classe	1 „
3e classe	„ 50

d) Droits de désinfection:

1° Désinfection du linge sale, des effets à usage, des objets de literie du bord et de tous autres objets ou bagages considérés comme contaminés.

Par voyageur débarqué, 1re classe, 1 fr.;

Par voyageur débarqué, 2e classe, 50 centimes;

Par voyageur débarqué, 3e classe, 25 centimes;

Par homme de l'équipage (état-major compris), 25 centimes;

2° Désinfection des marchandises:

Désinfection pratiquée à bord des navires, par tonneau de jauge, 5 centimes;
Marchandises débarquées pour être désinfectées:
Marchandises emballées, par 100 kilogr., 50 centimes,
Cuirs, les 100 pièces, 1 fr.;
Petites peaux non emballées, les 100 pièces, 50 centimes;
3° Désinfection des chiffons et des drilles, par 100 kilogr., 50 centimes;

4° Désinfection du navire ou de la partie du navire contaminée: pour le navire entier, par tonneau de jauge, 2 centimes. Si la désinfection ne porte que sur la partie du navire contaminée, le droit est réduit de moitié.

Les droits de désinfection déterminés par les paragraphes 1, 2 et 4 ci-dessus peuvent être réduits de moitié pourle navire qui, ayant à bord un médecin sanitaire nommé ou agréé par le gouvernement du pays auquel appartient le navire et une étuve à désinfection dont la sécurité et l'efficacité ont été constatées, justifierait que toutes les mesures d'assainissement et de désinfection ont été régulièrement appliquées au cours de la traversée conformément aux prescriptions du titre V.

Tous les droits sanitaires sont à la charge de l'armement Les frais résultant soit des manipulation main-d'œuvre et transport soit de l'emploi des désinfectants chimiques, sont également à la charge de l'armement. S'il s'agit de chiffons et de drilles, la dépense est, suivant l'usage, au compte de la marchandise.

Art. 95.—Les navires naviguant au cabotage français (l'Algérie comprise) dans la même mer sont exemptés du droit de reconnaissance.

Art. 96.—Les navires qui, au cours d'une même opération, entrent successivement dans plusieurs ports situés sur la même mer ne payent le droit de reconnaissance qu'une seule fois au port de première arrivée.

Art. 97.—Les militaires et marins, les enfants au-dessous de sept ans, les indigents embarqués aux frais du Gouvernement ou d'office par les consuls sont dispensés des droits sanitaires.

Art. 98 —Les droits sanitaires applicables aux émigrants ou aux pèlerins voyageant en vertu d'un contrat sont à la charge de l'armement.

Art. 99.—Sont exemptés de tous les droits sanitaires déterminés par les articles précédents :

1° Les bâtiments de guerre et les bateaux appartenant aux divers services de l'Etat ;

2° Les bâtiments en relâche forcée, pourvu qu'ils ne donnent lieu à aucune opération sanitaire et qu'ils ne se livrent dans le port à aucune opération de commerce ;

3° Les bateaux de pêche français ou étrangers, y compris les transports rapportant le poisson dans les ports français, pourvu que ces différents bateaux ne fassent pas d'opérations de commerce dans les ports de relâche ;

4° Les bâtiments allant faire des essais en mer, sans se livrer à des opérations de commerce.

Art. 100.—La perception des droits sanitaires est confiée au service des douanes.

TITRE XI.

AUTORITÉS SANITAIRES.

Art. 101.—La police sanitaire du littoral est exercée par des agents relevant directement du ministre de l'intérieur pour la France et du gouverneur général pour l'Algérie.

Art. 102 —Le littoral est divisé en circonscriptions sanitaires.

Chaque circonscription est subdivisée en agences (agences principales et agences ordinaires).

Le nombre et l'étendue des circonscriptions et des agences sont déterminés par décision du ministre de l'intérieur après avis du comité de direction des services de l'hygiène.

Pour l'Algérie les circonscriptions sont déterminées, après avis du comité de direction, par le gouverneur général ; la répartition des agences est faite par le gouverneur.

Art. 103.—A la tête de chaque circonscription est placé un directeur de la santé, nommé après avis du comité de direction des services de l'hygiène, en France par le ministre de l'intérieur, en Algérie par le gouverneur général.

Le directeur de la santé est docteur en médecine.

Il a sous ses ordres des agents principaux, des agents ordinaires et des sous-agents échelonnés sur le littoral.

Les agents principaux remplissent les fonctions de chefs de service dans les départements où ne réside pas de directeur de la santé.

Une direction de santé comporte, en outre, un personnel d'officiers, d'employés et de gardes dont les cadres sont fixés, suivant les besoins du service, par décision soit du ministre de l'intérieur, soit du gouverneur général de l'Algérie : elle peut comprendre un ou plusieurs médecins, docteurs en médecine, qui prennent le titre de médecins de la santé

Les médecins de la santé et les médecins attachés aux lazarets sont nommés en France par le ministre, en Algérie par le gouverneur général.

Art. 104.—Le directeur de la santé est chargé d'assurer dans sa circonscription l'application des règlements et instructions sur la police sanitaire maritime.

Il délivre ou vise les patentes de santé pour le port de sa résidence.

Art. 105.—Le directeur de la santé demande et reçoit directement les ordres soit du ministre de l'intérieur, soit du gouverneur général de l'Algérie, pour toutes les questions qui intéressent la santé publique.

Art. 106.—Le directeur de la santé doit se tenir constamment et exactement renseigné sur l'état sanitaire de sa circonscription et des pays étrangers avec lesquels celle-ci est en relations.

Art. 107.—En cas de circonstance menaçante et imprévue, le directeur de la santé peut prendre d'urgence telle mesure qu'il juge propre à garantir la santé publique, sous réserve d'en référer immédiatement soit au ministre de l'intérieur, soit au gouverneur général de l'Algérie.

Art. 108.—Les directeurs de la santé doivent se communiquer directement toutes les informations sanitaires qui peuvent intéresser leur service.

Art. 109.—Le directeur de la santé adresse chaque mois au moins soit au ministre de l'intérieur, soit au gouverneur général de l'Algérie, un rapport faisant connaître l'état sanitaire des ports de sa circonscription et résumant les diverses informations relatives à la santé publique dans les pays étrangers en relations avec ces ports, ainsi que les mesures sanitaires auxquelles auraient été soumises les provenances des dits pays. Ce rapport est accompagné d'un état des navires ayant motivé l'application de mesures spéciales. Pour les ports de l'Algérie, copies des rapports et états sont adressées au ministre de l'intérieur par le gouverneur général.

Le directeur de la santé avertit immédiatement soit le ministre, soit le gouverneur général de tout fait grave intéressant la santé publique de sa circonscription ou des pays étrangers en relations avec celle-ci.

Art. 110.—Les agents principaux et agents ordinaires, chacun pour la partie du littoral dont la surveillance lui est confiée, assurent, suivant les instructions et sous le contrôle des directeurs de la santé, l'application des règlements sanitaires.

A cet effet, ils reconnaissent l'état sanitaire des provenances et leur donnent la libre pratique, s'il y a lieu. Ils font exécuter les règlements ou décisions qui déterminent les mesures d'isolement et les précautions particulières auxquelles les navires infectés ou suspects sont soumis. Ils s'opposent, par tous les moyens en leur pouvoir, aux infractions aux règlements sanitaires et constatent les contraventions par procès-verbal. Dans les cas urgents et imprévus, ils pourvoient aux dispositions provisoires qu'exige la santé publique, sauf à en référer immédiatement et directement au directeur de la santé de leur circonscription. Ils délivrent ou visent les patentes de santé pour les ports dans lesquels ils résident.

Art. 111.—En vertu des articles 12 et 13 de la loi du 3 mars 1822, les directeurs de la santé et les agents principaux et ordinaires ont droit de requérir pour le service qui leur est confié le concours non seulement de la force publique, mais encore, dans les cas d'urgence, des officiers et employés de la marine, des employés des douanes et des contributions indirectes, des officiers et maîtres de ports, des gardes forestiers et, au besoin, de tout citoyen.

Ces réquisitions ne peuvent d'ailleurs enlever à leurs fonctions habituelles des individus chargés d'un service public, à moins que le danger ne soit assez pressant au point de vue sanitaire pour exiger momentanément le sacrifice de tout autre intérêt.

Art. 112.—Les agents ordinaires du service sanitaire sont choisis, autant que possible, parmi les agents du service des douanes ; ils reçoivent une indemnité.

Le taux des indemnités est fixé par décision soit du ministre de l'intérieur, soit du gouverneur général de l'Algérie.

Art. 113.—Les agents principaux, les capitaines de lazaret et les capitaines de la santé sont nommés soit par le ministre de l'intérieur, soit par le gouverneur général de l'Algérie. Si les candidats appartiennent au service des douanes, leur nomination a lieu sur la désignation du directeur général de cette administration.

Art. 114.—Les agents, sous-agents et autres employés du service sanitaire sont nommés par le préfet, sur la présentation du directeur de la santé ou de l'agent principal, et après entente avec le directeur des douanes, si l'agent désigné appartient à ce service.

Ces nominations ne peuvent avoir lieu que sous réserve des dispositions législatives ou réglementaires concernant les emplois affectés aux sous-officiers rengagés ou aux anciens militaires gradés. A cet effet, aucune désignation n'est faite par les préfets sans qu'il en ait été préalablement référé soit au ministre de l'intérieur, soit au gouverneur général de l'Algérie.

TITRE XII

CONSEILS SANITAIRES

Art. 115.—Le ministre de l'intérieur pour la France et le gouverneur général pour l'Algérie déterminent, après avis du comité de direction des services de l'hygiène les ports dans lesquels est institué un conseil sanitaire.

Il en existe au moins un par circonscription sanitaire.

Art. 116.—Le conseil sanitaire est nécessairement consulté par l'administration :

Sur le règlement local du port où il est institué ;

Sur l'organisation de la station sanitaire ou du lazaret existant dans ce port ;

Sur les traités à passer, le cas échéant, avec les administrations hospitalières ;

Sur les plans et devis des bâtiments à construire,

Il donne son avis sur toutes les questions qui lui sont soumises par l'administration ou sur lesquelles il croit devoir appeler son attention dans l'intérêt port.

Art. 117.—Le conseil sanitaire est composé de la manière suivante :

1° Le préfet ou le secrétaire général, le sous-préfet ou, à leur défaut, un conseiller de préfecture délégué par le préfet ;

2° Le directeur de la santé, l'agent principal ou l'agent ordinaire du service sanitaire en résidence dans le port ;

3° Le maire ;

4° Le professeur d'hygiène soit de la faculté de médecine, soit de l'école de médecine de plein exercice, soit, à leur défaut, de l'école de médecine navale, situées dans le département ;

5° Le médecin des épidémies de l'arrondissement ;

6° Le médecin militaire du grade le plus élevé ou le plus ancien dans le grade le plus élevé, ou résidence dans le port ;

7° Dans les ports de commerce, le chef du service de la marine ou, à son défaut, le commissaire de l'inscription maritime, et dans les ports militaires, le préfet maritime ou son délégué et le médecin le plus élevé en grade du service de santé de la marine ;

8° L'agent le plus élevé en grade du service des douanes ;

9° L'ingénieur en chef ou, à son défaut, l'ingénieur ordinaire attaché au serivce maritime du port ;

10° Un membre du conseil municipal élu par le conseil ;

11. Deux membres de la chambre de commerce élus par la chambre ou, à défaut de chambre de commerce, deux membres du tribunal de commerce élus par le tribunal ou, à défaut de chambre de commerce et de tribunal de commerce, deux négociants élus par le conseil municipal ;

12° Un membre du conseil d'hygiène publique et de salubrité de l'arrondissement, élu par le conseil.

Le préfet ou le sous-préfet est président du conseil sanitaire.

Le conseil nomme un vice-président qui préside en l'absence du préfet ou du sous-préfet

Art. 118.—Les quatre membres élus du conseil sanitaire sont nommés pour trois ans. Ils sont rééligibles.

Art. 119.—Les préfets et les sous-préfets, présidents des conseils sanitaires, peuvent convoquer aux séances du conseil le consul du pays interessé aux questions qui y sont mises en délibération.

Dans ce cas, le consul étranger participe aux travaux du conseil avec voix consultative.

Art. 120 —Le conseil sanitaire se réunit sur la convocation du préfet ou du sous-préfet.

En cas d'urgence, la convocation peut être faite, à défaut du président, par le vice-président.

Art. 121— Il est tenu procès-verbal des séances, dont le compte rendu est immédiatement et directement adressé, par les soins du président, soit au ministre de l'intérieur, soit au Gouverneur général de l'Algérie, ainsi qu'au directeur de la santé de la circonscription, s'il s'agit d'un port autre que celui ou réside ce fonctionnaire.

TITRE XIII

ATTRIBUTIONS DES AUTORITÉS SANITAIRES EN MATIÈRE DE POLICE JUDICIAIRE ET D'ETAT CIVIL.

Art 122.—Les autorités sanitaires qui, en exécution des articles 17 et 18 de la loi du 3 mars 1822, peuvent être appelées à exercer les fonctions d'officier de police judiciaire sont les directeurs de la santé, les agents principaux et ordinaires du service sanitaire, les capitaines de la santé et les capitaines de lazaret

Art. 123.— A cet effet, ces divers agents prêtent serment, au moment de leur nomination devant le tribunal civil du port auquel ils sont attachés.

Art 124 —Les mêmes autorités sanitaires exercent les fonctions d'officier de l'état civil conformément à l'article 19 de la loi du 3 mars 1822.

Art. 125 —Au cas où il se produirait une infraction pour laquelle l'autorité sanitaire n'est pas exclusivement compétente, celle-ci procède suivant les articles 53 et 54 du code d'instruction criminelle.

TITRE XIV

RECOUVREMENT DES AMENDES.

Art. 126.—En cas de contravention à la loi du 3 mars 1822 dans un port, rade ou mouillage de France ou d'Algérie, le navire est provisoirement retenu et le procès-verbal est immédiatement porté à la connaissance du capitaine du port ou de toute autre autorité en tenant lieu, qui ajourne la délivrance du billet de sortie jusqu'à ce qu'il ait été satisfait aux prescriptions mentionnées dans l'article suivant.

Art. 127.—L'agent verbalisateur arbitire provisoirement, conformément à un tarif arrêté par le ministre des finances de concert avec le ministre de l'intérieur, le montant de l'amende en principal et décimes, ainsi que les frais du procès-verbal ; il en prescrit la consignation immédiate à la caisse de l'agent chargé de la perception des droits sanitaires, à moins qu'il ne soit présenté à ce comptable une caution solvable.

Celui-ci en cas d'acquittement, remboursera à l'ayant droit la somme consignée. Si, au contraire il y a condamnation, il versera cette somme au percepteur (en Algérie, au receveur des contributions diverses) qui aura pris charge de l'extrait de jugement, ou il fera connaître à ce comptable les nom et domicile de la caution présentée.

Art 128.—Le contrevenant est tenu d'élire domicile dans le département du lieu ou la contravention a été constatée ; à défaut par lui d'élection de domicile, toute notification lui est valablement faite à la mairie de la commune où la contravention a été commise.

TITRE XV.

DISPOSITIONS GÉNÉRALES.

Art. 129.—Des médecins sanitaires français sont établis en Orient : leur nombre, leur résidence et leurs émoluments sont fixés par le ministre de l'intérieur.

Ces médecins sont chargés de renseigner les agents du service consulaire français, l'administration supérieure et, en cas d'urgence, les directeurs de la santé sur l'état sanitaire des pays où ils résident.

Art. 130.—Les agents de la France au dehors doivent se tenir exactement informés de l'état sanitaire du pays où ils résident et adresser au département dont ils relèvent, pour être transmis au ministre de l'intérieur, les renseignements qui importent à la police sanitaire et à la santé publique de la France. S'il y a péril, ils doivent, en même temps, avertir l'autorité française la plus voisine ou la plus à portée des lieux qu'ils jugeraient menacés.

Art. 131.—Les chambres de commerce, les capitaines ou patrons de navires arrivant de l'étranger, les dépositaires de l'autorité publique, soit au dehors, soit au dedans, et généralement toutes les personnes ayant des renseignements de nature à intéresser la santé publique, sont invités à les communiquer aux autorités sanitaires.

Art. 132.—Des règlements locaux, approuvés soit par le ministre de l'intérieur, soit par le gouverneur général de l'Algérie, déterminent pour chaque port, s'il y a lieu, les conditions spéciales de police sanitaire qui lui sont applicables en vue d'assurer l'exécution des règlements généraux.

Art. 133.—Les dépenses du service sanitaire sont réglées annuellement, en prévision, par des budgets spéciaux préparés par les directeurs de la santé pour chacun des départements de leur circonscription et approuvés, sur l'avis des préfets, soit par le ministre de l'intérieur, soit par le gouverneur général de l'Algérie.

Aucune dépense ne peut être ni effectuée ni engagée en dehors de ces budgets sans une autorisation expresse du ministre ou du gouverneur, à moins toutefois qu'il n'y ait urgence. Dans ce cas, il en est référé immédiatement au ministre ou au gouverneur pour faire régulariser la dépense effectuée ou engagée.

Aussi tôt après la clôture de l'exercice financier, les directeurs de la santé adressent au ministre ou au gouverneur, par l'intermédiaire des préfets, et indépendamment des pièces exigées par les règlements sur la comptabilité, un compte détaillé des dépenses ordinaires ou extraordinaires effectuées au cours de l'exercice dans chacun des départements de leur circonscription.

Art. 134.—Sont abrogés les décrets des 22 février 1876, 25 mai 1878, 15 avril 1879, 26 janvier 1882, 19 décembre 1883, 30 décembre 1884, 29 octobre 1885, 15 décembre 1888, 25 juillet et 19 octobre 1894, 20 et 22 juin 1895, et généralement toutes dispositions réglementaires antérieures qui seraient contraires au présent décret.

Art. 135.—Le ministre de l'intérieur et les ministres de la justice, des affaires étrangères, des finances, de la guerre, de la marine, des travaux publics, du commerce, de l'industrie, des postes et des télégraphes, de l'agriculture, des colonies, et le gouverneur général de l'Algérie sont chargés, chacun en ce qui le concerne, de l'exécution du présent décret, qui sera publié au *Journal officiel* de la République française et inséré au *Bulletin des lois*.

Fait à Paris, le 4 janvier 1896.

FÉLIX FAURE.

Par le Président de la République :

Le président du conseil,
ministre de l'intérieur,
LÉON BOURGEOIS.

Le ministre de la justice,
L. RICARD.

Le ministre des affaires étrangères,
BERTHELOT.

Le ministre des finances,
PAUL DOUMER.

Le ministre de la guerre,
G. CAVAIGNAC.

Le ministre de la marine,
EDOUARD LOCKROY.

Le ministre des travaux publics,
ED. GUYOT-DESSAIGNE.

Le ministre du commerce, de l'industrie,
des postes et des télégraphes,
G. MESUREUR.

Le ministre de l'agriculture,
VIGER.

Le ministre des colonies,
GUIEYSSE.

Par décret en date du 19 janvier 1896, rendu sur la proposition du ministre des finances :

M. Lacroix (Victor-Michel), percepteur des contributions directes à Givors (Rhône), nommé, par décret du 17 décembre 1895, à la recette particulière des finances de 3e classe d'Albertville (Savoie), et non installé, a été nommé receveur particulier des finances de l'arrondissement de Saint-Pons (Hérault), 3e classe, en remplacement de M. Dufort, décédé.

M. Blanc (Joseph-Henry), percepteur des contributions directes à Albertville (Savoie), a été nommé receveur particulier des finances de l'arrondissement d'Albertville (Savoie), 3e classe, en remplacement de M. Lacroix, non installé, qui a reçu une autre destination.

Le Président de la République française,

Sur le rapport du président du conseil, ministre de l'intérieur, et du ministre de l'instruction publique, des beaux-arts et des cultus,

Décrète :

Art. 1er.—L'enseignement donné aux élèves sages-femmes dans les maternités, en exécution du décret du 25 juillet 1893, peut être inspecté par les délégués du ministre de l'instruction publique.

Le ministre de l'instruction publique transmet au ministre de l'intérieur le résultat de ces inspections.

Art. 2.—Les ministres de l'instruction publique et de l'intérieur sont chargés,

No. 758.—The following telegrams regarding quarantine and trade restrictions, imposed in consequence of the existence of bubonic plague in India, are published for general information :—

Telegram, dated the 19th February 1897.

From—The Secretary of State, London.

To—The Viceroy, India.

Russia. All Indian ports declared contaminated. Basrah and Camaran report suspected cases of plague. Germany Prohibition to import from Indian ports and Persia rags, hides, old clothes, carpets, human hair, bristles, hair, wool, claws, hoops, personal baggage exempt, but disinfection possible Antwerp Sanitary officials examine crew and passengers, but arrivals from healthy ports exempt. Hides, unless cured with arsenic, hoofs, animal refuse, etc. prohibited; wool etc., admitted in transit, not for sale in Belgium, but liable to disinfection. Dunkirk. Four days' quarantine arrivals from infected ports if there has been no sickness on board, otherwise nine. After sick person removed, goods and passengers disinfected.

Telegram, dated the 20th February 1897.

From—The Secretary of State, London.

To—The Viceroy, Calcutta.

Russia Bokhara-Afghan frontier closed against Indian trade. Taktabazar only open Trans-Caspian town for passengers and goods. Hedjaz pilgrimage forbidden. Portugal. Lisbon only open port for landing mails and passengers' luggage; all will be subject to quarantine and disinfection, patterns and postal parcels excluded; this applies arrivals from Indian ports, Sea of Oman and Persian Gulf.

Telegram, dated the 22nd February 1897.

From—The Secretary of State, London.

To—The Viceroy, Calcutta.

Antwerp. My telegram of 19th February. Revised rules enjoin prohibition to import textile or similar products, animal or vegetable, as wool, cotton, jute, fibres of these products, cocoanut fibre, etc., unless packed in compressed bales bound with hoops.

Spain. Vessels arriving from Egypt, Arabia, India, the Persian Gulf ports, three days under observation. Prohibition to import rags, old clothes, tissues, mattresses, peltry, feathers, animal hair, horns, hoofs, wool, silk, linen, hemp, jute, etc., from India.

Telegram, dated 24th February 1897.

From—Secretary of State, London,

To—The Viceroy, Calcutta.

Roumania. Importation of all animal products from India forbidden. Bulgaria. Importation of all merchandise from India Baluchistan, Afghanistan Persian Gulf forbidden. All Bulgarian Black Sea ports closed against India, unless vessel quarantined in Ottoman lazaret and against vessels with sickness. Varna and Bourgas open in certain cases after satisfactory medical inspection. Change of ship *en route* from infected port does not secure more favourable treatment.

PORT BLAIR.

The 24th February, 1897.

No. 117.—Mr. H. G. Tayler, Officiating 1st Assistant Superintendent, Port Blair, is granted one year's furlough, with effect from the 20th March 1897, or the subsequent date on which he may avail himself of it

No. 119.—Consequent on the grant of furlough for one year to Mr. H G. Tayler, 3rd Assistant Superintendent, Port Blair, and officiating as 1st Assistant Superintendent, the following appointments are made in the Port Blair Commission :—

No. 77.—The following is published for general information :—

No. 154 R. T.

GOVERNMENT OF INDIA, PUBLIC WORKS DEPARTMENT.—RAILWAY TRAFFIC.

Calcutta, the 18th February 1897.

General Rules of 1895 for working railways open for traffic.

READ—

Section 47 of the Indian Railways Act, 1890.

Government of India, Public Works Department, notification No. 118, dated the 21st March 1895, publishing—in the *Gazette of India* of the 23rd March 1895—the Government of

India circular No. 6 Railway, dated the 12th March 1895, and the General Rules, therewith promulgated, for all open lines of railway in British India administered by the Government.

Government of India, Public Works Department, notification No. 257, dated the 28th May 1896, publishing—in the *Gazette of India* of the 30th May 1896—the Government of India circular No. 3 Railway, dated the 22nd May 1896, and the amended rules therewith promulgated.

Government of India, Public Works Department, notification No. 55, dated the 5th February 1897, publishing—in the *Gazette of India* of the 6th February 1897—the Government of India circular No. 3 Railway, dated the 3rd February 1897, and the addenda and corrigenda to the rules therewith promulgated.

Letter from the Government of Bombay, Public Works Department, No. 348, dated the 4th February 1897, forwarding letter from the Agent of the Bombay, Baroda and Central India railway, No. 1023 T., dated the 30th January 1897.

OBSERVATIONS.—The Agent of the Bombay, Baroda and Central India railway has applied that the General Rules for working open lines of railway published under the Government of India, Public Works Department, notification No. 118, dated the 21st March 1895 (*vide* the *Gazette of India* of the 23rd March 1895), as modified by the Government of India circulars No. 3 Railway, dated the 22nd May 1896, and No. 3 Railway, dated the 3rd February 1897, which were published under Public Works Department notifications Nos. 257, dated the 28th May 1896, and 55, dated the 5th February 1897 (*vide* the *Gazette of India* of the 30th May 1896 and 6th February 1897), may be made applicable to the Surat-Amalner section of the Tapti Valley railway from such date as it may be opened for the public carriage of passengers animals, or goods.

RESOLUTION.—The Governor General in Council is pleased to sanction the application of the General Rules for working open lines of railway which may, for the time being, be in force on the Bombay, Baroda and Central India railway, to such portions of the Surat-Amalner section of the Tapti Valley railway as are situate in British territory and which may, from time to time, be opened for the public carriage of passengers, animals or goods.

ORDER.—Ordered that this resolution be published under a notification in Part I of the *Gazette of India* as required by section 47, sub-section (*3*), of the Indian Railways Act, 1890; also that the General Rules cited in the foregoing observations—which have already been published in the *Gazette of India*—be kept at railway stations as directed by sub-section (*6*) of the same section.

Ordered, also, that this resolution be communicated to the Government of Bombay, for information and guidance.

The 24th February, 1897.

No. 80.—The following is published for general information :—

No. 159 R. T.

INVENTIONS and DESIGNS.

Calcutta, the 25th February, 1897.

NOTIFICATIONS.

No. 670 P.—APPLICATIONS in respect of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act during the week ending 20th February 1897:—

No. 58 of 1897.—George John Craven, gentleman of 27, Martin's lane, Cannon street London, E. C., for improvements in nails.

No. 59 of 1897.—George William Boucher, Daniel McCallum, and Frank Johnson engineers, all of 27, Martin's lane, Cannon street, London, E. C., for improvements in wheels for vehicles.

No. 60 of 1897.—George Henry Clarkson, assistant telegraph superintendent, Indian Midland railway, Jhansi, for improvements in and connected with electric signalling on railways

No. 61 of 1897.—George William Claridge, of Harchatch estate, North Travancore, *viâ* Bodinayakanur, Madura district, Madras, for improvements in transplanters, or implements for transplanting plants and shrubs.

No. 62 of 1897.—James Frank Duryea, mechanical engineer, of No. 70, Montrose street, in Springfield, county of Hampden, and state of Massachusetts, United States of America, for improvements in motor-vehicles and the like.

No. 63 of 1897.—The Dairy Supply Company, Limited, dairy engineers, of Museum street, in the county of Middlesex, for improvements in apparatus for sterilizing milk, cream, and other alimentary liquids.

No. 64 of 1897.—The Dairy Supply Company, Limited, dairy engineers, of Museum street, in the county of Middlesex, for improvements in apparatus for sterilizing milk, and other liquids.

No. 65 of 1897.—William Thomas Page, engineer, of Lynthorpe, Bromyard road, Worcester, for improvements in railway signalling apparatus.

No. 66 of 1897.—Thomas Holliday, manufacturing chemist, of Edgerton, Huddersfield, in the county of York, for improvements in means or apparatus for use in the production, storing and application of acetylene gas.

No. 67 of 1897.—Henry Lewis Davis, silk merchant, of 27, Brondesbury road, Kilburn, London, N. W., for a new or improved attachment for bicycles.

No. 68 of 1897.—Frederick Carleton Esmond, electrical engineer, of 488, Fourth street, Brooklyn, United States of America, for new or improved means of sup-

porting or attaching the saddles or seats of bicycles and other vehicles.

No. 69 of 1897.—Joseph Campbell, consulting geologist and chemist, of St. Nicholas college, Randwick, New South Wales, for improvements in the method of and apparatus for treating gold and silver and other metal bearing ores and materials.

No. 70 of 1897.—William Owen Phillips, journalist, etc., of No. 136, Dhurrumtollah street, in the town of Calcutta, for a bicycle umbrella holder.

No. 71 of 1897.—Ali Ahmad, for Persian and Urdu type made in accordance with the art of Persian calligraphy.

No. 671 P.—SPECIFICATIONS of the undermentioned inventions have been filed, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, the Chief Commissioner of Burma, and the Director of the department of land records and agriculture, North-Western Provinces and Oudh. These and other specifications are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West, Calcutta), on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 87 of 1896.—B. L. Rajak, B.C.E., temporary engineer, state railways, at present at Pad Edan, Naushahro, Sind, for a new method of manufacturing "surkhi." (Specification filed 15th February 1897.)

No. 92 of 1896.—William Naylor, mechanical engineer, Howrah, for an improved pulley, to be called "Naylor's patent challenge channel pulley." (Specification filed 8th February 1897.)

No. 129 of 1896.—Otto Hoffmann, engineer, of 46, Cresswell Grove, Withington, Manchester, for improvements in and relating to humidifying and spraying apparatus and appliances. (Specification filed 12th February 1897.)

No. 208 of 1896.—Preston Davies, tyre manufacturer, of Spencer House, West Hill road, Southfields, in the county of Surrey, for improvements in ball bearings. (Specification filed 12th February 1897.)

No. 227 of 1896.—Gordon J. Scott, electrical engineer, residing at No. 651, North 33rd street, in the city of Philadelphia, state of Pennsylvania, United States of America, and William S. Janney, physician, residing at No. 1535, North Broad street, in the same city, for a system of electrical distribution. (Specification filed 12th February 1897.)

No. 229 of 1896.—Alfred Jordan, commercial clerk, of 27, Mincing lane, in the county of London, for an improved apparatus for reducing or disintegrating hard substances. (Specification filed 12th February 1897.)

No. 230 of 1896.—Bernard Morley Fletcher, civil engineer, of 7, Victoria street, Westminster, for improvements in apparatus for utilising the power of waves. (Specification filed 12th February 1897.)

No. 231 of 1896.—James Albert Bonsack, mechanical engineer of 1328, Chestnut street, city of Philadelphia,

state of Pennsylvania, United States of America, for a machine for making conical cigarettes. (Specification filed 15th February 1897.)

No. 232 of 1896.—Hugo Bilgram, machinist and mechanical engineer, of the city of Philadelphia, state of Pennsylvania, United States of America, for a machine for making conical cigarettes. (Specification filed 15th February 1897.)

No. 236 of 1896.—George Lansell, quartz miner, of the Fortuna crushing works, Bendigo, in the colony of Victoria, for an improved pump for mining and other purposes. (Specification filed 12th February 1897.)

No. 237 of 1896.—The Folk-Ellis Patent Marine Governor and Safety Cut-off Company, Limited, of No. 31, Queen street, Melbourne, in the colony of Victoria, for an improved method of and electrical apparatus for automatically reducing and cutting off steam to prevent the "racing" of marine engines. (Specification filed 15th February 1897.)

No. 343 of 1896.—Cuthbert McCallum, merchant, of No. 23, St. Mary Axe, in the city of London, for improvements in or connected with collapsible or folding boxes. (Specification filed 9th February 1897.)

No. 344 of 1896.—Ernest Harry Archer, tea dealer, of No. 23, St. Mary Axe, in the city of London, for improvements in or connected with collapsible or other boxes or cases. (Specification filed 9th February 1897.)

No. 387 of 1896.—Robert Henry Cave, indigo planter, of Patterghatta post office, Colgong, E. I. Ry., for improvements in the process of indigo manufacture, whereby the deposit of indigo is increased and a better quality of dye obtainable. (Specification filed 1st February 1897.)

No. 399 of 1896.—Robert Alfred Fraser, gentleman, of "Alvie," Toorak road, Toorak, in the county of Bourke, in the colony of Victoria, for an improved mechanism for opening or closing doors of railway carriages, and for indicating to passengers the names of arrival stations. (Specification filed 13th February 1897.)

No. 443 of 1896.—James Alexander Main, engineer, of Clydesdale iron works, Possilpark, Glasgow, for improvements in apparatus for withering and drying tea leaf. (Specification filed 13th February 1897.)

No. 672 P.—THE undermentioned design has been registered, under the provisions of the Inventions and Designs Act of 1888, in the office of the Secretary appointed under that Act, and copies have been sent to the Governments of Fort St. George and Bombay, and the Chief Commissioner of Burma. This and other designs are open to public inspection, from 11 A.M. to 4 P.M., at the Secretary's office (Imperial Secretariat, Government Place, West), Calcutta, on payment of a fee of one rupee, and a certified copy of any one of them will be supplied on payment of the fixed expenses of copying :—

No. 2D of 1897.—Isaac Benjamin, artist and proprietor, The Bombay Art Furnishing Establishment, Gowalia Tank road, Bombay, for a centrement consisting of an octagonal cabinet having four seats and four jardinières.

No. 673 P.—THE fees prescribed in Schedule 4 of Act V of 1888 have been paid for the continuance of exclusive privilege in respect of the undermentioned inventions for the periods shown against each :—

No. 50 of 1888.—Edward Smith and Frederick Smith, designers in glass and glassware, of 34, Gray's Inn road, London, for an improved method or means of producing a sparkling effect in or from glass alone, or from a combination of glass and metal, or metallized material. (From 1st March 1897 to 1st March 1898.)

No. 95 of 1888.—Richard Morris, engineer, of Bennett park, Blackheath, in the county of Kent, for an improvement in filters. (From 6th March 1897 to 6th March 1898.)

No. 12 of 1889.—Alfred Nobel, engineer, of 53, Avenue Malakoff, Paris, for improvements in the manufacture of explosives. (From 23rd February 1897 to 23rd February 1898.)

No. 260 of 1890.—Samuel Cleland Davidson, merchant, of Sirocco works, Belfast, Ireland for improvements in the manufacture of tea and in apparatus therefor. (From 24th March 1897 to 24th March 1898.)

No. 96 of 1891.—Peter Ferguson and William Young Fleming, engineers and shipbuilders, both of Phoenix engine works, Paisley, Renfrewshire, for improvements in multiple-expansion steam engines. (From 27th June 1897 to 27th June 1898.)

No. 300 of 1892.—Samuel Cleland Davidson, merchant, of Sirocco works, Belfast, Ireland, for improvements in air heating stoves. (From 25th March 1897 to 25th March 1898.)

No. 5 of 1893.—Elisha Gray, professor of physics, of Highland park, Lake county, state of Illinois, United States of America, for an improved mode of and apparatus for transmitting and recording electrically autographic messages, signals and markings. (From 26th April 1897 to 26th April 1898.)

No. 22 of 1893.—Gerard Beekman, gentleman, of No. 5, East 34th street, New York, United States of America, for improvements in harvesting machines. (From 20th February 1897 to 20th February 1898.)

No. 674 P.—WHEREAS the inventors of the undermentioned inventions have respectively failed to pay, within the time limited in that behalf by the fourth schedule to the Inventions and Designs Act (V of 1888), the fees hereinafter respectively mentioned, it is hereby notified that, under the provisions of section 8, sub-section (2) of the said Act, the exclusive privilege of making, selling and using the said inventions in British India and of authorizing others so to do has ceased :—

No. 183 of 1892.—Elizabeth Phillips' invention for improvements in bed pans, commodes and other like articles. (Specification filed 18th November 1892.)

Fee in respect of the continuance of an exclusive privilege—

(4) (*a*) After the filing of the specification and before the expiration of the fourth year from the date of the filing thereof—

The sum of ₹50 for the above invention.

NOTICES.

All communications relating to Act V (the Inventions and Designs Act) of 1888 should be addressed to the "Secretary to the Government of India, Department of Revenue and Agriculture (PATENTS BRANCH), CALCUTTA."

The office of the Secretary under the Act is open for the transaction of business from 11 A.M. to 4 P.M. on all days except Sundays and gazetted holidays.

The Government of India are advised that as trade marks are not "designs" within the meaning of the Act, they cannot be registered under Part II.

The fees payable under the fourth and sixth schedules are now collected in cash, and applicants are warned that they must be responsible for any delay in cashing cheques.

Copies of the weekly notifications, and of the quarterly lists, of applications and specifications filed in the Secretary's office are now on sale to the public at one anna and eight annas a copy respectively.

Attention is requested to the rules made by the Government on the 10th October 1895 in regard to the preparation of applications, specifications and drawings

All applications made under the Inventions and Designs Act, V of 1888, will from this date (December 19th, 1896) lie in the visitors' room of the Patents Office for ten days from the date of the *Gazette of India* in which their filing may have been notified; or, if the tenth day is a holiday, till the evening of the office day next following.

A. T. PRINGLE,

Offg. Secy. under the Inventions and Designs Act, 1888.

Surveyor-General of India.

AGENT TO THE GOVERNOR-GENERAL FOR CENTRAL INDIA.

NOTIFICATION.

DRAFT REGULATIONS UNDER THE DANGEROUS EPIDEMIC DISEASES ACT.

Indore Residency, the 18th February, 1897.

In exercise of the powers conferred on him by Foreign Department Notifications Nos. 443-I.A. and 444-I. A., dated the 4th February, 1897, the Agent to the Governor General in Central India prescribes the following regulations for the inspection of persons travelling by railway in and through Central India and the segregation, in hospital, temporary accommodation or otherwise, of persons suspected by the inspecting officer of being infected with the plague or bubonic fever:—

1. Any medical officer or qualified medical practitioner may, at any railway station in the Central India Agency, compel any person or all the persons in any train stopping at such sta-

tion to alight from that train and undergo such inspection of body or property as the said medical officer or the said qualified medical practitioner may consider necessary for determining whether the said person or persons travelling by train is or are suffering from or is or are likely to be infected with bubonic fever or plague.

2. If any such traveller is found to be so suffering, or if the aforesaid inspection shows that he is likely to be infected with bubonic fever, it shall be competent for the person making the inspection to direct the removal, segregation, in hospital, temporary accommodation or otherwise, of any person so suffering or or likely to be infected.

3. It shall be competent for the person making the said inspection or for the person in medical charge of the place to which any such traveller is removed or in which he is segregated, to order the destruction by fire or otherwise of any of that traveller's property which he considers likely to spread infection of bubonic fever.

4. It is obligatory on every traveller referred to in any of the foregoing sections to answer all questions put to him by the person making such inspection or in medical charge of the traveller, and such traveller is bound to answer any such question fully and truthfully to the best of his information, knowledge and belief.

5. Any person taking action under any of the foregoing sections without authority from his official superior or from some officer of Government shall not be entitled to protection under section 4 of Act III of 1897, but such authority may be given by the Local Government indicated in Foreign Department Notification No. 443 I. A., dated the 4th February, 1897, subsequently to such action being taken.

6. Any action such as is contemplated in the first 3 sections of these Regulations which may have been taken before these Regulations come into force shall be held to have been taken under these Regulations.

7. These Regulations shall have effect from the time and date of their receipt in any place by any person authorised to act under them

L. S. NEWMARCH,

First Assistant to the Agent to the Governor-General in Central India.

AGENT TO THE GOVR.-GENERAL IN BALUCHISTAN.

NOTIFICATIONS.

Quetta, the 15th February, 1897.

No. 89.—Pandit Nand Lall, a Munsif of the 1st grade and Munsif of Sibi, is appointed to officiate as an Extra Assistant Commissioner and as Personal Native Assistant to the Agent to the Governor General, with effect from the date on which he may assume charge of his duties, and during the absence of Lalla Chokha Nand, on furlough, or until further orders.

Quetta, the 17th February, 1897.

No. 169.—In exercise of the powers conferred by the Notification of the Government of India in the Foreign Department, No. 444 I. A., dated the 4th February, 1897, the Agent to the Governor General is pleased to declare, under section 2 (2) (*b*) of the Epidemic Diseases Act (III of 1897) as applied to the territories administered by the Agent to the Governor-General in Baluchistan as such Agent, that the Regulations published for British Baluchistan by Notification No. 168, dated the 17th February 1897, shall apply also to the aforesaid territories.

By Order,

S. G. KNOX, *Lieut.*,

Second Assistant.

CHIEF COMMISSIONER IN BRITISH BALUCHISTAN.

NOTIFICATION.

Quetta, the 17th February, 1897.

No. 168.—In exercise of the powers conferred by the Notification of the Government of India in the Home Department, No. 302, dated 4th February, 1897, the Chief Commissioner in British Baluchistan is pleased to prescribe the following Regulations under section 2 (2) (*b*) of the Epidemic Diseases Act (III of 1897) :—

I.—In the following Regulations :—

"Place of inspection" means any place which may be notified by the Local Government to be a place of inspection.

"Inspecting Medical Officer" means a person appointed by an order in writing by the Local Government to be an Inspecting Medical Officer.

II.—The Local Government may notify any railway station or any place in the vicinity thereof to be a place of inspection, and may by order in writing appoint one or more Inspecting Medical Officers for the same.

III.—Every Inspecting Medical Officer who is unavoidably prevented from discharging all or any of his functions

H D

as such may by order in writing appoint any Assistant Surgeon or Hospital Assistant temporarily to discharge such functions, and every Assistant Surgeon and Hospital Assistant so appointed shall so far as such functions are concerned be deemed for the purposes of these Regulations to be an Inspecting Medical Officer.

IV.—An Inspecting Medical Officer may at his place of inspection direct any person travelling by railway to leave the carriage in which he is travelling and come on to the platform or on to the line, and may prohibit any such person from leaving the platform or any other portion of the place of inspection.

V.—(1) An Inspecting Medical Officer may at his place of inspection make a medical inspection and examination of any person travelling by railway in such manner and to such extent as he thinks necessary in order to ascertain whether there is reason to believe or suspect that such person is or may be infected with bubonic plague: Provided that such inspection or examination shall not be made in any manner or to any extent to which such person objects.

(2) An Inspecting Medical Officer may put to any such person any question he thinks fit in order to ascertain whether there is reasot to believe or suspect as aforesaid, and such person shall be bound to answer truly any question so put to him.

VI.—Where, as the result of such inspection or examination or otherwise, the Inspecting Medical Officer considers that there is reason to believe or suspect that any person is or may be infected with bubonic plague, or where any person makes any objection under the proviso to clause V, sub-clause (1) of these Regulations, the Inspecting Medical Officer may direct that such person be removed to and detained in any building tent or other place, whether near the place of inspection or elsewhere, until the Inspecting Medical Officer or some other Medical Officer empowered in this behalf by a written order of the Local Government certifies in writing that in his opinion there is no longer any reason for believing or suspecting such person to be infected as aforesaid.

VII.—Any person in respect to whom a direction has not been given under clause VI may apply to the Inspecting Medical Officer to be allowed to attend upon any person in respect to whom such a direction has been given, and the Inspecting Medical Officer shall, except for reasons to be recorded by him in writing, grant such application.

VIII.—Any person who has made an application under the last foregoing clause and whose application has been granted shall be detained in such building, tent or other place, whether near the place of inspection or elsewhere, as the Inspecting Medical Officer may direct until the Inspecting Officer or some other Medical Officer empowered in this behalf by a written order of the Local Government certifies in writing that in his opinion there is no longer any reason for detaining such person.

IX.—No person in respect to whom a direction under clause VI or VIII of the Regulations has been given shall leave any building, tent or other place in which an Inspecting Medical Officer has directed him to be detained until such Inspecting Medical Officer certifies in writing that in his opinion there is no longer any reason for believing or suspecting such person to be infected as aforesaid, or that there is no longer any reason for detaining such person as the case may be.

X.—The Inspecting Medical Officer may order the destruction or disinfection of any article which is or has been in the possession of any person in respect to whom a direction under clause VI or VIII has been given, or which is or has been in the possession of any person whom the Inspecting Medical Officer considers to have been in dangerous proximity to such person:

Provided that compensation shall be paid for the destruction or injury of any article under this clause.

XI.—Applications for the payment of compensation under the last foregoing clause may be made to the District Magistrate, who shall upon receipt of any such application determine by order in writing the amount of such compensation, if any, and such order shall be final.

XII.—The Local Government may determine in what cases or classes of cases any charges for the provision of accommodation, diet and treatment for persons detained under these Regulations and any sums payable as compensation under them shall be defrayed or paid by any Local Body or Local Fund, and such Local Body or Local Fund shall thereupon become liable to defray such charges or pay such compensation accordingly.

XIII.—In every case in which any charges are to be defrayd or any compensation is payable under these Regulations for which no Local Body or Local Fund is liable under an order issued under the last preceding clause or under any other law or rule having the force of law, such charges shall be defrayed or compensation shall be paid by the Local Government:

Provided that nothing in this clause shall be deemed to prevent the Local Government from recovering any moneys thus paid from any Native State or Railway Administration or Railway Company when such moneys are by agreement or otherwise so recoverable.

XIV.—The powers conferred on the Inspecting Medical Officer by these Regulations shall be exercised subject to the control of the Magistrate of the District, the Revenue Commissioner and of the Local Government.

By Order,

S. G. KNOX, *Lieut.*,
Second Assistant.

AGENT TO THE GOVR.-GENERAL AND CHIEF COMMISSIONER IN BALUCHISTAN.

NOTIFICATION.

Quetta, the 17th February, 1897.

Apparatus for Printing can be made up at the Roorkee Workshops, and all particulars obtained from the Superintendent.

CIRCULARS.

Circulars containing the Rules of Admission to the different Classes of the College will be forwarded to applicants.

J. CLIBBORN, *Lieut.-Col., I.S.C.,*
Principal, Thomason College, Roorkee.

THE INDIAN LAW REPORTS.

PUBLISHED UNDER AUTHORITY.

The Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month, at Calcutta, Madras, Bombay, and Allahabad, and comprise four series,—one for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat Book Depôt, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad, respectively.

In commencement of the previous advertisements, on and from the [illegible] sale will be as follows for current issues, as well as for back numbers of the Reports from 1870:—

Terms of subscription payable annually in advance.

For the complete Series, *including postage* . . . R22-8

	Without postage.	With postage.
	R a. p.	R a. p.
For the Calcutta Series	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series	6 0 0	7 0 0
„ a part of the Calcutta Series purchased separately, *inclusive of postage in India*	...	2 0 0
„ a part of each of the Madras, Bombay, and Allahabad Series purchased separately, *inclusive of postage in India*	...	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied to subscribers when required in place of copies lost in transit:—

	For town.	For mofussil.
	R a. p.	R a. p.
For the Calcutta Series; per copy . .	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series; per copy . . .	0 5 3	0 5 9
„ the Calcutta Series. For the year .	7 2 6	8 6 3
„ each of the Madras, Bombay, and Allahabad Series. For the year . .	4 4 6	4 11 3

Persons desiring to subscribe for, or purchase, the Report should apply to—

Superintendent, Government Press, Madras.

The Superintendent, Government Central Press, Bombay.

The Curator of Government Books, North-Western Provinces and Oudh.

The Officer in charge, Bengal Secretariat Book Depôt.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

Advertisements will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page.	*Half page.*	*Quarter page.*
For one issue . . .	R 20	R 14	R 9
„ three issues . . .	„ 55	„ 39	„ 24
„ six „ . . .	„ 100	„ 68	„ 45
„ nine „ . . .	„ 145	„ 96	„ 64
„ twelve „ . . .	„ 180	„ 120	„ 80

Several volumes of the BENGAL LAW REPORTS, from August 1868 to December 1875, and FULL BENCH RULINGS, Parts I and II, are available at the following rates:—

	Without postage.	With postage.
	R a. p.	R a. p.
Bengal Law Reports, for one year . .	20 0 0	22 8 0
Single copies R2 per copy.		
Full bench Rulings, Parts I and II . .	20 0 0	22 8 0

Bengal Secretariat Book Depôt, Writers' Buildings, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer, Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Officer in charge of the Bengal Secretariat Book Depôt.

The subscription, R22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

NOTICE.

It is hereby notified, for general information, that subscriptions to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

BOOKS AND PUBLICATIONS

PART IV.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of His Excellency the Governor General on the 25th February, 1897, and is hereby promulgated for general information :—

ACT NO. V OF 1897.

An Act to repeal certain Obsolete Enactments and to amend and facilitate the citation of certain other enactments

WHEREAS it is expedient that certain enactments specified in the first schedule to this Act which are spent, or have ceased to be in force otherwise than by express specific repeal, or have by lapse of time or otherwise become unnecessary, should be expressly and specifically repealed;

And whereas it is also expedient that certain formal amendments should be made in the enactments specified in the second schedule to this Act;

And whereas it is also expedient to facilitate the citation of the enactments specified in the third schedule to this Act;

It is hereby enacted as follows :—

1. (*1*) This Act may be called the Repealing and Amending Act, 1897; and

Title and commencement.

(*2*) It shall come into force at once.

2. (*1*) The enactments specified in the first schedule are hereby repealed to the extent mentioned in the fourth column thereof.

Enactments in schedules repealed and amended respectively.

(*2*) The enactments specified in the second schedule shall be modified to the extent and in the manner mentioned in the fourth column thereof.

3. The repeal by this Act of any enactment shall not affect any Act or Regulation in which such enactment has been applied, incorporated or referred to;

Savings.

and this Act shall not affect the validity, invalidity, effect or consequences of anything already done or suffered, or any right, title, obligation or liability already acquired, accrued or incurred, or any remedy or proceeding in respect thereof, or any release or discharge of or from any debt, penalty, obligation, liability, claim or demand, or any indemnity already granted, or the proof of any past act or thing;

nor shall this Act affect any principle or rule of law, or established jurisdiction, form or course of pleading, practice or procedure, or existing usage, custom, privilege, restriction, exemption, office or appointment, notwithstanding that the same respectively may have been in any manner affirmed, recognized or derived by, in or from any enactment hereby repealed;

nor shall the repeal by this Act of any enactment provide or restore any jurisdiction, office, custom, liability, right, title, privilege, restriction, exemption, usage, practice, procedure or other matter or thing not now existing or in force.

4. Each of the enactments described in the first three columns of the third schedule may, without prejudice to any other mode of citation, be cited for all purposes by the short title mentioned in that behalf in the fourth column thereof.

Citation of certain enactments.

THE FIRST SCHEDULE.

A description or citation of a portion of an enactment includes the words, section or other part mentioned or referred to as forming the beginning or as forming the end of the portion comprised in the description or citation.

PART V.

Bills introduced in the Council of the Governor General of India for making Laws and Regulations, Reports of Select Committees presented to the Council, and Bills published under Rule 22.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Report of the Select Committee on the Bill to amend the law relating to Reformatory Schools and to make further provision for dealing with youthful offenders was presented to the Council of the Governor General of India for the purpose of making Laws and Regulations on the 25th February, 1897 :—

WE, the undersigned, Members of the Select Committee to which the Bill to amend the law relating to Reformatory Schools and to make further provision for dealing with youthful offenders was referred, have considered the Bill and the papers noted in the margin, and have now the honour to submit this our Report, with the Bill as amended by us annexed thereto.

From Agent to Governor General in Baluchistan, No. 3100, dated 20th April, 1896 [Paper No. 1].
From Chief Commissioner, Coorg, No. 800, dated 13th June, 1896 [Paper No. 2].
From High Court, Calcutta, No. 2308, dated 14th July, 1896 [Paper No. 3].
From Chief Commissioner, Burma, No. 006—L-18, dated 21st July, 1896, and enclosures [Papers No 4]
From Secretary for Berar to Resident, Hyderabad, No. 215, dated 29th July, 1896, and enclosures [Papers No. 5].
From Chief Commissioner, Assam, No. $\frac{\text{Pol. \& L.}}{3170}$ J., dated 4th August, 1896, and enclosures [Papers No 6].
From Chief Commissioner, Central Provinces, No. 5354, dated 10th August, 1896, and enclosures [Papers No. 7].
From Chief Commissioner, Ajmere-Merwara, No. 1004, dated 21st August, 1896, and enclosures [Papers No. 8].
From Government, Bengal, No. 2611 P., dated 25th August, 1896, and enclosures [Papers No 9].
From Government, Bombay, No. 6262, dated 12th September, 1896, and enclosures [Papers No. 10].
From Government, North-Western Provinces and Oudh, No. 2550, dated 2nd September, 1896, and enclosures [Papers No. 11].
From Chief Commissioner, Burma, No. 583—L-18, dated 23rd September, 1896, and enclosures [Papers No. 12].
From Government, Punjab, No. 1077, dated 3rd October, 1896, and enclosures [Papers No. 13].
Office Memorandum from Home Department, No. 613, dated 5th November, 1896 and enclosures [Papers No. 14].
Endorsement from Home Department, No. 684, dated 29th December, 1896, and enclosure [Papers No. 15].
Note by the Hon'ble Pandit Bishumber Nath, dated 6th January, 1897 [Paper No. 16]

2. *Clause 1.*—We have ascertained that the Punjab and Coorg are the only two provinces of British India (other than deregulationized areas such as Upper Burma and British Baluchistan) in which the Reformatory Schools Act, 1876, has not been brought into force. We have, therefore, while making the repeal of the existing Act general, altered the extent clause of the Bill as introduced so as to bring the proposed Act into force at once in all places in which the existing Act is now in force.

3. *Clause 4.*—"*Youthful offender*".—Owing to the representations made on the subject by the Government of Bengal, we have reduced the age required to bring a boy under this definition from sixteen to fifteen years. It is to be noted that clause 31 is now applied to girls as well as boys.

We have also added a definition of "District Magistrate," making that term include a *Chief Presidency Magistrate for the purposes of the proposed* Act.

4. *Clause 8.*—In consequence of the objections taken to it by the High Court at Calcutta and other authorities, we have recast this clause and restored the provisions of the existing law under which the discretion of the Courts as to the period for which a *youthful offender is to be sent to a reformatory is limited by rules to be made by the Local Government. We have further limited the discretion* of the Courts as to the *kind of* youthful offenders who may be sent to reformatories by also conferring power on the *Local* Government to provide by rule what youthful offenders should be sent to reformatories having regard to the nature of their offences or other considerations. In view of the reduction of age in the definition of "youthful offender" above explained, we have extended the minimum period of detention from two to three years. Lastly, we have extended the powers conferred by this clause to *any* Magistrate specially authorized by the Local Government in this behalf and have declared that the powers conferred may be exercised whether the case comes before the Court originally or on appeal.

5. *Clause 9.*—We have made this clause conform more strictly to the procedure prescribed by section 349 of the Code of Criminal Procedure by reserving the power to pass sentence as well as to pass the order for detention in a reformatory in the hands of the District Magistrate.

6 *Clause 10.*—We agree with the North-Western Provinces and Oudh Government that the wording of sub-clause (*1*) of this clause might with advantage be made clearer, and we have adopted the re-draft of the sub-clause proposed by that Government.

7 *Clause 11.*—We have inserted a new sub-clause (*2*) to this clause requiring a subordinate Magistrate, before sending a case up to a District Magistrate as prescribed by clause 9, to hold such an inquiry into the age of the youthful offender as is required by this clause. We have omitted the old sub-clause (*2*) as being now unnecessary.

8 *Clause 12*.—We have, on the suggestion of the North-Western Provinces and Oudh Government, recast the proviso to this clause so as to make it impossible to keep a boy, who has been sent to a jail to wait the order until he can be removed to a reformatory, for a longer term in the jail than that of his substantive sentence.

9. *Clause 13.*—We have recast this clause on lines proposed by the Chief Commissioner of the Central Provinces, so as to provide a procedure for dealing with a youthful offender whose age has been afterwards found to have been understated at the time of sentence.

10. *Clause 14.*—We have omitted sub-clause (*4*) of this clause because we do not consider that a boy who has been detained in a reformatory should be sent back to prison under any circumstances.

11. *Clause 15* is new. We are aware that power is already possessed by the Governor General in Council under section 32 of the Prisoners Act, 1871, as amended by Act VII of 1894, section 1, to remove youthful offenders from one reformatory to another in British India, but we are of opinion that it is desirable nevertheless to insert in the body of the new Reformatory Schools Act a specific provision of the nature of that contained in this clause, which confers a general power on the Governor General in Council to direct the use of a reformatory in one province for the reception of youthful offenders from another, and to issue such supplemental orders as to cost of maintenance and other matters as may be necessary.

12 *Clause 16* (formerly clause 15).—We agree generally with the criticisms which have been passed on this clause and have accordingly amended it so as to leave the jurisdiction of the superior Courts under the Code of Criminal Procedure unrestricted, save in so far as it relates to orders passed with respect to the age of a youthful offender or the substitution of an order for detention in a reformatory for transportation or imprisonment.

We have omitted clause 16 of the Bill as introduced, as we consider that the cases for which it provides are not such as should properly be dealt with in a reformatory.

13 *Clause 18*.—We have required the Superintendent to obtain the sanction of the Committee before licensing youthful offenders to employers of labour, as we think that this is a power which should not be left in the hands of the Superintendent alone.

14. *Clause 19.*—We have omitted the second part of this clause in the Bill as introduced, because in our opinion it should be left in every case to the discretion of the Committee to license the youthful offender to another employer or not as they may think fit.

15. *Clause 20.*—In compliance with a suggestion from the Chief Commissioner of the Central Provinces, we have made the fact of an employer named in a license ceasing to employ labour a reason for the determination of the license.

16. *Clause 22.*—As in the case of licensing, so in the case of apprenticing, we have subjected the Superintendent's authority to the sanction of the Committee.

17 *Clause 27.*—We have brought this clause into more strict conformity with section 42 of the Prisons Act, 1894, by making it cover cases in which prohibited articles are removed from a reformatory and by including communication with a youthful offender in the scope of the clause.

18. *Clause 28.*—We have raised the penalty of fine under this clause from one hundred to two hundred rupees as in the preceding clause.

19. *Clause 31.*—We have extended the provisions of this clause to girls who may be youthful offenders, and we have limited the exercise of the powers which it confers to the Courts which are empowered to act under clause 8, making provision, analogous to that contained in clause 9, for the case of subordinate Courts which are not empowered to take action under the clause.

20. *Clause 32.*—Having considered the criticisms offered on this clause by the Calcutta High Court and various Local Governments, we have entirely recast it, our object being to provide that a sentence passed on a youthful offender in a reformatory shall commence at once subject to any special orders which the Local Government, to whom the matter is to be reported forthwith, may think fit to issue.

21. We have considered the proposal to provide Reformatory Schools for female juvenile offenders, and in view of the grave objections to this course arising out of Hindu and Muhammadan customs, we are not in favour of the proposal. The Madras Local Government alone favours it, and it may be that the circumstances of that Presidency, where there is a large Christian population, are such that the objections urged by all the other Local Governments and Administrations do not prevail there, but in this case we are of opinion that the proper course is for the Local Legislature to undertake such special legislation for the establishment of such schools in Madras as it may deem necessary.
